

UNITED STATES COAST GUARD
Telecommunication and Information System Command
RENEWAL OF ANTENNA APPROVAL (BUILDING L08)
7323 Telegraph Road, Alexandria, Virginia

Delegated Action of the Executive Director

March 30, 2007

Pursuant to delegations of authority under Section 6(B) of Guidelines and Submission Requirements for Antennas on Federal Property, as approved by the Commission on January 7, 1988 and amended on August 2, 2001, I approve the renewal of approval for five existing antennas on two existing towers at the U.S. Coast Guard Telecommunications and Information Systems Command (TISCOM) at 7323 Telegraph Road, in Alexandria, Virginia, as shown on NCPC Map File No. 22.04(38.30)42208 for a period not to exceed five years.

* * *

The United States Coast Guard (USCG) is seeking renewal of approval for five antennas on two towers located at the U.S. Coast Guard Telecommunications and Information Systems Command (TISCOM) at 7323 Telegraph Road in Alexandria, Virginia. The Commission previously reviewed and approved the antennas and towers on May 29, 1997 for a period not to exceed five years. The existing installation consists of a 70-foot-high tower, Z01, located just northeast of Building L08, with three whip antennas for VHF and UHF on brackets partway up the tower and a wire dipole antenna with two wires leads from the top of Z01 to the ground, and a 30-foot-high tower, Z07 (previously Z04), attached to the southeast corner of Building L08, with a twin-boom satellite antenna installed on top.

The USCG indicates that with the exception of removal of a long wire antenna between Towers Z03 and Z05 which are no longer in use, there have been no other changes in any previous conditions of the initial construction, operation, maintenance, or RF radiation of the antennas as previously approved. In compliance with the Commission's Environmental and Historic Preservation Policies and Procedures, NCPC staff has determined that the action is a categorical exclusion under the National Environmental Policy Act in conformance with NCPC requirements under §8(C)(20) that provides for the review and approval of the installation of communication antenna on federal property. USCG has determined that the project will have no effect on historic resources. NCPC staff has determined to permit a five year approval, as previously approved.

Patricia E. Gallagher, AICP
Executive Director
