THE SW ECODISTRICT WILL BE A REVITALIZED COMMUNITY AND CULTURAL DESTINATION

The SW Ecodistrict will be a livable community, attractive to workers, residents, and visitors alike. The neighborhood will be a new national cultural destination that extends the civic qualities of the National Mall. It will provide a distinguished setting for future museums and memorials and a place for public gatherings, relieving pressure to locate new development and events on the National Mall. While the area will remain a center for federal agencies, these facilities will be complemented with residential and commercial uses to become a true mixed-use neighborhood.
