

UNITED STATES COAST GUARD
Telecommunication and Information Systems Command, Server Building
7323 Telegraph Road
Alexandria, Virginia

Delegated Action of the Executive Director

January 26, 2007

Pursuant to delegations of authority adopted by the Commission on October 3, 1996, I approve preliminary and final site and building plans for the installation of a new 1,566-square-foot masonry server building and a back-up generator with uninterrupted power supply to support communication and information networks for all commands within the U.S. Coast Guard Telecommunication and Information Systems Command at 7323 Telegraph Road, Alexandria, Virginia, as shown on NCPC Map File No. 2204.10(38.00)42163.

* * *

The United States Coast Guard (USCG) has submitted preliminary and final site and building plans for a 1,566-square-foot brick masonry building for storage of 12 relocated computer servers at the U.S. Coast Guard Telecommunication and Information Systems Command (TISCOM) at 7323 Telegraph Road in Alexandria, Virginia. Site coverage of 2,110 square feet would include a sidewalk and concrete pad for HVAC units and back-up generator. The one-story concrete masonry unit building will be brick-faced with an asphalt-shingle gabled roof. A seven-foot high brick screen wall will extend from the northeast face of the building to screen the generator and equipment from Telegraph Road to its west.

The project is consistent with the Land Use Plan of the current master plan. The Coast Guard base covers 200 acres, of which 32 acres are suitable for buildings and site improvements. USCG has submitted a Categorical Exclusion Determination to address the requirements of the National Environmental Policy Act (NEPA). The Coast Guard has concluded its consultation with the Virginia State Historic Preservation Office, determining that the project will have no effect on historic resources. NCPC has no independent NEPA or Section 106 responsibilities for federal projects in the environs.

Patricia E. Gallagher, AICP
Executive Director
