	PROPOSED ACTION Approve preliminary site and building plans
	ACTION ITEM TYPE Consent Calendar

PROJECT SUMMARY

The National Park Service (NPS) has submitted preliminary plans to replace a small building that currently houses a restroom and a storage space on the White House grounds just southwest of the White House itself. This new structure, to be called the Tennis Pavilion, is the first of a two-phase project. The second phase includes the replacement of the existing NPS Maintenance Building called the Pony Shed, which will happen at a future date.

This project will not only update the older restroom facility it will also provide a unifying element for the tennis court, the Children's Garden and the Kitchen Garden. The Children's Garden, which is west of the tennis courts, was introduced into the White House grounds by Lady Bird Johnson in 1968 as a secluded play area for presidential grandchildren. Footprints and handprints of previous Presidents' children and grandchildren are embedded in the garden's paved pathway. This garden also includes a small pond with coy fish and a tree suitable for climbing. Also nearby is the Kitchen Garden, which was started by Michelle Obama several years ago. This 2,800 square foot vegetable garden south of the tennis court provides locally grown vegetables for the White House. The proposed Tennis Pavilion will be a quiet respite in the middle of these three uses and will provide locker rooms and a sitting area, unifying this part of the White House grounds.

The NPS notes that the proposed Tennis Pavilion will be approximately 1,200 square feet in area and approximately 18 feet in height. The building, which is heavily influenced by the White House architecture, will be clad in limestone and have a copper roof. This new structure will be located west of the existing tennis/basketball court.

KEY INFORMATION

- The existing restroom facility is attached to the rear of the NPS maintenance building, which itself is in need of modernization since it is a repurposed building first installed as a

temporary structure during the Truman reconstruction of the White House in the late 1940s. The main north-south axial vista between the White House and the South Lawn will remain unchanged by this project.

- This is a two phased project with the new Tennis Pavilion occurring in the first phase and the NPS Maintenance Building occurring in the second phase.

RECOMMENDATION

The Commission:

Approves the preliminary site and building plans for the new Tennis Pavilion on the White House grounds, as it will improve the existing restroom facility, provide a connection between the Children's Garden and the tennis court, and will not impact any historic resources or prominent vistas.

PROJECT REVIEW TIMELINE

Previous actions	None
Remaining actions (anticipated)	– Final approval of site and building plans, Fall 2019

PROJECT ANALYSIS

Executive Summary

Staff reviewed the preliminary site and building plans for a replacement restroom and locker room facility on the White House grounds adjacent to the existing tennis/basketball court. The replacement facility will be located in a secluded part of the southeastern White House grounds, is 1,200 feet in area and slightly under 18 feet in height. It will serve as unifying element for the tennis court and the Children's Garden. Therefore, staff recommends that the Commission **approve the preliminary site and building plans for the new Tennis Pavilion on the White House grounds, as it will improve the existing restroom facility, provide a connection between the Children's Garden and the tennis court, and will not impact any historic resources or prominent vistas.**

Analysis

The NPS submittal includes images of the existing restroom facility which consists of a one-person restroom and a small, upright cabinet used for storing sports equipment. The existing restroom facility is attached to the rear of the existing maintenance building, which itself is in need of

modernization since it is a repurposed building first installed as a temporary structure during the Truman reconstruction of the White House in the late 1940s.

This existing restroom and maintenance building is on the southwestern part of the White House grounds and located next to and under groups of mature trees which help to enhance the secluded and private nature of this area. The proposed Tennis Pavilion will be located on the west side of the existing tennis court and only impact a few smaller trees. NPS states it will use the design of the White House as inspiration and incorporate architectural elements such as a colonnade, large floor-to-ceiling windows and fanlight windows in the facades. The building dimensions are 49 feet 4 inches in length, 24 feet in width, and 17 feet 8 inches in height. The existing maintenance building will remain in place.

Phase 2 includes demolishing the old maintenance building and realigning a new maintenance building on axis with the new Tennis Pavilion. It would also include a small maintenance yard. The NPS notes that as part of Phase 2, the Children's Garden will need to move eastward to accommodate the new maintenance building and yard. Staff looks forward to learning more about the proposed plans when Phase 2 begins.

CONFORMANCE TO EXISTING PLANS, POLICIES AND RELATED GUIDANCE

Comprehensive Plan for the National Capital

The proposed Tennis Pavilion is consistent with the relevant policies in the Urban Design Element of the Comprehensive Plan for the National Capital.

National Historic Preservation Act

Pursuant to the Section 107 of the National Historic Preservation Act (NHPA), the White House and its grounds are exempt from Section 106 consultation and the requirements of NHPA.

National Environmental Policy Act

NPS has a responsibility under the National Environmental Policy Act (NEPA) for this project and is currently working to conclude this process, anticipating that the project will be consistent with one of its categorical exclusions. The Commission has its own NEPA responsibility and will use one of its categorical exclusions to fulfill this requirement.

CONSULTATION

Coordinating Committee

The Coordinating Committee reviewed this item at its meeting on May 15, 2019 meeting and forwarded the proposal to the Commission with the statement that the project has been coordinated

with all agencies participating. The participating agencies were NCPC; the District of Columbia Office of Planning; the DC State Historic Preservation Office (via email); the Department of Housing and Community Development; the General Services Administration and the Washington Metropolitan Area Transit Authority.

U.S. Commission of Fine Arts

The U.S. Commission of Fine Arts reviewed the project at a concept level on May 16, 2019 and provided several comments regarding future landscaping changes and the location of the Maintenance Building in anticipation of Phase 2.

Project Summary:

The National Park Service has submitted plans to replace a building that currently houses restrooms and a storage space on the White House Grounds just southwest of the White House itself. This new structure, to be called the Tennis Pavilion, will not only update the older restroom facilities it will also provide a connection between the tennis courts and the Children's Garden which is west of the tennis courts currently. The Children's Garden was introduced into the White House Grounds by Lady Bird Johnson in 1969 and is a secluded area that has many president's grandchildren handprints. There is also the Kitchen Garden, started by Michelle Obama several years ago, which is located nearby.

The NPS notes that the proposed Tennis Pavilion will be approximately 1200 square feet in area and approximately 18 feet in height. This new structure will be located west of the existing tennis/basketball court.

Existing Conditions

Design Proposal – Tennis Pavilion

Design Inspiration

The proposal to construct two new structures on the South Grounds is based on the necessity to modernize and elevate the current buildings. The proposed designs are specifically informed by the existing architecture of the White House, including the East and West Colonnades, fan windows, columns, stonework, and cornices. Architectural inspiration is drawn from the symbolic images of the White House that are so recognizable to the American public.

Design Proposal – Tennis Pavilion Rendering

The Tennis Pavilion would function as both a place of leisure and a gathering area linking the independent garden areas (Kitchen Garden and Children's Garden) on the South Grounds. It would provide the connecting framework for a larger, more integrated landscape.
