PROJECT Irrigation, Drainage, Water Collection, and Re-landscaping of the Mall – Phases II and III	NCPC FILE NUMBER 7110
The National Mall Washington, DC	NCPC MAP FILE NUMBER 1.41 (70.00)43749
SUBMITTED BY United States Department of the Interior National Park Service	APPLICANT'S REQUEST Preliminary and final approval of site development plans
	ACTION TAKEN Approve with comments
	REVIEW AUTHORITY Approval per 40 U.S.C. § 8722(b)(1) and (d)

The Commission:

Approves the preliminary and final site development plans for Phases II and III of the turf and soil reconstruction on the Mall for the center lawn panels located between 7th and 14th Streets, as shown on NCPC Map File No. 1.41(70.00)43749.

Notes that the project takes into account recommendations from the National Mall Plan to widen the non-turf areas on the Mall in order to improve accommodations for large public events and national celebrations.

Notes that it is desirable for the National Park Service to consider meeting 100 percent of its irrigation needs through the resizing of the cisterns.

Notes this approval should not preclude more ambitious plans to accommodate more stormwater control elements and potential bus parking.
