Thanks to the National Trust, we have until March 4 to submit comments about the ballroom to the National Capital Planning Commission. You can make a comment through the link

I oppose the spending of one cent let alone $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to law abiding citizens.

As an American citizen, I vehemently oppose the "East Wing Modernization Project." The White House is the Nation's House, not the domain of a single person currently in residence. This $400 million demolition-construction began WITHOUT National Capital Planning Commission approval, WITHOUT required environmental assessments, and WITHOUT the Congressional authorization that is mandated by federal law for construction on federal land in Washington. These violations should NOT be rewarded with after-the-fact approval.

The funding creates unacceptable (and perhaps illegal) conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of a president who controls those contracts. This is not charitable giving. This is buying access and favorable treatment. It's clear to every American who is paying attention.

The White House belongs to the American people, not any individual president. I strongly urge the Commission to reject this proposal until FULL LEGAL COMPLIANCE is achieved, including congressional authorization and completed environmental assessments.

No temporary occupant of the People's House should possess unilateral authority to demolish structures of historic importance to the nation without following the law.

Please uphold the law.

Sincerely and emphatically yours,
Lauret Savoy

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history, an attack particularly on the valuable work of First Ladies throughout our history. I want this project canceled, and the East Wing rebuilt and restored to its former design. This destruction sets a dangerous precedent. I write to request a significant redesign of the proposed ballroom addition to the White House.
The proposed building is far too large for the WH property and would exceed the needs of the office of the President. A ballroom with a capacity of 500 would meet the needs of large state dinners and other events and the corresponding building would be of proportional size to the existing historical structures.
Additionally, the proposed building is so large that it would alter the shape of the road around the South Lawn, taking away the design symmetry of the space.
Lastly, the lack of transparency (of funding and design) means there is no accountability to the American people who ultimately own the WH.
Do not approve the project plans as the are now. Please reduce the size and scale of this proposed building to match the size and scale of the Residence or West Wing. Also share more specific details of the plans so the American people can further weigh in on such an important project.

I am appalled by the unwarranted destruction of a part of The People's House. No one person should be allowed to

destroy public property without consultation from the public and extensive review of any plans BEFORE any demolition is done. I want the East Wing rebuilt exactly as it was. We do not need a ballroom to entertain as if the President were royalty. This country was founded as by the people and for the people. We have not asked for nor do we need to spend precious public taxpayer funds on this monstrosity.

Building gilded ballrooms, when our own benefits and institutions are being gutted, is the beyond disgraceful. I oppose spending $300 million or even $1 on a this illegal project, which was initiated without authorization, permits or a design review. Trump is merely a temporary resident in the White House, which belongs to the American People. It's a piece of American History. The appalling decadence of the Epstein class of oligarch grifters, is on full display. Never mind Trump is building his bunker underneath it. We must restore the rule of law. The White House belongs to all of us and to history, not to one man. This project is not a modernization but a vanity project undertaken without proper review or consent of the public. Every President leaves his mark on the White House but this project is an unnecessary wholesale gutting. No matter what the President says, it will end up costing the taxpayers money. I think you will find this is a very unpopular project and to allow it to go forth sets a frightening precedent.

Trump’s sudden and unprecedented razing of the East Wing was egregious and illegal. His whole ridiculous ballroom project is just to satisfy his massive ego and cannot be allowed. The White House if the house that is for all, not one or one party. We are a democracy and not a country of fanfare and parties. This should be rebuilt as it was and not a wing for parties. I strongly oppose the Administration's illegal destruction of the East Wing of the White House and its plans to rebuild in a manner that does not comply with historic-preservation, and other relevant building/construction, rules. I am particularly appalled that we now have a White House that is a construction site during the recognition and celebration of this nation's 250th year.

The East Wing should be rebuilt according to the plans and standards of the professionals who have long been entrusted with the oversight of our historic buildings. It should not be rebuilt according to the whims of one individual who is more interested in enshrining his name, and questionable (at best) taste, everywhere.

I live in the DMV and every time I have crossed the Potomac at the Roosevelt Bridge to enter DC, I have been awed by the majesty of our magnificent federal buildings and monuments, and the long-standing history they represent. We must sustain, not destroy, these national treasures.

The White House is not simply a residence or an event venue. It is one of the most recognized and historically significant buildings in the United States. Its proportions, architectural character, and visual prominence have remained carefully preserved for generations. The current ballroom proposal, as presented, would significantly dwarf the existing structure and alter its historic scale. In my view, it would be out of proportion with the original design and create a visual imbalance that undermines the dignity of the building.

Major alterations to a national landmark require extraordinary care. The White House is a symbol that belongs to the American people, not to any single administration. Any addition should be subordinate in scale, architecturally harmonious, and sensitive to the historic character of the property.

The proposal before you does not meet that standard.

I respectfully urge the committee to deny approval of the current plans and require a redesign that better preserves the architectural integrity, historical significance, and visual prominence of the White House.

Thank you.

To tear down the East Wing with no input was wrong. The White house is the Peoples House and President only live there four or eight years. It is a temporary assignment and they do not have the right to tear parts or all of it down. There are 18 acres on the property and a ballroom could be built without destroying parts of the White House. At the very least the decision should have been made with consultation with the Trust and other appropriate agencies. Rebuild what was there and make joint plans for a ballroom. And DO NOT put the current president's name on the ballroom.

I oppose this project for these reasons…
1. Legal and Procedural -
"No authorization/permits": Demolition began without typical independent reviews, congressional approval, or public comment, which are required for alterations to historic federal buildings.
"Violation of federal law": project proceeded without complying with the National Historic Preservation Act (NHPA) or proper environmental and historical impact reviews.
"Sidestepped process": breaking these processes "erodes trust" and "diminishes the public dimension of architecture".

2. Preservation and Historical Value Arguments
"Desecration" and "Razing history": The destruction of the East Wing is described as a, "complete razing of American history" rather than a mere renovation.
"Slashing a masterpiece": Architectural historians have likened the destruction to "slashing a Rembrandt painting" or "defacing a Michelangelo sculpture".
"Undermining democratic symbols": Demolition is a "metaphor" for the destruction of established democratic processes.

The proposed White House ballroom design represents a jarring departure from the architectural dignity, proportional restraint, and historical coherence that define the Executive Residence. Rather than complementing the iconic neoclassical structure, the new design overwhelms it—an oversized, over-scaled intervention that appears to prioritize spectacle over stewardship.

At its core, the proposal seems to misunderstand the very context it seeks to inhabit. The White House is not a convention center, a luxury hotel, or a showpiece for architectural bravado. It is a national symbol whose longevity has depended on thoughtful, precedent-aware additions—additions that respect the building’s scale, materials, and symbolic gravitas. Previous expansions, from the Truman Balcony to the East and West Wing evolutions, adhered to a disciplined architectural language. This design does not. Its bulk erodes the carefully balanced massing of the existing house, and its

stylistic choices appear untethered to either historic precedent or contemporary architectural excellence.

The ballroom's sheer size is particularly troubling. It reads less as an enhancement and more as an annex threatening to visually devour the residence it claims to support. Instead of creating functional space that harmonizes with the site, the proposal introduces a visual imbalance, making the White House appear diminished by comparison—an inversion of hierarchy that no responsible design review process should accept.

Beyond aesthetics, the proposal raises broader concerns about cultural stewardship. The White House is an irreplaceable national symbol, and any modification should embody humility, restraint, and a deep respect for continuity. This design does none of these. It prioritizes scale over subtlety, novelty over integrity, and short-term ambitions over long-term preservation.

In its current form, the proposed ballroom is misaligned with both architectural precedent and the public expectation of how we treat historic national spaces. It deserves a thorough rethinking—one that starts with respecting the building that already stands, rather than attempting to overshadow it.

I do NOT support replacing the East Wing of the White House with a ballroom. I would like to see the exterior restored to what it has been during my 71 years on earth. The interior could again have office space and/or a museum/library area that the public can visit and that can be used for small gatherings and meetings to discuss issues relevant to governing the USA and discourse about global issues relevant to the USA. There are plenty of ballrooms in the DC area to accommodate extravagant affairs.

You Have Until March 4th to Comment on Trump’s White House Ballroom

The National Capital Planning Commission opened public comment on the East Wing Modernization Project (Trump’s $400M ballroom funded by Google, Amazon, Microsoft, Lockheed Martin, and other companies with billions in federal contracts).

This is your only formal opportunity to weigh in.

Deadline: March 4, 2026 at Noon ET

How to Submit:

I oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval.

The funding creates unacceptable conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of the president who controls those contracts. This is not charitable giving. This is an investment in access and favorable treatment.

The White House belongs to the American people, not any individual president. I oppose the east Wing Modernization Project and the building of a ballroom for the White House. In my opinion the destruction of the East Wing was criminal. The White House is not a resort; it is the seat of our federal government. A ballroom has nothing to do with running the federal government. Additionally, bad behavior should not be ignored. We are a nation of laws and there are consequences to ignoring those laws. There is simply no valid reason to allow the building of a ballroom and expanding the size of the East Wing. I am requesting that the east wing modernization project be overseen by a bipartisan commission that includes representation from the National Trust for Historic Preservation.

As with any large-scale renovation to the White House, this project should undergo all legally-mandated review processes, including generating an environmental impact statement; securing approval of the plans by the National Capitol Planning Commission; and securing construction approval of the United States Congress. Due to the unprecedented scale of corruption in the Trump administration, Congress should be providing ongoing budgetary review of the project and should be provided a list of donors and their donations. As the people's house, contracts for this project should be awarded to competitive bids from companies that are owned by women and other historically-marginalized communities rather than to firms owned by friends of the president.

The proposed architectural plan is out of scale with the existing historical building, and should be revised so as not to detract from or endanger the existing White House. Modifications must be made to ensure that the addition preserves the balanced classical design of the existing structure; the White House is not a palace for a monarch but instead belongs to the people of the United States, and its appearance should reflect this. Attention must be paid to surrounding historical structures and monuments as well to preserve the cohesiveness of the monumental core. Finally, public access to the White House must be permitted to continue throughout the course of the project.

As a citizen of the United States, as a registered voter, as a US taxpayer, as a lover of our beautiful capital city, and as a passionate supporter of our US National Park system, I wish to go on record as one who fervently objects to the unapproved demolition of the East Wing of "The People's House" to make room for a ballroom whose scale far exceeds that of the White House it is intended to be part of.

I do NOT object to the idea of expanding/redesigning existing space, nor do I object to what is likely a real need for a larger and more functional event space for "The People's House," such as might necessitate an entirely newly designed and constructed venue.

However, I absolutely object to the following:
1) demolition of ANY part of "The People's House" without appropriate permissions having been sought from the National Park Service, the National Trust for Historic Preservation, and the National Capital Planning Commission
2) an architectural plan being approved by no one other than the sitting president
3) the solicitation of mammoth numbers of dollars for said demolition and reconstruction from an elite group of tycoons whose only interest appears to be currying favor rather than a genuine desire to celebrate the the icon that is our White House; such an action suggests toadying at best and backroom quid pro quo bargaining at its worst.

The so-called "modernization" of the East Wing without the deliberate protections of the logical and stipulated channels of approval MUST apply to ALL the land and structures that belong to "We, the People." No administration, no president, owns the land on which "The People's House" rests, nor the House itself.

Any resident of any town, city, or municipality who has ever thought to tear down, alter, or reconstruct a home or commercial building without submitting detailed plans and obtaining required approvals and permits has faced a number of possible consequences: cancelations of work, monetary fines, mandatory restorations, or even jail time. The current president does NOT own our House. Any president is a merely a tenant of our White House, and "We, the People" are its landlords and stewards.

This is vanity project for this president. This is wrong! He lives in “the peoples’ house”. And the people, by a wide, substantial amount don’t want a gigantic gaudy monstrosity slapped on their White House. This president is temporary. He does not deserve or have the right to foist this so called ballroom upon the country. It’s grotesque and totally unsuited for our form of government. To all agencies in our government that have jurisdiction on this matter must reject it and insist the east wing be rebuilt as originally designed. To do otherwise is to saddle our precious White House with this monstrosity! Unacceptable!

This so called moderation project is nothing but destroying history & breaking the laws of this country by doing this destruction of histoy without the proper steps to get approval. It is another law broken by a very strong criminal who doesn't belong in the people's house. This White House does not belong to Mr. Trump, but to the people of the United States!!!!

I am writing to oppose this current project. The project as projected would greatly dwarf the White House and significantly change the meaning and purpose of the residence. This is the the people's house. It is not a palace nor do I expect to to be. It is the house of an American Citizen we elect as president. A humble position of service that we entrust to a common citizen whose power derives from us. Our house should represent that idea.

Further, it is an historical home that should have all maintenance and improvements reflect that reality, not destroy it in

whole or part. It concerns me very much that people took it upon themselves and with little oversight to destroy part of this historical place to put an unsightly monstrosity next to it.

I write to express deep sadness and outrage at the demolition of the East Wing of the White House without any review or oversight. The public comment period is a little too little, too late but I want to register my profound disgust with the vandalism and destruction that has already occurred at the White House. The White House is one of the most significant landmarks in this country and is owned by the American people, not the current occupant. The fact that this demolition occurred on the whims of one person defies the basic norms, rules and values of the United States. Please stop the construction of this massive ballroom and hold the persons responsible for the unlawful demolition of the East Wing accountable for their actions. Although the damage can never be remedied, those who did this should pay for, but not be involved in, the repair of the White House after careful review and input from the CFA and NCPC.

The financial involvement of mega donors who by all appearances are seeking political favors that benefit their companies and business interests reeks of corruption and needs to be prohibited, Such persons and entities need to be removed and blocked from directly paying for governmental projects so that there is not even a hint of "pay for play" bribery. A better way to fund government projects them would be to restructure the tax rate of billionaires so that they actually pay taxes equivalent to the percentages of tax paid vs income of the average American.

I was so appalled to see the East Wing being torn down and now looking like the home of presidents is located on the other side of the tracks. This is so beyond disgraceful. How do you modernize our country's history? What has happened that our government officials no longer care about our history. Are we rewriting everything? PLEASE, restore the East Wing to its previous beauty and restore our history. Lastly, it is my opinion that those involved in this destruction should be fined, if not fined and jailed for proceeding without the appropriate authorizations and approvals.

I am entirely against anything other than a rebuilt east wing - the way it looked before.

We don't need or want a ballroom. Plant new adult trees to replace those that were there for hundreds of years.

The unauthorized destruction of the East Wing was a horror that never should have been allowed. Now make it right.

The east wing of the White House is an historical treasure that has been illegally torn down and needs to be restored back to its original purpose to serve as the peoples house. I strongly oppose the proposed construction of a new ballroom at the White House and instead urge that priority be given

to reconstructing and preserving the historic East Wing in a manner that honors its original character and purpose.

The White House is not merely a venue for events; it is a living symbol of our nation's history, democratic values, and architectural heritage. Alterations that expand its footprint or introduce large new entertainment spaces risk shifting the focus from stewardship to spectacle. At a time when fiscal responsibility and preservation of historic assets should guide decision-making, investing in a new ballroom sends the wrong message.

Reconstructing and restoring the East Wing offers a more thoughtful path forward. Preservation respects the building's historical integrity, safeguards its architectural legacy for future generations, and demonstrates a commitment to careful stewardship of national landmarks. Rather than pursuing expansion for ceremonial convenience, we should reaffirm the principle that historic public buildings deserve protection, restoration, and reverence.

Our national home should reflect continuity, humility, and respect for history—not vanity projects and unnecessary expansion. Occupants of the White House are caretakers, not owners.

The destruction of the East Wing, undertaken in violation of laws relating to a property belonging to the American people, is now being followed by a plan to build an excessively sized structure that will aesthetically dwarf the executive mansion

and satisfy the current President's need for personal grandiosity, even to the point of naming it the Donald J. Trump Ballroom.

The use of private funds does not obviate the betrayal of the American people. In fact. it smells of bribery from wealthy donors.

In every aspect, the destruction of the East Wing and the construction of a monstrosity insults the law, norms, historic preservation, and a host of other restraints on unchecked power. I storngly urge that this project be denied, halted, and the destroyed East Wing restored.

President Trump should have to pay out of pocket to restore the East Wing since he ignored all applicable laws and rules tied to a space owned by the American public and for our benefit, not his own. Of course this is asking for consideration after the damage is done because the previous ballroom has been demolished. However, in the spirit of actively participating in the process, I would request that the new ballroom design be in keeping with the architectural style of the White House and that the scale of the project not dwarf the rest of the White House. This house is owned by the hardworking American population - who are as diverse in their aesthetic as they are in their background. It needs to be a ballroom that fits the function (and with an eye to fiscal stewardship) and not the gaudy, flashiness of a casino or a failed mercurial monarchy. Understated, elegant, and energy efficient. This would be a good time to use building principles that respect the environment and cost savings. Thank you.

I am opposed to the "modernization" of the East Wing as proposed.

While I have no issues with the building of a ballroom, it could have been done without destroying an historic building. The original building must be rebuilt as it was. If the President desires a ballroom, he can design it within the perimeters of the East Wing.

As an American Citizen I was distressed to see this so called President demolish the white house with no oversight, or time to save any of the historical items house within the wing. The American people do not want a ballroom they will never use in order for the 1% to have another place to display their wealth in their faces. Put it back the way it was or don't do anything at all and let the scar sit as a reminder of the damage Trump has done.

The fact that none of this occurred is disappointing to say the least. This project has erased a piece of history we will never get back. It is not an attempt to make something better, but for a single man to build a monument to himself with no regard to the laws and requirements in place. I don't care who is paying for it. Good Day,

I wanted to comment on the East Wing Modernization Project. I am deeply saddened that it was destroyed.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

Further, the project has been so ill-conceived that the cost estimates have doubled. Contractors haven't been paid in a timely manner and frankly, the American People's house does NOT need a ballroom.

There are so many positive ways that amount of money could be spent to serve the citizens of this country. Destroying a historic building, erasing its history, and building an unnecessary ball room - are not the ways I would choose to spend my tax dollars.

Sincerely,
Anita L. Albertson

I oppose this project which was initiated without the proper authorization, permits, or design review. The addition is too large and will overshadow the White House. The East Wing should be rebuilt and restored to its former design. If a ballroom is desired, it should be planned as a separate facility not attached to the White House. The White House is the People's House. The President is a temporary resident and does not own the White House and should not be allowed to destroy history and make such a drastic decision on a whim. No one is above the law. A project of this importance should have gone through the proper channels of planning and approval. This project should be stopped.

The East Wing should be restored to its previous condition, allowing for cosmetic improvements if necessary. Space for small state dinners could be allocated as before. Space for large state dinners could be allocated in a separate building near the Whitehouse. Ways to access it should be evaluated, a connecting tunnel, a parking structure which accommodates limos and an appropriate reception area for greeting arrivals.

Trump tore down the east wing without asking and now he needs to put It back up. Back up with his money, from his bank account, not the funds from his backers, not from our tax dollars. It needs to be put back up with plans brought forth from the National Trust for Historic Preservation NOT from the Nation Capital Planning Commission (NCPC).(The chairman, vice-chairman and the commissioner of the NCPC are appointees of the fool who had the east wing of our National Historic Landmark torn down). The plans will NOT be for a ballroom. And while we’re at, trump needs to pay for the removal of the graffiti, (his name), that he had put on the wall of our Kennedy Center.

Where was the public comment period BEFORE the historic east wing was demolished? This appears to be another

vanity project by Donald Trump; another attempt to affix his name to existing buildings, and construct monuments to himself. The proposed "ballroom" is an unnecessary 90,000 sf abomination that it is out of scale with the White House. Nowhere in America was there ever a movement among American citizens to tear down the entire East Wing of the People's House, and replace it with an absurdly ornate ballroom with a capacity for 1000 people; nor has Donald Trump ever offered any rational justification for such a drastic move. In fact, it could be argued that the reason why he demolished the entire East Wing with no prior notice, was that he knew that a majority of the American public would be against it, and he didn't want that in his way; which begs the question: Who's house is it? It is NOT his. It belongs to the American people, and in the absence of a logistical, operational, or security exigency to justify the immediate destruction of an entire wing of the White House, American's should have a say BEFORE such a major renovation is undertaken. But that ship has sailed. I would hope that the NCPO uses every means at its disposal to force Mr. Trump - widely known for his gaudy, Versailles-era sense of "style" - to keep the project within a sensible and necessary scale, and NOT a gilded monument to himself and his excesses. The funding should come from the US treasury, and not private donors, so as to eliminate the excesses that led Mr. Trump to six bankruptcies, and to eliminate the possibility that private donations will curry favor towards the donors from the Executive.
The White House is the People's House, and the destruction of the historic East Wing to construct an absurd "ballroom" to Mr. Trump's taste will be a lasting reminder of the corruption and taint of the Trump Administration.

I strenuously object to our current administration's unilateral razing of the White House East Wing, historically occupied by the offices of the First Lady, without any public input whatsoever. I am also troubled by the president's obsession with replacing the East Wing with an oversized, privately funded ballroom. The ballroom will be out of scale with the rest of the White House and the funding raises questions about corruption. The symbolism is also troubling, since it replaces the offices of former First Ladies with a playroom for extremely wealthy donors and visiting heads of state.

Allowing any president simply to tear down an entire wing of the White House on a whim without significant oversight sets a terrible precedent.

Although the White House has been home to presidents since 1800, it is not the property of any president. It is perhaps the most significant historic site in the US, of immense historic, aesthetic, and symbolic importance. It is a National Historic Landmark and National Park, owned by the American people and stewarded by the National Park Service. Before nationally significant places are permanently altered, the public deserves an opportunity to be heard and to help shape decisions that affect our shared national heritage. If the ballroom is indeed built, I hope it will be removed after this president is out of office, no matter what the demolition might cost. The demolished East Wing should be restored. Its unauthorized removal was an outrage against the American people.

I am greatly concerned about preserving history. It is important that, in the name of progress, our history is not erased.

I have owned historic homes and one thing I knew when I purchased my historic home - it could not change without maintaining the original appearance. When I wanted to replace my windows, there were many conversations around how to properly change the windows so not to change the history of my home. I am an individual without a large budget and making changes that needed to be done were not easy but I understood the importance my home played in the history of my community and my nation.

If my home, which may be special to my community, the history of my area, and to me, needed to receive approvals and could have no outward visibility for changes, how much more is the White House important to our whole country and even our national identity. If changes are made to a historic structure, there are rules and procedures for how the renovation can move forward maintaining the original design.

If individuals are required to follow these rules and we own our homes, how is it that a president, who does not own the White House, but is merely a tenant, able to remove a whole section of the building without approval from the historic commission, or the people who own it - every day Americans.

If we do not protect the most visible images of our country, how can we pretend to protect other, less identifiable historic places, buildings, and national monuments. The protections we claim are only as strong as our willingness to follow the policies in place.

It also seems to make sense that any budgeting for the project would need to have been approved by Congress before any construction began.

Please protect our historic places, buildings, and national monuments.

Thank you for your time.

The Rev. Ginger Bennett

I strongly support President Donald Trump's idea and efforts to secure funding for the proposed addition of an enlarged Ball Room at the East end of the White House. The need is plain to see with currently available space available for only a few hundred participants. Also, tax dollars will NOT be used for this project.

Throughout its history, the White House has undergone many needed rebuildings, reinforcements, rearrangements, redecorating, and other improvements.

I believe those supporting opposition to the new Ball Room are those infected with TDS - Trump Derangement Syndrome. They only hate the New Ballroom idea because they hate President Trump. Nothing more.

Again, the New White House Ballroom is needed. It is time to get on with it and get it built.

Any addition to the White House should not dwarf the original structure. Whatever replaces the demolished East Wing should be similar to the West Wing in size and should blend with the rest of the building in architectural design. If there is a true need for a huge ballroom to host presidential gatherings, build it somewhere else -- not on the White House grounds!

I oppose this project for multiple reasons. The architectural design will dwarf other parts of the White House and destroy the visual balance of an iconic historic building. Additionally, I object to use of funds from businessman and corporations who are only trying to curry favor with the president. Any external funding amounts should be published and the process needs more transparency. Finally, the building of a gaudy ballroom as a pet project for the president when citizens are struggling with the cost of living and losing health insurance directly contradicts the idea of a government that is meant to be by the people and for the people.

To the Members of the National Capital Planning Commission (NCPC):

While I truly believe that my comments will be ignored and make no difference in this administration’s desire to convert the White House into a mini-Versailles, I must nevertheless state my opinion so that during some future search into the archives of the history of the White House a reader will understand how an average 80-year-old woman from the small state of Connecticut felt about the desecration of the White House in the year 2026. That word “desecration” was a deliberate choice.

Many books have been written about the construction and remodeling of the White House since its completion in 1800. A quick search in Wikipedia for “White House” brings up an article that contains a section titled “The White House since the Kennedy restoration.” That section ends with this sentence:
”In 2025, President Donald Trump had the East Wing demolished and its surrounding grounds cleared for the construction of a new East Wing containing a state ballroom.”

The current President desires a state ballroom but the the People do not. Depending on the polls viewed, 56% to 61% of Americans strongly disapprove of the construction of a $300 million ballroom. It is unnecessary. Americans consider the White House to be “The People’s House”; it belongs to all of us, not to one man. It is and always will be the residence and office of the President of the United States and the First Family while that President is in office. To Americans, the White House is a symbol of America’s democratic government because every President lives in that building temporarily, for four or eight years. Then they leave and leave behind any changes made to improve its use for the next occupant. Americans understand that State Dinners are held in the State Dining Room in honor of dignitaries from other nations. State dinners are not soirees requiring a Ballroom, as in Cinderella. The White House was declared a museum in legislation enacted by Congress in 1961. As a museum, it remains a example of early American neoclassical architecture and represents our nation’s unique beginning. The White House must remain simple in stature, understated, not a palatial structure requiring a King but rather a humble mansion that is the transient home of the President of the United States.

Thus, the reader now has a clearer understanding of the choice of “desecration” in the opening paragraph.

Respectfully submitted,
Merla Porter

I oppose this project for the following reasons:
1. It was not authorized through the proper channels BEFORE starting the demolition.
2. The American people did not ask for this
3. I have significant concerns on how this is being funded as no congressional approval has been given to fund the project. Also, the costs reported to do the project have been increased more than once by the President.

To allow this project to go ahead is, in essence, telling the President he can break the law and do what he wants. That is not how laws work. It certainly does not work that way for everyday Americans.

I oppose this project and feel the President, not the government, should have to pay to restore the East Wing to what it was when he moved into the White House in 2025. Processes are in place for a reason. It is The People's House and we do not need an astronomically large ballroom, particularly when people are losing their healthcare and struggling to pay their bills. How does a monstrous ballroom help us?

Like most Americans, I was appalled and aghast when I saw the bulldozers decimating the East Wing of the White House. And then I watched in amazement at the self-aggrandizement of Resident Trump and the spiraling cost of building this ballroom that we the People had supposedly been clamoring for. I don't know what the current damages are--the last estimate I heard was in the range of $400 million--but it doesn't matter. This project should never have been undertaken. If anything, Trump should be forced to pay for the reconstruction of the previously existing structure. This nonsense about a ballroom died with the last of the royals in France.

The East Wing was destroyed without proper review of the project. Indeed, there didn't seem to be any finalized plan for the ballroom to replace it and the White has been standing for months with parts demolished. Any contractor who did this to a private house would have been fired by now.
Kings in palaces have ballroom. The White House was built to be a temporary resident for whoever is elected president for 4-8 years. It doesn't need a ballroom because we don't have Kings.

This is not "modernization" so much as it is putting the Trump stamp (tacky, garish, overblown) on a valuable and irreplaceable piece American history. Dear members,
The current condition, or lack thereof, of the East Wing is an abhorrent national embarrassment. It should be repaired and replaced, at any cost and the bill sent to Pres. Trump. We must send a message that our government buildings and institutions belong to all citizens, and decisions cannot be made by the highest bidder, bypassing all laws that are designed to prevent that exact scenario. With that mentality, it is frightening to think of what money will be able to destroy or build.

Furthermore, there should be no further destruction of any structures in D.C. until the East Wing is rebuilt. No Arc de Triomphe, no more name changes, nothing. Please don't give the American people one more thing to feel powerless to change.

The promised private funds for this project must also be guaranteed and available before construction.

The White house needs a ballroom and an East Wing. The design of the East Wing should be architecturally balanced with the White House, West wing and connecting collonades. e.g. height, width, front set-back similar to the West Wing.

The diagram of the site looks like the East Wing could be expanded east and slightly south to be similar to the West Wing and provide some more seating. It would be unfortunate to lose the large trees to the north.

The interior design should be elegant, understated and not gaudy. Efficient interior layout could also increase seating.

The East Wing ballroom should be sized to hold formal events, State dinners and diplomatic receptions. Large and informal events can be held in temporary tents on the lawn as they are now.

The unilateral and illegal destruction of part of America’s heritage is despicable and must be reversed. The War of 1812 couldn’t eliminate the White House, don’t let current forces get away with doing it now. Restore the White House to it’s former glorious appearance (with whatever security, materiel, and other upgrades are needed and universally approved)!

A temporary caretaker of the People's House should seek the input of the People. At the very least, they should have had a plan approved by the historical committee and full funding in place. Prior to demolition, historical items should have been preserved. Since we are not able to turn back the clock, all rules and regulations should be followed moving forward. Consent was not obtained prior to these actions, which further comment upon that will be withheld. However, consent and input are required to move forward to create something that is fitting for future residents and the People.

I am writing to comment on my opposition to the destruction of the east wing of the White House. This is a historical building and it is tragic for our country that it was completely destroyed without permission or permits. I believe that it should be restored to its original historic design. Furthermore I completely object to the construction of a massive ballroom funded by billionaires and companies who are trying to buy influence with the current president. The whole situation is a disaster and President Trump needs to personally pay for its remediation and the restoration of this historic American building. Please do something to fix it.

The desecration of the East Wing is heart breaking. To think this historic wing could possibly be turned into a gaudy ballroom is unthinkable. I doubt the $300 million price tag will be funded by donors, but if so, I'm sure they will expect "payback" in the form of political favors.

The East Wing should have never been torn down. But as that shipped has sailed and it's now about damage control, the new building/ballroom should be not be allowed to eclipse the White House. This is the people's house and it sends a terrible message when a 'ballroom' is almost double the square footage. A building larger than the main house MUST BE stopped.

Name: Aileen Beno-Lietz

The White House is not simply a residence or an event venue: it is a living symbol of the American story. Any proposal to significantly alter that complex (and especially in ways that permanently change or remove historic structures), deserves the highest level of transparency, scrutiny, and public accountability. Even when a building carries special legal status, that does not negate the expectation that established planning, environmental, and design-review processes will be respected. The rule of law is not an obstacle to progress; it is the framework that ensures progress reflects the will and values of the nation rather than the preferences of a moment.

Historic preservation laws exist for a reason. While federal historic designation alone may not automatically prohibit demolition, projects involving nationally significant properties typically trigger review processes. Those procedures are not only symbolic; they are also safeguards of our sacred Democracy. They ensure that decisions affecting irreplaceable landmarks are thoughtful and legally sound. When any administration appears to sidestep or compress those steps, it raises serious concerns about precedent. If process can be brushed aside for one of the most significant historic sites in the country, what protections remain for others?

At its core, this issue is about stewardship and accountability. The White House complex belongs to the American people, across generations. Major alterations should reflect careful deliberation, lawful authorization, and respect for the architectural and historical legacy entrusted to current leaders. Pausing or stopping the ballroom project until all required reviews, permits, and consultations are fully completed is not obstruction, rather, it is a reaffirmation that no officeholder stands above the legal and preservation standards that protect our shared national heritage.

I oppose this project, which was initiated without the review process. It is not a modernization project but rather a complete razing of American history.

The destruction of the East Wing was akin to a houseguest taking a sledgehammer to the walls of your home. A part of the People’s House was razed illegally without the permission (or knowledge) of the people. Building a huge unneeded ballroom in place of the heart of the White House is offensive and contrary to the original intent of the design of the building and its historical significance. The East Wing should not be replaced by a gold and marble ode to wealth and power’s ego. Rebuild the East Wing and return its historic furnishings and decor. To do anything else would be an affront to the Constitution and our republic's 250 years of democracy.

The East Wing should never have been demolished. Its destruction and the proposed ballroom construction are illegal. Return control of the White House property to the National Park Service where it belongs and halt any construction on the East Wing until a thorough review of options can be made BY THE PROPER AUTHORITIES, which does NOT include the Executive Branch. Any reconstruction should be in keeping with the nature of the original structure, i.e. as close to size and design as the original East Wing. By no means should a gigantic ballroom be constructed. The skeevy funding mechanisms the Trump administration is proposing should also be investigated for improprieties/illegalities.

The White House does not belong to the president or to any other individual. While the president will live there and will be the custodian of the house during his or her term of office, it is the People's House. Regardless of the source of funding, no president has the right to make major changes to the White House without proper consultation with the true owners: the American people.

I oppose spending corporate or taxpayer funds on the East Wing project.
This work appears to have moved forward without proper authorization, permits, or a meaningful design review. That is not acceptable for any public project, and it is especially unacceptable at a site that carries this level of national significance.
Calling this "modernization" does not match what has happened. What I see is a loss of history and character that cannot simply be rebuilt later and called “the same.” A ballroom is not "the same" and is not a structure for the good of the American people.
I am asking that this project be canceled. I also want the East Wing rebuilt and restored to its former design, as faithfully

as possible.
Allowing this to continue, without accountability for those who ignored the required process, would be an insult to every law abiding American who is expected to follow the rules.

I oppose the demolition of the East Wing! The ballroom construction should be immediately stopped with the "donated" money going toward reconstruction and restoration of the East Wing as it was originally intended. In 2002, our public library was honored in the East Wing by Laura Bush to accept an IMLS award. I was devastated when the East Wing was destroyed to make a ballroom. This is the people’s house and demands respect and observance to existing laws & guidelines. The current occupant needs to rebuild the East Wing and scuttle his plans for a grandious ballroom which he appears to want to cement his legacy. Perhaps some of the moneys raised from his fawning “friends” could be used for this and to repair additional damage inflicted upon our White House.

I want the construction of that monstrosity of a “ballroom” stopped immediately and the East Wing restored to its pre-destruction appearance. The White House belongs to the people of the United States, not to whichever president resides there.
The American public should be consulted and, via Congress, decide whether national landmarks are to remain or are to be bulldozed.
President Trump had no business demolishing the East Wing of the White House, an irreversible action.

No further action should be undertaken until the public has the opportunity to determine the best use of the area and, via Congress, decides how to proceed.

This is regarding the ballroom. I am against this vanity project. We do not need a ballroom especially a ballroom of this huge size. As a taxpayer, I don’t want my money used to provide upkeep for this monstrous project. I realize private people have funded this project but I am sure taxpayers are going to be on the hook after this is built.

There is no justifiable reason to build this ballroom.

The people that are being installed on the planning commission (?) are unqualified. Ms Harris should be embarrassed to accept placement on this commission (no moral compass?). Also, even if it were smaller, the complete tackiness of the president’s love of marble and gold decor is an embarrassment to our country.

So I am against this ballroom being built in our country.

I also hope that if it is built, when the new administration comes in 2028, this building is torn down.

The East Wing of the White House was torn down without any consideration of its' historical significance in our country. It is also not the property of any individual president that happens to reside in the White House at any given time. As such, the destruction of the building was in and of itself an illegal act. The perpetrator of the act should be held to account and the funds to replace such an ediface should come from the stolen money this president has browbeat from his terrified, greedy accomplices. This is part of the People's House, not Trump's house and should be replaced in a manner fitting the rest of the White House.
Do not replace it with some gaudy, oversized monstrosity of a "ballroom" or whatever the current occupant is calling it. It is where the East Wing is to stand, and it should be replaced forthwith.

There is no justification for a facility of this size or nature at the White House. State dinners have declined significantly over the past 4 presidencies, a facility to have "events" is rarely needed and could easily be accommodated elsewhere in the White House. During Trump's first (second) year in office, there was only 1 state dinner. Biden had a total of 6, Trump held just 2 during his first term. Obama had 13 during his 8 year tenure, and George W. Bush had 13. That makes the per event cost of this facility extreme. What other events would a ballroom such as this be needed for???? What would be the extreme cost of holding these events.....food, staff, etc. etc.
We are at a time in our country where lavish spending such as this is disgusting to the majority of citizens who struggle every day to house their family, and put food on the table.
Maybe those that think this is a necessary project should spend 1 month in a 1500 sq. foot house, going to work 40 + hours a day, and trying to buy the essentials their family needs before justifying the cost of this.

While the White House is the temporary residence of the president, it is still the people’s house. A 1,000 seat ballroom is an outrageous change for this “residence “. The cost for maintenance is the absolute definition of waste and abuse. Not to mention the cost for events to take effect in such space. The staffing requirements, food costs, security staffing, and such have not been voted for or agreed to by the American people or our elected representatives in Congress. I feel that this project must be halted till a proper assessment involving all interested departments of the project and a full cost analysis of what the future costs to the American people will be is completed.

I'd like the current administration to present a plan to fully clean up the demolition site according to established environmental laws and practices, to be completed within one year.
Secondly any plans for building on that site should be done in coordination with all typical authorities such as office of building permits, the DC Historical Society, etc.
When plans are approved there needs to be more opportunities for the American people to review and comment.
Priorities for that site are for the common person to have access to it during every event.

No funding for this site should come from individual donors or companies but from US taxpayers after an election to choose the best plan. Construction companies should be vetted and monitored according to the strictest building standards, OSHA regulations, accounting policies, etc.

I oppose the spending of $300 million of taxpayer money on this “East Wing Modernization Project”, which was initiated without the proper authorization, permits, or design review.
This "project" was done without proper permissions or permits, or the will of the American people. It is not a modernization project, but rather a complete razing of American history and rebranding in the name of our current president. I want this project canceled, and the East Wing rebuilt and restored to its former design. I understand that renovations might be needed for modernization and updates; this is to be expected. But no one is above the law. To permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans and to all of us who abide by rules and ethics in our professional careers.

Trump is a FELON and a PEDOPHILE. He has done NOTHING to help, support, aid, or unite the AMERICAN PEOPLE. He demolished our BEAUTIFUL WHITE HOUSE and OUR REPUTATION. The Rose Garden, the Oval Office, Air Force One, the Kennedy Center, the “Wall” that was never finished, OUR Health Care, the list goes on and on, and NOW the EAST WING has been destroyed for a $300 MILLION Ball Room! He did NOT get permits, nor permission, nor designs. ALL this destruction is ILLEGAL!

The destruction of the East Wing and the plan to build a "ballroom" is an abomination. No one besides the current President wants this.
The cost is huge and growing, the permits have not been obtained, and the current resident is NOT the owner - he has no right to make huge alterations to a property he simply uses for 4 years. No own was consulted and Congress has never authorized funding

Please deny him this construction.

My concerns about the East Wing Modernization Project are grounded in the seemingly forgotten fact that the White House is the Peoples' House. The temporary occupants live there at the will of the people. For one person to assert

ownership and destroy any part of it, at will, does immeasurable damage to public trust. The message sent to the world should this project be allowed to continue with no consequences for flouting proper procedures, no oversight, and no rigorous design review will be: In America the law does not apply equally to all, and one person is very much above the law. The rest of us must just sit back and watch our history and our part in the American story be destroyed. That's not a statement coming from a healthy democracy.

Please do the right thing - protect the people's house.

The wanton destruction of the East Wing is a violation of law and policy. Further damage must be stopped and the original structure returned to its past state. Th White House belongs to The People of the United States. No unilateral decision can be made to change or destroy this historic structure.

Thanks to the National Trust, we have until March 4 to submit comments about the ballroom to the National Capital Planning Commission. You can make a comment through the link below (click on Submit Comment). PLEASE NOTE, the project is called East Wing Modernization on the pull down menu.

I do not think that the White House, as a working residence for the President, should have a ballroom. It is not meant to be a palace, but rather a working center of government. Every proposed image I have seen for it is gaudy to the point of tastelessness, and it seems to be purely an excuse to pander to President Trump while also deniably giving bribes. No part of this project has followed the law, whether of the United States or of good taste.

I oppose this project on several grounds:

1) Submitting the project for review after the demolition of the East Wing demonstrates contempt for a process designed to ensure that the Capital is developed in harmony with the overall city plan. This review should be undertaken by professionals with a deep understanding of the United States Capital City with allegiance to the Americans of today and tomorrow, not any special interest.

2) Due to its exaggerated scale, the ballroom blocks the visual access of the main building from the southeast. The main building would not be visible unless the viewer were almost directly south. Additionally, due to perspective (and its overblown size), the ballroom would dwarf the main building when viewed from the south.

3) Historically, the iconic main building flanked by two smaller wings was the image held by Americans and the world as the home and offices of the President. This design breaks with that tradition for the sake of a ballroom.

4) During the NCPC presentations, some of the recently appointed Commissioners stated that the visitor experience would be greatly improved, since currently entry is processed through a series of trailers. It is truly hard to imagine the tiny role this function would occupy in a 90,000 SF building.

5) Much has been said of the relative scale of the addition to the iconic central building. Buildings communicate the priorities of their builders. Since the ballroom is the largest building in the White House compound, the public could rationally interpret that the Presidency is primarily about hosting parties for the elite.

As a 71 year old citizen of this country, who has had the privilege of touring the White House on several occassions, I STONGLY oppose the spending of $300 million, on the so called East Wing Modernization.

This ill concieved project was initiated without the ANY of the established or proper authorizations, permits, or design review. They tore down the historic East Wing without going through any of the regulated and legal processes. They knew they wouldn't get permission, so they just tore it down, and hoped you would cave.

It is not a modernization project but a vanity project for the president and a cover for building an opulent bunker underneath and a complete razing of the history of this important part of the Peoples House! It's a CRIME!

I am pleading with you to completely cancel this project and require the funds collected to be used to rebuild the East Wing and restored to its former design.

No one is above the law including the current president. To permit this project to go ahead without penalizing those who broke the law would be an affront to all law abiding citizens and a terrible loss to this historic structure.

Destroying the East Wing of the White House should never have happened without the proper input from the American people, permitting and authority. The White House is the PEOPLE'S HOUSE — NOT the property of the temporary occupants. I oppose spending of $300 million taxpayer dollars without recovering it from whoever broke the law to tear it down in the first place. I want the East Wing rebuilt and restored to its former design and historical accuracy so that we can have continuity of history. To do otherwise would be a stain on the American story. There should be proper and strong accountability from those that tore the place down in the first place.

I will just reiterate what the AIA has said:

As set forth in our August 5, 2025 statement and letter to the Committee for the Preservation of the White House, AIA urged rigorous oversight in recognition that the White House is not simply another building; it is the People's House, a living symbol of democracy and national identity. We recommended a project governed by the highest standards of design excellence: a qualifications-based selection of the architect, alignment with historic-preservation standards, full transparency in funding and procurement, proportionality of design to the existing complex, and collaboration with expert practitioners to safeguard longevity and public value.

The demolition of the East Wing without full public engagement or clarity undermines the very process that the design and preservation professions developed to protect our civic architecture. Public architecture requires open decision-making, meaningful opportunity for citizen participation, and a design process rooted in stewardship of heritage as well as service to future generations. When these processes are sidestepped, trust is eroded, and the public dimension of architecture is diminished.

The AIA reiterates that architects bring a commitment to how communities are seen, how history is respected, how public investment is honored, and how places reflect the people they serve. The White House — its form, setting, and meaning — deserves that care.

We call on decision-makers to halt any further irreversible alteration of the historic fabric, to publish full documentation of the project's scope, budget, schedule and procurement path, and to reopen meaningful engagement with the professional community and the public.

Only by returning to a process grounded in transparency, preservation and excellence can the People's House continue to reflect their values

I disagree with the project and the spending of $300 million. There was no proper authorization, permits, or design review by anyone or the committee. President Trump just did it, like he does all the time without asking for help. There was a picture he had and without any plans to build, he destroy the history that American had of the East Wing. I am writing to express my strong opposition to the destruction of the historic White House East Wing and the proposed construction of a new $300 million private ballroom. As a concerned citizen, I believe this project is a profound violation of public trust, historical preservation standards, and ethical governing principles.
The project destroyed 83-year-old structures, including the East Wing, rather than expanding upon them, which many architects and historians argue against. The East Wing served as an important, functional part of the Executive Mansion for more than 80 years. It was demolished without proper consultation or public input. This sets a dangerous precedent for the stewardship of our nation's most iconic symbol.
The White House is the “People’s House” owned by the American people, not a private estate for the temporary occupant. The East Wing was used for public tours (10,000 visitors/week), and its destruction limits the public's access to their own government's home. The demolition of the East Wing and secure, functional areas like the Presidential Emergency Operations Center (PEOC) for a personal vanity project is irresponsible.
I urge you to take immediate action to halt this project.

No single person (not even our President) should have the sole authority to structurally modify the White House (and/or any National Monuments). These decisions must be made by a group of people who will ensure the historical significance and aesthetics are maintained. Building a ballroom that dwarfs the existing White House does neither.

The East Wing of the White House should be restored to its previous state at the sole expense of President Trump.

No one should be allowed to demolish, damage or deface a place that American Citizens consider their heritage. Any changes to public places must be carefully considered, agreed upon, then integrated into the existing look and feel of a heritage place. I never was asked if We needed a grand ballroom, neither was I told the historic East Wing would be touched, in fact it was the opposite. This is a tragedy that can never be replaced, but it can be reconstructed without a ballroom. America is We the People, not one person who is our employee where only his wants are considered without national approval. We have process to make these decisions so it is a unified decision instead of a narcissistic one. I am just one but I am part of many and my vote is no ballroom but to reconstruct the East Wing with improvements.

Please continue to maintain the standards that have allowed us all to be proud of Washington, D.C. and restore the elegance, historical and beauty of the East Wing. Modernization was likely needed but this is destruction for destructions sake. Please do the right thing. Thank you. Joan Coleman

I was horrified and heartbroken. I have tried several times when I have been in DC to get a tour of the WH and have not been able to do so. But we always stand outside and admire the beautiful, gracious White House. I want the East Wing rebuilt and restored. I do not want a massive ballroom that overwhelms and overshadows the residence of the President of our country. The White House is not supposed to be a palace. People who live in historical structures across the US must follow the rules of the historical preservation society in their communities. Tearing the East Wing down was against the law and it must be rebuilt and restored. The ones responsible for the destruction need to be held accountable.

This project was begun without proper authorization. What happened to government regulations regarding the bidding process? The facade of the East Wing should be made to look like the previous building, perhaps expanded a bit but not to over power the White House.

When it is rebuilt, don’t involve Trump or Trump suck-ups in choosing the decor; he has horrible tacky taste.

Be sure he didn’t promise naming rights to any of the donors.

The EAST WING of the PEOPLE'S White House was, without proper authority, demolished by the White House's current occupant so he could build himself a "vanity project." I do NOT approve of his supposed plan that has NOT been made available to or explained, in its entirety, to the CITIZENS of this nation. In actuality, it appears to be changing from day to day based on whatever whim floats through his thoughts. Any future construction on the WHITE HOUSE grounds should be subject to established evaluation and approval processes, period, all stop!

He claims that all construction costs will be covered by donations from his billionaire friends. I don't believe it. He also said he was going to build a wall that Mexico was going to pay for ... um ... that NEVER happened, and what was constructed mostly turned out to be replacement of existing areas and was paid for using taxpayer dollars.

Whatever ends up being constructed on our WHITE HOUSE GROUNDS must not in any way, shape, or form be named in honor of Donald J Trump. The White House Grounds are the PEOPLE's property, NOT HIS. He's merely a temporary tenant with NO OWNERSHIP rights, and our grounds should be treated as such. Not only that, whatever is constructed should NOT dwarf and reflect the White House itself as being diminutive.

And lastly ... if there is a means to do so, Mr Trump should be fined and/or be required to cover all costs associated with the demolition and restoration of the People's property. Not a single penny of taxpayer dollars should be used in the restoration and construction process.

I support the rebuilding of the East Wing as it was & where history was made & at this point has been destroyed!

Furthermore, the absolute GAUDY redecorating of the Oval Office and other areas of the White House were totally unnecessary and should also be restored. The Trump Administration should be billed for all damages to the White House and should be held accountable for paying them.

Subject: Public Comment Opposing NCPC File No. 8733 (East Wing Modernization)
To: The National Capital Planning Commission
From:
Date:

Re: Opposition to the East Wing Modernization and Ballroom Construction

I am writing to formally submit my strong opposition to the "East Wing Modernization" project currently under review.

As a concerned citizen, I urge the Commission to reject the current proposal, halt all further construction, and impose strict conditions on any future activity at this National Historic Landmark.

1. Condemnation of the Unapproved Demolition I vehemently object to the demolition of the historic East Wing that occurred in October 2025. This action was taken before the Commission had granted final approval for the project, bypassing the standard Section 106 review process intended to protect our nation’s heritage. The administration’s "act first, ask permission later" approach is a breach of public trust. The NCPC must not rubber-stamp this destruction by approving a replacement project that rewards such reckless disregard for historical preservation laws.

2. Opposition to Administration Oversight I am totally opposed to the current administration having any role in the design, funding, or construction of the replacement structure.
• Conflict of Interest: The reliance on private donations from corporations with active government contracts to fund a federal building creates an ethical minefield. The "People’s House" must remain public property, funded by the public to ensure it serves the national interest, not the interests of private donors.
• Lack of Stewardship: The administration has already demonstrated a lack of fitness to steward this historic site by authorizing the demolition of the 1942 East Wing without proper oversight. Consequently, I request that the Commission halt all work until an independent, non-partisan body can be established to oversee the future of the site.

3. The Replacement Should Not Be a Ballroom The proposed 90,000-square-foot ballroom is fundamentally totally inappropriate for the White House complex.
• Scale and Character: The massive scale of the proposed ballroom dwarfs the historic Executive Residence, altering the residential and dignified character of the White House. It transforms a seat of government into a commercial-style entertainment venue.
• Mission Creep: The primary function of the White House is governance and housing the First Family. A facility of this size, designed for mass social gatherings, distracts from these core functions and imposes unnecessary security and logistical burdens on the capital.

4. Prohibition on Naming Rights It is imperative that the Commission explicitly forbid the attachment of any private name to this building.
• No "Trump" Branding: The White House is not a private hotel or a campaign asset; it belongs to the American people. Under no circumstances should the replacement structure, or any room within it, bear the name of the sitting president or any political figure. To do so would be an act of vanity that degrades the history of the institution.
• No Donor Naming: Similarly, no naming rights should be granted to the private donors funding this project. The NCPC must include a binding condition in any future approval that permanently prohibits naming rights for donors or the President, ensuring the White House remains free of commercial or political branding.

I urge the NCPC to exercise its authority to protect the integrity of the White House. Do not allow this project to proceed as currently planned.

I wholeheartedly oppose spending millions of dollars on a project which was initiated without any discussion, authorization, permits, or review via the proper channels. Part of American history has been literally gutted and razed. Claims by the current administration that the project is being partially funded by private donations is equally disturbing, suggesting the possibility of quid pro quo and corruption.

I am appalled we are even at a stage for public comment as this project should have been halted before it even began. Never in the history of our country have we needed a ballroom, nevermind a 90,000 square foot monstrosity. The purposed ballroom is too large, too grandiose and out of character of the executive residence.

Style and size should remain the same. It is a residence not a convention center.

I am very concerned about this project. While there certainly may have been a need for some modernization of this space, I think an expensive, gaudy ballroom funded primarily by rich people/organizations/corporations (that will surely benefit as we have seen others benefit as they supported the current administration) is totally inappropriate. Moreover, the steps that have already been taken are another example of flaunting the rule of law -- the steps required to destroy, add, or change this historic site were apparently ignored. The way this project has been implemented is an affront to working and law-abiding Americans. I would like to see the historic structure restored, with necessary modernization (e.g., fix up the plumbing and the wiring, etc.). This is another embarrassment for the USA.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

To the NCPC,

The design should be rejected based on its mass and scale alone. While I do not object to a new East Wing to satisfy needs of the executive mansion, the proposed design significantly overwhelms the mass and scale of the existing executive mansion and west wing. Re: Formal Opposition to the Proposed East Wing Renovation Project

Dear Executive Director and Members of the Commission:

I am writing to formally oppose the current administration's proposed project to demolish and reconstruct the East Wing of the White House. This project was initiated without proper authorization, required permits, or design review — and it must be stopped.

This is not a renovation. The East Wing has stood as part of one of the most iconic and historically significant buildings in the country, and tearing it down without following the required legal process is simply wrong.

It would be a travesty to allow the proposed "ballroom" project that overwhelms the White House to proceed. At 90,000 square feet to 55,000 square feet, it would dwarf the White House.

I urge the Commission to take the following actions:

Halt the project immediately pending a full review of all authorizations, permits, and design approvals.
Require full compliance with all applicable historic preservation laws, including the National Historic Preservation Act.
Mandate restoration of the East Wing to its original design, consistent with the historic character of the White House complex.
Hold accountable those who proceeded with demolition or construction work without proper legal authority.

No one is above the law — not even the occupants of the White House. To allow this project to proceed without consequence would send a dangerous message that legal processes can be ignored by those in power. That is an affront to every law-abiding American and to the institutions designed to protect our national landmarks.

The National Capital Planning Commission has both the authority and the obligation to intervene. I urge you to act decisively and without delay.
Thank you.

The White House is an important cultural icon, a symbol of our democratic seat of power. It’s endured through turbulent times in our country’s struggle to grow and develop into a place where all people can be respected and valued. President Trump’s astounding destruction of the East Wing is an affront to our dignity and rule of law. He thinks that I’df he destroys our symbols he can wrench our power away! As a citizen I demand that the East wing be restored to its original condition, in its original footprint.

Dear Commissioners,
Thank you for the opportunity to make comments. As an American citizen who's East Wing was demolished, I have been horrified over the loss of history and memories for generations, I am 67 years old and have listened and watched history in real time over the years and find the audacity of an administration just demolish it all.
I would like to see the old footprint of the East Wing be maintained and the replanting and upkeep of the Rose Garden.
We do not need a 'Russian' 'Gold' ballroom for the elite and the few. We should have an historically significant entrance to the White House where people of all walks of life can be welcomed.
Please keep the historical architecture to match the rest of the buildings and please no 'gold'.

I oppose spending $300 million on this project, or any funds at all in fact. Any funds that may be available should be used to restore the East Wing as it was. The White House is not the possession of the president. It belongs to the people of the United States. The so-called beautiful ballroom that actually no one wants should be cancelled. Any construction/destruction of federal property must be approved through the legal process. Stop this...now.

Dear Sane People:
We do not need a ballroom in The Peoples' House that 99% of the people will never be allowed to use. Even the idea of a ballroom is disgusting & anti-democratic. PLEASE cancel all plans for this abomination & RESTORE THE EAST WING.
Thank you.

I absolutely do NOT support the notion of constructing a ballroom (of any size) on the White House property. Rather, it is imperative that the East Wing be fully restored to its most recent intact state as quickly as possible. The East Wing should never have been demolished in the first place.

As a US citizen I feel strongly on the modernization of the East wing. There needs to be input from National Capital Planning Commission, the US Commission of Fine Arts, congress needs to approve the budget and the citizens of the US need to provide their thoughts as it is the "peoples' house". I was deeply disturbed on how quickly the East Wing was demolished and hauled away. Centuries of history were removed without a second thought to their significance to our countries' history. And now to build a ballroom that will dwarf the administration building that is next to it, and the solution is to build more to balance it, show a lack of planning and a huge waste of taxpayer dollars. We cannot replace what has been lost, but we can move forward with planning and input from organizations who are the custodians of the "peoples' house" not the delusions of grandeur from the current administration.

It is an affront to the American people and our laws to use tax payer money on a project nobody asked for and does not

serve the American people. The East Wing of the White House served as office space for those who are conducting the business of the American people. It was an historical and essential structure that served the people's business. This Ballroom will serve only one purpose, a playroom for the wealthy elite. A giant structure whose purpose is to host dances and dinners for the rich rather than house the workers who conduct America's business from the mundane to crucial national and international activities which affect the daily lives of every American. A giant space dedicated for rich people to hold cha-cha contests does not serve our country. Stop this project now. It's never going to be built anyway and if it is built it is bound to be torn down when Trump is gone and America resets its self.

Good Day,
As a citizen I am opposed to this project. None of the proper procedures were followed, the East Wing was demolished with no review, no permit, no input from Congress, the American people, anyone. The East Wing needs to be restored and a ball room is unnecessary. There are many better uses for 300 million dollars than a ball room that the majority of the people of the United States won't even get to use. If the average person tried to destroy property to build something else with out designs and permits, the project would be immediately be shut down. Shut this one down.

I am speaking out against the construction of the “Trump Ballroom” where the East Wing of the White House previously stood. While the damage has already been done and the East Wing is gone along with the history it held, constructing a lavish, and frankly ugly, ballroom on the site compounds the insult to the American people. The White House is a symbol of our country and is fitting of a country that is a republic, not a monarchy or a dictatorship. Building a ballroom to Trump’s specifications, complete with gold leaf embellishments, detracts from our heritage. His planned ballroom resembles something associated with autocratic governments and monarchies. It is an insult to hard working Americans to build such a monstrosity when people are losing their health insurance and going hungry. Please say No to this construction.

It was an act of sexism and dominance that destroyed the East Wing of the White House, our house. While there is no way to replace the venerable addition and this by no way is a "Modernization," the scale and size should be one that does not dwarf the remaining structure. The architect needs to be selected from a NATIONAL search of renowned professionals selected not on the basis of influence but based on the qualifications that are pre-determined and public.

Aren't there other venues in the Washington, D.C. area that can host large events? This location is not appropriate for the for this amount of square footage simply to support the ego of one public servant's ego. Again, this is our house...not the current administration's house nor future administrations' house. I disagree with the uber wealthy providing funding to, essentially, openly bribe and influence this administration. The funding should be to a scale that is small enough to be a reasonable request from Congress. Requiring this change is the ultimate in political over reach to garner influence over someone who was supposed to be an ethical leader for the entire country not just his minions.

I would hope that the design could reflect the current trends in architecture. While the other structure coordinated with the style of the time, there is an opportunity through open competition to create a contemporary addition. While it may not be the desired design of the person inhabiting the house, it, again, is not his house. It is the house of the United States. We have talented professionals who could look at a variety of scales and designs that could create something that looks to the future and inspires the next generation rather than stagnating with a much older generation that will not be present in the next 20 years, or less.

The design process should be a public one and open to public comment. Wide scale collaboration and open conversation about the opportunity at hand.

Lives and administrations are finite. This house should represent the best of us. The best of the design teams in the U.S.A. that is COMPETITIVELY selected. And who will sensitively make suggests to a scale that allows the main structure of the home to shine.

I object to the speed at which the East Wing "modernization" project is proceeding. There does not seem to be any mindful process being followed. I'm not versed on the legal aspects of this project, but it seems to me that there is very little oversight and very little clear reasoning. It's not being modernized for any clear purpose. With homelessness, high prices, and staggering consumer debt, why not spend money making citizens lives easier than embarking on a vanity project. I would like to see the project stopped before it goes any further. Thank you.

We are violently opposed to this mammoth vanity project from one man's distorted dreams of glory. It is way, way, way oversized and dwarfs the White House itself, blocking views of an icon, and demeaning all the federal buildings and monuments of the national seat of government. It contains all kinds of extraneous spaces, like guest suites and offices. There is further threat of trying to "even out" the unbalance of the behemoth by constructing a second story over the West Wing. The perpetrator is lawless, having contempt for process, norms, regulations, and a sense of public ownership. He has stuffed oversight boards with his yes-men and toadies. Say NO. Say NO BUILD. Put the East Wing back the way it was, at his expense. He can use the hollowed-out Kennedy Center for his balls.

It was sacrilegious to tear down this historical building with no authorization. The plans for this horrific addition are so out of proportion to the of the White House that it will dwarf the historic structures still there. Why on earth does Trump or any president need a ballroom of this size ? State dinners have been held successfully ever since they first existed without a 1000 seat capacity, or whatever he is now planning since it changes. How many times a year will it actually be used? That is unless Trump starts holding fundraisers there. Please stop this madness and rebuild an historic replica.

Dear Commissioners,

I wish to strongly object to the East Wing Modernization Project initiated by President Trump to create an elaborate ballroom to honor himself by destroying the entire East Wing of the Whitehouse. The Whitehouse is not his alone, but belongs to the American People. President Trump's clear objective to plaster his name on so much of Washington DC and the rest of our nation is a disgrace to the country. The fact that President Trump secretly planned to have the East Wing of the Whitehouse destroyed practically overnight is itself a clear indication he knows that had he worked with the National Capitol Planning Commission, his plan for self aggrandizement would not have been achieved.

The NCPC has long stood for upholding the dignity of our nation's capitol city. I ask only that you continue that work to keep our capitol as a hallmark of our nation and all of its incredible leaders, and not as glorification of one man. It is our right as members of this nation to honor our greatest leaders. It is not the right of any leader of this democracy to glorify himself.

Please do not approve the East Wing Modernization Project. Please work to restore our nation's Whitehouse to a state which honors all of great leaders and history, not just one man.

Thank you.

Re: Formal Opposition to the Proposed East Wing Renovation Project

Dear Executive Director and Members of the Commission:

I am writing to formally oppose the current administration's proposed project to demolish and reconstruct the East Wing of the White House. This project was initiated without proper authorization, required permits, or design review — and it must be stopped.

This is not a renovation. The East Wing has stood as part of one of the most iconic and historically significant buildings in the country, and tearing it down without following the required legal process is simply wrong.

It would be a travesty to allow the proposed "ballroom" project that overwhelms the White House to proceed. At 90,000 square feet to 55,000 square feet, it would dwarf the White House.

I urge the Commission to take the following actions:

Halt the project immediately pending a full review of all authorizations, permits, and design approvals.
Require full compliance with all applicable historic preservation laws, including the National Historic Preservation Act.
Mandate restoration of the East Wing to its original design, consistent with the historic character of the White House complex.
Hold accountable those who proceeded with demolition or construction work without proper legal authority.

No one is above the law — not even the occupants of the White House. To allow this project to proceed without consequence would send a dangerous message that legal processes can be ignored by those in power. That is an affront to every law-abiding American and to the institutions designed to protect our national landmarks.

The National Capital Planning Commission has both the authority and the obligation to intervene. I urge you to act decisively and without delay.

I don't think a good case has been made for the need for a massive ballroom, especially not one of this size and at this location. State dinners and other functions have been held in the White House for our entire history and it's never been a problem. And even if there was a need, a better solution could be found. The White House is "The People's House". It doesn't need to be a gold studded, massive, grotesque edifice in line with ancient Rome. It belongs to no one man, and is a piece of our history that is loaned out as a residence and seat of executive power for our country. The ballroom plans are hideous and the function of the building and it's massive scale shift the focus of the property to a luxurious, Vegas style ballroom rather than a refined and elegantly balanced historic house.

It goes against the ideals of America that a handful of billionaires can effectively take ownership of our country's historic property and do whatever they like to please the whim of one man This isn't a modernization project, it's an exercise in pandering, greed and vanity and should not move forward. The East wing should never have been demolished, and must be restored. Acting without the proper authority should never be rewarded with success. If I did this, my local planning commission would come down on me like a ton of bricks. No one should be above the law in America.

As a citizen of the United States it is my right as well as my duty to speak on matters concerning changes to public structures that belong to the people. The White House is one of the most important symbols of our government and an incredibly important, historically significant building. What has already been done to it by the current president is illegal. That fact has been proven.

Architecture and design are not only a matter of aesthetics. They serve to communicate messages, and that purpose cannot be ignored when it comes to national historical buildings. The current president is symbolically tearing down our country and what it stands for, as well as attempting to build a symbol of dictatorship, with this destruction of the East Wing and proposed construction of a huge ballroom. It does not serve the people. It serves him.

He has already added disgustingly opulent golden ornamentation to the Oval Office. It is gaudy, tacky, and an embarrassment to the nation. The over-use of golden embellishment is an obvious attempt to imitate the style used by monarchies, and more importantly dictatorships for whom he has expressed admiration. So he has given us proof of his sense of style, and it is not representative of the nation's history or its values.

In terms of architectural integrity, this proposed ballroom addition has none. It is not only outrageously expensive, but also totally disproportionate to the main building of the White House itself. The disrepect to our nation and our laws shown by this addition is clear. It must not be constructed in its current proposed scale and form.

No further changes should be made to the White House during his administration except to mitigate the damage from the destruction of the historical East Wing, and protect the remaining structure from further irreparable harm.

A plan to replace the East Wing must go through the proper channels and process and be carefully considered in terms of design, scale, and aesthetic compatability with the rest of the White House. The current proposal does not meet those criteria.

The proposed addition is a clear effort to build a monument to himself and to wealth. The fact that it dwarfs the White House itself sends an obvious message to the nation and to the world.

This current president's selfish and horrifically expensive pet project cannot be sanctioned. His blatant breaking of laws that were written to protect the symbols of our nation against precisely this type of eggregious action cannot be glorified by the approval of this proposed addition. His wasting of funds on a ballroom, in lieu of spending much-needed money on programs that serve our citizens, cannot be allowed.

Please do the right thing, for the sake of our country's history and its future.

This historic building belongs to all of us, and to have it unilaterally destroyed and replaced without regard to history, proportion or process is heartbreaking. May the process now be undertaken by the proper means and the East Wing be returned to its place not as a billionaires’ ballroom but as part of our heritage and the basic functionality befitting it. The White House is not a gold-leafed castle or casino.

The East Wing of the White House was a balanced architectural part of the building and its proposed “replacement” with an oversized and illegal rebuild was shocking enough. But when the bulldozers came in and tore apart a wing of the

people’s house without approval or notification, I was angry.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. This project never should have started without public input and the correct permits for working on a historic landmark. The plans I’ve seen are completely out of character for the historical nature of this national treasure and costs continue to balloon. As a taxpayer I am incensed to be paying for this vanity project when children and seniors are going hungry and immigrant detainees are being held by for-profit prisons (for longer than legal periods of time) in truly terrible conditions not considered even humane enough for animals. “Modernization” to me means that electrical work is up to code and buildings are properly accessible to all people. This wanton demolition and hubris build should be reversed immediately. The President should pay for remediation with his ill gotten gains from this term.

I wanted to express my horror that the historic East Wing of the Whitehouse was demolished! As the People’s House and an historic landmark it needed to follow a proper process consulting the ‘Peoples’ representatives that are elected to Washington as well as the Historical Commissions. I do not want the $300,000,000. spent on an unapproved ballroom and want instead the original structure to be rebuilt as it was before. The people of this Nation never approved or would ever have wanted the destruction of this wing OR a new ballroom trophy for Trump. We went this horrible Trump action and memory to be erased!

I adamantly object to spending $300 million dollars to further decimate the designated “Women’s Wing” of the White House, for a Trump ballroom for the elite. The legacy of countless First Ladies of the United States has been thoughtlessly destroyed.

No appropriate oversight reviews or historic preservation opinions were considered. Patriotic tours of The Peoples’ House are in jeopardy. This is yet another outrageous affront to ordinary citizens in general and the lasting legacy of American women in particular. Please put a stop to this madness before another step towards obliterating American history moves forward.

It is clearly not a modernization project but a tear down of our national architectural history. We protect historical buildings and structures to preserve our history and memorialize those who came before us. Please so as you state and modernize the East Wing, and not build and entirely different building. The East Wing is our history and should be our future. This is a lie to the American people, the East Wing is gone (illegally) and SHOULD be rebuilt to honor our history and serve our future.
The $300 million on this project was initiated illegally without the proper authorization, permits, or design review. It is not a modernization project but rather a destruction of American history. Cancel the unnecessary ballroom and rebuild the East Wing but as the subject states, modernized. Also, those who broke the law should be subjected to actual consequences. I oppose the demolition of the White House East Wing because changes to a national historic site should occur through transparent review, not unilateral action. Additionally, this $300M project is being funded by large private donations at the behest of the sitting administration which creates at the very least the appearance of influence-seeking or preferential access, and undermines public trust.

The East Wing was destroyed to make way for a new state ballroom funded largely by private donors, with demolition

beginning before review by the National Capital Planning Commission and amid unresolved preservation concerns.

I am asking for clear disclosure of donor funding, environmental and design review, and public accountability.

The White House is a shared civic symbol, not the property of any one administration, and major alterations should follow the same oversight standards expected of every other federally significant project.

In my opinion, the East Wing Modernization Project as presented is too expansive and dwarfs the White House - it overpowers the site in size and design. This addition for the ballroom, an area only occasionally used, is a waste of taxpayers money which will be necessary for its upkeep in the future. greetings

the east wing does not need "modernization", which is just a tricky way of saying "ballroom". the white house is the people's house, not a palace. we don't have kings, remember? please rebuild the east wing as it was and send the bill to the pretender who had it razed.

This project was started without proper authorization, permits, or design review. The American public was stunned when part of the People's House was razed at the whim of a single individual. The proposed ballroom cannot be allowed to be constructed; it would only have to be razed by a later administration to remove a continuing affront to all Americans.

Therefore I opposed the spending of $300 million on this project. The East Wing should be restored to its original aboveground design, though without the underlying bunker. No one is above the law.

I strongly oppose the destruction of the East wing of the White House. I also oppose the desecration of the White House by attaching a gaudy “Ballroom” to it. I will note that initially Donald Trump promised that his ballroom would not touch the existing structure, which was a lie. He also said public money would not be used, but based on Donald Trump’s history I’m concerned that that also is a lie. I am also concerned that if that structure is built its design, inside and out, will not blend well with the remaining structure and will more closely resemble the gaudy style preferred by Trump. I urge the commission to take control of the situation and preserve the dignity of The People’s House. Please prevent the desecration of this sacred symbol of democracy.

The “modernization” of the East Wing is a complete travesty. The White House is a place for the President to receive visitors, conduct the business of leading the US, and retire to private quarters for respite. It is not a venue for entertaining thousands. It is not a place in which to hold political rallies or fund raisers. It has been, and should remain, a symbol of our nation’s history and our strength as a democracy.

But democratic principles were ignored in razing the East Wing and planning its replacement, a ballroom that appears completely out of proportion to the White House itself. No input was sought from the public or even from Congress. It’s as if the current president considers the White House private property rather than a national treasure he is permitted to occupy during his term in office. It makes no difference if, as reported, the cost is being funded without tax dollars. The people’s house should not be for sale.

Please stop this over-reach and restore the East Wing to its original size and architectural design.

I am writing to express my concern that the East Wing was demolished without going through the legally required review processes, including review by the National Capital Planning Commission and input from the public. Even in the revised plans without the pediment, the proposed East Wing is overly large and out of proportion with the main building (and "correcting" that by making the residence taller is not a real fix). The circular drive should also remain round (rather than distorted) to maintain the White House's neoclassical symmetry.

As an American, it pains to see what has been done to "the people's house." The White House is not the current president's personal property, but a historical building that he or she occupies during their years of public service. I also mourn the loss of the Jacqueline Kennedy Rose Garden and the historic trees that were razed. The president is not above the law and to allow this unfortunate project to go ahead as planned would be to reward his "move fast and break things" approach. There is much that was loved about the original East Wing and any architectural changes must be sensitive to preserving the character of the old East Wing while repairing and perhaps expanding the structure as needed. In any case. all plans must go through the proper legal channels.

Thank you for the opportunity to provide input.

Before nationally significant places are permanently altered, the public deserves an opportunity to help shape the decision. The White House is a National Historic Landmark and National Park, owned by the American people and home to our presidents since 1800.

This review is also required under federal law. Major construction projects in Washington, D.C. must undergo review by the NCPC and the Commission of Fine Arts, comply with the National Environmental Policy Act, and receive congressional approval.
While expanded event space may be needed, additions must respect the historic scale and design of the White House. At 90,000 square feet, the proposed ballroom would exceed the size of the 55,000-square-foot Executive Residence. Additions to historic properties should be compatible in scale and subordinate to the original structure. Commissioners need to hear directly from the public.

THESE ROGUE MOVES that are repeatedly being used to eliminate and erase true AMERICAN HISTORY and the jurisdictions of the PEOPLE of the US MUST be STOPPED!

The White House is a historically significant landmark. It should be preserved and restored only in efforts to keep it in safe, operational condition. The residents and staff who live and work there are merely visitors. Their role in caretaking of the house is humble stewardship. It is disrespectful of the presidency to demolish any part of it. There are protocols in place that should be followed and enforced to maintain this decorum. Violation of protocol should be followed by consequential action.

This is not a “modernization.” It is a totally unnecessary desecration. The only person who wanted this is Donald J. Trump, not the decades of presidents or US citizens that he claims to represent. This project must be stopped before it goes any further. Its funding sources are questionable (what are these investors getting in return for their “donations?”), its cost continues to skyrocket, and its architectural design—both exterior and interior—are gaudy and tasteless, in huge contrast to the stately architectural design of the West Wing. I have had the privilege in my professional life of seeing the interiors of the West Wing and it makes me cry to see it trashed. Some future Administration will have to spend millions of $$ to undo the damage that has been done to the interior of the West Wing, which now resembles a bordello. Let’s not squander even more money on what is nothing more than a vanity project for the current WH resident. The original East Wing should be reconstructed—perhaps a bit larger than it was—to its original classic design.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

Stop destroying nationally owned buildings. The ball room was not needed. The White House is not an event venue. It is a complete waste of taxpayer money. Please restore building.

I strongly am opposed to this project. It was started with no authorization and no review. Destroying part of the White House, which belongs to the people, not to any president, is completely wrong. The plans for a huge, gaudy ballroom that have been shared with the public are very ugly and do not fit in with the existing historical building.
I urge the Commission to do everything they can to stop this ego-driven project immediately.
Thank you.

I completely oppose the demolition and proposed building of a ballroom. Nothing so far in this process was done legally but in defiance of all rules and regulations. The project must be stopped and the historic building rebuilt. This is the 250th anniversary for our country and it can’t be commemorated by this travesty.

I oppose this project. The East Wing of the people's house should have remained intact pending the submission of plans that described in detail what the complete "modernization project" entailed including the costs and who was funding the project. It's the "People's house" where the sitting president is granted living arrangements during his/her term. We have heard that millionaires/billionaires have donated money for this project. Is this legal without fear and/or favor? I would prefer our government representative to spend time and money on making life better for ALL Americans not just the privileged class. It appears that this is just another project that Trump wants to put his name on.

I oppose the spending of $300 million on a project initiated without the proper authorization, permits, or design review. Modernization could have been be done without destroying a beautiful and historic building. A ballroom that is 1.5-1X greater than the White House itself will loom over the remnants of the White House, destroying not just history but the aesthetic value of the White House architecture. This project should be canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

I strongly urge members to veto action on building a ballroom on the site of the destroyed East Wing.

No attempt was submitted to gain permission for the destruction of the people’s house. There is no transparency on where the money to build is coming from. Everything about this project is cloaked in secrecy.
I believe that something this enormous should be out in the open for all to see.
Please hold the person/people responsible for the destruction. And require a reconstruction of the original building.
Thank you.

Destruction of the east wing without public comment is a horrendous action that took place. This is the people’s house. It doesn’t belong to anyone president. And now building a Gotti ballroom that’s twice. The size of the White House is something that clearly shouldn’t even happen. We shouldn’t allow things to be built that do not fit with the architectural style of the current building.. the White House is a classical type of architecture to build some big round Gotti thing that should be at Mar-a-Lago just doesn’t fit and it’s gonna be horrible looking. I think it should not go forward.

To the Commissioners:

As a law-abiding and patriotic American, I vehemently oppose everything about the East Wing "modernization", otherwise known as vandalism, plain and simple.

"This project began without ANY of the proper authorizations, permits, or design review, and it has no merit whatsoever, whether functionally or architecturally or in any other way.

"I want this project canceled post haste. Millions of Americans of good will including me demand that the East Wing get rebuilt TO ITS PREVIOUS DESIGN.

"In America we have no kings: NO ONE IS ABOVE THE LAW. Allowing this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

As a physician, preservationist, and restorer of historic homes in Louisville, Kentucky, here are my views on the White House ballroom project:
The proposed 89,000 square foot ballroom addition to the White House is wrong in design, scale, intention, and financing.
• The gilded, opulent interior is excessive while the faux historic exterior is a mockery of the residence and historic federal buildings. A restrained contemporary design could reflect our times and complement the White House.
• The new structure will dwarf the White House, creating a visual imbalance. At 22,000 square feet (per lead architect Baranes), the new ballroom is less than one quarter the size of the proposed building. In my view, the footprint should be reduced by half, still allowing ample space for a ballroom, visitor entry, spousal office, and a small theater while complementing the White House setting.
• The monstrous scale and style of the proposal seem intended to glorify the current occupant. Such a major change to the property should be thoughtfully planned and executed to achieve a long-term functional and aesthetic White House complex.
• The proposed financing, through donations from corporations and wealthy individuals, many of whom stand to benefit from governmental favor, serves to obscure potential bribery while bypassing Congressional approval. This major renovation of a beloved federal asset should be transparent in funding and authorized by Congress.
In its current form the White House ballroom project will be an albatross around the neck of the Executive Branch, long outlasting the current administration. It will be an enduring affront and a lavish testimonial to both egotism and the taint of corruption.

I object to the construction of a ballroom and the unnecessary spending it will require. The proper channels should be honored so that any publicly owned properties adhere to reasonable design aesthetics and a congressionally approved budget (agreed to by the American people - not one man’s taste and preference.) While you’re at it - save the Kennedy Center and put the Rose Garden back together. Thanks for your consideration.

The White House belongs to the American People, not the current or past occupants. While it is too late to stop the demolition of the East Wing, it is imperative that the replacement be in scale with the original White House. There are a plethora of existing banquet spaces in the local vicinity which can accommodate the needs of the present tenant of the White House. I stress "tenant" here.

Friends :

It is incumbent upon you to ensure that Due Process and Rule Of Law are adhered to at each and every step of decision-making relevant to this project -- and to ALL projects -- within your purview.

Recent developments re : East Wing destruction, plans for an < Arch de Trump >, the < re-naming > of the Kennedy Center, et alia., raise grave concerns concerning the Administration's willingness to skirt Due Process and Rule Of Law in matters of National Capital Area land use and planning.

Thank You for your attention to this important matter !

I oppose this "modernized ballroom" project.It's nothing more than another $400 million dollar grift from a convicted sex

offender and felon trying to leave his slimy fingerprints all over the remains of the iconic East Wing. There should be a committee of experts - architects, historians, preservationists - reviewing the plans and carefully discussing pros and cons.

Honestly, it is the people's house.
Please look at all aspects of design and construction.

By no definition is this "modernization". In no way is this a matter of "national security". Tearing down the East Wing was capricious arrogant vandalism by an egomaniac. The ballroom is completely out of character with the history and design of the White House, and worse, it's a flagrant statement to the American people that the People's House is no longer theirs. Trump wants to hold the Inauguration there behind closed doors, away from the peasantry, off-limits to the average Americans that he views as his inferiors, and this is how he want us to see ourselves.

To have defaced the White House with gold applique was bad enough but to tear down the East Wing without the national trust being involved or any public comment was a crime. I understand it's too late to stop it now but this should not be turned into a trump ballroom. The East Wing could be rebuilt as close to the original as possible with some modernization on the interior. We do not need Mar-A-Lago North. Please put a stop to the ballroom and return the East Wing to the beauty of what it was

My feeling is that if any federal building, including The White House, requires modernization and renovations, then it should be initiated through the channels of the National Trust for review and approval. No sitting president/administration of either party should be able to just tear down a building or a portion of an historic building.

The history of our country is not something that can be changed by one person's whims and ideas. We have to learn through our history, not destroy it.

The demolition of the East Wing feels like an assault on the American people. A grand ballroom vanity project seems out of touch. I am especially offended by all the "gold glitter" added to the Oval office. It gives it a Saddam Hussein vibe. Dignity and grace are absent from the White House. Also historic plaques about slavery being taken down is a problem for me. You shouldn't be able to erase history like it didn't happen. The White House is the people's house. President Trump can't be allowed to destroy our national heritage to satisfy his vanity. If a pastor simply decided to tear down the parsonage and build a showy new building on church property, he would be immediately fired —and people would wonder if he was mentally ill. If a Methodist pastor thought that this proved that Methodist pastors were stronger than Catholic priests, his church board would kick him out the next day—while wondering if he was mentally ill.

In our culture, we accept that the church, not the pastor, owns the parsonage. When the pastor moves on to another church, he also moves out of the parsonage. It’s part of the salary package. Such arrangements have existed throughout American history. Furthermore, communities cherish and celebrate old historical buildings as part of their shared cultural heritage. This is why strict regulations exist that protect the traditions and buildings that represent our communities and our history.

Mr. Trump should be punished for destroying property that he did not own. Many citizens cherish the White House and, until this year, expected that the regulations would protect it. Mr. Trump did not prove how strong and right he was. He proved that he has contempt for our shared community values. At the very least, he must be held responsible for an

appalling act of illegal vandalism. Giving permission for the “East Wing Modernization Project” betrays American citizens, betrays our shared cultural heritage and betrays the trust that citizens have placed in the NCPC.

I'm commenting on the "East Wing Modernization Project", which is an interesting subject title for a portion of The White House that no longer exists.

The White House belongs to the American people and is looked after by The National Parks Service. No president has the right to tear down any portion of it without consent and/or guidance and approval. No President should be above the law, and yet, here we are. This President continues to do whatever he wants, whether breaking laws or not, and there are no consequences.

I oppose the construction of a ballroom that was not approved and is not needed, especially because the cost keeps rising and, no doubt, the bills will be passed on to the American people.

This property belongs to the people of the USA. The current residents are there only for a short period of time and it doesn’t belong to them nor do they have the free right to do as they wish to the property. Any good renter knows this although this current, temporary resident doesn’t even pay any sort of rent. The destruction happened without plans, permits or application to the boards that are the overseers of said property. The fact (?) that private funds are supposedly paying for this, lends to the possibility that favors are being curried.
The East wing should be rebuilt to the specifications of the original structure. It would make sense for the interior to be modified for better performance and efficiency. The destroyer of the previous structure should be on the hook for all costs involved not the American people.

I oppose the spending of $300 million on this boondoggle of a project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. This project needs to be canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans. This property is not owned by any individual, political party, or administration. It belongs to the people of the United States, and we did not agree to this.

The destruction of the historic East Wing of the White House is unlawful, illicit, criminal, unethical, immoral, and reprehensible, in every way. Donald Trump took it upon himself to decide that the White House needed a ballroom, ignored the required process for review and approval, solicited donations from his billionaire cronies, then DESTROYED the existing East Wing to build this monstrosity. Now his donors have backed out and we, as taxpayers, are expected to pay for this man-child's horrible project. As a citizen of the United States of America, I am AGAINST the continuance of this project and DEMAND that the East Wing be restored to its latest form, AT TRUMP'S PERSONAL EXPENSE.

There's nothing else to say. This man is a danger to all that we hold dear in this country. I don't even recognize the USA as it was when I was growing up and raising my family.

Please restore an East Wing that is modernized with a secure entrance and appropriate offices as it has been used in the past. It should be a natural extension of the White House in appearance and use. If a ballroom is to be built it should have its own footprint away from the White House with all of the customary planning and approvals and comment periods. Most importantly it should not overwhelm the White House in stature or appearance. The recent destruction of the existing East Wing was a betrayal to the American people and American history by a revengeful demented man.

Trump has set about destroying American history and working to put his name on every historic building (Kennedy Center) and his desire to remodel golf courses where previous presidents golfed and then put his name. Demolishing our historic East Wing is a sin to America. Building a gaudy ballroom where Trump will also put his name is a complete waste of taxpayer money. I believe that his rich friends will not foot the bill. Just another Trump lie. Trump lies, cons and deceives without an ounce of guilt. The modernization of the East Wing by the Trump administration is a travesty.
The Trump administration seeks to use taxpayer dollars on a completely unnecessary "public" project during economic and social turmoil, and add his name to another building to solidify his legacy -- and destroy the architectural integrity of the existing White House while at it.
Shame on Trump and all those who work as his minions.

I lived in a historic preservation district in Buffalo , N.Y. during the 1980’s . My husband and I were required to tear down a porch we were rebuilding and submit plans to the historical society . They turned down our original plan and suggested something more simple and in line with the original home . Although it was frustrating we were happier with the second plan .
I don’t understand how the President or his cohorts didn’t realize they were in a historic building and subject to the same rules governing all Americans . I’m also suspicious about the funding of the project and given the dire lack of housing for most Americans am against spending our tax dollars on these extravagant renovations .

As a tax-paying voting American citizen, I oppose the spending of $300 million on this project. This razing of a portion of the White House was initiated unlawfully, without even seeking proper authorization, permits, or design review.
In no way is this a modernization project but part of the erasure of American history, especially American history that does not conform to the views of this administration. I ask that this project be canceled, and the East Wing rebuilt and, as much as possible, restored to its former design.

The proposed additions to the White House violate the most fundamental principle of the stewardship of notable and historic settings by upstaging the historic building and landscape. The White House and immediate grounds should be treated with the utmost care and sensitivity in a public process worthy of the significance of the resources. The present progress renderings show a building completely out of scale with the setting and cloaked with a classical expression that is inappropriate for a structure that should have a supporting role on the site.
The process has to start over with a thoughtful discussion of a program which will accommodate large gatherings in an indoor space while also respecting the significance of the existing building and site. I believe there is a solution to provide the requested space in a respectful manner if three principles are opened for discussion:
1. Reset the program for a space that accommodates 650, rather than 1,000 guests, or show that the larger capacity is absolutely essential.
2. Align the major program elements with the ground level, rather than first floor. This will preserve the East Room and allow drop off and pickup on the same level as the events. It will also avoid the numerous monumental stairs in the present design that would hardly be used.
3. The language of the classical expression should relate to the architecture of the early Republic, not Imperial Rome. Monumental colonnades and portals which dilute the effect of the north and south facades of the White House should be avoided.
It’s not too late to design and build an extension worthy of the setting.

I am deeply opposed to the East Wing "Modernization" Project. Aside from the disproportionate design, my opposition is based on my belief that the White House is the people's house and doesn't not belong to any individual who resides there by right of office.

No President owns the White House! The people's business is conducted at the White House. To destroy the East Wing in order to erect a monstrous sized ballroom does not serve the people's interest. An occasional party or reception for the contributors, elites, or foreign dignitaries has been satisfactorily presented without the need for a hideous gilded arena sized structure that will lay idle for the vast majority of time.

If the Commission proceeds with this venture, I hope that they insist on a design that can be retrofitted to be converted to

business offices when supporters of the project or future residents of the White House admit that it is a waste of space needed to conduct necessary work in support of our government.

Thank you for this opportunity to submit comments concerning what is being referred to as the East Wing Modernization

Project. Given that the East Wing was summarily bulldozed, "modernizing" it has become necessary. You use the word modernize and it will be a good thing to update the wiring and make the new wing ADA accessible wherever possible. We're told there were structural and mold issues involved. There were other ways to have mitigated those issues but the bulldozer has made those points moot. As regards the exterior dimensions and the architectural style for the Peoples' House it is imperative that those aspects be restored to what they had been so as to preserve the balance and dignified elegance that the White House has always been known for. Imposing but not ostentatious. Nothing gaudy, flamboyant, or reminiscent of the regal. It is an emblem of democracy not aristocracy. The proposed gargantuan expansion of the East Wing to include a giant ballroom would totally distort the building. If a ballroom is needed (not clear at all that it would be), that should be constructed elsewhere in the city. To the extent possible, restore the historic nature of the building, such as the East Colonnade. Not sure if this is within your purview, but the soliciting of special interest funds to pay for the rebuilding is highly problematic. Hoping the American peoples' opinions will factor significantly into the rebuilding of this demolished wing of the Peoples' House.

I agree with the following points made by members of the American Architectural Historic Preservation Community in a letter to Mr. Shalom Baranes FAIA of Shalom Baranes Associates Architects dated December 11, 2025 addressing the destruction of the East Wing of the White House and the impending design of the proposed new ballroom to replace the East Wing.
“The plan to build a structure that is twice the size of the White House Central Mansion and immediately adjacent to it will forever diminish its significance as one of the many important axial focal points in Pierre Charles L'Enfant's plan for the District. Symmetry drives the effectiveness of the District’s Plan. The White House itself respected and emphasized this symmetry with its own design. The size and scale of the West and (and now demolished) East Wings respected the Central Mansion and did not disrupt its significance as the focal point in the north/south axis from the Washington Monument.
The scale and location of the proposed ballroom creates an extreme imbalance of the White House. It would reduce the Mansion to the “tail wagging the dog”. This is untenable and should be stopped.
The argument that there is a “need” for an enormous national ballroom, if it must be so, can be met elsewhere just as other public needs over recent decades have been fulfilled with museums and monuments that do not disrupt the District’s magnificent plan but enhance and strengthen it.”
“The questionable action of soliciting donations from wealthy corporations and individuals to finance this out of scale, inappropriate ballroom is quid pro quo for those who donate.”
Sincerely,
Jeffrey Boord-Dill

There are processes to be followed to maintain our history. This was not the case for the Rast wing of the White House. Procedures and consultations that could have prevented the demolition of the East wing were ignored and the destruction completed. I want to see the east wing original design and scale rebuilt to preserve our national heritage with engagement from the proper historical preservationists and procedures executed by those protecting our national heritage.

I am writing in opposition to the proposed White House ballroom project, as currently designed. I believe the ballroom was hastily and insufficiently conceived, resulting in a project that is out of scale to its location, and more importantly, contrary to the cultural and historic preservation norms and priorities of the federal government, the nation and the American people.

Specifically, I am concerned at the choices made regarding disruptions to the symmetrical, semi-circular path that receives visitors to the White House. Aerial views of the project site indicate that the new ballroom will intrude into a historic space like a malignant tumor.

I am also concerned by the hasty process by which the design has been developed—with little time for analysis, limited exploration of alternatives, and no community ascertainment or criteria by which design choices might be reasonably evaluated. I fear this slip-shod design process, with questionable accountability, would not pass muster in any other local, state or federal jurisdiction, and has put into motion a project that is at risk of failing spectacularly in its implementation. Please reconsider.

For the record, I have recently retired from a career spanning more than 40 years, working variously in fields of historic preservation, art museum administration and higher education, and my comments reflect the knowledge and experience derived from my many years of on-the-job exposure to historic preservation issues and projects.

During the final year of my work, as executive director at the Sam and Alfreda Maloof Foundation for Arts and Crafts in Rancho Cucamonga, California, I was responsible for managing a $320,000 Save America’s Treasures grant administered

by the National Park Service. These funds, provided in support of a roof repair and replacement project for a historic home, were locally matched, and essential to one community's efforts to preserve an important and irreplaceable local cultural resource.

From start to finish, our project took seven years, including reviews and approvals by architects, engineers, city planners, the California State Historic Preservation Officer, careful planning by smart and experienced contractors, and fundraising. Based on my experience with this one federally funded grant, it is inconceivable to me that such an enormous, sensitively located, complex project as the proposed ballroom could be rushed as it has been to a successful completion. Please slow down and do it right.

Finally, I believe the budget for the project is excessive in consideration of other national priorities for historic preservation. To me, $300 million invested alternatively in an endowment for continuing upkeep of existing historic resources located in communities across the nation would offer far greater value and return on investment to the nation at large than would a single new ballroom at the White House. The Historic Artists Homes and Studios program of the National Trust is, for example, currently represented in more than 50 communities from coast to coast, together serving more than a million visitors per year. Even this enormous ballroom located in Washington, D.C. could never approach such numbers of visitors served, jobs created, culture shared or community economies enriched.

Respectfully,
James Rawitsch

What's happened to the East Wing is an abomination and an insult to every American. How dare this current administration ignore rules, regulations, and the LAW to destroy it? It's despicable that its destruction was based on a need to soothe the megalomaniacal ego of the current president. Do not insult the nation's intelligence by falsely labelling this the "East Wing Modernization Project."

No ballroom. America doesn't need it.

Restore the East Wing to its former glory - and actual usefulness.

The White House is a public house and any changes should be approved by the majority of we the people. The sheer fact it has been destroyed is a visual reminder of what our current “leaders” stand for, destruction and chaos. Of all things that need to be addressed in this country, the east wing renovation is at the bottom of the list. It should have been left alone, like due process, voting rights, and women’s right to choose. I am against our tax money continuing to be used on vanity projects and killing people. Stop destroying and start building up.

Donald Trump had no right to tear down this wonderful historical monument. It is a testament to our heritage as the United States of America. It is a desecration, a disrespect to the people, and to the history that created it. It must be stopped and rebuilt. We the People own that building and it represents us in so many ways, and it represents our history and respect for the United States of America. A new ballroom was not needed in this place. There are other venues in Washington that can be used for those purposes. This building should be treated with the utmost respect for our heritage and our love for the monuments to our country and democracy. This tear-down represents everything that's going on in this government at this time-a total lack of respect, ignoring the needs and wants of the people, elevating a very unpopular President in a very unpopular movement. Please do not let this continue. It must be rebuilt to show our heritage, pride and respect as the monument to Democracy that it has always been.

I oppose the disgraceful destruction of our White House for Trump's vanity project. It is ghastly that one man thinks he has the right to destroy history and the people's house on a whim/without obtaining the required authorizations. Trump will undoubtedly be remembered as the single worst president in American history and will be a stain on this country forever the same as Hitler is to Germany. Just as the statutes and monuments to Hitler were torn down so undoubtedly will be every monument to Trump. His name will be cursed and reviled not just in America but abroad. So building any building which will be associated with him would be a waste of money as it will undoubtedly be razed to wash away the stain of him and the harm he has caused so many. He should be required to personally pay to rebuild the historic wing he tore down without the right to do so.

The White House is a National Historic Landmark and National Park, owned by the American people and stewarded by the National Park Service. Before nationally significant places are permanently altered, the public deserves an opportunity to be heard and to help shape decisions that affect our shared national heritage.

The White House is public property MrTrump is just a tenant with an obligation to the owners , the American People, to respect its history. It is deeply disturbing that he destroyed irreversibly this public monument on a whim. The architecture should be a choice informed by professional art historians and public comment.
Mr Trump’s tastes are gaudy and garish, reflecting , Atlantic City and Las Vegas glitz . He can build his library in that style but not the White House.
An investigation should be conducted to determine if he broke laws , civil or criminal in the destruction of the wing. If he did he should be held accountable . Even if he claims immunity and is never charged it is important to create an historical record. Immunity does not protect him from historical judgment.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic

design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

While I recognize that many former presidents have made structural modifications or updates to the White House, there has never before been a president so brazen as to take a bulldozer to this historic building without any permits, environmental review, architectural review, and without any authorization, as if it were his own personal property. The White House belongs to the People of the United States. There is neither precedent, nor authority for any president to treat this national landmark as their own personal property. I respectfully request that this administration be ordered to restore the East Wing to its prior design, at the personal expense of the individuals who ordered its destruction.

I watched with great dismay and sadness when the East Wing of The People's House was razed to the ground with no warning, no process, and no regard for its great historical significance to the American people and to our shared history.

What steps were taken to preserve the historical artifacts in the East Wing? Where are they now? Who catalogued and prepared them for storage? No information has been provided with regard to these questions.

The new ballroom addition has not been reviewed by the proper historical entities to ensure that it will be in keeping with the style, comportment, and representative purpose of our American values.

More significant is the process with which this project has been approached. No single man or woman should have the power to direct the demolition of any part of the White House without input from Congress, appropriate historical organizations, and the American people.

THIS SETS AN UNTENABLE PRECEDENT. Who is to say another President could -- without warning -- direct the demolition of the entire White House itself, or perhaps any other United States monument cherished by the American people? If we allow this to go unchallenged, we could lose some of our most beloved symbols of freedom and history.

Wartime Controversy: The construction of the East Wing was controversial, with Republican opponents calling it a

wasteful expense during the war, Under the current administration, government was slashed to bare bones under the appearance of reducing government spending. The wrecking ball disrupted just about every office of government.

The wrecking ball has been exercised on the Rose Garden..turning it into a lack-luster resort-style picnic area. The ball was then turned on the East Wing with a vision that DOES NOT represent the American people. The White House is "the people's house". Within the walls, thereof, is history that has been transformed and updated throughout it's standing time. What has not happened, I the compromising or "white washing" of history..

This portion of the White House served the First Ladies and as with removing the importance of women thru history from our military archives and museums, it would seem we have now lost the last vestige on the importance of so many First Ladies Eleanor Roosevelt used the wing for acts of activism; Lady Bird Johnson launches Head Start and to expand the key roles of her staff in organizing social and preservation work; Rosalyn Carter moved her office from the "living quarters" to the East Wing, thus unifying her office with the staff who diligently served her. Many initiatives sponsored and supported by many first ladies were launched!

Historically the East Wing should be made whole again in the full image of the room it was. If our government has been pared down to reduce the deficit and social support of the people, a ballroom such as has been proposed WILL NOT represent the people of this country. It will be a representation of a division of classes; the minimizing of the years of work and social projects launched by women who held this country in awe and wonder and the people of this country as it's best asset.

Our nation's public buildings belong, yes, to the public. They should not be changed or destroyed or significantly altered by individual whim and they should not be changed, destroyed, or significantly altered without a period of process, comment, and review. These are our public buildings. They carry our shared public history and symbolism. They belong to the nation, not to any current occupant. The current occupant is merely the steward of our public institutions. To call the this a "modernization project" is cynical at best. The East Wing must now be "modernized" because it was irreparably damaged without due process. Our nation was founded on the principle of due process and due process was owed to the East Wing of the people's house. The only way for the public to get redress now for the damage to our house is for a thorough, careful, non-partisan review without preconceptions.

It is unconscionable that the destruction of the East Wing was carried out so cavalierly and by bypassing all normal and REQUIRED oversight. East Wing Modernization Project is a misnomer as the East Wing has been completely destroyed. Nothing less than its complete restoration is acceptable. And the cost of the restoration should be borne by the person who destroyed it. Never again will Americans be able to walk the exact halls that so many historic figures trod, but constructing an exact replica would at least remind us of what was lost and why we should never allow this to happen again. We must be vigilant in protecting our built history.

The ballroom is out of character, out of scale, and out of control. It should not be allowed to be built on the property.

While there may be a need for a larger gathering space at the White House, there are ways to accomoplish that end that will blend seamlessly with existing structures.

This is "The People's House" and it must never become a palace for, or monument to, a single individual.

Building a ballroom in its place is an insult to we the people. We don't want or need a ballroom that 99.9% of the country will never see.

The design is another desecration--ruining the historic symmetry and its unassuming design.

I am against building the ballroom addition. The East Wing was distroyed before getting approval and before anything could be done to stop it. Trump did it because he has no regard for the White House or our American history. He feels he can do whatever he wants. The White House is not his house - it's the American people's and we want the East Wing restored.

The ballroom that Trump wants to build dwarfs the White House. The excitement people feel when they go to see the White House and the history is awesome. Don't let this would be dictator ruin America's house. Say no to the ballroom and make him retore the East Wing.

I am concerned that this historic structure was razed to the ground and it’s only now that permission is being sought to build a ballroom that is going to dwarf current adjacent buildings. It seems to be a complete disregard for the law and I don’t see why this shameful behavior should be rewarded. I suggest rebuilding the structure that was already there, in exactly the same style but to take the opportunity to modernize utilities.

If I decided to knock down my own house and just build a McMansion, I don’t think I’d get very far.

Thank you for the opportunity to comment.

I object to the East Wing Modernization project. It is not the modernization of an existing structure as that structure has been demolished. It is the replacement of a historically significant structure with a building of less functionality and ungainly proportions that diminishes the overall appearance and functionality of our national "residence". I support the building of an east wing that compliments the overall esthetic of the White house and restores the functionality of offices, gathering and entertainment spaces needed for the comfort and dignity of visitors.

As an ordinary citizen, I was horrified to see the destruction of East Wing of the White House. Please REJECT the

proposed ballroom construction, an abominable Trump vanity project. We want to be proud of the "People's House", not feel disgust or shame when looking upon it! Saving democracy is important to most of us! The Trump ballroom is a symbol of oligarchy, corruption, and kleptocracy. If built, will it be our Berlin Wall?

I am appalled that the Trump administration felt they had the right to demolish the East Wing to create yet another tribute to himself. I object to the building of a giant ballroom on the White House grounds, even if it is paid for by his wealthy cronies (which I question if the money is actually really available at this time). There is not a need for such unnecessary opulence, especially when it means the destruction of a historic building. While I realize that you have no choice but to rebuild the East Wing, the ball room is excessive, expensive, and not in keeping with the concept that the White House is a building for the people, not for the elite.

If I had my way, Trump would be prosecuted for the destruction of government property for destroying the East Wing without going through the necessary channels (permits, blue prints, environmental studies, etc.) Likewise I would prosecute the construction company that demolished the East Wing, again, without going through legal steps like pulling a permit.

Functional, reasonably priced, and accessible to the people of this nation, with modernization of electrical, water, and safety measures...that's what should be created. And Trump's name should not be anywhere on the addition!

Trump said he loved the White House and wouldn’t touch it. The next thing you know ,the East Wing is laying on the ground. American history razed- no proper authorization, permits, or design review. It’s not his house to destroy, it’s the people’s house. It’s only a gaudy monument to himself which will probably exceed the estimated cost and taxpayers will be expected to pay for it. I want this project cancelled and the East Wing rebuilt and restored

I do not support Trump's current vision for a ballroom addition to the White House. This is the People's House, and as

such, we should have a say in the design of any additions. He was allowed to destroy a piece of our history without any input from the American people, and he should not be allowed to continue to change this historic landmark.

I strongly object to the allocation of $300 million for this undertaking, which moved forward without the necessary approvals, permits, or proper design oversight. This is not a simple renovation — it amounts to the destruction of a significant piece of our nation's heritage.
I am calling for this project to be halted immediately and for the East Wing to be reconstructed and restored to its original architectural character. The rule of law applies to everyone, without exception. Allowing this to proceed without accountability for those who bypassed legal requirements undermines public trust and disrespects every citizen who follows the law.

I oppose the demolition of the White House East Wing because changes to a national historic site should occur through transparent review, not unilateral action. Additionally, this $300M project is being funded by large private donations at the behest of the sitting administration which creates at the very least the appearance of influence-seeking or preferential access, and undermines public trust.

The East Wing was destroyed to make way for a new state ballroom funded largely by private donors, with demolition beginning before review by the National Capital Planning Commission and amid unresolved preservation concerns.

I am asking for clear disclosure of donor funding, environmental and design review, and public accountability. I am also asking that the East Wing be rebuilt in a style and scale similar to what existed previously, with all artworks returned to the building. I understand that modernization efforts needed to be made, and am feel that electrical, lighting, etc., changes, which will make the building more efficient and up to current code are acceptable, but to materially change the building is erasing history.

The White House is a shared civic symbol, not the property of any one administration, and major alterations should follow the same oversight standards expected of every other federally significant project.

To Whom It May Concern,

I am writing to ask that you exercise your authority and your obligation to the American people as you consider the proposed ballroom addition to the White House. The oversight and integrity of the NCPC over more than a century has ensured that our nation's capital remains distinct in terms of both historical importance and aesthetic quality. Washington D.C. is one of the most handsome cities in the world as a result.
The proposed ballroom is an affront, an insult added to injury following the destruction of the East Wing of the White House. This 90,000 square foot structure is grossly inappropriate in size, scale, and proportion and would visually dwarf the White House in a way that is nearly unimaginable. I concur wholeheartedly with the position of the National Trust as stated in their letter to the CFA regarding this project.
The wanton destruction of the East Wing, the heedless rush toward constructing the over-sized monstrosity of a ballroom, the utter disdain for following the law and going through proper channels - these things have had a visceral effect on me and millions of Americans. We are sickened by it. The White House is OUR house, our history, a reflection of who we are to ourselves and the rest of the world. The idea that one individual, without oversight or accountability, without a shred of respect for history or the importance of place, can cause such irreversible harm is repugnant and unacceptable. I implore you to intervene. Thank you for your good work.

Sincerely,
Leslie Colley

As a taxpayer, and a US citizen.

I want to see all the blueprints all the money that is coming this fund us so called project.

This project is already well over all estimates.

has there been any kind of study on how much it's going to cost to heat and cool this building and who's paying for all that?

I highly doubt that there's that kind of money being donated that there will be enough funds to build this addition and provide all the extra cost of maintaining this building for the next hundred years.

this building should have never been taken down in any decision to build a new building should have been proposed and went through the proper channels.

at this point this project should be stopped immediately until the complete, blueprints are evaluated environmental impact is reviewed.

based on the few pictures I've seen this monstrosity is going to be bigger than the current White House why would anything be allowed to dwarf the actual White House.

The description is a misnomer. It is the East Wing Desecration Project. The existing wing was wrongfully demolished and the Jacqueline Kennedy Rose Garden was destroyed at the same time. This project is operating under the “Act first and then ask forgiveness” but no forgiveness should be granted. The White House is the people’s house and is not the personal property of any president. The demolition was not only done without any review but the proposed design is completely out of scale with the White House and destroys the integrity of the remaining building. Nor has the need for the mammoth addition been demonstrated. The project should be disapproved with orders to rebuild the East Wing as it was before the demolition and to restore the Rose Garden at the sole expense of Mr. Trump and his donors.

I feel what has happened to the Whitehouse East Wing is an atrocity. Demolishing part of a federal historic building without permissions is an affront to the American people. I absolutely oppose this entire project, including the illegal demo that has already happened. The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

This issue can not be undone, as the same wrecking ball that's blasting our democracy has already done its damage. But reining it in from the current occupant's self-aggrandizing wishes will return a modicum of power to the people who own his temporary home.

I oppose the spending of $300 million on the East Wing project (aka destruction), which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I am outraged by this destruction of American history without permission, process, or respect.
I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans. Imagine if all presidents took a wrecking ball to buildings they did not like! It is an affront to U.S. history.

This project was initiated without authorization, permits or design review and should be terminated immediately.

This “modernization” project is an abomination to an historic building that is meaningful to many Americans. Somehow the East Wing was demolished without going through any proper process. The addition of a giant ballroom is unnecessary and wasteful. As a citizen, I object strenuously to this and want the East Wing restored at the Trump family expense.

The :East Wing Modernization Project” is a slap in the face to the American People. The White House is not personal property of the President. It is the People’s House. No one president can “modernize” or demolish any part of the White House without consulting the proper people involved with maintaining and preserving it. It is an historical landmark, preserved as a monument that represents the American People’s highest ideals: the creating of Democracy and the Presidency. To destroy a part of the White House for personal reasons, such as “to build a ballroom,” goes against every person’s ideals and against the laws that were set down. Any other person who would commit such an act, destroying a part of a national landmark, would be prosecuted for breaking the law. President Trump believes himself above such laws. NO ONE, and I repeat, NO ONE IS ABOVE THE LAW! President Trump must be prosecuted for this crime, and charged with RESTORING the East Wing to its original state, as well as charged with the crime of willful destruction, which is punishable by law. I am not a lawyer, but even I am aware that you do not destroy property, PUBLIC OR PRIVATE, and the People’s House is PUBLIC PROPERTY FOR THE PEOPLE!

This project was not authorized or properly reviewed. It should be halted immediately and the building returned to its former condition. The White House belongs to the people. It was wrong that the construction moved forward, destroying history and a national landmark, without consulting and receiving approval from the proper channels. No one man should be allowed to destroy historic places on a whim. Stop the construction. Restore the building.

Contain the size: I would respectfully suggest that the original footprint of the wing be maintained as it is proportional to the building as a whole. There is a long history of symmetry as an element of an important neoclassical building like this; respect its history even while modernizing. The planned ballroom would overwhelm the rest of the property size-wise. It would look lopsided. It would draw attention from the main portion and, perhaps, DEVALUE THE ACTUAL HOME of the presidency, which I don’t believe our leader would like. Quality of workmanship, not quantity (in size), should be the goal of any addition, in order to stand the test of time. Thank you.

The destruction of such classic architectural building never supported expect by a few close associated of Mr. Trump. The costs for operation and maintenance estimated or shared. The lose of history housed in the East Wing defended. The avoidance of legal, historic, established channels of approval and concern for aesthetic and historic appropriateness explained. I have been sickened and appalled as I’ve watched the current administration tear down the historic East Wing of the White House. I lived in Northern Virginia for 27 years and worked many of those years in D.C. Every person who visited us from outside the area was treated to a tour (by us) of Washington DC, the Monuments, the Museums, and ALWAYS, we took them to the White House. The PEOPLE’S House. I still get tears in my eyes and a lump in my throat as I write about how important all of those sites are to me. I can’t say this strongly enough: please do not allow this destruction of the PEOPLE’s HOUSE to continue. The current government is a temporary one and cannot be allowed to totally destroy our history during its reign. We, the American people, will vote in a new administration as soon as possible. It will be an Administration that honors our precious democracy and history. In the meantime, we have to rely on you not to allow everything to be destroyed and replaced with a “ballroom” in the current president’s image. Please agree ONLY to

approve a complete restoration of the East Wing of The White House. Deny the plans for the abominable design of a Mar-a-Lago style structure that dwarfs the PEOPLE'S HOUSE and disrespects our National Heritage. Thank you.

The proposed structure decimates the importance of the main White House. This is especially egregious given the 250 year anniversary of our country. The East Wing was destroyed without following the required procedures. This is a pure vanity project, that will remain empty the majority of the time. At least the old east wing produced things that were valuable to Americans. What is proposed is a travesty.

I as a lifelong American citizen do not want this ballroom, what I truly wanted wasn't even considered in the first place, it was the preservation of the historic East Wing. I understand renovations and upgrades that are historically appropriate to these buildings that mean so much to the American people. This administration has trod on our rights, misappropriated our tax dollars for purposes that I find appalling, but the destruction of the Rose Garden, and the East Wing was unconscionable. Please stop this. Those buildings and what they stand for spread back to our history. They mean something, this country means nothing to Trump other than something to pilfer from. Please listen to the people and remember the history of these the United States. We don't need a ballroom, we needed a country that we can be proud of, and at the moment that is sadly lacking.

Our founders were faced with two models for government. In one, in England and, particularly, in France, the entire purpose of the government was to protect and increase the wealth and power of a ruling class. The other was a government by and for the people. They chose the latter, and the neoclassical architecture chosen for the capital reflected that choice by recalling a time of ancient representative government. Rather than imitate the architectural style of London & Paris where larger was always preferable to smaller and more ornate preferable to less, simplicity and reasonable size in architecture reflected their view of the role of government. Trump is incapable of seeing that symbolism, and seeks to destroy what he does not understand. Massive buildings and giant triumphal arches have represented the megalomaniac visions of Hitler & Stalin, not the vision of the American people. Trump must be stopped to preserve the critical architectural symbolism of Washington and its environs.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

The East Wing was destroyed recklessly and illegally, with zero regard for the public's input nor that of any appropriate authorities. Furthermore, there was no respect for the public costs that would be incurred at a time when we are cutting payments to the most vulnerable people in the the U.S. and abroad.

In my opinion, the individuals responsible for this travesty should reimburse the public coffers for all monies related to the demolition of the East Wing, including any costs related to rerouting traffic, having extra security, or any other costs associated with the demolition. Furthermore, not one hammer should be lifted until those responsible for the demolition of the East Wing have put forth the entire cost of the reconstruction, in an irrevocable form of payment.

Additionally I would hope that extensive research is being done to determine whether in fact the White House needs a ballroom big enough for 1,000 people.

My family has lived within 5 hours of Washington DC since the early 1700s. This is not guesswork, this is documented. We have owned land in the American colonies, documented, since the 1600s. My immediate family has worked on Capitol hill as congressional staff, From the 1950s until the 1980s, my immediate family has visited the White House since the late 1980s.
My heritage, and my family's tax paying status since the 1700s, depends on the rule of law, government stability and constituents' input as to our revered structures. A segment of our family line fought in EVERY SINGLE WAR since the Seven years War (French & Indian) from NY, Va, NC & TN. I was born on an Army base. I have contributed to this country by working in various public industries for over 40 years, and 1000s of hours of volunteer work and by voting in every election since 1976.
So, when I say as an very early line descendant of immigrants, who helped build and PAY FOR our institutions for 100s of years -- to include
The Whitehouse ! I am requesting in a respectful, yet passionate way for you and everyone to stop the unlawful changing of our national architectural
heritage history, without congressional review, hearings, and approval. Thank you for allowing our citizenry to give input-- which is of course as it should be.

I am writing to request that the approved design reflect a true recreation of what was just removed, not a ballroom. While I fully support modernizing the structure with updated building materials and current construction standards, the overall design should faithfully recreate the East Wing as it originally stood.

This should not include the addition of gold elements, branding, logos, or any personalized features. The East Wing belongs to the people, and it should be restored in a way that honors its historical appearance and public character.

The goal should be preservation through modernization, not redesign or rebranding.

The original name of the White House was the Executive Mansion. It is the house of the President and his family, the office of the President and his staff and the ceremonial site where the nation welcomes its most important visitors. While significant and controversial alterations to the White House have taken place since its construction in 1792, the actions we see today are un-democratic, corrupted and violate applicable law and regulations:
1. It is an extravagant addition which will disfigure the democratic simplicity the White House is meant to embody
2. Was the 2025 Big Beautiful Bill to enrich billionaires done so that these beneficiaries could turn around and finance this lavish expense of 300,000 million now set for $400,000 million and, as we all know it, can only grow during the lifetime of the construction itself? We suffered tremendously with the DOGE cuts to save Federal dollars but in reality the savings are few and rare … It sounds too much like the wealthiest of the nation are returning the President's personal favor to have cut their taxes …
3. It is shocking to see how the normal process has been excluded from this project from the permits to historical standards and zoning rules, code requirements, and Congress authorization. If I want to demolish my garage to enlarge my kitchen, I must go through a myriad of administrative processes which are costly and timely. The law, rules and regulations must be obeyed by everyone.
For these reasons, I urge you to disapprove this project.

Trump illegally tore down the East Wing and the "modernization" project should not be allowed to be continued. It doesn't matter that it will supposedly be funded by private donations. The fact remains that the White House belongs to the People. Trump's actions are like having a long term renter in your Airbnb, which happens to be a historic landmark, and ripping down part of the building because they simply don't like it and would prefer a big party room. Would/should that person ever be held accountable? Of course they would! The East Wing must be restored and preserved as part of the People's house, not as Trump's personal playroom.

I would like to thank you for seeking public comment. It is nice to see some elements of our democracy still working.

My opinion is the ballroom project must not move forward for the following reasons.
1 - This did not come from a public need or desire. It is the desire of an autocrat that just wants to put his name on it and brag about doing so.
2 - I am an architect and can see, along with you, that the approach has not been correct. When was it programmed? Who programmed it?
3 - BUDGET. It is already apparent that there is no budget or parameters set for a budget. Who set's the budget?

I appreciate your attempt in bringing this dictator under control. Can you also let the taxpayers know how we are going to recoup from the destruction of the east wing please?

Thank you,

Brett

To say I was disappointed to see the demolition of the East Wing of the White House last fall would be a complete understatement. This project appears to be a vanity project to satisfy Mr Trump's colossal ego. The demolition also appears to have taken place without following proper Congressional approval.

I write to ask you to stop this project. The east wing is a national, historic treasure, and should not have been demolished. Please restore it.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

This has been a disgrace to our iconic White House. I am devastated that I will never get to see Eleanor Roosevelt's office. The East Wing should be rebuilt as closely as possibly to match what it previously was. Donald Trump does not deserve a ballroom. No other president needed such a lavish display of wealth. He works for us, not the other way around. We do not want this ballroom.

I am opposed to the building of a ballroom where the East Wing of the White House once stood. Tearing down the East Wing is a blatant act of disrespect for American history. This is The People's White House and does not belong to Donald Trump. He has not followed any kind of protocol in making changes to the White House and he should not be permitted to complete the ballroom.

The White House is not the property of any president, but this president is acting like it is his and his alone. The complete demolition of tge East Wing seems to be a crime.

I am deeply skeptical of the underground work he has planned, and what I've seen of his proposed ballroom is unattractive, unbalanced in size with the other buildings on the property, and does not match the clean and understated elegance of other buildings at the address.

Please assert whatever authority you have to prevent the wasteful construction of a gaudy monstrosity that does not conform with the style and tone of our other federal buildings in our Capitol area.

The "People's House" belongs to the American people - past, present and future. As such, those who seek to maintain & "improve" it must approach any alterations with humility and with allegiance to the national interest above all else. I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. In its inception our American Democracy was not founded on the enshrining, glorifying and ceding of power, but on the will to defy and democratize it. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be a betrayal of all law-abiding Americans and an affront to our founding values and national history.

The current administration’s lack of understanding and therefore appreciation of the historical importance of our buildings -notice I say ours not his-is more than disheartening. The total disregard for process has destroyed a perfectly fine building that served an important role, especially for the leadership of our First Ladies. While it may have needed some renovation, or even a bit larger room for White House events there is no excuse for its complete demolition. And without permission! The White House is not a palace -it is the American People’s House and we do not need the kind of ballroom that is being considered. Please regain control of our buildings so that one individual cannot make decisions that undermine at the least and destroy at the worst those structures that stand for what America is about- our democracy.

It feels incumbent upon us to push back after the east wing was demolished without proper vetting and process. I would think that rebuilding it to represent our history as it was previously used and recognized would be the most appropriate approach. A huge, very expensive ballroom does nothing to enhance the atmosphere, agenda or historical significance of the White House. This project should restore, as much ss possible, all the White House has stood for historically, to continue that tradition into the future.

Demolition is something that should be avoided at all costs. If it must happen to the “People’s House” it should be the last resort and decided in a representative and democratic process. Designs for replacement should be completely specified and approved PRIOR to any construction taking place. I’m a contractor that has worked on historic projects and this project is a travesty for the American people.
If something was going to be built after all of this perversion, it should be sympathetic and subordinate to what is already there.

I am writing to formally express my opposition to the $300 million project currently planned for the construction of a new ballroom. This project was initiated without proper authorization, permits, or design reviews. Proceeding without addressing these legal breaches would be an affront to law-abiding citizens.

I request that the current ballroom project be canceled and that the East Wing be restored to its original external design. While the interior can be updated to meet modern needs, the exterior MUST be rebuilt as it was.

Once restoration is complete, I propose the construction of a smaller ballroom designed to complement the surrounding architecture. There is sufficient space for this south of the rebuilt East Wing along E. Executive Ave NW. A well-proportioned addition featuring a front portico that follows the curve of the Oval with a westward-facing glass front would be a far more appropriate and tasteful alternative to the current oversized gaudy design.

To the Commission:
The proposed plans for the "East Wing Modernization Project" (aka the White House Ballroom) are vastly out of proportion to the existing structure. They disregard the history of the White House and its grounds; what is proposed will dwarf the White House and the West Wing complex. Demolished hastily, with no regard for process, planning, or public input, the reconstruction of the East Wing should only proceed when the project has been completely re-visioned to reflect idea of "the people's House," in a scale that respects the architecture and the symmetry of the remaining buildings. A 50,000 square foot structure should be sufficient to meet the programmatic requirements of the White House; if the current President is in need of a 90,000 square foot gilded edifice, I would respectfully suggest he build it at his own expense, on one of the many properties in his vast real estate portfolio.

Respectfully,
Christine G. Price

I comment to register my total and complete opposition to the addition of a 90,000 square foot ballroom to the White House. This planned addition will overwhelm the White House and disrupt its classical design. In addition to being a totally frivolous expenditure at a time when so many in our country are suffering, I am concerned that the Trump administration is seeking private funding, much of which is undisclosed and apparently will remain so. This "pay to play" funding scheme raises real risks of corruption and undue influence and is antithetical in a democracy. Please vote "no."

The precipitous -- without sufficient notice or congressional approval -- of the East Wing was an abomination. Its

replacement should not do further injury. My main input is that the replacement wing should match, as closely as possible, the footprint of the former east wing, and its classical architectural style. The ballroom should not be too large nor too gold because the people's house should not be ostentatious, nor should it be the site of frequent lavish balls thrown at taxpayer expense. A large ballroom should also be avoided because it would create an eyesore and threaten to eclipse the more restrained beauty of the rest of the White House compound and its surroundings. White House balls should generally be modest and tied to specific diplomatic functions such as the occasional visit of foreign dignitaries. We do not need to be able to present the people's government as a monarchy that throws large and lavish parties, nor should we be senseless of the outrage of spending large amounts of money -- whether from taxpayers or private fundraising or bribes -- while Americans go without health care or adequate food and clean drinking water. Make it modest, make it restrained, make it conform to the existing classical style and footprint.

I am confused by the name of the Project. How can destroying the Country's East Wing be a modernization Project when The President destroyed it and wants a Ballroom bigger then the wing was? He had no business doing this and should be responsible for rebuilding the structure (at his own expense - and you can't tell me doesn't have the money) as it was with current building codes. The United States does not need a huge ballroom. This is not the 1800's or early 1900's time period that our current President wants!!! And even he knows that you need to have the proper permits and approvals before you start any work on a house or building no matter where you live in our Country.

No. No. Absolutely not.

This is a vanity project by an unpopular president attempting to impose changes on a building he openly disdains. It is not preservation, it is not improvement—it is ego.

This gilded spectacle is an effort to stamp personal taste, excess, and resentment onto a public landmark that belongs to the people, not to one man’s insecurities. It should be rejected outright.

Beyond being aesthetically offensive, it is fiscally irresponsible. Taxpayers will inevitably pay twice: once for the damage done by this tasteless intervention, and again when a competent, thoughtful designer is brought in to undo the harm and restore dignity to what was defaced.

Public architecture deserves restraint, respect, and stewardship—not ego, gold leaf, and grievance.

currently proposed and urge the Commission to reject

the plan until proper legal processes are followed.

This project began with the demolition of an 123 year old

structure before obtaining required approvals from this

Commission, before completing mandatory

environmental assessments under the National

Environmental Policy Act, and before securing

congressional authorization required by federal statute

for construction on federal parkland in Washington. The

fact that demolotion has already occurred does not

excuse these violations or create a fait accompli that

forces approval

The funding mechanism raises serious concerns about

institutional independence and conflicts of interest.

I oppose the spending of any money much less $300 million or more on this "modernization" project, because it was initiated without the proper authorization, permits, or design review. In the United States the rule of law must rule or else our country becomes nothing more than a fiefdom run by an autocrat. For one person to be able to raze a sizeable portion of a historic, public building would be tantamount to ceding the law for a vain whim which is not a true need or vetted requirement. The public deserved to have a say. Congressional representatives should have been able to weigh in on the idea and plans and shoud have had to authorize and appropriate that kind of money.

The East Wing needs to be rebuilt to its former design or one approved by multiple stakeholders representing the American people. Stop the current process. Force the rebuild to go back into proper vetting and approval channels. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would insult all Americans.

Thank you for allowing my comments.

In the grand tapestry of American history, the White House stands not merely as a residence for the nation’s chief executive, but as an enduring emblem of democratic restraint, architectural elegance, and the collective will of the people. For over two centuries, its neoclassical facade—designed by James Hoban and refined through careful evolutions—has symbolized a government of modesty and accessibility, unadorned by the gilded excesses of monarchies past. Yet, the proposal to erect a sprawling new ballroom, at a staggering cost of up to $400 million, threatens to unravel this sacred thread. This ill-conceived addition, which has already led to the hasty demolition of the historic East Wing, represents an affront to our heritage, a circumvention of democratic processes, and a misallocation of resources that could better serve the republic. It must be halted, lest we permit hubris to overshadow humility in the heart of our nation’s capital.
Foremost among the objections is the irreparable harm to the White House’s historic integrity. This iconic structure, arguably the most evocative building in our country and a globally recognized symbol of American ideals, has withstood wars, renovations, and the passage of time with its classical balance intact. The proposed ballroom, a 90,000-square-foot behemoth inspired by the opulent halls of Mar-a-Lago and Versailles, would dwarf the original edifice, rising to match its height and commandeering inviolable parklands to the south. Such an addition violates the Secretary of the Interior’s Standards for Rehabilitation, which demand that new constructions respect and not overwhelm historic properties. The demolition of the East Wing—erected in 1902 by the esteemed architects McKim, Mead & White—marks the first major alteration to the exterior in 83 years, erasing a piece of Theodore Roosevelt’s legacy without due reverence. To mar this national treasure for a venue that evokes tsarist grandeur or royal excess is to betray the very principles of equality and simplicity that the White House embodies. As architectural historians have warned, this “bloated, banal, unnecessary, and self-aggrandizing” project risks permanently disrupting the site’s carefully balanced design, transforming a symbol of the people into a monument to personal vanity.
Equally damning is the flagrant disregard for legal and democratic safeguards. No president—regardless of stature or intent—possesses unchecked authority to reshape federal property at whim. The project has commenced without submitting plans to the National Capital Planning Commission or the Commission of Fine Arts, as mandated by the National Capital Planning Act. It lacks an Environmental Impact Statement under the National Environmental Policy Act, denying the public an assessment of its ecological footprint on President’s Park. Most egregiously, Congress has not authorized the endeavor, contravening the Property Clause of the U.S. Constitution, which reserves to

lawmakers the power to dispose of and regulate federal lands. ￼ ￼ By evading these reviews, the administration deprives citizens of their right to comment, turning a public icon into a private folly. Federal judges have already voiced skepticism, likening the funding scheme—a patchwork of private donations—to a “Rube Goldberg contraption” designed to sidestep congressional oversight. ￼ ￼ This is not governance; it is an end-run around the checks and balances that define our republic.

Beyond the legal transgressions lies a profound fiscal and symbolic imprudence. At a time when our nation grapples with pressing needs—from infrastructure decay to economic inequality—diverting $400 million, even through private channels, to a lavish ballroom seating 900 guests is a grotesque misprioritization. ￼ ￼ The existing East Room and State Dining Room have sufficed for generations, hosting dignitaries and events with dignity, supplemented by tents when necessary. ￼ Why indulge in such extravagance when the White House’s current spaces embody the frugality of our founders? This ballroom, with its echoes of imperial splendor, undermines the democratic ethos that the residence should remain “the people’s house”—accessible, unpretentious, and reflective of shared values, not elite indulgence.

In conclusion, to forge ahead with this ballroom is to chisel away at the soul of America itself. We must rally—through lawsuits, public outcry, and congressional intervention—to preserve the White House as it was intended: a beacon of restraint amid power’s temptations. Let us reject this gilded distraction and reaffirm our commitment to history, law, and the common good. The White House endures not through expansion, but through the timeless ideals it safeguards.

I strongly oppose this project. This was initiated without the proper authorization, permits or design review and is an affront to the American People. "Our House" is steeped in history and to demolish it without the proper oversight is a tragedy.

I want this project canceled, and the East Wing rebuilt and restored to its former design if possible. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be a slap in the face to all law-abiding Americans.

Sincerely,

I oppose the East Wing Modernization Project.

This project began without required National Capital Planning Commission approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington.

The $400 million cost is funded by corporations holding billions in federal contracts with the administration approving those contracts.

This creates an unacceptable conflict of interest.
The White House is not private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve construction without following the law and allowing public input.
I urge the Commission to reject this proposal.

Existing structure which was demolish did not go through permitting process. It is an historical structure owned by the citizens of the United States. Any new structure must comply with guidelines for permitting and regulations of historical properties. The proposed new building does not conform to the guidelines, would be out of place in size and design and ruin the White House. The east wing exterior must be rebuilt to conform to the size, design and quality of the existing remaining building and previous east wing. It must not be of a significantly larger footprint or height. The existing plans must be denied, new plans must fit construction guidelines for restoring an historic building. I am opposed to the existing plans.

While expanded event space may be needed, additions must respect the historic scale and design of the White House. At 90,000 square feet, the proposed ballroom would exceed the size of the 55,000-square-foot Executive Residence. Additions to historic properties should be compatible in scale and subordinate to the original structure. Commissioners need to hear directly from the public. The American people deserve “an opportunity to provide comments and shape the project."
I do not support anything this large. The size of the former East Wing was in the scale and style that worked well.

I VEHEMENTLY oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled.

1. President Trump stated he WOULD NOT TOUCH the East Wing and then he, without telling the American people, tore it down completely. The East Wing needs to be rebuilt and restored to its former design AND President Trump needs to pay for this rebuild out of the millions, if not billions, he has made during the one year in the White House.

2. Presidents come and go and are residents of the PEOPLE’s House. WE own the White House! Our taxes have pay for this. We shouldn’t have to pay for the damage any resident does to it. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

3. We don’t want an enormous ball room which would dwarf the White House either. We have roads, bridges, and other infrastructure that is in desperate need of repairing and rebuilding. All of this needs doing, but not this!

We have no kings. Trump's decision to do whatever he wants whenever he wants flies in the face of everything I was taught about the three branches of government and their checks and balances. He has been allowed to grab too much power. His sudden demolishment of the east wing, in spite of his original promise to not touch the existing structure, seemed designed to keep anyone from stopping him. He should have obtaned the required approvals first. I am so thankful that he is finally being challenged.

I write to oppose the replacement of the East Wing of the White House with a giant ballroom. The East Wing should never have been abolished -- it was illegal to do so and does not represent the will of the American people. The money used to pay for the demolition -- our tax dollars -- should be repaid, and the East Wing should be restored to its historical design with the use of new money secured from fines against those who pushed and allowed this travesty to happen. We deserve accountability for the absolute outrage of razing the East Wing and restoration of the building to its historic grandeur.

I strongly oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic

design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

I stand in opposition to the destruction of the East Wing. This president is intending to build an audacious ballroom that will stand as a testament to his corruption, and I don't want that for this country or its citizens. The East Wing should be rebuilt to the same specifications it was built before. The ballroom is unnecessary and we don't want it. Also, the cost is outlandish and is a way for rich billionaires to buy favor with this criminal president. It must be stopped. He must be stopped. We need people to stand against this corruption.

Dear Commissioners:

I would like to comment on the East Wing Modernization Project and proposed ballroom addition.

I feel that the addition of a ballroom to the White House and grounds is generally a good idea. However, I must voice my concern that the destruction of the East Wing was not necessary in order to complete the ballroom and it certainly should have been approved by the appropriate authorities before demolition. At your meeting on January, I heard the Administration representative say that the reason the demo was not approved beforehand was something "top secret". Afterwards, I believe the architect said it was due to structure damage, poor wiring and water intrusion. Whatever the reasons, I feel that had this been discussed with the CFA and your committee, that renovations could have been done to fix any issues and preserve the structure instead of a complete demolition of a historic section of The People's House.

As Commissioner Mendelson mentioned, the entire project should have been presented to your committee instead of a post East Wing demolition proposal..
I also agree with Mr. Mendelson's concerns regarding the size of the ballroom structure and how it will blend with the existing White House complex. Now is the time to evaluate how this addition will change the previously balanced appearance. My feeling is that it is out of proportion and too large. I would call it unsightly.
Does it really need to be almost 90,000 square feet to accommodate the 1000 seat capacity and house the additional event facilities (kitchen, bathrooms, etc)

In years past, when I walked by the White House, I always admired the balance, beauty and serenity of the grounds. I fear that this will no longer be what I see and that is sad.

If I were to have one more comment, it would be the disappointment in the removal of the historic trees from the grounds in order to build this ballroom. I would ask that when this project is nearing completion and landscaping is being decided, that you work with NPS and landscapers to replace the trees that were removed and require that new plantings are native to Eastern North America. We have many beautiful native plants that benefit native pollinators and wildlife and for the grounds In our Capitol, the only appropriate plants will be ones that belong here.

Thank you for your consideration. I look forward to following your decisions in this matter.

IN addition. Penatties for all the contractors, designers, permit specialists, and lwayers involved regarding the demolition should be prosecuted or fined for what has happened.
Also: a new project design must be approved 100% by Historical Preservation.
All roles that worked on the project up to demolition will be replaced with approval of Historical PReservation Board.
Design for the Building WILL, adhear to all preservation requirements approved by the Historical Review board and return the East Wing to a Similar look, feel and design as the Pre-demolition Wing.

Monies donated for this project will be used to repair the damage that has been done and not be used to pay personal or business fines that have resulted from the damage that has been done to the East Wing.

I believe the White House belongs to the people and therefore should not be changed without the people being heavily involved in the process. It represents our country and our nation and should never represent one man's vision. This is a project that should take a substantial amount of time and planning to make sure that the voices of all have representation. To me that's what it means when the constitution says "promote the general welfare".

I stand firmly opposed to the so-called "East Wing Modernization" project that resulted in the unlawful destruction of a historic portion of the White House known as the East Wing. The East Wing is not a personal asset to be demolished, redesigned, or repurposed at the whim of any administration. It is part of the people's house — a symbol of continuity, history, and democratic stewardship.

The decision by the Trump administration to tear down a historic section under the guise of "modernization" reflects a troubling disregard for preservation laws, institutional norms, and the public trust. Major alterations to nationally significant historic structures demand transparency, legal compliance, and respect for process. Those standards were not met.

Historic preservation is not partisan. Respect for the rule of law is not optional. And stewardship of national landmarks is a responsibility — not an entitlement.

For these reasons, I strongly oppose granting any further approvals related to this project and call for full accountability, restoration where possible, and adherence to the laws designed to protect our shared heritage.

I am opposed to Trump's ballroom project. He ordered the East Wing demolished without consultation with anyone, a breach of appropriate process unfortunately typical for his administration. His proposal is for funding by oligarchs, who will undoubtedly want a quid for their pro quo. The White House and its attachments are not the possessions of this president or of any other private party--they belong to us the People. The lawless demolition of the East Wing should not be rewarded by a building of Trump's own design or order.

Rather, Congress should appropriate funds either to restore the East Wing building to its historical appearance and functions, or if that is not possible, turn the site into simple but well maintained green space.

Thank you for soliciting comments from us.

Referring to it as a "modernization project" blatantly misrepresents its true intent: the deliberate erasure of critical chapters of American history. This not only undermines our nation’s heritage but also fosters a dangerous precedent of rewriting facts to suit political agendas.

Donald Trump had no right to tear down the East Wing without going through the proper approval channels. I strongly oppose the building of the ballroom monstrosity that Trump is trying to ram through. I feel he should restore it to the way it was at his own expense. If he wants to make changes of this magnitude, he should then go through the approval process.

I oppose this project! It was started without authorization, without an approved design and without the permits and approval required. I strongly object to the East Wing/ballroom propsal submitted by the President, and am offended by his cavalier, ill-advised, and uncredentialled destruction of public property. I suggest that he should be required to rebuild at his expense that which was destroyed by his wanton diregard of propriety, procedural due process, and general good taste. As a former staff member of the American Institute of Architects and as a long-time consultant to the built enviroments organizations, I am sensitive to both the design and the meaning of the built enviroment. The White House is a world-recognized symbol of the American Ideal, and has a graciousness that Trump will never understand. He should not be allowed to sully that image.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.
The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.
I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion. I urge that no temporary resident of that house or any other federal building make changes or adjustments to it without going through proper protocol and the people. Any legitimate government in a democracy serves the needs of the people not a party or a man.

I vehemently oppose the spending of $300 million on the White House Ballroom project. This project was initiated without the proper authorization, permits, or design review and therefore should not have been allowed to move forward. It is clearly not a modernization project or renovation. It is however a complete razing of American history. I want this project canceled and the East Wing rebuilt and restored to its former design at the expense of those individuals involved in the demolition of the former East Wing - NOT at the tax payers expense. Do NOT reward this president for tearing down the East Wing of the People's House without seeking authorization. This is NOT his house.
The money billionaires are providing as bribes for this president's approval could and should be used for projects that benefit U.S. residents. The money should NOT go to build something that the rest of us will never even see.

I oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval.

The funding creates unacceptable conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of the president who controls those contracts. This is not charitable giving. This is an investment in access and favorable treatment.

The White House belongs to the American people, not any individual president. I urge the Commission to reject this proposal until full legal compliance is achieved, including congressional authorization and completed environmental assessments. No temporary occupant should possess unilateral authority to demolish historic structures without following the law.

This project is a desecration of the White House and all it stands for. The demolition failed to follow proper procedures. The funding of the ballroom is rife for corruption. I do not want private sector transnational corporations bribing our government officials by funding their pet projects. The planned ballroom is itself hideous and disproportionate to the White House. The East Wing is the traditional space of First Ladies and its demolition is an erasure of their work and history. Most of all, the U.S. has policies and procedures in place to ensue that the government follows the will of the people with checked and balance. No one is above the law. This project attempted to circumvent approval and must be held accountable. The East Wing must be rebuilt to its former specifications.

The White House grounds are far more than a backdrop to presidential life— they are a national symbol — the People's House — and part of the White House National Historic Landmark designation. In the early 20th century and before World War II, the grounds were significantly more open to the public, allowing visitors to walk and gather in ways that reflected an idea of democratic access to civic landscapes.

Significant work to unify and shape the site came in 1934–35, when Frederick Law Olmsted Jr. prepared a comprehensive plan that reorganized circulation, preserved long-standing trees, and strengthened the spatial coherence of the grounds after many piecemeal presidential alterations. Olmsted Jr., following the democratic and egalitarian landscape philosophy pioneered by his father, emphasized that such public green spaces should reflect both continuity and accessibility — qualities that help connect generations and embody civic stewardship.

Today, a controversial project to build a roughly 90,000-square-foot structure— complete with offices and a 22,000 square foot ballroom— on the site of the former East Wing is underway under President Donald Trump's administration. Demolition of portions of the East Wing to prepare for this addition began in late 2025 and has drawn strong criticism from preservationists and legal challenges because it proceeded before full historic review and approval processes were completed, and without broad public input.

This shift — from a landscape historically characterized by relative openness and careful, incremental change to one marked by rapid, large-scale alteration — raises questions about the balance between institutional priorities and democratic restraint. The White House grounds are on public land and carry deep historic values; changes to their form and use resonate beyond architecture and lawn layout. They touch on how we, as a nation, steward shared symbols of democracy and civic life.

When changes are proposed for National Historic Landmarks, especially ones as iconic as the White House grounds, there is a broad expectation — both legal and cultural — that reviews consider not only preservation standards but also public-good values, transparency, and democratic engagement. Without careful consideration of these broader implications, we risk eroding not only bricks, mortar, and green space but the very ideals those grounds are meant to represent.

I want the old East wing restored to its original specifications. The proposed changes are garish in nature and not to any scale appropriate to the simple sophistication and reverence that the White House commands. This addition would be a monstrosity in direct contradiction to the values of what our country represents. It needs to remain the People's House and not become a party palace.

To Whom it May Concern,

I am writing to express my strong objection to the proposed ballroom at the White House and utter dismay that the East Wing was destroyed without public notice or comment. As the White House is the people's House, the fast track push to build a unneeded ballroom with little opportunity for deliberation and without the consent and vote of Congress is unamerican. There are other ballroom available within the government complexes in DC. The scale of the proposed ballroom will result in an aesthetically displeasing result - over shadowing the actual White House. I object to the funding method- to allow private corporations to subsidize the building is unethical. I thin the ballroom's style and size is not in keeping with the People's House. This is an ill conceived undertaking.

What happened to the East Wing of the White House is despicable, the product of decisions made by a man who only wants his name on as many public buildings as possible. Is there even an option to recreate the East Wing as it used to be? Will the same donors willing to curry favor with Trump by funding an unnecessary and ugly "ball room" for billionaires also willing to put their funds behind a restoration of what the historical structure used to be? Without permission or permits a piece of our history was torn to the ground. I oppose spending money to build a ballroom to feed an ego over the will of the people. This is the People’s House. The East Wing should be restored. Aside from the illegality of this, the ballroom drawings do not fit the theme of the house, and frankly, would make it look like a lopsided hotel that belongs on a golf course, not the dignified home and office it once was. It will be an eyesore, not a feature. Restore the East Wing and stop destroying our house.

I am opposed to the spending of $300 million on this project, which was initiated without proper authorization, permits or design review! Calling it a modernization project is wrong! The East Wing was completely destroyed without any discussion with the American people (or their elected representatives) as to the scope and purpose of the project. The structure and it's history have been taken from the American People without consent or due process. The East Wing should be rebuilt and restored to it's former design and those responsible for it's destruction held financially responsible for all costs associated with the rebuilding of the East Wing. My first concern is the lack of accountability for process and legal procedures. The East Wing was demolished without permission and no one has been held accountable. What's to stop the current administration from demolishing The West Wing next? Or decide to demolish or erect monuments as part of the National Mall?

My second concern is that The White House itself should be the center (visually, square footage, weight) of the building complex. This plan is grossly weighted towards a ballroom/party room which is completely out of balance with everything else around it. The ballroom is even on the same plane as the front of The White House - while The West Wing is stepped back, lower in height, and much smaller in size.

The aerial view of The White House and the buildings immediately to the left and to the right of it show symmetry in design and make it very clear that The Ballroom is vastly out of proportion in relation to The White House and The West Wing (page 3 and page 20). The renderings should include The West Wing so there is a clear representation of scale on pages 13, 14, 15, and 19. The massive contrast in scale is clearly evident in image 20 and 21 which shows The Ballroom

dwarfing The White House and The West Wing. While I appreciate the removal of the pediment on the South End, the giant Parthenon style columns on the end of the ballroom and the huge pediment on the side of the building, again, dwarf the proportions of The White House itself.

Lastly, there are plenty of conference and event spaces in Washington DC which could serve as host spaces for the few State Dinners that take pla ce each year. The Waldorf Astoria's Presidential Ballroom in the Old Post Office comes to mind. This "East Wing modernization and ballroom addition" is an obscene project of ego, not necessity. Those who support and vote for this project will carry that stain as their legacy.

I am writing to plea for a stop of this so-called East Wing Modernization Project. This is far from a modernization, but rather a a complete overhaul of this portion of the White House. The demolition ensued without appropriate Congressional approval or the necessary permits. Furthermore, this is a public building belonging to the American people, not a personal asset of the current nor any future occupant. I implore this committee to act according to the rules set by Congress for construction or changes to federal buildings. I believe that a substantive fine be imposed on the current occupant, who has acted unlawfully in this case.

I oppose this project. I want this project cancelled. This project started without going through the proper steps of authorization, permits, and design review. The citizens of the United States of America, whether through our representatives or the proper committees and commissions, were not allowed to give input before it was initiated.
This is not a Modernization Project, and does not compare to the proper modernization other administrations have completed to the White House of the USA.
If a ballroom is needed to allow our great nation to host events without having to temporarily install tents on the lawn, then it can and must be done with a plan that will be approved to ensure it is contained to a conservative size which serves that purpose, complements existing structures without damaging them, and requires the exterior and interior design to be tasteful and match the classic architecture and design of our historic buildings.
I am devastated that part of our history was demolished and that we the citizens of the United States were initially lied to and misled about the size of the ballroom and its location in relation to the White House.
No one in our country, no matter their position or office, is above the law. No one should be allowed to circumvent any requirements, rules, and laws. This was a project of pride and demonstrates that the current administration does not respect our country. The people who initiated this project and encouraged it to advance violating the standard procedures for historical site modifications should be penalized.

A ballroom that would be used a handful of times per year cannot be allowed to overshadow the White House itself. It must blend harmoniously with that building. To that end, your organization should ensure that the approved design is no larger in any dimension than the White House.

I strongly oppose the current design for an East Wing 900+ sq ft ballroom addition. Any addition's size and design should not overwhelm the White House and West Wing, but should visually be in accordance with them. Many administrations have successfully hosted large events without the need to build a massive ballroom. Also, corporate donors may have donated funds for a large ballroom, but American taxpayers will pay the cost of maintaining it and that is wrong. There are other priorities such as education, infrastructure, and medical research to name a few. Lastly, any additions should also be approved by the members of the CFA and OGB, not whatever administration is currently in office.

I oppose the East Wing Modernization Project.
This project began without required National Capital Planning Commission approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington.
The $400 million cost is funded by corporations holding billions in federal contracts with the administration approving those contracts.
This creates an unacceptable conflict of interest.
The White House is not private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve constructions without following the law and allowing public input.
I urge the Commission to reject this proposal.

As a professional historian, I am horrified at the razing of the East Wing without the slightest consultation with professional historians regarding the historical importance of the building. No one is above the law. If my neighbor razed their garage without a permit, the municipal officials would be all over them. If the owners of a historic building in my hometown tore off and rebuilt a side porch without consultation and a permit, they'd risk jail time and/or a huge fine. The President tears down the East Wing with no public consultation or opportunities for anyone outside his inner circle to weigh in, and nothing happens? The White House is a historic building that belongs to the American people. The current President is merely a tenant. This should not be allowed to stand.

I also work for local government. The sheer amount of paperwork, permit pulling and architectural reviews that have to be undergone for any building project in my community is time consuming and for many builders tedious but it serves a purpose to make sure that what is built in my small city is in compliance with zoning ordinances and codes. The fact that this has been done without going through or consulting the proper channels is mind boggling

I'm appalled and deeply shaken to see photos of our White House with a wing ripped off, and a huge golden replacement planned. This is the people's house, and to see it becoming an imperial monument, in keeping with the other changes made Ito glorify one man, is horrifying. Those who support this project, or fail to oppose it, must be condemned, and the project itself must be abandoned, the more modest East Wing and Rose Garden restored to us.

WE THE PEOPLE did not give consent to demolish our East Wing and demand that it be replaced immediately and very personally at the destroyers’ expense from his own pocket that he has already stuffed full with ill-gotten gains and bribery. WE THE PEOPLE demand that the word “Trump” NOT be added to any property that belongs to WE THE PEOPLE. Presidents are only allowed to occupy the White House temporarily for up to 8 years only and may update it tastefully on behalf of WE THE PEOPLE and should not degrade it in any way.

I do not approve of this project. When members of this administration point to this as
“ You will have a beautiful ballroom that you can be proud of “, what I see is an empty spot where the East Wing of the White House should be. The fact that this travesty was done without permission or legal permits is another slap in the face to 99% of the American public.
It’s not My ballroom. I will never step foot in it because I am not a member of the 1% billionaires club (and I wouldn’t want to rub elbows with that trashy bunch of S O B’s anyway).

The demolition of the East Wing is a profound loss. An historic building that stood as part of our shared civic and architectural heritage has now been erased. Whatever the stated intentions, once a structure of historic significance is torn down, it cannot truly be replaced. Preservation is a responsibility, and in this case, that responsibility was not upheld.

Now, the proposal to construct a large, gilded ballroom in its place raises further concern. Such a grandiose addition appears architecturally incompatible with the character and scale of the surrounding structures. Historic settings call for restraint and thoughtful design, not spectacle. A ballroom of this magnitude risks overwhelming the site and diminishing the integrity of what remains.

Beyond aesthetics, the need for such an expansive and ornate structure has not been clearly justified. In a time when communities face pressing priorities, investing in an opulent hall sends the wrong message about values and stewardship.

While the East Wing can no longer be saved, decision-makers can still choose a path that respects the historic context and architectural harmony of this space. I urge reconsideration of the scale and style of the proposed ballroom and a renewed commitment to preserving what remains of our shared heritage.

The White House belongs to the people of the United States, not to whomever occupies it temporarily. There are rules and regulations about making any changes to the structure of this historical building. The demolition of the East Wing was done with no permit, no permission, no warning, and obviously no coherent thought. This desecration of a piece of American history is immoral and must be stopped immediately.

The graceful East Wing is sadly gone, but it can be rebuilt, as it should be. But not a single person in the Trump administration should be allowed to participate in any discussion, design, or contracting of the rebuilding. No one in the current administration can be trusted.

The United States has a short-term elected President, but a monarchy. The White House serves as a residence for the President and family and also provides an office wing. However, the White House is not and was never intended to be a "palace." It is not appropriate for the White House facility to include a huge and luxuriously appointed Ballroom that will stand empty most of the time.

Even if the money is from private donations, a President should not solicit donors for a project like that. Rather the President could motivate donors to use their funds for projects that would benefit the public at large and be fully accessible to the public at large.

When the President, as Head of State, finds it necessary to host a State Dinner, there are already formal rooms in the White House. And if the crowd, for some reason, needs to be "large," on rare occasions, then there is no problem with renting the temporary tents.

If we care about maintaining our democracy of government of the people, by the people, and for the people, then we ought to make sure that our "public" buildings are designed to serve that end and never indicate a movement away from that end and toward what signals monarchy, "Versailles Light," etc. For shame.

As a US Citizen, I am appalled. This writing is about my horror of watching the East Wing of the White House being torn down by heavy machinery on my computer screen. I live in Colorado, and while it has come to my attention that we are

all an abomination and traitors, we do have rules for historic properties. Say I owned one of these precious historic homes or lived in one of these historic districts, I would have a vast amount of rules of what I can and can't do to the property. Rules such as ALL exterior changes (roofing, siding, paint colors, fences, or additions) would have to be submitted and approved to make sure they do not harm the historic character. I would be encouraged to use materials that match the original. I would be responsible for maintaining this important historic property. That would be part of the agreement of owning or residing in the historic home. You know what I can't do? Bring in a bunch of heavy equipment and just knock it the hell down because I feel like it. If I did, there would be big consequences. I imagine I would pay!

You know who actually lives in a VERY important historic home in this country? Dare I say this historic home is vastly more important than any historical home in Colorado. Yes, that is correct, the sitting US President. One might have been under the naive impression, that someone is protecting this extremely important historic home. It appears that notion is mistaken. I have watched the treasured White House Rose Garden be turned into a patio that looks like any dated country club across this nation. I have watched gold veneer appliques being attached to seemingly everything. I guess these things can be undone. Not sure why the taxpayers have to pay for it to be done and then (hopefully) undone, these things do seem reversible. I imagine some amazing rose varieties were lost though.

As for the rubble or vacant lot of the former East Wing, who is going to pay for that? Who is going to be held responsible? FYI, I can't tell if it is rubble or a vacant lot because Google maps has not updated the picture yet, but it does reference the East Wing as "Closed". Perhaps "MIA", "Gone", or "No longer" would be a better description. The East Wing being the working office of the First Lady just can't be lost on me as a female of this nation. The destruction of the East Wing feels exactly like it does being a woman of this nation. Given no respect, no care, no consideration and treated exactly however the most powerful person feels is justified. It is a disgrace. As far as what should happen now, I only know two things, 1) it should NOT be a ballroom that is bigger than the actual White House, 2) it should not be decided by the sitting President or any other future one either. It should be decided by people who actually give a damn and have education and knowledge of the history. I do know exactly who should pay for it (both the demolition and the reconstruction) and that is the current sitting President with his own funds as he created the problem and he should pay.

Please make this right. We are desperate in this country for something to be made right.

This project got an illegal start, based in the vanity of a man who surely has nothing to crow about. He destroyed a portion of the People's House out of spite, in order to build an unnecessary venue, outsized and outside the historic nature of said house. It is more than likely that he wants to use the so-called ballroom as he does mar-a-lago: a rental for parties unattached to the government or any such uses. It will be just one more way for him to fleece the people of the USA. It should be laughed out of town. And the East Wing should be restored to its former state, with absolutely no input from the criminal in the White House.

Dear Planning Commission Members,

The proposed ballroom is so massive it overwhelms the people's Whitehouse. It should be smaller and in keeping with the restrained and elegant architecture of the mansion. Grandiosity and vulgar display is wholly out of place in this setting. Perhaps it's construction should be left to a future president who understands this.

I am writing to the National Capital Planning Commission regarding the proposed plan for the East Wing of the White House in my capacity as a licensed architect, a member of the American Institute of Architects, and a practitioner of over 40 years, including professional experience on a project subject to the Commission's review. From a professional standpoint, I have serious concerns about both the substance of this proposal and the integrity of the review process. Despite reservations about participating in a process I believe has been undermined, I feel a professional responsibility to submit these comments given the national significance of this site.

The removal of a portion of the People's House without appropriate public approval raises serious concerns about adherence to the principles and norms that guide architecture and stewardship within a democratic republic. From an architectural, civic, and preservation standpoint, such actions set a troubling precedent regarding the care of nationally significant public buildings.

In my professional judgment, the commission should reject the project in its entirety. I further urge that the only responsible course of action is to rebuild the East Wing consistent with its original size, character, and function, particularly given that the prior structure was demolished before this review process took place.

The commission now bears a heightened responsibility to uphold the integrity, transparency, and public trust that projects of this importance demand. Decisions regarding the White House complex must reflect careful stewardship, respect for process, and fidelity to the architectural and historical significance of the site.

Thank you for your consideration.

Thank you for this input opportunity to submit comment for tomorrow's meeting.

I support the meaning and specifics of National Trust for Historic Preservation President Quillen's letter, with emphasis on the spirit recognized by our nation's Founders, nineteenth century renovators of the Executive Mansion and President Carter's exercise of White House design leadership by example.

As a resident of Venice, California - known by some in recent years as "Silicon Beach," I'll note here a beach boardwalk pagoda that is about to undergo restoration, ostensibly in preparation for the 2028 Olympics while sorely in need of repairs for a decade and more.

The community is committed to restoring its original design with updated accessibility features. That concept of humility should make sense for the Commission's decision as well.

I oppose the spending of $300 million on this project that is stripping us of our beautiful history. This is an affront on our country’s White House which has honored all of its presidents and citizens. This was not initiated with any regard for the input of citizens, it was not initiated with authorization, building permits, or design review. This is an additional abuse of power by an administration that continually serves itself and breaks laws. Our White House is looking more and more like a pitiful gold flecked shrine. I am very much opposed to this project. I believe that it desecrates a national monument. The White House is The People’s House and the proposed changes do not serve The People. Thank you for the opportunity to make my voice heard.

I do not think the East Wing should have been torn down and I now that it's torn down:
1) handle asbestos to protect workers and the public;
2) work with the Historic Preservation Commission to ensure drawing and architectural plans meet their standards;
3) do NOT make the addition so large that it minimizes the outward appearance and size of the White House;
4) create an addition that mimics the old East Wing;
5) do worker bids per Historic Preservation Commission standards.

Consider creating another Rose Garden near this addition since the other one was ripped away,

This project is a horrible stain, its been done without proper review and planning.
Critics argue that the East Wing modernization project is unnecessary given the existing space for large events and raises concerns about its impact on the East Wing, which is traditionally used by the first lady and her staff. Additionally, there are worries about the lack of transparency regarding the project's funding and planning process.

Concerns About the East Wing Modernization Project
Criticism of Necessity
Many critics question the need for the East Wing modernization, particularly given the existing space available in the White House for large events. The East Wing has traditionally served as an important area for the first lady and her staff, leading to concerns about the impact of the demolition on its historical and functional significance.

Legal and Procedural Issues
There are ongoing legal challenges regarding the project. Critics argue that the construction should have followed proper legal procedures, including input from federal review panels like the National Capital Planning Commission and the Commission of Fine Arts. The lack of adherence to these processes raises concerns about transparency and governance.

Historical Context
The East Wing demolition is the first major construction project on White House grounds in nearly 80 years. This historical context amplifies concerns, as past renovations have often faced criticism. For instance, previous presidents also faced backlash for their renovations, which were seen as prioritizing modernization over historical preservation.

Financial Implications
The project is estimated to cost $300 million, funded by private donors. Critics argue that such a significant expenditure during a time of economic uncertainty raises questions about priorities and the use of funds, especially when many believe the existing facilities are adequate for presidential events. The funding is likely a substitute for overt bribery of the president.

To the Committee:
Remember the East Wing of the White House? Remember the giant ballroom that the tech billionaires have agreed to fund in its place? The National Trust for Historic Preservation is making a gallant effort to stop this. And we can help.

Thanks to the National Trust, we have until March 4 to submit comments about the ballroom to the National Capital Planning Commission. You can make a comment through the link below (click on Submit Comment). PLEASE NOTE, the project is called East Wing Modernization on the pull down menu.

Anara Guard's comment on this is beautiful. She gave me permission to post it here, if anyone wants to use her language.

I agree with Anara Guard's comment and will repeat from her: "I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. I had the pleasure and honor to visit the White House with my Girl Scout Troop in Summer 1963. We were chosen for a special private tour and it is one of the highlights of my life. I dont believe in monarchy. I want the full measure of the law applied to each culpable participant in this monstrosity and the East Wing rebuilt with reparation funds supplied by the participants. It looks like vandalism.

With respect,

The White House is a national historical monument. it has survived burning, floods, termites, and other blights. It should not be overshadowed by one man's hubris. The White House complex is impressive and awe inspiring because it makes use of its layout, viewing lines, and space. An enormous East Wing destroys all of that. It makes the White House look like a somewhat fancy conference center from some mid-size city. The White House is special; it's not just a building. It tells stories about American fortitude and longevity. Don't destroy all that by agreeing to plonk down an ugly hulking mess next to our beautiful house. Not all White House Complex green space needs to be paved over. We understand that something needs to be built there due to rash actors. BUT, it can be fitting in scope and size and not reinforce that world's idea that we're Ugly Americans with ugly architecture.

I submit this comment in strong opposition to the demolition of the White House East Wing — a 123-year-old national landmark — and urge this Commission, Congress, and all relevant federal authorities to require the historically faithful reconstruction of the East Wing to its pre-demolition condition. The demolition, which occurred on or around October 20–23, 2025, was unlawful, proceeded without required statutory review, and caused irreversible harm to an irreplaceable piece of American heritage. The American public deserves nothing less than full accountability and restoration.

II. The Demolition Was Unlawful
The East Wing demolition proceeded in violation of multiple federal statutes and review requirements:
A. No Congressional Authorization. Federal law is unambiguous: "A building or structure shall not be erected on any reservation, park, or public grounds of the Federal Government in the District of Columbia without express authority of Congress." The White House grounds are federal public grounds. No such Congressional authorization was sought or obtained before demolition began.
B. Bypass of Mandatory Review Bodies. The National Capital Planning Commission (NCPC) and the Commission of Fine Arts (CFA) are legally required to review and approve major construction and alteration projects affecting the White House complex. Both bodies reviewed far more minor projects in recent years — including perimeter fence changes and the tennis pavilion. Yet this administration demolished an entire historic wing without submitting plans to either body prior to demolition. The NCPC chairman's assertion that the Commission's jurisdiction covers construction but not demolition does not excuse the administration from complying with the full statutory framework governing this federal property.
C. No Environmental or Historic Preservation Review. The National Historic Preservation Act and related regulations require assessment of impacts on historic properties before undertaking federally sanctioned actions. The White House is listed on the National Register of Historic Places and is among the most protected historic properties in the United States. Demolition of the East Wing without this review is a clear statutory violation. As the National Trust for Historic Preservation stated in its federal lawsuit: "No president is legally allowed to tear down portions of the White House without any review whatsoever."
D. No Public Comment Period. The public — the true owners of the White House — was denied any meaningful opportunity to comment before irreversible action was taken. This comment process, now occurring after demolition, is precisely backward. The law requires public input before such actions, not after the damage is done.
E. Asbestos and Safety Compliance Questions. The Asbestos Disease Awareness Organization has filed a federal FOIA lawsuit seeking records on asbestos inspection, abatement, and disposal related to the demolition. The public has a right to know whether federal asbestos safety requirements were followed, and the administration's failure to proactively disclose this information raises serious legal and public health concerns.

III. The Administration's Justifications Are Insufficient
The administration has offered post-hoc structural justifications — citing "unstable colonnade, water leakage, mold contamination" — that were not disclosed to the public or any review authority prior to demolition. These justifications:

Were announced months after demolition;
Were never independently verified by any authorized historic preservation or engineering authority;
Contradict the President's own July 31, 2025 public statement that the ballroom "won't interfere with the current building" and would "pay total respect to the existing building"; and
Cannot retroactively cure the statutory violations that occurred.

If genuine structural emergencies existed, emergency procedures exist within federal law to address them while preserving historic fabric to the maximum extent feasible. Those procedures were ignored entirely.
Furthermore, the cost of this project has ballooned from an estimated $200 million to over $400 million — with incomplete disclosure of private funding sources and serious ethical questions about the influence of undisclosed donors. The American people are entitled to full transparency about who is funding the reconstruction of their national home.

IV. The East Wing Belongs to the American People
The White House is not the personal property of any sitting president. It is a public trust — the People's House — held in stewardship for all Americans and for posterity. The East Wing, built in 1902 and significantly expanded in 1942 under President Franklin D. Roosevelt, housed the Presidential Emergency Operations Center, the Office of the First Lady, and served as the entry point for millions of public visitors. It was, in the words of Betty Ford, the "heart" of the White House.
A majority of Americans — 53% in polling conducted in October 2025 — opposed the demolition. Their voices were ignored. This Commission now has an obligation to ensure they are heard going forward.

V. Relief Requested
This commenter respectfully urges:

Immediate halt to any further construction or site alteration pending full legal compliance with all applicable federal statutes, including NCPC and CFA review, environmental assessment, and Congressional authorization.
A full, independent structural and historical assessment of what was lost and whether faithful reconstruction of the East Wing is achievable.
Historical reconstruction of the East Wing — to the greatest degree architecturally and historically possible — in lieu of the proposed ballroom design, which the American Institute of Architects and historic preservation experts have called out of scale and incompatible with the White House's historic character.
Complete public disclosure of all funding sources, asbestos inspection records, structural assessments, and communications related to this project.
Congressional investigation into whether the demolition violated federal law and what remedies, including restoration requirements, are available.

The White House has survived the burning by British forces, the Civil War, and more than two centuries of American history. It should not be undone by a vanity project that bypassed the law. This Commission has both the authority and the obligation to act.
Respectfully submitted.

I am very much against the tearing down of a wing of the White House and building a ballroom. I also hate what was done to the Rose Garden. In my opinion, what the East Wing was used for was adequate and built with thought and

consideration of its part with the White House. I also don't feel that such a huge, overly decorated ball room is necessary or is popularly welcome. When the President and First Lady entertain, having a smaller group is much more personal and they are able to be actively host and hostess than in such a huge place. I don't believe crowds that large are usually invited when entertaining foreign dignitaries. Again, they are too large to be a warm and personal experience.

I also am furious that Trump has made all these decisions without giving a thought to history, to the historical society, or to the general public's opinion. I sincerely don't think Mrs. Kennedy's work in restoring the White House can be questioned. Definitely by someone with so little taste. What has been done has removed the feeling of the Country's House and garden and has been made glitzy and commercial. Doing that to property that is not personally his is a terrible thing to do.

I oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval.

The funding creates unacceptable conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of the president who controls those contracts. This is not charitable giving. This is an investment in access and favorable treatment.

The White House belongs to the American people, not any individual president. I urge the Commission to reject this proposal until full legal compliance is achieved, including congressional authorization and completed environmental assessments. No temporary occupant should possess unilateral authority to demolish historic structures without following the law.

I am against the East Wing Modernization Project. This building was torn down without proper approval and the replacement is going to be funded by big network, technology and legal firms in return for what? Sounds like pay to play to me. The premature demolition of the East Wing was a shameful neglect of the people's legal right to influence the outcome of the project. The White House is the people's house, and as one of the nation's most important historic sites, must be treated appropriately, that is, under the nation's official historic preservation standards, with design by qualified historic architects. Mitigation for the erasure of that historic wing, should be a much scaled-down building above ground to avoid overwhelming the mass of the White House itself. Better would be a faithful reconstruction of the East Wing above ground, placing the ballroom, at the proposed size or smaller, below ground. Design the ballroom such that, in the future, when we don't have a vain dictator who flaunts the law and commits treason and fraud, it can be easily converted to some other more fitting use that embraces democratic ideals.

I literally cried the day. I saw the East Wing razed. I was born and raised in Washington DC as was my mother and her mother before her. I cherish this historical city and the beautiful architecture within D.C.. To learn that Donald Trump, illegally, was able to demolish an entire wing of our White House is appalling. Someone needs to put a stop to this man’s unchecked power. It’s bad enough that he has ruined the dignity and ambience of interior spaces with the gaudy gold planted throughout, but at least the next head of state can rectify that. With regard to the construction that will eventually replace the East Wing, people with historical backgrounds, architectural design talent, and a reverence for style that permeates government buildings throughout the district need to be involved.

I do not want any funds spent on a ballroom. The White House is a national treasure and a part of our history. No oversight or permission was requested or allowed before the wing was razed. I believe the bunker beneath the structure should be updated, but the wing should be rebuilt using the original plans. Dear Fellow American Citizens,

The demolition of the East Wing of our White House is an extremely disturbing destruction of our American heritage and property. The plan for looming 90,000 sq ft building next to our classic White House structure brings the architecture out of balance. The traditional and classic style of the White House and West Wing will need to be mimicked in the construction of a new edifice on the east side of this beautiful home. I oppose the spending of $300 million on construction of a White House Ballroom and renovation of the East Wing, which was initiated without the proper authorization, permits, or design review.

This was also done without sensitivity or regard for the history of the East Wing, and the ownership of the White House by the American people; President Trump, like all prior Presidents, is an occupant of the White House for a short period in that history, and does not have the authority to destroy the White House and rebuild it without regard to the views of the American people.

My vote is for restoration of the East Wing and abandonment of any plans to construct a large ballroom on the scale currently proposed.

I oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval.

The funding creates unacceptable conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of the president who controls those contracts. This is not charitable giving. This is an investment in access and favorable treatment.

The White House belongs to the American people, not any individual president. I urge the Commission to reject this proposal until full legal compliance is achieved, including congressional authorization and completed environmental assessments. No temporary occupant should possess unilateral authority to demolish historic structures without following the law.

The new structure must include space for the offices which were demolished. Future first ladies will need space and staff, and deserve the same respectful areas granted to other staff members.

Additions to historic properties should be compatible in scale and subordinate to the original structure. The east wing should be about the size of the west wing, and in proportion with the center. It must not dominate the space. The structure should also be in a similar style to the existing west wing and the oval office's area.

What an atrocity! The fact that the razing of the East Wing occurred without review or approval at the ridiculous whim of an obviously unhinged president is absolutely abhorrent and an insult to taxpayers.
If changes are to be made (or monuments constructed) they should be subject to the rules and regulations set forth for government buildings (and their financing!) and should be subject to congressional oversight.

I concur with the comments and positions of the National Trust for Historic Preservation stated in their February 18, 2026 letter to the US Commission of Fine Arts. The proposed 90,000 square-foot new ballroom construction will overwhelm the Executive Residence, which is only 55,000 square feet. The new construction will permanently disrupt the carefully balanced classical design of the White House complex, which emphasizes the prominence of the Executive Residence in contrast to its two smaller, and lower, East and West Wings. Modifications are needed to the proposed project, such as those proposed by the National Trust.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

Name: Lisa Carver

The proposed ballroom addition is an abomination and out of scale with the rest of the White House complex. The proportion of the form and details are not contextual to the existing structure. Creating "false history" by building a new structure in a formal classical style is not appropriate for our time nor talks to the evolution of the White House campus. Similarly, the interior is grotesque, following the obvious personal preferences of the sitting president. There is a lack of true refinement again in proportion, detail, and finish selection that is inappropriate for a venue of this importance and anticipated longevity. I urge the Commission to do what it can to restart the design process in a more public engaging and transparent process.

The Ballroom did not have the appropriate approvals, the destruction of the East Wing was destroyed without approval, the disgusting plans for Trump’s ballroom are larger are larger than the entire White House. The White House is the house of the America People. If you were living in a house that did not belong to you, you would have to pay for any damages that occurred during the time you were a tenant. As a result Mr Trump should be required to pay for damages that were

done for the East Wing and the Oval Office. If a tenant were to put all of the gold extras to someone else's home they would be charged for damages and the cost of removing them. If the costs are not paid within 60 days of his vacating the American people will sue.

It is not a modernization project but rather a misguided, tasteless ego project, done without the consent of those granted the authority and responsibility to protect the architectural vernacular of our Capitol city. I want this project canceled, and to use the donated funds to rebuild the East Wing and restore it to its former design and proportions. I am so very disturbed that this Administration finds it necessary to spend millions of dollars to build a ballroom!! This building is our--the citizens of the United States--building. Not any one person's who thinks he needs to create a castle like effect to impress others who visit or in order demonstrate wealth and power that can and is being lorded over the people of this nation. When Washington D.C. was designed, it was done so with a quiet dignity that would inspire anyone who visits our country. We have an earned respect, or we did have. This decision to build a superfluous addition to an already iconic presidential home is a way to flaunt this country's wealth to a world that was already in awe of the GOOD the United States has done in the past for the world. Now, however, this administration is using those benevolent funds to build a monstrosity. This is a reality check--No Ballroom!!

I am one of the many citizens who oppose this.

Let there be office rooms, study libraries, public gathering places for policy makers in the East Wing. A moderate assembly or ball room could fit in also. But a huge over sized ballroom that will overshadow the rest of the White House has no place symbolically or practically in a democratic republic. We don't have a KING we don't need a cathedral sized ballroom.

I vehemently oppose the East Wing Modernization Project. The White House belongs to the American people, not any individual president. I never thought that I'd have to petition my government to stop the further desecration of the White House by its temporary occupant, but here it is: I urge the Commission to reject this proposal until full legal compliance is achieved, including congressional authorization and completed environmental assessments. It was outrageous for a temporary occupant to destroy an historical wing of this iconic structure without gaining any congressional approval, especially after numerous public statements that the plan was not to demolish it. Its destruction cannot be allowed to serve as tacit approval to replace it with whatever structure the temporary occupant desires. The interior and exterior design of any proposed new structure must be approved by the Commission, and reflect the aesthetics of a democratic society, not the garish greed and decadent taste of a temporary occupant. As the people's house, any reconstruction must be publicly funded, not paid for by individuals and corporations holding billions in federal contracts that in appearance or in fact will lead to access and favorable treatment. Any and all work on the project must stop and remain halted until all environmental assessments, and congressional authorization mandated by federal law for construction on federal parkland in Washington are completed.

I am strongly opposed to a 90,000 sq foot addition to the White House. The design of this is a monstrosity. It will completely overshadow the White House - the PEOPLE's house. The beautiful central White House building should always be the focal point of this historical site. Any additions should be subtle, tasteful, and never distract from the main building. Re: Formal Opposition to the Proposed East Wing Renovation Project

I am writing to formally oppose the current administration's proposed project to demolish and reconstruct the East Wing of the White House. This project was initiated without proper authorization, required permits, or design review — and it must be stopped.

The 123-year-old East Wing has stood as part of one of the most iconic and historically significant buildings in the country, and tearing it down without following the required legal process is simply wrong.

It would be a travesty to allow this proposed "ballroom" renovation -- that overwhelms the White House -- to proceed. At 90,000 square feet to 55,000 square feet, the "ballroom" would dwarf the White House.

I urge the Commission to take the following actions:

1. Halt the project immediately pending a full review of all authorizations, permits, and design approvals.
2. Require full compliance with all applicable historic preservation laws, including the National Historic Preservation Act.
3. Mandate restoration of the East Wing to its original external design, consistent with the historic character of the White House complex.
4. Hold accountable those who proceeded with demolition or construction work without proper legal authority.

No one is above the law — not even the President of the United States of America. To allow this project to proceed without consequence would send a dangerous message that legal processes can be ignored by those in power. That is an affront to every law-abiding American and to the institutions designed to protect our national history and landmarks.

The National Capital Planning Commission has both the authority and the obligation to intervene. I urge you to act decisively and without delay.

Thank you for your attention to this matter.

This administration often talks about running government like a business. In the case of the East Wing demolition and reconstruction, it might be helpful to view it through the eyes of a business. Mr Trump is a temporary occupant of a building owned by the American Public. He has no legal right to destroy the property. If this was a privately owned building, would any landlord allow the renter to demolish part of the building and make plans for reconstruction/enlargement without any permission, permits or oversight?

The design for a ballroom to replace the East Wing cannot be described as a "modernization project." Rather, it is the addition of a massive new structure that is wholly out of scale for the site and dwarfs the White House itself. If a ballroom + offices are to be built in that location, the height should be drastically reduced so that it is subservient in scale to the People's House. To lower the building, the ballroom itself can be put substantially UNDERGROUND and does not/should not dominate the landscape.

This style of the columns as shown in the renderings are totally inappropriate. If there are to be columns they should be simple in keeping with those on the original East Wing.

This project is the result of an insatiable presidential ego. NCPC and the Fine Arts Commission must be challenge the design in the strongest possible terms.

I oppose the construction of a ballroom AND the razing of the East Wing. The ballroom is a vanity project to fluff Trump's ego. There is no benefit to citizens of the USA. The project should be cancelled and the East Wing restored. This is an scar on the landscape and detracts from the beauty of the White House. The person who authorized the razing of the East Wing (Trump) should be fined and required to reconstruct with his own money. He's certainly earned enough with the scams he is operating as president. I oppose any spending, especially that of the Corporate Oligarchs, money of $300M on the re-building of the current designed East Wing project. The reason for the necessity of “re-building “ of the East Wing is because a law was broken by the current, President Trump. It was because of him illegally tearing down the East Wing that a re-build is required. The East Wing should be re-built but only in the same foot-print and design of the original East Wing. The need for this was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. And a n intention to memorialize Trump and all his gaudiness. I want this project canceled, and the East Wing rebuilt and restored to its former design. This destruction should have never happened much less go forward with a ballroom that we do not need. Me. Trump should be made to pay for putting the east wing back the way it was from his own pocket. It is not his house to destroy. I'm the beginning the ballroom was to be away from the White House and not be attached at all. If approval for the

ballroom should go forward it should not be attached to the original building. The scale and design are not complimentary to the original White House. In any event the east wing should be put back since it was not approved to be torn down. Rules are rules and even trump should be made to follow them.

I oppose the East Wing Modernization project on the grounds that those project was begun without proper project review and public comment before the historic East Wing was destroyed. The project as designed would significantly overshadow the existing White House and has already negatively impacted the grounds of the White House by tearing down historic trees and other landscaping. The East Wing should be restored to its former design and construction. And IF an additional ballroom or bunker is deemed to be necessary, ALL protocols and reviews should take place before ANY construction begins. I propose the following:
The exterior of the newly built East Wing should be as close to the original in size and design as possible, along with the rose garden.
The interior should recieve modern updates plus make use of any original artwork and furniture saved.The design should continue with the understated elegance of the past first ladies and President's.
Yes I think President Trump should pay for the rebuilding however we should not wait to begin. Past actions prove that would be an incredibly drawn out process.

I oppose the planned changes to the White House East Wing area. Before nationally significant places are permanently altered, the public deserves an opportunity to help shape the decisions. The White House is a National Historic Landmark and National Park owned by the American people. A 90,000 square feet ballroom exceeds the size of the the Executive residence and would be completely out of scale. The costly plan was initiated without proper authorization, permits, or design review. I view this as a razing of American history. A monstrosity that will overshadow the White House will be an eye sore to a historically important building. The razing of the East Wing and planning for a ballroom was unlawful and to permit this project to progress without penalizing those who broke the law would be an affront to all law-abiding Americans.

The $300 million East Wing project isn’t “modernization.” It’s an unauthorized demolition of American history — pushed forward without the required permits, oversight, or legal review. If any ordinary American tried to bulldoze a historic building without approval, they’d face consequences immediately.
Why should the White House be any different?
This project needs to be stopped now. The East Wing should be rebuilt to its historic design, and the people who ignored the law should be held accountable. No one is above the rules — not even those in power. Letting this slide would be an insult to every law abiding American.

Commissioners:

It was with dismay and disgust that I, along with millions of other American citizens, learned that the current president had taken it upon himself to 'order' the destruction and removal of the East Wing of the White House. It appears that this process was begun without the regulatory research, studies, and permit processes that are required for such a significant project.

The destruction of this portion of one of our nation's most historic buildings has a huge impact on both the visual and the emotional aspects of every person who visits the Captial region and seeks to observe and absorb the inherent history of the area. What must a child think when he/she is taken to visit the White House--the center point of our historic government--and then a third of the building is in shambles? How could a faux-gold "ballroom" represent the government of the United States of America? How can an adult view the same scene and not wonder whether our democracy can still be in effect while such destruction and slight-of-hand has occurred without any democratic input or legal procedures?

In addition to all of these considerations, the project plans for the proposed 'ballroom' that have been released publically appear to reflect a massive block of a building as a replacement of the historic footprint; a building that dwarfs the remaining portions of the country's presidential residence. Both the scale and the proposed decor will diminish the remaining original structure, diminishing the country's historic past along with it, and-possibly-encouraging the current administration to order further destruction of other irreplaceable buildings and structures throughout the Capital region.

Please intervene on behalf of America's generations of citizens, who cherish the memory of our nation's well-known historic buildings and their connection to the establishment of our democratic form of government. Thank you.

This is not a modernization project, it is an affront to the historic East Wing. The project was begun without the proper authorization, and there now stands a pile of rubble where part the People’s House once stood.

If a ballroom were to be added, it could be sunken into the ground so the scale would match the existing building. For that matter, it could be an entirely underground addition with skylights and perhaps a terrace above—no conflict with the existing building.

As the proposal now stands, it will dwarf the existing sections and throw the scale of this once-stately building off. And it was not authorized by Congress or reviewed by the proper historic overseers. The East Wing should be rebuilt as it was.

I have been a member of the National Trust for Historic Preservation for man years and I wholeheartedly thank them for, and support, their efforts to put the brakes on this horrendous project. It was begun in secrecy (with no oversight and no apparent coherent plan for the eventual reconstruction of this beloved historic structure) by a President who has demonstrated zero respect for--or even interest in--the beauty, dignity, and historical signifigance of our nation's capitol and the architectural works that stand as significant markers of our history, as well as the individual Americans who have contributed to the ongoing work of forming a more perfect union. The project must be abandoned. The East Wing must be restored. No presedent has the right to destroy public buildings to satisfy his own ego. The White House is the people's house. Period.

I am deeply outraged by the demolition of the East Wing of the White House and strongly oppose the addition of a ballroom to the historic complex. The East Wing is not just a functional space—it is part of the architectural and institutional fabric of the presidency and a tangible link to our nation’s history. Destroying it for the sake of an ornamental

expansion shows a troubling disregard for preservation, stewardship, and the symbolic meaning of the White House as a public institution, not a private venue. Alterations of this magnitude undermine the integrity of one of the most important historic buildings in the world and set a dangerous precedent that legacy can be sacrificed for vanity. This proposal should be rejected in favor of protecting the White House's historical character for future generations...RESTORE THE EAST WING.

I oppose spending ANY sum of money on what is being termed a modernization project, when in fact it became a demolition project at the behest of a rogue President who knowingly began demolition when he did not have any such Congressional authorization to do so. That property belongs to the AMERICAN PEOPLE and Donald Trump only has the

use of such property during his term of office, does not own such property and does not have the right to do as he pleases with such property without the express permission of Congress. Therefore, I suggest the American public rebuild the historic East Wing of OUR White House to the specifications of the original East Wing. I also suggest the American public proceed with criminally charging Donald Trump for the destruction and defilement of a National Historic Building and proceed ahead with a lawsuit suing Donald Trump for the entire cost of rebuilding along with damages and lost use of the building caused by his egregious, disgusting attempt to destroy a portion of OUR WHITE HOUSE.

If the Trump admin insists on proceeding with this project, the structure should not have a footprint larger than the previous East Wing. From a preservation perspective, it needs to be the same size as the original East Wing and it needs to look very similar on the outside.

I am an archaeologist who works in cultural resource management, and I oppose the East Wing Modernization Project because of the dangerous precedent it sets for our cultural resources.

By demolishing a portion of one of our nation's most iconic cultural resources without first undergoing the required review and approval process, the project undermines a long-standing suite of legislation protecting our shared heritage. If allowed to proceed, I fear the project will set a precedent to other developers that the federal government no longer

enforces this legislation. Doing so will endanger historical and archaeological sites across our nation.

Furthermore, tens of thousands of Americans, including myself, earn our livelihoods by ensuring projects such as the East Wing Modernization Project comply with federal regulations protecting cultural resources like the White House. Allowing the East Wing Modernization Project to move forward without such reviews is an affort to my colleagues and the important work we do every day to protect our heritage. Proceeding with the Project would set a precedent that endangers not only our shared heritage, but also the livelihoods of tens of thousands of Americans who have devoted themselves to protecting it.

The White House is the People's House. It represents our invaluable legacy as a democratic republic. Therefor, the new East Wing should reflect this tradition. Any replacement of the historic East Wing of the White House must be built in a legal and aesthetic manner, following the rules that require it not overshadow the White House and be architecturally appropriate et cetera. The Commissioners may have to step a bit further back in the process, and not start, as it appeared in the hearing I watched, with the mess and chaos the President has produced as if that is normal and okay. THINGS ARE NOT NORMAL AND OKAY IN WASHINGTON!!!

They are not normal because, if you're following the news of the Epstein files, evidence may soon surface to show the President has been an active participant in an international child sex trafficking crime that yesterday the UN Commission on Human Rights stated appears to involve Crimes Against Humanity. The reason I bring this up is to say, please, everyone stop operating with such fear of displeasing this horrendous man!! Of course it's repugnant and inappropriate for me to write about sex crimes in a commentary of the National Capital Planning Commission. But if not here, then where? If not now, then when? Everyone must do their part to put a stop to the completely amoral, unethical, and dishonest goings-on in Washington DC, and you, the National Capital Planning Commissioners have an opportunity to put something right.

I literally wept as I watched the wrecking ball tear down the East Wing, an important part of the Peoples’ House. The remodel must be consistent with the dignity and historical tradition that is expected of a building that is central to our country’s history. I expect that all rules and regulations and timelines should be strictly followed. Whatever replaces our beloved East Wing should be constructed to stand the test of time. It will remain standing long after the current occupant of the White House is gone. It should as a monument to the courage, honor and dignity of the Americans who have died protecting our country and our democracy. It should not reflect the whims of one particular individual.

The east wing should not be a change in appearance from the way it looked prior to destruction. It needs to balance the west wing both in scale and in style. There are venues which could accommodate large social functions and could be rented as needed. The White House is one of our national symbols and should be respected as are the Eagle and the flag.

First, and foremost, I am absolutely disgusted at the current administration's act of demolishing the East Wing without going through proper channels. This administration believes itself above the laws that govern our nation - right up to the capital of our country. I am vehemently against turning the former space of the East Wing into a ballroom that will be tackily decorated and used for the sole purpose of the current administration's quest for more money and elitism. Our country was founded on the principle that ALL MEN (humans) ARE CREATED EQUAL. This gaudy display of perceived status and wealth goes against this principle.

It is my view that the East Wing should be rebuilt in its past form - clearly upgraded but not in such a manner as to further embarrass the citizens of the United States of America.

Please do not use outside donors to create a monster…. Let the design and payment for the building be done with decency, elegance and to honor the existing building. Please do not allow for a monstrosity to built so that the current sitting president can leave his mark on the White House.

We do not need an oversized ballroom with no sense of history and current decorum.

Thank you for Asheville, North Carolina.

I ask that the unauthorized East Wing demolition be stopped, and that the building be reconstructed at no cost to the US government. The entire project was a rushed "middle of the night" attempt to modify the People's House to please one man. The East Wing of the White House stands defaced and destroyed, and it must be rebuilt to specifications decided by

the appropriate planners and with required approvals. A $300 - $400 million dollar ballroom is unnecessary. It is unwanted. Please stop the destruction and rebuild our house.
Sincerely,
Lynn Butler

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

I oppose the modernization of the East Wing". The East Wing has historical significance, was beautiful and was a perfect compliment to the White House. The current occupant of the White House did not follow the rules set forth to modify or modernize historic buildings. It is not within his purview to do whatever he wants with historic buildings; he does not own these buildings!

As a US citizen, resident of the District of Columbia and retired historic preservation profession I find the proposed project to be profoundly distrurbing for many reasons. Many aspects of the legally required federal review process have already been perverted. These safeguards exist to ensure transparency, accountability, and meaningful public input. Public input should occur before construction makes the outcome irreversible. The applicant has failed to consult in good faith with the many pertinent expert agencies and entities such as the National Park Service and National Trust for Historic Preservation.

The proposed project demolished the existing West Wing without regard for its historic significance and without any consultation. The proposed design for a 90,000 sf "wing" is excessive in size, dwarfing what remains of the historic building. The enormous wing is significantly larger than the White House and West Wing together, unbalancing the composition, creating visiual disharmony and symbolically elevating entertainment and pomp above all other aspects and functions of the White House. The enormous and highly elaborate design of the proposed wing is not subordinate to the remaining historic building, as is required by the Secretary of Interior's Standards. It will leave the historic White House appearing as if it is a modest wing of the "grand" new building. It is unbelievable that as a country we are at this juncture and that this project, so obviously incompatible with our prior vision of the house of the people suitable for a democratic nation, is under consideration.

The East Wing, full of history and belonging to the people of this country since it was constructed, should be rebuilt, restored and furnished with its original contents. Its recent unauthorized destruction violated the law , ignored the norms of respect for our heritage, and broke the hearts of all Americans who have visited the East Wing, seen it on TV, and trusted it would always be there unless lawfully modified. We weep.

The proposed ballroom construction to replace the East Wing is way out of proportion to the White House and inconsistent with the size and spirit of this early 19th century place. It has not received input from the appropriate institutions in charge of our historical properties. None of the steps required to accomplish demolition or construction have been taken. Nor have the American people been consulted through their elected representatives or otherwise. Instead plans have been thrust forward, based on dubious funding by wealthy individuals currying favor with the current administration.

Those responsible for bulldozing down the East Wing should be prosecuted to the fullest extent of the law. The costs to restore the East Wing should be sought from them as damages. The proposed ballroom should be rejected, and if necessary, enjoined by a court of law.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

Respectfully, Janeen Provazek, Tacoma, WA

The East Wing Modernization Project should be carefully reviewed for its architectural integrity as it applies to the size and design of the new wing. I think ballroom space is appropriate as long as it enhances the main structure of the White House and does not overshadow it. The new wing should also complement the neoclassical design of the original structure both inside and outside, following the understated elegance that the White House has represented for centuries, and not the neo-bordello design favored by the current administration.

The destruction of the East Wing without any process, consideration, approvals, or design consultation was an inexcusable crime against the American people. Donald Trump should be prosecuted and required to pay for it's reconstruction without a "ballroom". He should be required to personally pay for Architects, Preservation Architects, Engineers, and Historians to accurately develop construction drawings to reconstruct it exactly as it stood. He should pay for every cent of the construction. He should also be impeached for this crime among hundreds of others.

The proposed $300 million expenditure should be rejected. This project moved forward without the necessary approvals, permits, or design oversight, and its continuation would legitimize a process that ignored established legal safeguards. Rather than representing thoughtful modernization, the plan effectively erases a significant part of America’s historical legacy.

I call for the project to be stopped immediately and for the East Wing to be reconstructed and restored to its original design. Upholding the rule of law requires accountability — proceeding without penalties for those responsible for the violations would undermine fairness and respect for the law among the public.

Please stop this insanity. This is the people's house, not a Trump branded building. He has/had no right to destroy any part of the house to start with. He has no right to dictate what goes there. He can suggest, ask, petition, but to have the gall to simply tear down part of the house with no oversight or permission by commissions as your self is unacceptable. Finish the demo, clean up the site, plant sod and start from scratch in a manner that involves all the stake holders ie. the representatives of the US people. Washington does not need another Tacky Trump monstrosity. The ballroom, IF it must proceed, should not dwarf the people's house, nor diminish its gravitas as the symbol of US democracy. PS I dispute the necessity of a ballroom at all. Perhaps a parking garage would better suit the people that work there. All attempts to thwart the planning commissions authority in determining what happens to the people's house must be rebuffed. Trump will be here for only 1000 more days. What he has destroyed will be a smear on the city for decades.

First of all, this is not an East Wing "Modernization" Project; it is an East Wing Destruction Project. The very notion that an individual -- regardless of who -- could tear down part of the White House without prior study and permission from the public is utterly wrongheaded. The White House is a National Historic Landmark and National Park, owned by the American people and stewarded by the National Park Service. The current administration's "it's easier to ask for forgiveness than permission" approach is inexcusable.

No, it is not okay to tear down the East Wing and put up a giant ballroom. No, the White House doesn't need a giant ballroom. No, the American people don't want our history destroyed and replaced with garishness.

The people behind the destruction of the East Wing should be compelled to built it back the way it was, inch by inch, at their own expense.

Never again should politicians or their cronies have the gall to destroy Americans' historic treasures.

I, along with so many Americans, vehemently reject the idea of building a lavish presidential ballroom onto the East Wing. At a time when our country faces real needs — from preserving history to serving the public — this feels wasteful, unnecessary, and completely out of step with what the White House should represent.

Instead, the East Wing should be used in ways that actually serve the American people: expanded public history exhibits, educational spaces for visitors and students, preservation of the building’s historic character, or programs that reflect the dignity and purpose of the presidency. The White House is not a private estate — it belongs to the nation. Its spaces should reflect service, stewardship, and respect for history, not personal grandeur.

To have destroyed the East Wing already is tragic.
To have done so merely to provide the current occupant with a forum for entertaining the wealthy is in complete philosophical, ethical and fiscal opposition to what this country was founded upon. To have further allowed it without the proper vetting and oversight is illegal.

Two times in history the White House was damaged. Once in 1814 at the hands of the British Army.
The second time was this summer, and the guy who swore to uphold the Constitution lit the proverbial match.

The White House stands as a visual representation of our nation’s identity. When its legacy is dismantled without transparency or lawful process, it mirrors the broader instability and division many Americans feel today. I was appalled to see this destruction.
The decision to spend $300 million on a project undertaken without proper authorization, permitting, or design oversight is deeply concerning. What is being described as modernization is, in reality, the erasure of American history.
Additionally, having big business offer to finance part of this to curry favor with the President is unconscionable.
This project should be halted immediately, and the East Wing restored to its former design and historical character.
Accountability matters.
Restoration matters.
To unify and move forward, we must recommit to preserving both our civic and physical institutions and return our nation to a foundation grounded in respect for history, law, and shared purpose.

Many Americans were horrified to see our white house destroyed in the dark of night. I want this project canceled, and the East Wing rebuilt and restored to its former design. There should be a bidding process in place with The National Historic Society in charge of awarding the architects and leading/approving the renovation. It is imperative the east wing design be dignified and hold the same functions of the previous design. There is no need for an enormous golden ballroom to be included just to satisfy the enormous ego of the current temporary president. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans. Watching the destruction of the People's House was a shock and one of the saddest occurrences I have witnessed. It should have never happened, but now that it has it is time to stop it in its tracks and restore the East Wing as designed. We do not need billionaire "sponsors" aka BRIBES to be involved in this building. Please restore dignity to the People's House.

The act of tearing down the East Wing, unlawfully ordered by Donald J Trump, was a travesty and a descecration of The Peoples' House. The ballroom that he wants to put in its place should never be allowed to be built. The simple solution to correcting this unlawful act is to rebuild the East Wing as it was, and require that the project be paid for by the person who ordered the destruction in the first place - Donald J Trump. The funds for this restoration project could and should be seized from the money Donald Trump has been taking in violation of the Emoluments Clause of our Constitution, which prohibits federal officials, including the president, from receiving gifts, payments, or other benefits from foreign or domestic governments beyond their official compensation to avoid corruption or undue influence. The people of this country should not be paying one cent to this unlawful project!

I do not agree with President Trump's plan to turn the East Wing into a massive ballroom. His directive to tear down the previous structure was illegal, immoral, and unethical. I recommend that the site be restored to the same size and function as it was in the past, with appropriate modernizations as needed.

I oppose the spending of $300 - $400 million dollars on this project, which was done without the proper authorization, permits, or design review. Calling it the East Wing Modernization is a joke. It is a vanity project for the current President who claims it will be paid for with private donations. Do you really believe the pledges for this will materialize into actual cash, and at what cost in the form of special treatment and favors to the billionaires? The White House does not belong to the President, it belongs to the American people, he is a temporary resident and nothing more. The size of this “Ballroom” will overshadow the White House and the décor will be a grotesque dripping of gold. This project must be stopped and the East Wing build back to its original size, or at least a size more complimentary to the White House. Thank you for everything you are doing to prevent this project from moving forward.

I oppose constructing the ballroom as proposed due to poor planning and subsequent project scope creep. While we cannot bring back the destroyed East Wing, proper studies of the need for the proposal must be done before moving forward with a proposal to "modernize" the East Wing that was torn down. This is not just about building a ballroom. It is now also about replacing the East Wing and bunker within the scale of the existing White House and grounds. An assessment must include impacts to the historic site as well as construction and maintenance costs moving forward, especially the costs to the American people. If a large ballroom is needed, alternatives need to be considered, including constructing an oversized ballroom at a different location where the historic White House and Grounds are not compromised.

As a child, I went to Washington DC with my parents. I remember touring the White House, and the Capital. We went to Smithsonian Museums, what existed in the 1960's. Now there are more Smithsonian Museums, and each brings parts of history that were not included at the start. Native American. African-American, more. I remember my mother bending down as we looked across the Mall at the magnificent buildings: "They belong to YOU, honey. They belong to all of us. And you can come whenever you can, for the rest of your life. And they're free because they belong to us."

Donald Trump is the WORST TENANT EVER. Which is the understatement of the decade if not century. He has no respect for history, he has no respect for citizens. The man doesn't read. He can't READ. Has he read a book in the last month? The last year? The last decade?
He wants a damn"Ballroom" and he wants it to have his name all over it and his awful, awful, taste (the gold 'touches' in the Oval Office are bad enough). If we maybe could use an event space, it needs to be a thoughtful and respectful process. It needs to fit the proportions of the buildings. It needs to be restrained, not obnoxious. BUT nothing about DJT is restrained. He flaunts the law because he is above the law. Tear down the East Wing? Yeah. Go through the regs required? Screw the regs. Because what are 'they' gonna do after he ambushes us with a demolition? Too late. He is white-washing history, erasing anything but his name. His power. His legacy.

Please stop him. Please. I'm 76. I need to have this over, have my country back, democracy back, before I die.

The destruction of the East Wing was an abomination and I now write to oppose the president's push for a "ballroom" attached to the White House. It is vanity project designed to distract from the administration's malfeasance in other areas (e.g. ICE incursions and violence, lack of transparency around the Epstein files, etc.) and to bolster the president's insatiable ego. Additionally, this structure allegedly will be paid for by private donations from corporations and individuals currying favor with our corrupt president. How will those payments be tracked? How can we safeguard decision making on the inevitable conflicts of interest such payments contain? The entire enterprise is fraught with the risk of greater corruption than has been evidenced thus far. If the building is allowed to proceed, I can only hope that the next president either repurposes it for the public good or destroys it outright.

The obscene destruction of the East Wing without design plans, permitting or permissions seems like it goes against common sense and common law. Those who are responsible for its destruction should be held liable, and accountable. They have violated the peoples house, and should be forced to rebuild the structure at their expense, with full oversight of the Historic Preservation Committee, following all laws regarding zoning and permitting. How dare a President tear down part of an historic landmark to build a gold laden ballroom. No President has ever tried to do this before. Washington, DC is not Maralago. It is the people's house and we allow him to reside in it. Even though it may have private funding, this should not be allowed to a very historical building. Thank you for giving me the opportunity to voice my opinion. I am opposed to spending any tax payer money or private donations to build a ballroom. A very unnecessary, and frivolous vanity project. I want this project cancelled, and the East Wing rebuilt and restored to its former design. I am very disheartened that a President has so much disregard for our country’s history and the American people, that he destroyed the East Wing and started building a Ballroom, without the proper authorizations, review or permits. I am also frustrated that he destroyed the Rose Garden and replaced it with a cement patio. I feel he should personally be responsible to rebuild everything back to its original design, with his own money, including the disastrous, gaudy changes he made throughout the White House.

I strongly support the restoration of both the East Wing and the Rose Garden to their original place in the White House.

How dare he destroy these things because he wanted an unnecessary ballroom and she has no concept of how to manage a garden!!

The White House does not belong to him, although he thinks he’s going to become a permanent resident. Nor to her. It belongs to the American people and has a history that needs to be maintained and shared. Among my books is the book about Jacqueline Kennedy, a woman I deeply admire, and her restoration of the White House. While Nancy Reagan felt that the White House needed new china, I love Rosalyn Carter’s comment about using the china from different administrations.

The destruction of the East Wing and Rose Garden was just plain tacky, and took away from this important history. It must be restored and laws must be passed that there won't be any more destruction to the People’s House.

Thank you, Steven LaVigne

I was horrified at the destruction of the East Wing, a building of massive historical significance that cannot now be replaced, but "what's done is done."

I hope that the replacement East Wing will be approximately the same size above ground and approximately the same design as the destroyed East Wing, maintaining the scale and importance of the central White House. It would be desecration of our history to have a "ballroom," especially an absurdly gilded one out of a French comedy, outweigh and overshadow the central White House and its history.

I have no objection to a massive increase in the size of the below-ground facilities, shelter, etc.; I object only to the massive planned size of the visible building aboveground.

I oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval.

The funding creates unacceptable conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of the president who controls those contracts. This is not charitable giving. This is an investment in access and favorable treatment.

The White House belongs to the American people, not any individual president. I urge the Commission to reject this proposal until full legal compliance is achieved, including congressional authorization and completed environmental assessments. No temporary occupant should possess unilateral authority to demolish historic structures without following the law.

The funding creates unacceptable conflicts of interest. I oppose the spending of ~$400 million on this project, which was initiated without the proper authorization, permits or design review.

It is not a modernization project but rather a complete razing of U.S. history.

This project must be completely canceled.

The East Wing must be rebuilt and restored to its former design.

No one is above the law; to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding U.S. citizens.

Another thought: Leave it exactly as it is now — tarps, scaffolding and all.

Put up a plaque, like a war memorial, explaining how we literally destroyed our own executive mansion. Let it appear in the corner of every news broadcast about what “The White House” or “Washington” did today. Let it appear in the background of every movie set in DC.

Leave it there until we have repaired the damage done from 2025 through 2028. Until we’ve reunited families that we chose to destroy. Until we’ve recreated the regulations that were wiped out without thinking. Until we’ve put limits on the executive branch’s ability to unilaterally declare war on external “enemies,” and support a secret police on internal ones.

Leave it that way until our former allies say that they can trust us again. (That will be a very long time.)

Let it be a reminder of how we are destroying ourselves right now. We’re going to want to put this unnecessary destruction behind us and pretend it never happened.

And we can't do that if we are ever going to learn the lessons that this illegal destruction must teach us.

I oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval.

The funding creates unacceptable conflicts of interest. The White House is a National Historic Landmark and part of the National Park System. It is owned by the American people and has served as the home of U.S. presidents since 1800. The president at any given moment is not the owner of this property, but a temporary steward and resident, whose authority to alter this site is constrained by law, established preservation standards, and a fundamental obligation to the public trust.

The demolition of the historic East Wing without transparent public review, meaningful permitting, or Congressional oversight represents a profound failure of that stewardship. The American people were given no opportunity to weigh in on a decision that permanently altered one of the most symbolically and historically significant sites in the nation. What should have been presented as a proposal subject to rigorous review was instead treated as a fait accompli. This approach undermines both the letter and the spirit of federal preservation law and erodes public confidence in the stewardship of nationally significant historic resources.

I urge the National Capital Planning Commission and the U.S. Commission of Fine Arts to require the reconstruction of the East Wing in a manner consistent with its historic design, scale, and relationship to the Executive Residence. Restoration and reconstruction of historically significant structures is a well-established preservation practice when irreplaceable resources are lost, and it is especially appropriate for a site of this national importance.

Any future construction on the footprint of the demolished East Wing must be compatible in form and clearly subordinate in scale to the Executive Residence and the historic composition of the White House complex. New construction should not eclipse, overwhelm, or visually compete with the People’s House, nor should it permanently distort the classical balance of the East and West Wings that has defined the White House for generations.

As we approach the 250th anniversary of the founding of the United States, the White House should stand as a model of principled stewardship of our shared heritage. The appropriate response to the loss of a historic component of this complex is not to normalize the loss through over-scaled replacement, but to restore what was taken and ensure that any necessary modernization honors the historic integrity, symbolism, and public ownership of this irreplaceable national landmark.

Modernization project?? Ok, you can call it that. This whole ballroom is nothing more than an ego project for trump. It will be unslightly and should NEVER have been allowed to get this far. It ISN"T his house to tart up like he pleases. The oval office alone is obscene but the next president can take that down.
Where are the historians and nat'l park service? All afraid of this administration? This is exactly what happens when you abdicate all power to the executive branch. We get this crap. The demolition of the East wing is an abomination. Does the country (or even private citizens) need to spend millions and millions of dollars on a ballroom that would make Liberace blush. Trump said it is being funded with private donations, but most of that money has probably been spent and he is notorious for promising a big beautiful ball room then refusing to pay contractors or billing the tax payers for it. It makes me sick. It is just another ploy to stroke his enormous ego. I applaud the federal judge who has halted the project because he did not follow the letter of the law! But when has that ever stopped him? Now we just have a gaping hole of rubble which will be symbolic of the Trump presidency.

I strongly oppose and am grieved by the destruction of the East Wing. This demolition was done without proper consent, and the whopping $300M price tag is an affront to all Americans who value justice, fairness, and following the law. Calling this project a "modernization" is absurd. If the East Wing needed repairs or restoration, those should have been done. This so-called "modernization" is the equivalent of burning the house down because it had termites. I urge the

Given the old building has been already torn down - it's obvious that something should be rebuilt. But the funds spent on this need to be done like an average person doing a remodel on their house - with a controlled and reasonable budget. The White House is not a showcase of gold and marble. The people's house should be built solidly with quality and matching the architectural style of the existing buildings. Us / the public funding a place for the president to host grand events seems inappropriate. I won't ever be invited there - so why are my taxes being used for extravagances? How about funding our healthcare first and then we'll see what's left to finish off a reasonable sized place to hold gatherings with reasonable size attendance.

I am very concerned about the scale of the East Wing Modernization Project. The schematics show that the renovations will dwarf the rest of the White House complex. With a careful, thoughtful process, the renovations can surely accomplish practical needs, while honoring the historic design. The White House is a cherished public asset and should not be altered so significantly without input from the public and the involvement of historic preservation specialists. It should never be the prerogative of one administration to make such dramatic changes unchecked.

I strongly object to the current plans for the East Wing Modernization Project. The enormous ballroom dwarfs the rest of the White House--the tail wagging the dog, so to speak. No reputable architect should be proud of such a monstrosity. The fact that it is being funded with private money from people who want to buy the President's favor is also a strike against it. I suggest that the architects go back to the drawing board and design a ballroom that is reasonably proportioned in relation to the existing building. The architects recognize this addition is totally out of proportion and suggest adding a “modest one-story addition” to the West Colonnade, to “restore a sense of symmetry to the original central pavilion.” Where will this end?

To the Commissioners of the National Capital Planning Commission,

I am writing to formally oppose the proposed demolition and “modernization” of the East Wing of the White House, including the construction of a new ballroom.

I strongly disagree with the demolition of a historic and functional part of the White House complex. The East Wing is a nationally significant structure, and its removal represents an irreversible loss to our shared civic heritage. Historic preservation laws and federal review processes exist for a reason, and they must be followed without exception.

No individual—regardless of position or power—is above the law. The actions being taken under the direction of Donald Trump appear to bypass or undermine the established approval, review, and transparency requirements that govern federal construction projects on historic sites. This is unacceptable.

I urge the Commission to immediately halt demolition and suspend all construction related to the proposed ballroom until the project has gone through the proper legal channels, including full review, public input, and required approvals. Allowing work to proceed without these steps sets a dangerous precedent and erodes public trust.

The role of the National Capital Planning Commission is to protect the integrity of our nation's most important civic spaces. I ask you to uphold that responsibility by rejecting this proposal in its current form and enforcing compliance with all applicable laws and processes.

Respectfully,

Alyssia Cursi

I am against this project. As a former planning commission representative for my town and county, I know how important it is to follow the rules, whether we like them or not. The rules for this project have not been followed from the start which should put an end to the project for that reason alone and the East Wing be rebuilt to it's former self. The buck needs to stop somewhere and this is a good place for that to happen.

Funding, this is not a funded project, not a funded budget item. Getting donations that have yet to materialize is not stable funding. Once again, where is the bond for the construction, where is the income for this coming from. From what I understand, the deconstruction still has not been paid for - again, not a budget item.

I ask you to please consider very carefully, your decision in this matter as it not only effects the look and feel of the area, but the history of this structure. This also effects each taxpayer in this country, who seem to not have a say in so much of the deconstruction going on right now.

Thank you for your time.

Dear Fellow Citizens,

I am extremely troubled by the unauthorized actions of Donald Trump’s demolition of the East Wing of the People’s House in order to construct a 90,000 sf ballroom.

The White House website greets visitors with this message; WELCOME TO THE GOLDEN AGE. So it is no surprise that this man wants to adorn himself with a guided ballroom, the likes of which, to use his common words, the world has never seen…has never been done before. INDEED.

This is unauthorized use of the People's money for his glory and ego! People are hungry. People can't pay their bills. People are having to put all their attention on survival while this man lays another golden egg.

I am throughly disgusted and angry at this man and his cronies who have allowed this to happen at all but especially without oversight.

Our country is bleeding gold into the pockets of the wannabe King Donald.

The White House and all its buildings belong to the American people.
We value and treasure the history of the White House campus and all of DC and do not want to see it destroyed for the whim of a President.
My strongest objections are:

1. All laws and regulations must be respected. All permits and reviews must be followed. The President has already broken these laws, precedents and protocols. It must be reviewed by a nonpartisan body.

2. We were told this entire project was funded without taxpayer money. that appears to be a lie. The funding for any approved plan must be validated and cannot include pledges unless funds are desposited, and cannot include foreign contributions.

Halt the project until it passes all traditional permitting and approval processes.
Halt the project until non taxpayer funding is confirmed and placed in escrow in a US account.

I understand that even a place as beloved and historic as the White House may need additions or changes from time to time. When
that is the case, it should be done with the utmost care, planning and the input of a wide range of experts. The demolition of the East
Wing was done in the worst possible way, without even a “concept of a plan”. The attitude of the President appears to be “What are
ya gonna do about it”? Donald Trump is a temporary, part time resident there and so does not have a significant say in such a project.

In addition, the funding for any construction at the White House must come from the American people, not so called “donors”. There
is no “free lunch”, be it for this project or an airplane from Quatar.

From what I read, the Secret Service would naturally like a resolution to the area of the former East Wing. My recommendation is that
the East Wing should be put back as it was at Trump’s expense. Time & care should then be taken to decide if another structure on
the grounds is needed & how to have it fulfill its purpose.

I am opposed to this project for the following reasons

It is just a vanity project for Trump.
Being built with private donations is just a way for billionaires to curry favor with Trump.
The White House is a historic landmark, past renovations were small upgrades, not wholesale demolition of a complete wing.
The way this project is ignoring the regular process and just pushing forward without reviews or oversight is wrong. They rushed to demolish the east wing by saying demolition does not require a review which makes no sense. Demolition is part of the project!
Their excuse now that the project is too far along to stop is ridiculous.
He claims this project is for the American people, yet how many regular Americans will be invited to events held there?

The National Park Service website states that “The White House is owned by the American People and stewarded by the National Park Service.” Therefore, any president is a tenant of the White House, living rent free, and we The People are his landlord, receiving no rent. The tenant/landlord relationship is such that a tenant does not have the right to significantly alter the place they rent. In my younger days, when I was a renter, I may have painted walls, but I did so only with the express permission of the landlord who asked what color paint I had in mind and inspected my work afterwards.
I can understand that a larger event space for the White House may be needed and that erecting tents in the backyard is not an ideal option; however, the proposed addition needs to be carefully examined by architects and historians who will consider not only size and functionality, but also history and aesthetics.
Carol Quillen, President and CEO of the National Trust for Historic preservation writes of her concern that the proposed size of the new East Wing will overwhelm the rest of the White House and disrupt the balanced, classical design. The Soclety of Architectural Historians on October 16, 2025 expressed “great concern” over the ballroom addition. I am neither an historian nor an architect but I am embarrassed by not only the size but also the opulence of the proposed addition. Some may see what is planned as sumptuous and regal. I see it as gaudy and ostentatious and not in keeping with what our democracy strives for. We are not and have never been a monarchy. I am concerned that the upkeep of such a large structure will be a burden for future generations and the message it sends is not in keeping with what the Founding Fathers envisioned for our republic.
It is not respectful for any president to be in charge of significantly altering what is the People’s House. Mr. Trump can do that at Mar a Lago which he owns. He does not own the White House. I encourage you to listen to We the People, all of us, not just those who are funding this project or were appointed by this president.

This is very simple. Proper channels were not followed in planning any changes. Lies were told regarding the plans. Historical significance was not taken into account. The White House is the people’s house. It belongs to the people and changes must be approved properly. Halt and begin again, rebuild according to our history of a dignified, reserved mansion and offices. Ballroom should reflect the same dignified, reserved decor and atmosphere.

Restore the east wing with construction updates to its original purpose, decor and original footprint. The gold all over the Oval Office, White House, Kennedy Center etc. is gaudy and I find ugly as do my friends. That type of decor does not represent most of the citizens of the United States. It should not be labeled a "modernization project" since it is actually a complete razing of an icon of American history.

I and my family want this project canceled, and the East Wing rebuilt and restored to its former design, with "true" upgrades as needed for the modernization of plumbing, electrical, HVAC, and other elements of the structure which may have been required, albeit without necessitating the destruction of the entire wing.

No one is above the law, especially a President who has sworn to uphold our laws and the Constitution. Therefore, to permit this project to resume as already defined without any penalty being accessed upon those who broke the law would be an affront to all law-abiding Americans.

I can not begin to explain how angry I am that trump had the audacity to tear the east wing down without considering the historical significance of the building and grounds. Many, many of us feel like part of our history has been torn away with no regard to how meaningful it is to us. We do not want an ostentatious "Big beautiful ballroom." That is is the last thing we would be spending money on with thousands homeless, people dying without health insurance, our deficit exploding. But it isn't even the money...It is the cruelty and lack of care that demean the pain citizens felt as something iconic, representative of who were are as a country was thoughtlessly demolished. Please, please put our East wing back together and make the White House whole again. We do not want a ballroom, we want our White House restored to its glory not sullied with an ugly overwrought ballroom that does not represent Americans at all. If we have to, the citizens will raise the funds but not for a ballroom, we want to east wing restored.

Members of the Planning Commission:

I am an historian with a specialization in early American society who believes Washington DC's architectural legacy is important and worth preserving. The haphazard way in which the East Wing of the White House was demolished was not only heartbreaking, but irresponsible and any rebuilding that occurs should be a thoughtful and carefully overseen process that takes into account historical integrity and consistency in design and scale. No single president, of any political party, should be able to destroy and redesign buildings of historic significance as a personal vanity project. The White House belongs to the American people and should be treated as such. Thank you for your time.

President George Washington, the father of our country, was instrumental in the design of what would become the White House.

I believe he and all of the founding fathers envisioned a house for the President that would reflect the Democratic republic they had created. It was to be a home for the President and not a palace for a king.
Obviously, there have been modifications over the years, but they have been modest and in keeping with that original vision.

I believe what President Trump is proposing is an abomination and completely disrespectful of that vision.

Many presidents and their families have made the White House their temporary home over the years. Babies have been born, weddings have been celebrated and puppies have been trained and loved there. In addition, Americans and leaders from all over the world have visited and dined there. All of it conducted with beauty and grace and simple elegance.

The American people have no need for a humongous ballroom.
The White House was meant to be a dignified and gracious home.
No more, no less.
To expand the footprint of this beautiful home to make it into a grotesque museum of epic proportion would be a mistake.

I hope the people responsible for reviewing this project will think seriously about how they will be changing the original vision of President Washington, and that would be a crying shame.

RE: NCPC File Number: 8733

Dear National Capital Planning Commission Members,

I am very concerned about the construction activities at the White House in association with the East Wing Modernization. Even though the building and site are exempt from review through Section 106 of the National Historic Preservation Act of 1966, a project of this importance should still have close scrutiny through a similar or even more rigorous process. The White House is one of the most iconic buildings in the country and holds historical significance like no other. I, like many Americans, am deeply disturbed that the East Wing was demolished without any forewarning or input from the architectural or historic preservation communities. Since that is in the past, I will focus on what may be built in its place.

Any new construction must not detract from the size or visibility of the White House. The current proposal for a ballroom is immensely out of scale with the rest of the White House and the historic site, diminishing the appearance and stature of the White House. The proposal, with 90,000 square feet, will completely overshadow the current building. The replacement structure should be reduced greatly to a scale more in keeping with the remaining White House.

We must also challenge the premise that a ballroom is needed at the White House, particularly one of this size. There are many fine, historic and modern, ballrooms and event spaces under control of the federal government that currently serve that purpose. If a new ballroom is inevitable, it should be of a size and scale that will be useful to the greatest extent.

The current proposal will create ongoing maintenance expenses for taxpayers to cover for years to come. The cost of heating, cooling and maintaining a space that large, and that is infrequently used, has not been communicated to the public. The project should not move forward until such analyses of ongoing impacts and operating expenses have been completed. A detailed cost analysis should also be made of the environmental impacts of mining, manufacturing, and transporting the materials for the project. The fact that construction is proceeding without complete plans, multidisciplinary professional input, and unbiased public consultation is appalling.

I join the American Institute of Architects in requesting that all construction halt until full documentation of the project's scope, budget, schedule and procurement path has been completed and made public, and broad solicitation of professional input, including preservation architects, has been included in the decision-making.

Sincerely,

Donald R. Horn, FAIA

I am writing to express my opposition to the proposed construction of a 300-400 million dollar private ballroom. The size is outlandish and the cost astronomical. This administration cannot say there’s no money for health care yet spend money on a new East Wing that most Americans will not even enter.
A temporary resident of the White House should not be allowed to make such sweeping changes to the People’s House. While I understand something will have to be rebuilt to correct the current destruction the current plans should not be allowed to continue. A reasonable proposal should be submitted and historians and the American people should have a final say on the finished product.

If this would be imposed upon me then it should be imposed upon every other resident of the United States including Donald J Trump. He has acted without authority and ignores all laws as though they don’t pertain to him. As a United States Citizen that pays taxes in this country I have some demands.

1.) I demand that any and all planning and construction of this ballroom be halted immediately.
2.) I demand that Donald J. Trump be held criminally and civilly accountable for the destruction to the East Wing of the White House. This act was not within his scope of duties as POTUS and therefore he has no immunity.
3.) I demand that Donald J. Trump pay personally for the complete and total restoration of the East Wing as it was before being razed with the exception of upgrading materials for weatherization, and upgraded technology. Trump is to pay for it all.
4.) I demand that Donald J. Trump be restricted from having full access to all government buildings, services, grounds, etc.. He has willfully and with malice defaced and ruined multiple government assets and it must stop. He does not own these assets, the people own them.

I am writing to express my outrage at what has been allowed to happen to the East Wing of the White House. The destruction of our country's history must be stopped. The current adminsitration had no authority to do this yet no one stopped them. Please stop them then rebuild the East Wing to reflect our country's history rather than one man's delusions of grandeur. Thank you.

What is occurring with the destruction of East Wing of the White House is an abomination against this historical building. I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

I want this project stopped.

Isn't this 'The PEOPLE'S House?' This 'project' is nothing more than a vanity project initiated without following established protocol & with ZERO oversight -- by a TEMPORARY occupant. Our history should be protected and, if and when needed, improved upon, not demolished.

This president is NOT above the law.

My name is Fedie R. Redd. I would like to submit my comments to your committee in regards to the East Wing Modernization project. This project is an affront to the American people. As “We the People”are lacking, unemployed, fractured, and divided in Country, this excessive project by President Donald Trump is just one more slap in the face to Americans losing our access to healthcare, besieged by foreclosures, being hurt by masked men in our streets, and high

gas and grocery bills. We do not have a King. There is no need for this project to continue. What is the purpose of this project? Why does a president require a ballroom. Will the people be able to use this ballroom? I think not! The White House is not some Trump gambling casino or hotel. This project only benefits Trump and his ego. It's excessive, ridiculous, and a slap in our faces. I adamantly oppose this project moving forward, now or in the future.

Beside all the illegal actions already perpetrated, without Congress'scrutiny, i really do not think that ANY Fire Department in the Country, and, for that matter, amy Fire Dept. in the entire World, would ever give use aithorization to a ballroom , the size of a stadium, filled up to 900 people !!!

I also worry about all the historical and artistic treasures that were the People patrimony, probably lost to reappear in clandestin auctions.
The People owned the building.
We want it restaured to its original design. Please do not allow any more destruction anywhere, including the removing of past American, Slavery or or Ethnical History from all
Museum's displays in any one of our States.

I am a law abiding citizen of the United States. I wholeheartedly REJECT the ballroom addition to the White House! The East Wing was demolished without permits erasing valued history of our nation. Billionaires are supposedly funding this abhorrent project instead of supporting by funding donations for feeding hungry Americans, funding new jobs initiatives, funding disease research, funding health initiatives, funding housing, funding mental health services… These type donations would really help Americans who are fighting for a job, housing, health care and feeding their families. Instead these billionaires are feeding Trumps insatiable ego! We do not need this glitz! The White House is looking like a cheap junkie place with all this gold decor! ENOUGH!!!

While i understand select members of the Administration's desire for a more modernized East Wing, as a taxpayer and student of history I cannot support any building projects that unnecessarily impose on the established due process and financial systems for funding those improvements and corrections. As such, i do not support any building plans at the White House that do not preserve, or in this case correct the illegal demolition of the building's centuries of history and directly serve its tax-payer funded uses. The only construction plans i can support are the reconstruction of the east wing to the existing floor plan at the beginning of January 2025, with an eye for modernizing construction, safety, and accessibility without losing the gravitas, elegance and functionality developed over numerous modern presidencies. The

White House had both a bunker and an event space that could serve as a ballroom prior to January 2025; it does not need the proposed, oversized addition.

This project is wrong and unnecessary. The White House belongs to the people of the United States, NOT the president. I fully oppose this “ballroom” and my desire is to see the East Wing restored to its original state.

We should restore the East Wing in the same style and scale as it was, and with the same placement with relation to the West Wing. Construction should include functional updates that bring it up to code and modern standards, including ADA accessibility where possible. If a larger ballroom is needed, construct it elsewhere in the city or use other nearby public spaces. Do not allow special interest funds to influence or pay for the rebuilding.
The White House is the People’s House. It was deliberately designed and built with modest dimensions and restrained aesthetics. It is not a Palace for a King.
BEFORE nationally significant places are permanently altered, the public deserves an opportunity to help shape the decision. We should follow past process for making needed but historically sensitive changes.

I strongly oppose the East Wing Modernization Project which was initiated with no input from the public nor any authority that would review the scope, purpose, aesthetics, nor appropriateness of the project. It is a completely illegitimate endeavor and must be halted immediately. I want the East Wing rebuilt and restored to its former design. No one is above the law and no changes should be allowed to the White House without proper review, authorization, and permitting. Allowing this project to proceed would reward flaunting the law and would be an affront to all Americans. The White House belongs to the American people and no President or government official should be able to change it unilaterally. Allowing this project would also set a terrible precedent.

I am requesting that this project be stopped, renovation to its former beauty be restored. The destruction took place without the proper authorization. I oppose the construction of a disproportionately large ballroom Trump vanity project at the location of the former East Wing. I am devastated that the original, historic structure was demolished by President Trump without authorization, permits, required reviews, nor appropriate safety and environmental controls.

To date the public remains in the dark regarding the disposition of historical artifacts that had been present in the East Wing. An accounting of these artifacts is needed and should be made public.

I oppose spending 300 million dollars or more to construct a ballroom while there continue to be so many citizens who cannot afford food, housing, or healthcare. Billionaires, politicians, and the president partying in a ballroom while taxpayers suffer under the weight of inflation and tariffs. What a “let them eat cake” mentality!

I hope you decline this ridiculous, gigantic ballroom proposal, publicly account for the missing East Wing artifacts, and hold accountable everyone found to have disregarded rules and safety during the destruction of the East Wing.

To Whom It May Concern,

Thank you for inviting public comment. In my understanding, the Nation's Capital is home to our entire country, whether one has ever been there or not. It is a monument to our nation's history and a window into the United States for foreign visitors. I am deeply disturbed by our current president's reckless actions with the actual White House, and how his so called improvements will be paid. The history of our country is not for sale. Billionaire backers of Trump and his mob have no place in the planning of our National Treasures. Please reject Trump's plans and return the White House to it's former state.

I strongly oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval.

The funding creates unacceptable conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of the president who controls those contracts. This is not charitable giving. This is an investment in access and favorable treatment.

The White House belongs to the American people, not any individual president. I urge the Commission to reject this proposal until full legal compliance is achieved, including congressional authorization and completed environmental assessments. No temporary occupant should possess unilateral authority to demolish historic structures without following the law.

Please vote AGAINST this proposal.

I am appalled and saddened by the East Wing demolition/expansion of the "people's house". The White House is not the current president's personal property, but a historical building occupied during their years of public service. The proposed East Wing is overly large and not in keeping with the main building. The destruction of the Jacqueline Kennedy Rose Garden is a sad loss, as well as the loss of the historic trees that were razed. The president is not above thee law and all plans must got though the proper legal channels.

I oppose the East Wing Modernization Project, including razing the historic East Wing, building a gigantic ballroom, and adding a second story to the walkway to the West Wing. The White House was conceived of as the People’s House and was purposefully simple. It was not a gilded palace for a king. I cannot find words strong enough to express my sorrow about what has happened to the East Wing. I thought the People's House was sacred and protected; that anything of this magnitude would be reviewed and discussed, and every step would be taken legally (of course) and with great care and respect. What has happened is an abomination and must not be allowed to stand. Those responsible should be held accountable and the East Wing should be rebuilt back to the way it was. I had no idea that something this destructive would be allowed and could just HAPPEN, without any input from the actual PEOPLE of this country. You CANNOT allow this tragedy to continue unchecked and without consequence. Please, give us back our East Wing - as least as best can happen as this point.

To the NCPC:

The summary destruction of the East Wing of our historic White House campus was a tragic act and against all norms of historic preservation in the U.S.; it ought never to have occurred and any renovations to the wing that were needed should have gone first through normal channels of proposals, review, etc. by the proper authorizing entities and Congress. That it did not makes it all the more important that the building of a new East Wing and restoration of the southeast garden be supervised strictly according to the laws and regulations of the U.S. government, rather than the whim of the president. What has been lost cannot now be recovered and it is a further outrage to allow this to go further without full review by the appropriate bodies.

Furthermore, the proposed addition by S. Baranes is wholly inappropriate for the People's House. It is completely out-of-scale with the historical Executive Mansion, standing taller than the residence at its pedimented entry. This is unacceptable both in terms of any interpretation of Classical design and as it sidelines the main building of the campus, which is the mnemonic and historical center of our presidential residence. There is no reasonable need for the new building to be at this gargantuan scale other than to suit the ego of its patron. The design elements (staircases, window reveals, proposed landscape design) are pedestrian, at best. Please engage a real historic preservation debate about what has happened and in a proper design, financial, and functional review of whatever will come.

Sincerely,
H. Grossman, PhD.

I vehemently disagree with the destruction of the East Wing of the White House!

Regarding the "modernization project", we do NOT need a gargantuan ball room! The People's House already had a ballroom (that Princess Diana -- among others -- danced in!). The project wouldn't even be finished before this administration is out of office, so the rebuild should be done in such a manner as to honor the original wing (tastefully, without all the tacky gold accents) and serve future administrations, not Trump's ego.

The White House is the property of the people of the United States. The current tenant has no right to remodel it. But as he tore down the East Wing, we need to address what needs to be built. There is no hurry, apparently none of the office space was needed. The First Lady does not work there.
We are a democracy and gold decorations are symbolic of autocracies. There is no place for gold embellishments in our house while people starve. Kings and sultans hoard gold. We need to spend it lifting up the needy.
The present design is out of proportion to the rest of the White House. It needs to mirror the West Wing in size. It needs to be the proper scale.
We can't have every president tearing down buildings he does not like and then hit the oligarchs I up for money to rebuild. That money needs to be allocated by Congress as it the property of the government, not the President,that's the law of the land.
Take the time needed to consult Congress, and preservationists and the people. Maturity is putting off immediate wants in order to fulfill your needs. Ask what is needed in this building. Make it the best it can be.

As an Architect who has worked on numerous Historic Renovation projects that were reviewed and approved by the National Park Service and The NC Historic Preservation office I am shocked by the how much demolition work, site preparation work and ordering of new construction materials has been done with so little review by the appropriate agencies. What is clearly happening is a project that is to be reviewed after demolition has taken place and construction materials ordered and site preparation started, which no project I ever worked on was allowed to proceed. First we submitted proper plans and documents and no work on the the started until we had all the approvals in place. More troubling is the illegal dumping of site soil and debris on a public golf course again without any permits or approvals. So in my view the whole process is already out of compliance.
As for the project itself the proposed addition is massive and totally overwhelms the smaller White House in massing and scale. The site plan also alters the traditional oval path on the south lawn. Any addition to a Historic structure needs to be subservient and respectful to the original historic building (in this case the White House one of the most significant and well known historic structures in the USA).
The current design needs to be significantly reduced in size and massing to be more sympathetic to the White House which is after all the Peoples House not Presidents Trump's House.

I oppose the demolition of the East Wing of the United States White House… the People's House… supposedly to "modernize" by building a ballroom for which there was no request for and no plans submitted to be approved. We are a nation that has procedures that have been used to prevent blatant abuse that the current Oval Office occupant chooses to ignore. I am a US citizen that never even had the privilege of visiting the White House and now a portion of it Chad been destroyed! I request the East Wing to be rebuilt according to the original design! From my understanding, that portion has been the residence for the First Family. There literally is no need for a ballroom!

I oppose the spending of $300 million on THE EAST WING OF THE WHITE HOUSE project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

I was shocked and deeply disturbed at the sudden unauthorized demolition of the East Wing of the White House. I saw it as a desecration of The People's House by a President who perceives it as his personal property.
Our White House was deliberately designed to reflect our nation as the democratic constitutional republic that it is. It is stately and dignified, but not ostentatious. It is meant to reflect the balance and values of a republic, not the royal lavishness of a monarchy or the imperial excess of an empire. It signifies this to all that have ever arrived there.
Trump's current plans for the ballroom and East Wing do great damage, no violence to both The White House and the national ideal of The People's House. Update what needs doing but please restore the harmony of the House and its meaning. Do not sacrifice the White House for one man's vanity project. He will pass soon enough. The House will remain.
Thank you.

This is not a "modernization" project, it's a vanity project by the White House. It was carried out without permits, without

forethought, and without regard for American history. The only spending the government should allot toward this project is prosecuting anyone involved in the destruction.

I am as equally appalled at the demolition of the East Wing of the White House as I at the monstrosity they want to replace it with. It is completely out of proportion with the building as a whole and how often does the White House need a GIANT ballroom? Not often would be my guess. At estimated costs of $400 million it is also insanely expensive.

This never should have been allowed. It is an insult to the history of this building. The "Ballroom " is unnecessary and destroys the look of the White House. That President Trump had the East Wing demolished without prior approval of any sort is the most egregious action taken by any president I can even think of. Using private donors to pay for the ballroom should be illegal because of the obvious favoritism it would afford them, if he even has them. Even if it were free, the cost of maintaining it and a staff to serve at all the functions would fall upon the public. It is the most unconscionable thing I think I have witnessed from a president ever. Furthermore, I believe he should be forced to rebuilt the East Wing as close to how it was, WITH HIS PRIVATE FUNDS. He made the decision on his own and he should pay for it. He has grifted enough money while in office that it shouldn't be a problem. If you have to sue him do it - he has sued the American government. The East Wing needs to be restored for its original purposes. Following that, Trump should be impeached.

I oppose the East Wing Modernization Project.
This project began without required National Capital Planning Commission approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington.
The $400 million cost is funded by corporations holding billions in federal contracts with the administration approving those contracts.
This creates an unacceptable conflict of interest.
The White House is not private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve construction without following the law and allowing public input.
I urge the Commission to reject this proposal.

Who owns the White House? It has always been my assumption that whoever occupies the mansion is a mere tenant of the american people. Any good tenant knows that when your term of residency is over, you are expected to return the property in the same condition as when you first took occupancy.

President Donald Trump does not own the White House and should be responsible for correcting the damage that he has done to that venerable building.

Should the american people believe that a ballroom is needed for public functions, then the proper site should be determined and architectural renderings submitted for review.

Funding for the ballroom should come from the federal government- not individual corporations looking for advantages.

The term “East Wing Modernization Project” is a misleading euphemism that obscures what to be the blatant disregard for protocol, rules and regulations and refers to the unauthorized destruction of a historic structure in order to construct a new ballroom which has no prior approval or appears to be in anyway following the rules regarding the historic White House grounds. No prior president has ever required a ballroom of this nature at the White House. In fact, the federal government already maintains a massive and fully functional ballroom at the State Department, which has long been used to host large-scale official events. There is no legitimate functional need to alter the historic character of the White House grounds for this purpose.

The White House belongs to the American people not the current occupant… he’s just a tenant and every president has understood that except this one. Any demolition, reconstruction, or major alteration must be conducted transparently, in full compliance with historic preservation laws, environmental remediation standards, and established public review processes. The apparent demolition of the East Wing raises serious concerns regarding whether proper procedures, including public input and environmental safeguards such as asbestos and lead remediation, were followed.

If modernization is necessary, it should be limited to the interior while preserving and faithfully restoring the historic exterior. Any exterior reconstruction should replicate the original East Wing exactly, maintaining the architectural integrity and historic significance of the White House.

No new structure should be permitted that alters, diminishes, or overshadows the historic White House. The priority must be restoration, preservation, and respect for a building that serves as a symbol of the nation and belongs equally to all its citizens.

Thank you for allowing me to comment.

This insane destruction of American history is not a modernization project. It is not improving structural integrity or adding air conditioning. If we wanted to convince tourists to our country that America really is a superficial wealth-worshipping society, this is the way to do it.

The East Wing Modernization should have been open to the people before it was torn down. Now, the replacement should be energy efficient, windows, insulation and renewable energy as some of the information brought up in this rebuild. The East Wing should stay in size to compliment the White House, not become an oversized golden ballroom. I want this project to be stopped. Demolishing federal property is a crime. Renovations of historic government buildings need to have broad public support and be approved by experts, with oversight by Congress. Total destruction is not renovation. Nothing in the Constitution gives the president the right to assault our history and destroy our monumental buildings in honor of himself. The rebuilding of the East Wing needs to be done with a consensus of support from the full Congress and the public, after a thorough evaluation of how best to rebuild it in a manner that preserves its original design and intent.

The federal government was established with checks and balances. There are three separate branches of government and no one person gets to decide everything. Congress funds projects. Courts check legality. The executive manages departments under the funding of congress. A single person should not be able to decide to tear down and remodel the Whitehouse using bribes to fund construction. Bribery is a crime not a funding source for authoritarianism.

Dear members,
The current condition, or lack thereof, of the East Wing is an abhorrent national embarrassment. It should be repaired and replaced, at any cost and the bill sent to Pres. Trump.
Furthermore, there should be no further destruction of any structures in D.C. until the East Wing is rebuilt. No Arc de Triomphe, no more name changes, nothing.
Thank you all and God bless America and the United States.

I do not believe we need a ballroom for the President to entertain. The White House has been sufficient for previous administrations and is fine for this one. I feel that the historic nature of our buildings is important and must be preserved. The East Wing should not have been destroyed. I believe the East Wing needs to be rebuilt to the specifications it was and that President Donald Trump should pay for it out of his own pocket since he did not follow the proper procedures as outlined by the government. The White House is The Peoples House not his.

I am totally against the expenditure of $300 million dollars.for the construction of the proposed ballroom and alteration of the historic East Wing of the White House. This project was begun without proper authorization or review. This is America's residence and needs to be restored to its original historic condition and preserved for posterity. This project was begun unlawfully and those responsible should be held accountable.

It saddened me tremendously to see the East Wing torn down without any disregard for its history. The pipe dream of our President’s vision for a grandiose ballroom, does not speak well to who we, as a country. We have citizens in need of food, clothing, a roof over their heads, health care, jobs and assistance for caring for their children and their parents. The idea is to have the ballroom over shadow the White House. Nothing should overshadow the White House. We were told private donations were going to pay for it, but that is not the case. The dept. in charge of oversight of historic buildings should be the one to design and approve the restoration of the East Wing. The president will no longer be in office when it’s complete. Please restore it to its previous glory. Thank you.

The White House is the Peoples' House. No one, President or not, should be allowed to tear down an entire wing of Our House. Trump did not go through the proper process to make changes to the White House. He illegally did as he pleased and it must not stand. He is not above the law. I want the Peoples' House's East Wing rebuilt as it was originally. Watching billionaires gain favors for donating to this horrid project must not be allowed.

The East Wing should be restored to the original before trump demolished it without approval. The trump family should pay for the restoration. Under NO circumstances should the trump administration (or any other presidential administration) ever be allowed to destroy federal property, including The White House. A mammoth ballroom is NOT needed at the White House now or in the future. Previous administrations have presented numerous programs within The White House walls. It will cause millions to return The White House to the glorious historical space I've been privileged to tour three times once this

Please do not allow trump to build his bunker ballroom, but return The White House to its former historical glory. Thank you.

The White House is a National Historic Landmark and National Park, owned by the American people and home to our presidents since the 1800s. The East Wing Modernization Project, whether the $300 million project is paid for by public or private funds, circumvented the appropriate authorization process. The original East Wing was demolished and reduced to rubble, along with the Jacqueline Kennedy Rose Garden, even though the "modernization project" had never been through the Congressionally mandated planning and review process. While expanded event space may be needed, additions must respect the historic scale and design of the White House. At 90,000 square feet, the proposed ballroom would exceed the size of the 55,000-square-foot Executive Residence. Additions to historic properties should be compatible in design, scale and subordinate to the original structure.

Please pause this project to allow appropriate planning steps to catch up, and to investigate the circumstances under which it was initiated. Please do not approve spending any funds to move forward until all applicable regulatory steps have been documented as completed, and any legal actions that may be required to address past regulatory failures have been taken.

Also, please start over and develop a new proposal based on a legal starting point, rather than allowing a project to be forced through by illegal, pre-decisional actions.

I worked in federal planning for almost 30 years. If we had built a road into a timber sale before conducting scoping, in order to force the decision-maker to approve the sale, we'd have been acting illegally and would have been taken to court. If we had cut down a stand of trees and then submitted analysis and documentation to try to sell the felled timber, in an effort to force a decision to do so (the trees are already down, they're losing their value, we need to do something quickly), that would have been pre-decisional and illegal, and we'd have been successfully sued. It is not legal to take

preparatory actions that prejudice a decision that way. Tearing down an entire wing of a publicly owned, taxpayer-funded building is exactly that, and is no different from the examples I provided. For that reason, you should not even be considering the ballroom project.

Instead, the process should be started entirely anew: there is now an empty space where the East Wing once stood. The planning commission should set aside the existing, illegal (pre-decisional) proposal and start from scratch, including with an entirely new project name. There is, after all, no East Wing left to "modernize".

The commission should start over and develop an objective Purpose and Need statement that accurately reflects the status of the site. That should be something like: develop a new East Wing that will honor the history of the former structure and that will accommodate offices and spaces to serve future White House staff and resident needs.

Then the commission should solicit and develop a new, objective proposal that would meet that purpose and need, and then move into the NEPA phase of decision-making. It should develop reasonable and achievable alternatives, as it would for any other decision that starts not from a pre-decisional action intended to force the issue, but from a proposal designed to fulfill an established purpose and need.

Please do not force taxpayers to use our money to perpetuate an action that was taken illegally, without proper process, and that is not supported by any evidence of need or even of useful purpose.

Thank you.

Sincerely,
Wendy E. Clark

The destruction of the East Wing of the White House was done without permission, permits or review. As such it was WRONG from the start. No person, party or organization should cause great harm to our historic buildings, memorials or other PUBLIC properties and then demand that the destroyed item should be replaced with something they personally want, but which is NOT in the PUBLIC interest.

The East Wing should be fully RESTORED to its design, architecture and aesthetic for the exterior and interior at the time of destruction. The only upgrades should be those related to fire safety, electrical or other building infrastructure. The cost to repair should be personally borne by the perpetrator/s who directed the destruction to be performed. No reimbursement from ANY government coffers should be allowed.

I opposed the so-called "modernization" of the East Wing. I believe the East Wing should be restored exactly as it was before it was destroyed without any consideration for historical preservation, without permits, without proper input. I strongly oppose the White House ballroom. It is a desecration of our most treasured national symbol. The White House was designed by President Washington and his architect James Hoban. It was designed with symmetry and balance. This abomination distorts and destroys any sense of balance. It dwarfs the White House which should be the center piece. While it may be a "needed" addition, I believe the size is unnecessary...the WH should always be the focus as the "people's house"!
I would also want the interior to be tasteful and respect a traditional look while still modernizing the function. (In other words, NO GAUDY FAKE GOLD STUFF ALL OVER THE PLACE!!)

Members of the Board, As a retired Architect and owner of HMR Architects, Inc, practicing in Sacramento, Cal. During my 35 years at HMR, my office provided a host of projects for various state, county, city clients. Each and everyone of those projects were unique and required the upmost care and consideration in the planning and execution of that project. Several of those projects for the state included work on our own California State Capitol building and annex. I understand the importance of maintaining the public trust and historical context involved in working on such historically significant buildings. That is why I am so infuriated watching the random destruction of the White House by the grifter who currently occupies it with little to no regard for the historical context of the structure. While I understand that the White House might need upgrading to meet the demands of time and the changing social needs, tearing it down and throwing up a ballroom with absolutely no input is nothing less then grounds to be tried for willful destruction of government property. If a larger assembly room (Group A-1) was required then that plan should have been submitted for review and allowed to go thru the process of determine the most appropriate size, configuration, design, etc. to meet the needs of the temporary Occupant, the Nation and to fit that scale of the existing historically significant structure. By negating that process, Trump needs to be held accountable. All work on this project needs to be stopped immediately, He should then be required, at his cost, to rebuild the Historical East Wing to the exact specifications it met before he bulldozed it. Lastly he should be held accountable and should be tried and go to prison. The destruction of the East Wing crosses the line. Eric Mifkovic, Architect Ret.

Dear members, The current
condition, or lack thereof, of the
East Wing is an abhorrent
national embarrassment. It
should be repaired and
replaced, at any cost and the
bill sent to Pres. Trump
Furthermore, there should be
no further destruction of any

Thank you all and God bless

The end goal of this destruction is simply satisfying the ego of a temporary resident. The White House belongs to the American people. It is OUR HOUSE! The East Wing should be restored to its original graceful, historical, and well-proportioned beauty. Please do not allow this horrible monstrosity of a vanity project to proceed. This is shameful. This project - initiated without authorization - is a travesty. It is the razing of American history by a President who cares nothing for the country or the people he is supposed to be leading. If given the opportunity to have a say, it is clear that the majority of Americans would not only be opposed but be insulted by the price tag and the monstrosity that has been proposed. And, it was home to the offices of our First Lady and her staff through our history - perhaps intentionally symbolizing the disrespect for the role of women in our history. I oppose the spending of $300+ million on this project! Call this project to a halt and restore the East Wing and what it represents to proud Americans. No one is above the law. The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

It is a shame that the American public is being asked to foot a bill for an illegal project, one that was obviously done in secrecy by a guilty party. It will furthermore be a shame that the public is asked to pay to clean up the reckless behavior of these people whom have no value for American decency. Allowing their desires to go further would be a blight on our country.

I am adamantly opposed to the building of this ballroom. There was no public hearing or comment, no permits on the destruction of the East Wing, no approval of the new structure. This should not be built.

Our historic buildings should not be destroyed or altered at the whim of this or any president. Upgrades and renovations will always need to be done but there is a process for getting that accomplished. None of that was followed. Now, our historic East Wing as been demolished and with it, the history that was part of People's House.

This is not modernization, but an ego trip for a emotionally fragile president. Again, I oppose the construction of this ballroom.

The East Wing should never have been demolished prior to any design review or congressional appropriations. The fact that it is now gone does not give anyone the right to build a ballroom of any size, let alone one that dwarfs the White House itself. I am completely opposed to any ballroom constructed by this administration. Restoration of the historic east wing is necessary here, not "modernization" as a front for a ridiculous vanity project of a scope and size that is completely inappropriate for the site. Destruction of the east wing as it has progressed this far is a criminal action, and as such all involved should be prosecuted to the fullest extent of the law.

I believe the East Wing of the White House should not overshadow the primary White House structure. Its architecture should mirror as closely as possible the preexisting style of the building. It should not be taller than the current structure. Other preexisting features of the White House grounds, e.g. gardens, walkways, paths, and driveways, should not be removed or relocated by this project. The building and or any part of it should not be named for a person, living or dead.

Honestly this project should be halted and the People’s house rebuilt. The proposed “ballroom”/bunker/datacenter is not fit for the national treasure that is our White House. Please stop the project and go through the proper channels for compliance with this historical home.
Thank you for your consideration.

I don’t think any structure that is built on the White House grounds should be any taller than the White House, nor should it be larger than the White House. Our White House is a symbol of our democracy for lack of a better word. It needs to be the shining beacon upon the hill, not a ballroom. Surely a ballroom could be made to fit within those parameters.

Restore the exterior dimensions and architectural style, update wiring etc. and make interior ADA accessible where possible.

Follow past process for making needed but historically sensitive changes.

The White House is the people’s house. The proposed changes are totally out of scale and grotesque.

Well, I hope I'm commenting about the right project, "East Wing Modernization" seems like a side thought. This ballroom plan is obscene, it was never publicly reviewed to the best of my knowledge, and it comes as the president pushes us further and faster into deeper National Debt than we have ever known. All of us know there is a longer permit process for changing the windows on our modest houses, than this hideous ego-tecture got pushed through. We aren't talking about Trump's history, it is OUR history. If someone in power has the idea to saw off just a bit of the liberty bell, or paint the Lincoln Memorial in chromacolor, there should be a review of the idea because it is OUR collective history.

By the way, wasn't it the construction of a ballroom that actually got King Louis in a little trouble? I think it was.

I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans. No matter where the funding comes from, I oppose spending ANY amount on this project, which was initiated without the proper authorization, permits, or design review. I oppose the proposed ballroom addition to the White House because the scale of the new structure—approximately 90,000 square feet—risks dwarfing the historic mansion and overwhelming its carefully balanced classical design. The overall massing appears disproportionate and would visually compete with, rather than complement, one of the nation's most recognized historic buildings.

The White House is a National Historic Landmark and a National Park. As such, it is owned by the American people and stewarded by the National Park Service. Any major construction in Washington, DC must be reviewed and approved by the National Capital Planning Commission and the Commission of Fine Arts in compliance with the National Environmental Policy Act. Given the building's national and symbolic importance, this proposal warrants the highest level of scrutiny, and the scale of the ballroom and associated additions should be significantly reduced to ensure the historic character and prominence of the White House are preserved.

No, seriously, stop trying to create a palace, it is 100% against what the entire purpose of the east wing is for. We are not a monarchy, we do not support oligarchs (or do we?); our president is supposed to live there to serve the people, not entertain his subpar billionaire friends while the country can't get basic healthvare. This is a moral issue. Fix what's broken, we are a country with real, life-threatening problems. We don't have time for this frippery. I do not support giving my dollars to this monstrosity. The White House doesn't belong to any one person and it certainly doesn't belong to Donald Trump. It's called "the people's house" because it is up to us and our representatives as to what should happen to the house. There is a proscribed procedure that is supposed to be followed before anything major is done to the house and Trump blatantly ignored it. It's not for him to determine that a ballroom was needed or that the whole East Wing should have been demolished. Not only has he destroyed US history, but he's opened serious questions. Where is the money coming from that he claims to have from "contributors?" Who has he sold our house to? If he's able to get so many contributions, why isn't that money being used to actually help the people instead of building a vanity project? Shall a president not be held accountable to the same laws and procedures that the rest of us have to follow? Do we want to set a precedent that presidents can do whatever they want to? Trump's behavior has been illegal and disgraceful. No one has done this much damage to the house since the British army burned it in the War of 1812. This project must be stopped and the money used to restore the East Wing. We know that Trump has appointed a chairman for the commission and two members to force his will on the rest of the group. Stand up to him. Show the people that the Supreme Court was wrong and the president will not be allowed, much less rewarded, for breaking the rules the rest of us follow.

We have had enough of Trump saying you scratch my back and I will scratch yours. I presume they all expect favors in return. Congress should have already spoken up long ago about Trump's illegal acts. Are there no laws in place to stop him from defaming all our historic sites (e.g. putting his name on the Kennedy Center)?

The many projects President Trump has started with out approval are illegal. For those of us who read the Constitution knows that any project must be approved by Congress. To the best of my knowledge NONE of the list of projects were approved and thus, illegal. They should be stopped before they are started.

We didn't need a ballroom! There hotels in the area for that. The White House if the people's home for the President as

they serve . It is not something they can just decide to alter without the approval of Congress, (thus the people). I personally miss the East wing as it was and its history. You have demolished it. It feel it is your MONEY that should pay to repair or finish the destruction to the White House. You are NOT above the LAW!!! The law is the only protecttion the people have. Quit going rouge and destroying the 250 years of blood, sweat and tears the people of the United States have done to accomplish what was a wonderful country with a few flaws prior to your slashing of so many things at your whim. I could site other projects, but the White House is my main topic at present.

I want to respectfully voice my concern and opposition to the East Wing Modernization Project. This renovation occurred quickly and appears to have been masterminded by people in Trumps close orbit who seem to not appreciate the historic beauty and significance of the White House, also known as The People’s House.
I sincerely hope the National Parks Capital Planning Committee will act to halt further building of the ballroom and restore the East Wing to reflect its integral place as part of the White House.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. I am writing in opposition to the East Wing Modernization Project, which includes the grotesquely oversized ballroom. A building ninety thousand square feet with seating for over 1,000 people in no way mirrors the majesty and simplicity of the People's House. I could accept a ballroom half the size (in every dimension) of Trump's current rendering; if he is to build a ballroom, it should respect and bow to the White House itself--not overwhelm it. Of equal concern, however, is the sly, underhanded, and deceptive way this project has been presented--a fait accompli of the demolition of the East Wing, the attempt to use private donations to incur favor and riches to the current sitting President, the complete disregard for the law regulating renovations of the White House, and finally, replacing highly-qualified historians and architects with unqualified loyalists who take their marching orders from DJT and have no appreciation, knowledge, or experience regarding the preservation of history and historic architecture, especially that of the People's House. The ballroom should be minimized and its possible construction should follow legal channels and be paid for by the American taxpayer.

Thank you for your attention.

This project should not have progressed this far. Unilateral actions have taken away options the public would have enjoyed, including the option to say NO, had a legal public review process been honored before the first shovel of dirt was turned. There are no aspects of the current project that I support. Stop this project now and return the grounds to pre-existing conditions to the extent that any and all possible remediation efforts allow. The tree planted by Andrew Jackson cannot be replaced. Recreate, rebuild and replace everything you can to return the East Wing to the prior state generations of Americans respected and enjoyed.

Please do not allow our historical East Wing to be "modernized" into a giant room for which the people did not ask. Please require the East Wing to be rebuilt as to reflect the symmetry of the building as it once stood. Demolishing our history without the consent of the people should not have been allowed to happen and the present administration should be forced, if necessary, to restore our house. Dear National Capital Planning Commission:
I would like public clarification on the laws, rules, and codes governing the remodeling, reconstruction, destruction, and demolition of our PUBLIC buildings that are symbols of our Nation's Capital and history. As a daughter of former architects and a long line of American artists, it seems there should be a process by which ANYONE who occupies the White House or uses our Nation's buildings should seek approval before demolition, regardless of their background. There are architectural historians who make recommendations about our Nation's architecture. Moreover, IF we are to heed to Mr. Rubio's recent speech at the Munich Security Conference, then this Administration should have been more respectful and hesitant before demolishing an historic building such as the East Wing. He presented some sort of dribble about a shared Western vision, but alas he whom he serves has none of that vision nor respect for it because he bulldozed an historic public building without approval or respect to our shared history imbued in that structure. It is understandable that a president would like a more grandiose presentation hall for visiting dignitaries as well as more secure location, but ANY president should be required to have a review and get approval on revisions to their aspirations before destruction. If a president choses to march on the destructive path without prior approval from a historical committee, then they

should be assessed a personal fine for such an offense to the destruction of our Nation' s property. My hope is that the new East Wing reflects tastefully the elegant Federal Architecture style for which our Nation's Capital has sought, including in its modern buildings. Washington D.C. is an elegant dignified city with a specific layout that resembles some of Europe's grand cities, please do not allow some gaudy and garish edifice to be erected in place of the demolished refined East Wing. Additionally, its name should be one that encompasses ALL Americans, not the present occupant of the White House, regardless if he "raised" funds for it. Jackie Kennedy raised funds to refurbish the White House, but the refurbishment is not named after her, she is acknowledged for it, as it should be by our public servants. Thank you for your time.

The source of funding is disturbing on many levels. The White House belongs to we, the citizens, not the 1% looking for favors from the current occupant. It’s infuriating that one man feels he’s above the law, the rules don’t apply to him. It’s nothing more than ego while destroying history. The reins need to be tightened on the powers of the presidency.

As an avid student of history, ancient and modern, I am appalled by this project from various perspectives: legal, ethical, historical, and moral.

The law is clear, yet it was not followed; one must wonder whether anyone even checked proper processes/procedures before the demolition crews rolled onto the property of The People's House. No President has the right to create a monument to himself on this property. No President has the right to determine the "needs" for future administrations, particularly when plans include secret underground work that has not been approved through proper channels.

The White House isn't personal property, so the public ought to have had a say before the East Wing was illegally torn down. Now that that was done, it must be rebuilt in the same historic fashion. It belongs to the people, not to any one president and most of us liked it. It is shocking to see that an entire wing of the White House - the People's House - has been demolished. I am opposed to building an outsized ballroom in its place - one that, according to the plans I've read about, would dwarf the existing structure. Clearly a wing must be built to replace what has been torn down, but it should be done in accordance with current guidelines and regulations to preserve the historic beauty of the overall building. How the White House looks matters to the public and it's your job to ensure that the next iteration will stand the test of time. Please do it wisely and with care.

I think it is late to be asking for comments on a project that was already started. I'm appalled that President Trump decided to demolish a portion of a national, historic structure without consulting the parties responsible for it's care and well-being and the American public. It doesn't matter how or where the funding for the project was, or is being, appropriated. It wasn't his alone to to be making determinations about it's future. I'm also stricken by the lack of courage of the people surrounding him that did nothing to stop it and, in fact, aided him in the process. These facts being apparent, I also doubt any comments I or other members of the body politic make will have any influence on the outcome. That being said, I think the structure should be in keeping with the architectural design of the Whitehouse and it should be of a scale so as not to dwarf the rest of the structure. The interior should be understated, timeless elegance similar to the Grand Ballroom in the Metropol in Los Angeles or slightly less busy version of The Plaza's ballroom in New York. The best description is probably to do the opposite of what the President has done to the Oval Office, which is garish and smacks of desperation.

I greatly oppose of what Trump has done to OUR house. It is a national treasure and it should have to be built back exactly as it was and also the Lincoln’s bathroom. It is a Historical Monument. It belongs to the American people and while you are at it, Take his name off the Kennedy building and ban him from desecrating President Kennedy’s Memorial!! And restore Jackie Kennedy’s rose garden!!!!! It looks like his tacky golf course.
Better yet! Impeach him and remove him from office!!!!

I am outraged that there was no public consultation or approval before the East Wing of the White House was demolished. That is OUR house! I don't want any gaudy, enormous ballroom overshadowing the rest of the existing structure, I want the East Wing rebuilt, according to it's original dimensions, and for any further modifications to the public's house to be approved by the public, or at least, the legal permitting and review boards which normally sign off on such changes. Anything else is (additionally) disrespectful of the law and the United States' citizens.

NCPC Committee Members,
I think it is despicable that Trump tore down the East Wing without having approval from Congress or this committee! At least he did hire Mr.McCrery to design the new addition. Unfortunately, as he believed the structure should be kept to the 55,000 sq ft so as to fit in with the aesthetic of the White House, he was fired. Or demoted to consultant. Trump's remodeling of the White House with gold gilt is so gaudy as to be embarrassing.
Please rein in this fiasco!
Thank you,

I oppose the construction of a ballroom in the place of the removed East Wing. The architecture conflicts with the genre of the existing White House. The proposal itself conflicts with the philosophy that the White House belongs to the people of the United States, rather than one transitory administration. On top of that it will undoubtedly be the subject of jokes throughout the world in its bloated pomposity.

Had there been the opportunity to vote on a ballroom, I would have opposed it. There was no vote, no discussion, no consultation, no permits. No one except Trump wanted the ballroom. Before any discussion or consent was given, he demolished the East Wing of the White House, The People's House, not his house. He is only a temporary (I pray) resident and had no right to destroy the property.
Likewise, I oppose the idea of a triumphal arch in Washington D.C. Something like this kind of project should be submitted to the appropriate officials and evaluated for necessity and usefulness as well as aesthetics.
I hope that he can be prevented from destroying more of the People's property and legacy.

The demolition of the East Wing without taking the project before Congress was unprecedented and totally wrong. The East Wing was gone before anyone knew the bulldozers were there. We must stop this destruction of the White House. Do not let it progress any further and force the administration to get approval of a rebuild plan from Congress. The enormous gaudy disgusting “ballroom” that has been planned has NO place with our White House. That is the people’s house, not DJT’s plaything.

It is very unfortunate that the President chose to tear down the East Wing of the White House without going through proper channels. If he had, this project probably wouldn't have gotten off the ground. So now we have an empty hole that needs filling. I sincerely hope that this Commission will vote against the proposed monstrosity that dwarfs the White

House. No President has requested having a gigantic ballroom, despite what the current occupant claims. The President claims it is completely paid for by private donations. I'm sure the donors have favors that they will be requesting in exchange, as most of them do business with the Federal government. I can understand updating, or remodeling an existing structure, but to create a lavish space of this magnitude is ridiculous. Please vote against it.

The destruction of the east wing was not modernization. It was a travesty of an American public own building with no authority, no guidelines, and no endorsements.

The building does not belong to one political party, one person, nor one segment of society and to destroy willfully is it a front to every American citizen.

I am against any permits or future actions with the exception of restoring the east wing of the White House to its former historical structure.

A majority of Americans are horrified at the destruction of the East Wing of the White House. It was done without any input from NTHP and it was also done without any environmental impact statement. This action by President Trump was a slap in the face to Americans to whom this structure belongs. There should be accountability for this illegal and destructive action, done at the behest of a neurotic narcissist who sadly resides at said house. He should have to use his personal funds to restore the East Wing to its original structure, with strict guidance by NTHP.

It's hardly a modernization project when the entire East Wing was torn down with no warning, proper permitting, or mitigation of potential contaminants. President Trump’s vanity project to build a garish ballroom where the historic West Wing stood must be stopped. There are no approved architectural plans. There is no Congressional budget— just the alleged pledge that billionaires will pay for it. There is no public mandate. There is no sensibility the ballroom will make any mark of historic value. I love Washington D.C., both as a citizen and frequent visitor. Please restore the West Wing— don’t let a large brutish building with Trump’s name on it be an eyesore and heartbreak to many.

I am opposed to any action "modernizing" the East Wing other than rebuilding it exactly lie it was before it was demolished. The White House, including the wing and grounds belong to all the people of the United States and one person should not be allowed to remake any part of it single handed. The money is not the issue, the issue is that it is a part of our joint heritage that has been destroyed.
Having said that, I do believe that the cost of restoring the building to its original condition should be born by the person who destroyed it.

The president illegally destroyed a historic public building without the consent and authority of congress or preservation groups. The monstrosity he proposes is not to the scale or in keeping with the historic White House building and grounds. The public has no idea how he solicited donations, if he twisted arms like a mob boss or if donors expect government contracts or favorable policies in return. The entire thing is corrupt and the damage that has been done is irreparable but should be contained. It is heart breaking that he cut down trees that were memorials to past presidents with no respect and bull dozed the peoples house. Please stop the process and put congress in charge of proceedings.

I object to this modernization project. At a time when our country is in crisis, funds should not be committed to building a ballroom. The White House belongs to the American people, and it should not be the project of one man to remake the people’s house as he sees fit. I oppose a project that was conducted without proper permits and without following established protocol. While there may be a need for a larger venue to host state ceremonies, the manner in which this project has unfolded seems off the cuff and ill considered. It is imperative that projects of this nature, let alone any action of the U.S. government, be conducted within the confines of the law, and as such, any further work on this project should be ceased until all proper permits and procedures have been followed. While I would prefer the building to retain its form prior to its recent destruction, to preserve the history of the building, if this is not possible due to project requirements, I think it is essential that the themes and aesthetics of the White House be maintained in this new construction. Thank you.

I'm vehemently opposed to the project named the East wing modernization.
The historic east wing was torn down without permits, without redesign review and without any involvement of the historical commission.

Before the demolition of the East wing, the first lady enjoyed the privilege of using the offices there for the betterment of the American good. Replacing these offices have not been a part of any of the modernization plans. This is tragically unsupportable.

The current modernization plan of the east wing does nothing to keep alive the historical value of this part of the White House. Instead it glorifies the ability of billionaires to create a gilded ballroom for their own agendas that have nothing to do with the greater good for the American people.

I am a proud American who stands for carrying on the democratic traditions that this country was founded on. The east wing of the White House needs to be replaced with these values in mind.
It needs to include the valuable spaces for the first ladies's staff to accomplish her goals and vision for our country.

I encourage all government employees to follow this vision and reject the current east wing modernization ballroom of gold. This erroneous vision will only serve to send a message to the world that our government can be purchased.

Respectfully yours,
Karen Thorwaldson

I oppose the East Wing Modernization Project.

This project began without required National Capital Planning Commission approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington.
The $400 million cost is funded by corporations holding billions in federal contracts with the administration approving those contracts. This creates an unacceptable conflict of interest.
The White House is NOT private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve construction without following the law and allowing public input. I urge the Commission to reject this proposal.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a "modernization" project; modernization implies keeping the original structure and improving it. Before any authorization or review, the original standing structure (with considerable historic importance) was ripped down. I want this project canceled, and the East Wing rebuilt and restored to its former design. Failing that, I want the project to be subject to the same kind of rigorous review and revision that every other renovation to an historical site has to undergo. The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

Finally, allowing the current president to build whatever he wants after not following the law would be rewarding him, which I strongly ask that you not allow, as it encourages lawlessness.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

I would like to argue against the present plan for the modernization of the White House East Wing. The hasty destruction of the historical East Wing and the attempts to ram through approval of the new ballroom plan without the proper authorization and consideration of this massive change to the White House show little respect for the history and the meaning of the People's House. The plan is all out of scale with the aesthetics and the purpose of the White House; this is not a suburban shopping mall or a gaudy country club. It is, instead, a solid symbol of the Executive Branch, a history that should reflect the history of all presidents, their families, and the long tradition of the presidency. It should not be the poorly conceived, ego-driven home renovation of one man with questionable taste. The funding scheme, too, raises questions about propriety, politics, and influence peddling. Enough damage has already been done to the White House; don't compound it with additional bad choices that do not reflect the will of the people or the importance of the White House as an enduring symbol of democracy.

I believe Mr Trump had no right to demolish the East Wing and should restore it to the way it was structurally at his personal expense. This was not within the scope of his function as President. He demolished property of the nation, not his own. The people of the US should not have to bear the expense of his actions. It was a “tear it down and ask permission later” maneuver for which TRUMP should pay.

I oppose the spending of $300 million of taxpayer money on this project, which was initiated without the proper authorization, permits, or design review. As a professional archaeologist and professor in the field, I understand well the regulatory framework under which these kinds of projects can and cannot be undertaken. This "project" was done without proper permissions or permits, or the will of the American people. It is not a modernization project but a vanity project of the current president. I want this project canceled, and the East Wing restored. I understand that renovations might be needed for modernization and updates; this is to be expected. But no one is above the law. To permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans and to all of us who abide by rules and ethics in our professional careers.

I oppose the modernization of the East Wing.
It was done without proper authorization, permits or review. The use of $300 million dollars donated by the wealthy elites is a slap in the face of our democracy. It is a way to curry favor with the current administration, stoke his ego in exchange for the reward of government contracts. I am horrified at the destruction of America's history for a personal vanity project.

As the landlord of this property, I have an expectation that the tenant will exercise reasonable care and responsibility of this property. Considering its historical significance and the fact that it belongs to "we the people," any type of renovation or updating should clearly be approved through the legal process.

I'm deeply troubled that rules and laws have been ignored, that an entire wing of my property was demolished without any consideration for the owners, and it is troubling that the new abomination of unnecessary expansion has yet to be approved.

The size and scope of this addition, as well as the impetus behind it, leaves me no choice but to express my disapproval. The environmental impact alone should stop this construction immediately. I'll admit, my heart is broken at the loss and the arrogance behind the destruction.

Tearing down the East Wing of the White House under the guise of modernization was a travesty. The current administration has failed to recognize the historic, cultural and symbolic significance that the East Wing of the White House represents to our country. It is not a piece of property that one person can or should be allowed to damage or change. It is a historic building that has been destroyed and now needs to be restored to its former design and purpose. I for one do not support the East Wing Modernization project and do not want it to become a ball room.

I write to express strong concerns regarding the proposed construction of a ballroom within the White House East Wing.

The White House complex is one of the nation’s most historically significant federal sites. Any substantial alteration should meet the highest standards of necessity, restraint, and preservation. It is unclear that this proposal satisfies those standards.

The Commission should carefully evaluate whether this project:
• Preserves the architectural integrity and historic character of the East Wing
• Aligns with long-standing federal planning principles for the National Capital
• Represents a prudent and transparent use of resources
• Avoids setting a precedent for unnecessary expansion of the White House complex

Given the symbolic and historic importance of this site, modifications should only proceed when clearly justified by compelling public need. I urge the Commission to require rigorous review and full transparency before approving this proposal.

The White House is the people’s house. Yes, the President lives ther3e during his term of office, but it does not belong to him. It is also a historic building with enormous significance to Americans. Therefore, any plans to change, add or update the White House must go through a public process, and big changes through a Congressional process. Mr. Trump has violated the people’s trust with his actions. It should be noted, that the tastes of one one man should not dictate what changes chould look like. Shame on the WH resident for destroying "The People's House" to erect a ballroom merely to throw more gala parties while American children go to bed hungry. We are not the dumb sheep you take us for. There's no justification for destroying the East Wing. The structure has been upgraded to meet safety standards in the last 20 yrs. There is no reason for renovation to this extent. Simply put, the is solely a vanity project for the current resident of the WH. He and only he should pay out of his own pocket (NOT with taxpayer dollars) to restore it to its former glory. I support the East Wing modernization project. For too long, heads of state from other countries have stood on wet grass while attending functions at the White House. There is no explicit rule, written or unwritten, that insists the White House must remain unchanged for historical reasons, which leads to a stagnation of the structure in a bygone era. The progressive agenda encompasses many societal changes that often discard traditional values. Ultimately, the primary objection to this project seems to stem from a general disapproval of President Donald J. Trump.

The East Wing Modernization is a project that is unnecessary, unaffordable, and unwanted. The demolition of the existing structure has been done without any input from appropriate stake holders, including the organizations tasked with overseeing the management of public and historically significant properties. It is unfortunate that there is only now a discussion of how the East Wing should be modernized, as the structure has already been demolished. A bit like closing the barn door after the horse has gotten loose! But here we are, left to make something coherent out of chaos.
The new structure should absolutely NOT overwhelm the White House. It should be proportioned to balance the West Wing while providing adequate space for staff areas, entertainment space, and addressing security issues. Obviously the new structure will need to meet all current building codes.
Ultimately this structure, and all additions and upgrades, belongs to the American people. No one person, or administration, should take it upon themselves to alter a public building arbitrarily and without regard for its historic and civic value. The destruction of the East Wing has been a slap in the face to the American people and the institutions we rely on to advocate for our interests. This East Wing Modernization project should NOT move forward until there can be a full and extensive review of the historic considerations as well as the practical and economic concerns involved in redesigning this beloved representation of the American presidency.

I oppose the spending of $300 million of taxpayer money on this project, which the vast majority of taxpayers--myself among them--also oppose. For an administration that was so adamant about eliminating "wasted costs" from the federal budget, it seems remarkably short-sighted to waste so many millions on unnecessarily tearing down and remaking the East Wing in a garish new image--especially with the costs of both housing and groceries still far higher than too many Americans can pay.

That this project was initiated without proper authorization, permits, or design review makes it abundantly clear that the goal wasn't to modernize the White House, but to raze a portion of our country's history. If those millions are to be spent on anything, it should be on canceling the proposed project and rebuilding and restoring the East Wing to its former design. I am writing as a citizen to oppose the ballroom that is proposed to replace the illegally demolished East Wing of the White House. The destruction of the East Wing was an affront to all Americans, and the proposed ballroom structure is not in keeping with the historic site that is the White House. The East Wing should be restored to appear as it did previously, with updates to the interior as needed for modernization. The destruction of our history should never be allowed, and building a monument to the person who organized that destruction is inexcusable.

Thank you for allowing comments by citizens.

I was shocked when the East awing of the White House was bulldozed, without authorization or public comment.

I cannot imagine a need for a grand ballroom to be constructed; the idea that it will be larger than the White House is not justifiable .

Any further construction or demolition should, going forward, be based on the architectural integrity of the People’s House and not at the whim of the President, who will only be occupying the White House for less than three more years.

Just because there are wealthy people in this nation who will bend to the desire of power to fulfill their own agendas and are willing to pay for this dream of our president does not make it right.

Please do not allow this togoforward. Please.

The White House belongs to the people, not to the tenants. The current tenant has no right to destroy our treasured East Wing or any other part of the White House without appropriate approvals required for renovations. If there is (doubtful) $300m in donations then good, use it to rebuild our east Wing as it was. If the donations are not true, let the President pay for the damages himself…he is solely responsible for this debacle

I vehemently oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. This is also a blatant quid pro quo on the part of the president, and yet another attempt to stamp his name on yet another landmark. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

I am deeply offended at the huge amount of money, spent on demolishing and renovating the East wing of the White House without consent from Congress or consulting the wishes of the people. It seems obscene to me to spend so much money on such a frivolous project when so many people are in need in our country.

I am totally against The East Wing of The People’s House being torn down and rebuilt to the tune of $300 million dollars, due to a whim and ego of one person, without proper documentation, authorization and planning. This is an assault on our democracy.

I oppose the spending of even $1.00, much less the hundreds of millions proposed, on this project, which was initiated without the proper authorization, permits, or design review.

This is not a modernization project but instead a complete razing of American history and a self-aggrandizing one.

The project should be canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

I strongly oppose the spending $300 million and counting on an oversized ballroom at the whim of one man. There is a procedure for changing federal buildings that was not followed. It is disgraceful for this law and its attendant procedures to be flouted in such an arrogant and underhanded way. In order for this 90,000 sq.ft. ballroom to be built, the East Wing of the White House, the People's House, had to be torn down without any comment or input from we the people. The cost overrun is skyrocketing, the proportions of the ballroom to the rest of the White House are hideous, and the promise to not tear down or change any part of the existing White House in order to build this monumental, overwhelming edifice are all examples of the lies told to the American people in order for the President to satisfy his addiction to grandiosity. Restore the East Wing to its former place of symmetry in the White House configuration and start over with a design for a ballroom that is submitted for comment as per the correct legal procedures. Do not keep letting the President disregard the laws without attendant consequences.

I’m appalled that the East Wing of the White House was demolished without any review, permission, permits and public notice. The White is not the property of a President, it’s a temporary residence during the term. There is absolutely no reason to allow a ballroom to replace the historical East Wing. I feel the East Wing needs to be rebuilt as close as possible to the original.

I believe the destruction of the East West by the current President was unlawful, not approved and a total disregard for the history that took place in the East Wing.
This building needs to rebuilt to the standards that reflect the history of the United States.

Thank you for allowing my voice to be heard.

Please, no, do not use $300 million of the hard-earned taxpayers' money on this illegal project. It was begun without the proper authorization, permits, or design review. It is a horrifying, tragic razing of American history. Please have the project canceled. Rebuild the East Wing, restored to its former, historic, appropriate size and beautiful design. I object to the current plans for the "East Wing modernization project." The proposed 90,000 square foot ballroom is too big and detracts from the historic and symbolic character of the White House. I object that the East Wing of the White House was demolished without approval. I object that the funding for the proposed ballroom is coming from private donors. I urge the Commission and Board members to reject the proposal as currently written.

I oppose the proposed construction of the East Wing Modernization project for the following reasons.
The scale is not comparable with the existing White Hose.
There were no plans submitted for review before the demolition.
There does not seem to have been any hazardous materials abatement protective procedures
The White House is the people's house and should not be irreparably changed without input from the people.
I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review.

I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

The White House is a part of the National Trust. Therefore any renovation must be under permit, go through review and

follow proper historic guidelines. None of these were undertaken. I object to the destruction of a historic property done without authorization. It needs to be rebuilt according to historic guidelines, not "modernized."

The White House belongs to the people of this country not to 1 specific person. Anyone who destroyed an historic structure in such a manner would be held liable financially and criminally! No one, not even a president, is above the law. Do not spend $300,000,00 on this project!

The first I heard of this was the lie that the East Wing would not be touched. I didn't like the ballroom idea but assumed, and you know what they say about that, that all the historical building requirements would be addressed. First the lie, then the horrific destruction before our very eyes. What has happened to the White House from this to the Oval Office to the plaques is a travesty. Please stop all of it and restore the dignity of the People's House!

No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans. Mr. Trump should also be held personally responsible for the funding to rebuild the East Wing. This was part of the People's House, not Mr. Trump's personal property to do with as he wished.

Against this unnecessary destruction of the East Wing… done without proper/legal review and permitting! It can not.. should not… be allowed to be continued construction on this unnecessary, overpriced, questionable" ballroom… no matter who " pays for its construction.
Estimates now approaching $400000000., above the original estimate of $300000000. (Without identified funding…just hare brained thoughts), are only going to end up unnecessarily being paid for by the American taxpayer!
For anything to replace the now demolished east wing, there must be FULL compliance of all building permit processing, historical reviews and Congressional approval of every cent expended!

I oppose this project , the so called East Wing Modernization project, on the grounds that there was no prior authorization for the destruction of this historic building, The White House. It should be reconstructed and restored within the original design parameters. If this administration wants to make changes to the White House's structure he needs to ask the US citizens. It is our property, he is simply a temporary resident.

Money earmarked for the Big Beautiful Ball Room (BBBR) should be used to repair the East Side of the White House damaged during the demolition of the original East Wing and a memorial garden be established in it's place showcasing the strong citizens that chose to protect and defend the constituion during this tumultuous time.

The absence of an East Wing will be a reminder. for all future Americans, on what happens when the government fails to operate under the constitutional system of checks and balances.

I am completely opposed to the building of a ballroom or any other structure that's initiated without proper approval, planning, permits, and all public input. The destruction of the historical East Wing is unacceptable, regardless of who is supposed to be paying for it. The White House is a house of the people, not DJT, not GOP, not any person, not any party. I oppose the East Wing Modernization Project.
This project began without required National Capital Planning Commission approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington.
The $400 million cost is funded by corporations holding billions in federal contracts with the administration approving those contracts.
This creates an unacceptable conflict of interest.
The White House is not private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve construction without following the law and allowing public input.
I urge the Commission to reject this proposal.

I, along with so many other U.S. citizens, vehemently oppose this project to "modernize" the East Wing of the White House.

The East Wing was demolished without going through proper channels for approval, along with all of the historical events that occurred in this place. The only construction that should take place in this location, is the reconstruction of the East Wing to its original specs.

Building a ballroom for the billionaires and pedophiles is appalling and a slap in the face to those who built the East Wing, the American people, and the history of our nation.

The White House is the People's House. All president's are only tenants, not owners. NO president should be allowed to dismantle a wing of the White House and then rebuilt using private money. If any tenant destroyed an owner's home in this country, they would face serious consequences. The East Wing should be rebuilt using ONLY public funds and with a bi-partisan approved plan that includes input from historians. The current destroyers of the People's House should be required to reimburse the taxpayers for this unnecessary expense.

I wish it could be returned to it's original beauty.

However, since that is probably impossible, the next best thing is to put the reins on Donald Trump. Do not allow him to turn this project into a self glorification. I object to the East Wing Modernization Project first and foremost because THERE IS NO EAST WING LEFT. It was destroyed lawlessly (as a ruse to the releasing of the Epstein files, if you ask me.)
I object to the decadence and vanity of Trump's ballroom when most Americans are struggling to feed their families. The only monies that need to be spent are those used to restore our East Wing to its former glory. And in a just world, Trump would be liable for that bill.

I highly oppose any approval or funding for this project which was initiated without any prior authorization, approval or plan. It is the people's house, not a house belonging to a single individual to do whatever they want. The East Wing should be restored as best it can, and the president who destroyed a historical landmark should be responsible for paying for the damage he has created. It was unethical and illegal to have destroyed the East Wing. I spent months planning, obtaining permits and approvals before I could start a renovation to my own house, why should the president be allowed to destroy this property that does not belong to him without any process or plan? It is an outrage.

i am Incensed with the destruction of the EAST W/ING of the White House...While every so often presidents update the building, they do not tear an entire wing down with no plans, no oversight, no budget and no approvals. You cannot add on a room or a patio to your own personal house without city or county approval and inspections...There are safeguards in place from historical accuracy to proper building protocols that have not been followed. The White House is the People's House...not the trump house...he only gets to borrow it for the length of his term and he is renovating as if he is going to live there forever. We the People are not happy...So many events, so many historical happenings and it is all gone, the First Lady's Office, the entrance, I will throw in the destruction of the Rose Garden....He needs to pay to restore the East Wing back to it's historical accuracy and he needs to stop acting as if he can just do whatever he wants ...He isn't a KIng...

The footprint and architectural style of the new East Wing should be the same as they had been before the previous version had been destroyed recently. These must be compatible with the rest of the White House in size and architectural style.
Architects selected to design the new East Wing must have had training in the architectural style(s) of the rest of the White House in order to design the replacement wing so that it supports the other sections of the White House in design as much as possible.

I cannot believe that anyone would think it's fine to tear down the East Wing of our White House and decide what to build in it's place without consulting anybody or historical organizations. The damage has been done but must be mitigated! Past practices of consulting with historical organizations before building needs to happen.

The proposed project is out of scale with the rest of the White House. There was no needs assessment. There was no input from key stakeholders. There was no calculations of annual maintenance and operating costs. The East Wing should be restored to what it was, and those responsible for tearing it down, should pay for the rebuild.

East Wing Modernization? This is a misnomer. The administration does what it pleases and they razed a part of the building of historic importance to our shared history without following the law, without authorization, without any design submission or review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and I want the public involved in how to address the destruction of the former spaces. The current office holders in no matter what office do not have the right to just demolish the People's buildings and monuments. This goes for creating new buildings and monuments, or renaming them, ideas like a gigantic arch in the Tidal Basin as well. There needs to be an open, public process used to decide these things.

The White House is not Trump’s personal property and he should not be allowed to treat it as such. The addition of this ballroom plan is not in keeping with the esthetic of the entire profile of the White House and will be a gigantic blemish if finished. The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

It is unbelievable that one person can decide to tear down the East Wing and decide to put up a huge ballroom that dwarfs the White House. I am totally against this. The White House is supposed to be the People's House. It is utterly disrespectful to turn it into a resort ballroom.

The addition to the White House should not be the decision of a sitting (narcissistic) president whose goal is self glorification, but should be thoughtfully planned by a team of historical preservationists, architects, constructionists, and concerned citizens whose goal is to create a structure reflecting the graciousness of the main structure and in proportion to the main house.

Stop the monstrosity underway while possible.

I cannot fully express my disgust and consternation at seeing the demolition of the East Wing of the White House. This was meant to be the People's House, and each President has been granted the privilege of residing there and assuming the role of conservation of history represented within those hallowed halls. There must be nonpartisan guidelines to be followed by each President occupying the People's House, and I beseech your Commission to heed the cry of citizens and not yield to the power of an autocratic temporary tenant of the People's House. No one needs a ballroom to entertain1,000 of the wealthiest individuals and world leaders, that will never be accessible to the average citizen. The demolished East Wing contained not only offices for the First Lady, but allowed public access to tour the State dining room, East Room, Blue Room, Red Room, Green Room, and Family Theatre - consistent with the intent to make the White House truly the People's House. With the suggested funding to be provided by private corporate donations, it appears that it will become the house paid for by favors granted to donors. As the proposed ballroom will overshadow the original residence and West Wing, it is now evident that plans are underway to "balance" the structures by additions to the West Wing. Even if private donations remove the burden of taxpayers paying for these changes, how much more will citizens pay in maintenance costs and banquets for thousands at a time rather than the intimate gatherings of 200 in the ballroom now. The United States was founded as a democracy - not a monarchy where the "king" can impose his will without guidance from the majority of its citizens. PLEASE, take your responsibilities as members of this prestigious commission to heart and help preserve the history and accessibility of the People's House! NO, NO, NO to "modernization" of the East Wing. Give the White House back to the people of the United States of America. Thank you for your service!

My husband and I raised our five children in the 1910 house we still call home. We've spent 35 years fixing and maintaining, repairing plaster and wooden windows, resetting roof tiles, stripping woodwork. In all our maintenance endeavors we have honored the labor and materials of those who built this work of art.
To see the East Wing bulldozed literally broke our hearts. This historic building that belongs to us, the American people, treated with such utter disrespect….enraging. Part of our history as a nation destroyed.

I object to this project in the strongest terms. This “ballroom” is an illegal travesty at any cost, funded from any source. It is grossly oversized, dwarfing the full White House.

Instead of the ballroom, the East Wing should be rebuilt and decorated to its former condition for its former uses, with appropriate modern technology, if needed, within the classical design of the full White House. It is the People’s House, symbol of democracy, not one of Donald Trump’s vulgar golf clubs.

I respectfully beg you to do all in your power to stop this project and restore the East Wing.

I oppose the East Wing Modernization Project.
This project began without required National Capital Planning Commission approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington.

The $400 million cost is funded by corporations holding billions in federal contracts with the administration approving those contracts. This creates an unacceptable conflict of interest.

The White House is not private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve construction without following the law and allowing public input.

I urge the Commission to reject this proposal.

This is my strong opposition this project. It will be a blight on the White House and on U.S. history. It is NOT *his* house. The East Wing was destroyed prematurely and without any proper review or approval. Please don't allow a gargantuan and garish building onto this sacrilege.

I find it totally unacceptable that the East Wing was destroyed without appropriate approvals and plans. I’d like to see the East Wing restored to its original architectural state. No one, including the President, is above the law. He had no legal authority to destroy America’s house. Make him restore it to its original state.

I was shocked and heart broken by what the current administration did to the People’s House. It was illegal and unconscionable and must be remedied. I strongly request that the rebuilding of the East Wing of the White House remain consistent with the historic scale, character and architecture of the prior East Wing structure and in balance with the overall White House complex. Any reconstruction should honor the original intent and visual continuity of this nationally significant site, ensuring that additions or modifications are in harmony rather than stylistically inconsistent.

When reconstructed, the East Wing should be brought into compliance with modern safety standards and accessibility. Modernizing the interior of the building (while leaving the exterior as close to the historic original as possible) should be done in a way to honor the historic context. The East Wing has long served practical and ceremonial roles, including providing workspace for the First Lady/Gentleman and their staff. Any redesign should continue to accommodate these essential functions, ensuring that necessary offices and support spaces are prioritized within the plan. The style of the interior spaces should be similar to those of the original East Wing that was demolished.

It is strongly preferred there be no grand ballroom within the reconstructed East Wing. It would not be feasible to include such a large space and maintain the original footprint and office workspaces. If a smaller event or gathering space is needed within the East Wing, this should be of secondary consideration and designed with restraint and dignity.

If a ballroom is needed for state functions, there is public space available nearby for such events (such as Commerce Building, National Building Museum and Union Station). If a new ballroom is truly needed, construct it elsewhere in the city

Above all the White House belongs to the American people. Any changes to its structure should reflect respect for history and a commitment for preserving it for future generations. The People's House is a symbol of democratic governance and shared national heritage – it should not be treated as a palace or redesigned to the whims of the temporary occupant.

Key points: rebuild to original scale, original exterior architecture, and original function while updating to modern codes.

I oppose the East Wing Modernization Project.
This project began without required National Capital Planning Commission approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington.
The $400 million cost is funded by corporations holding billions in federal contracts with the administration approving those contracts. This creates an unacceptable conflict of interest.
The White House is not private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve construction without following the law and allowing public input.
I urge the Commission to reject this proposal.

I am heartily opposed to this monstrosity. It is an abomination to build a so-called “ballroom” that will be larger than the White House. It is contrary to the desires of the Founding Fathers who purposely built eschewed the trappings of European royalty in favor of modesty befitting a democracy. The White House was commissioned to be an example of what government for the people, by the people should be, absent the ostentatious trappings of European kings and oppressors. This is the People’s House. It isn’t Trump’s. And to suggest that it would be used for inaugurations outside of the view of the American people is once again antithetical to what we do here.

favored status donate for that favored status. No President has the right to ddstroy a significant historical building or landmark simply because he wants to.

With the initiation of the East Wing Project, the President has overreached his authority. His actions lack any common goodwill towards those he is in office to serve: the American people.

The President is a temporary tenant of the White House. The White House is a national fixture associated with the office held by the president. It is also a national museum. The historical and national significance of the White House should not be destroyed at the whim of one temporary tenant. Where is the oversight to protect the White House?

This is just one of many grievances the American people are filing against the president because of his corrupt and veiled actions.The president did not wait for proper approval to begin this project. He did not provide transparency to the American public about the project. Where is the oversight to protect the sanctity of our constitution and the credibility of the office of the President of the United States?

The cost of the project has grown and the public fears, as they should, that this is just another one of the President’s poorly-planned ideas that will leave we, the American taxpayers, on the hook for the exorbitant bill, when all is said and done. His actions in so many areas have proven that he cannot be held accountable. Where is the oversight to protect the American people?

The vast majority of the American public is opposed to this project. Do your due diligence to discover that and act on it.

This project has been conceived and started in violation of the law and of all respect for American history and culture, as well as all respect for thoughtful procedure. It should be halted in its tracks until the plans can be reviewed and approved through proper channels. The White House does not belong to any president. It is a National Historic Landmark and a National Park. The American people own it.

The National Capital Planning Commission should require any reconstruction of the East Wing to maintain it historic design and proportion. Anything built on the current demolition site should match the style of the original structure of the Executive Mansion, and must be subordinate in size.

Furthermore, private money should not be used to develop a public project of this nature. Any reconstruction should be funded by Congressional appropriation.

The East Wing was part of the people’s house the White House. The demolition was done without coordination with the approval of the committee. This President is acting like it is HIS personal property, which it is NOT.,

Our country does NOT need a ballroom for this President to act like an oligarch and using it to destroy our democracy for his infantile fantasy of being a king.

Please don’t let him build this monument to himself and instead make him build the West Wing back the way it was with his own money. And while we’re talking about destroying the Peoples House. He needs to tear up the concrete patio,

which looks like outside dining at a fast food restaurant and put back OUR Rose Garden, again at his expense.

I rest my case but his destruction of OUR White House, Not his has to STOP!

As an honorable president reminded this country in a time of crisis, our government is of the people, by the people, for the people. The people are not against modernization, but we do not want the People’s House turned into a shrine to the most corrupt man to ever hold office. The current occupant of the White House is using our highest office for his own financial grift. A Trump “ballroom” will cement America’s decline into kleptocracy. We have a process for accomplishing changes to government structures. There has been an overt choice to ignore that process. I would suggest that as a protest we do the following-

1. Stop all construction immediately, leaving all equipment and supplies in place. Pay the contractors for that equipment.
2. Erect a security fence around the construction site, without any cleanup.
3. Place a sign on each side of the fence, explaining that the project was created without public mandate.
4. Leave the fences and signs in place for the next 100 years as a reminder for future generations.

The terrible act of tearing down a part of “The People’s House” (the East Wing of the White House) is indefensible. All efforts must be made to not allow the destruction of an historic building to be rebuilt in the solo eyes of the destructor. The new construction must be handled by an appropriate party to the end of making the correct decisions for the property and existing historic building. The destroyer of the East Wing must be held accountable for the damage done of the White House. Why the destruction was not stopped is incomprehensible. Please make certain that next steps to restore the building is completed by competent people.

I oppose the spending of and amount of money on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history, particularly women’s leadership space and place in the White House. I want this project canceled. If anything, the East Wing should be rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

The design needs to fit the architecture of the existing White House and not overwhelm or in anyway diminish it because of size. What has been lost can’t be reclaimed but allowing an edifice that is too large and overwhelming would add insult to the injury that was the east wing’s destruction. The last design I saw removed the pediments, I would like to see them return. Thank you for the opportunity to comment on this and please listen to the people on any decision.

This project is an affront to our history and citizens. The East Wing was destroyed without going through any review process ignoring established procedures. The proposed ballroom will overwhelm the existing structures and be discordant aesthetically.

The way this has been done should not be rewarded and the East Wing restored to it previous status.

I believe the destruction of the East Wing without the approval of the historical preservation say was a major downfall of our government. With just the authority of one person, it should have never been done. The Rise Garden should be restored and give the Kennedy Center back to the people. The East Wing and the gold decor is in the White House is merely a power play. We do not need a ballroom, it would be for the billionaires, not the people. Look at history and how the East Wing was used. The Girl Scouts and Boy Scouts aren't going to bust a ballroom, or the many school trips to the Whiute House. It should be stopped and restored to its former glory.

This is THE PEOPLE'S HOUSE! It was absolutely devastating to see the bulldozers taking down the East Wing. Then to find out this was done with zero planning, preparation, and permitting! NO PRESIDENT should be allowed to make major renovations with zero permission or oversight. In every corner of this country people can't even PAINT a building considered protected because of it's historical value. To absolutely demolish part of a historical site is punishable by law everywhere.

We The People do not see a need or want a massive gigantic ego of a ballroom designed by a man who will be out of office in 3 years, if not sooner (we hope) and won't live to see it used enough to justify it. Please do not allow this to continue!

Sincerely,
American Voter from Roxboro, NC

I'm opposed to the grand ballroom plan because the United States shouldn't be sacrificing historic sites to replace them with tributes to any individual, especially since the destruction of the East Wing was done without proper input. I feel that

the exterior should be restored to previous appearance, and a plan developed by the Park Service using ideas from citizens and officials for the interior. It is certainly possible that the space needed some updating to best serve current usage, but few citizens would support a gilded gathering place for parties for the rich and entitled. If the Trump plans are allowed to go forward, we can expect bulldozers on other important National sites in the future.

What “East Wing Modernization Effort?” OUR East Wing was torn down without any warning or authorization and without any of the permits required. The only thing Americans need less than a $300,000,000 ballroom that only the elite will ever see, is to have a WWE wrestling fiasco tarnish OUR White House. Both are completely disgraceful.

We have Americans sleeping under bridges all over this country. We have families, homeless, living in their cars. We have millions and millions of Americans unable to afford food, shelter, utilities and the basic necessities of life. Our Educational System and Health Care Systems are the laughing stock of Industrialized nations, to the point that they no longer consider America as one of them.

It is reprehensible to build a completely wasteful, gilded ballroom while those are all truths that no one can deny. Who cares if the money doesn’t come from taxes, but rather from donations? Those wealthy enough to be donating to the ballroom are more than likely being blackmailed in some way into doing so. They should all be taxed the way they used to be, at a much higher rate, recognizing that they have earned their money off of the hardworking backs of American citizens. They are able to live like Emperors, Kings, Queens, and/or a ruling class while the average American is struggling to survive. We fought an entire Revolution to escape such lunacy.

We want OUR East Wing rebuilt, in its entirety, and we want that rebuild to be at President Trumps own, personal expense. Trump is NOT above the Law, no matter what he believes. He had OUR White House East Wing torn down without even asking OUR opinion, let alone going through all the proper, lawful channels. Trump should be made to pay for the restoration of the East Wing, modernizing it only so far as absolutely necessary for security and modern improvements, but putting everything back the way he found it. They say it’s impossible to turn back time, but President Trump should be shown that sometimes, it actually is possible.

Again, President Trump is not above the law and should be forced to personally pay the bill for a complete and total East Wing restoration as the penalty and consequence of ignoring the law.

The historic East Wing of The White House was totally demolished at the direction of President Trump without legal authorization, and his proposed $300 million ballroom is nothing less than a stalinesque vanity project which would be an affront to this country and its people. In its current form, the ballroom project, for which there apparently has been no meaningful independent design review or permitting, should be terminated in its entirety, and the East Wing rebuilt and restored to its original architectural configuration prior to its illegal razing.

The unpermitted razing of the East Wing of the White House is, in itself, a crime. The People's House is not the property

of its' temporary residents, and, as such, should be restored and renovated to its former state. Any funds raised to replace the East Wing rightfully should be earmarked to its restoration. In addition, the people responsible for its destruction should be held criminally and financially responsible, and should in no way benefit from any funds raised to create the monstrous ballroom proposed by those who committed these acts of vandalism. This was, and is, a symbol of our country's heritage. As a patriotic citizen, I want to see this egregious act of destruction remedied to the fullest extent of the law.

It is the worst case of “Ready, Fire, Aim” I’ve ever seen.

There is no final plan. It's just a bunch of wild ideas inside Trump’s head that keep on morphing.

It’s one man’s vanity project that takes no account of the existing architecture around the White House.

The plans are astonishingly ugly and unbalanced. The elegance of the White House will be weirdly attached to this monstrosity.

The phrase “short-fingered vulgarian” seems apt to describe what’s going on here.

The American people deserve to have the people’s house entrusted to better and more professional hands.

White House.

I would like for this project to be canceled and the East Wing restored to its historic design and intended use.

Any occupant who takes liberty to change, modify, or demolish property that is not theirs should be held fully liable for the cost of remediation and restoration. As with any lease or occupancy agreement, alterations made without proper authorization are the financial responsibility of the occupant — not the owner, and not the public.
All costs for remedy should be recovered directly from the occupant's personal assets.

The White House belongs to the people, not to the president. The fact that Donald Trump tore down the East wing with no approval or input is an abomination. The plans for the ballroom show that it will be massive in size and throw off the symmetry of the present design. The White House is a National Historic Landmark and National Park. It is owned by the American people. No one person, president or otherwise, has the right to destroy this building. Even if the story is given that it is to "improve" the building. The destruction of the East Wing was not approved by any federal agency that has the responsibility to approve such work. I am also against the building of the ballroom addition. The addition has no final design, and no regard for the existing White House structure. If it is completed, it will be an abomination of grotesque size. I actually believe that this work was started in secrecy in the late fall of 2025 with the intent that the winter weather would do so much damage to the remaining building that Trump would then declare that he needs to "demolish the entire White House" because of weather damage. He is already talking about adding an additional floor onto the West Wing to "balance" the appearance of the building. In my opinion, all work must be stopped until an acceptable reconstruction design is approved by the appropriate federal review process.

I am also questioning the funding for this project. I believe that the private funding from billionaires to pay for this project are simply bribes to get favors from Trump. No one should be able to "buy" the People's House.

I oppose the spending of $300 million on the project to replace the East Wing of the White House with a huge, unnecessary and artless ballroom. The destruction of the East Wing was initiated without any proper authorization, permits, or design review. It therefore amounted to razing a piece of American history. The White House is the PEOPLE'S House, not a piece of Trump real estate to vandalize as a vanity project. To call it a "modernization project" is the type of cynical double-speak propaganda that George Orwell parodied in his book Animal Farm. Do you think we are a nation a mindless sheep?

Any work on the White House and other historical monuments that belong to the PEOPLE of the United States must be reviewed and approved by the Commission of Fine Arts. This was not done, which amounts to an illegal destruction of public property. Furthermore, Congress created the 116-year-old Commission to be staffed with “well-qualified judges of the fine arts” who would review and advise on projects in D.C. This current president has appointed people with little to no professional qualifications to review and advise on art and architecture projects. Their only qualifications are their loyalty to the man currently residing in People's House. This lack of qualifications is vividly evident in the newly appointed assistant, Chamberlain Harris, who has no qualifications in the arts, making a making a laughingstock of the Commission of Fine Arts and making the Commission seem like it's being run by a ship of fools.

This project must be canceled, and the East Wing must rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

I respectfully submit my strong opposition to the allocation of $300 million for this project. Based on available information, the initiative was undertaken without proper authorization, required permitting, and appropriate design review. Such procedural deficiencies raise serious legal and governance concerns that warrant immediate scrutiny.

This undertaking does not constitute a routine modernization. Rather, it involves the complete demolition of a structure of historic significance, resulting in the irreversible loss of an important element of our national heritage. Projects of this magnitude and consequence demand full compliance with all applicable laws, preservation standards, and public oversight requirements.

I urge the appropriate authorities to suspend the project immediately, conduct a thorough review of the authorization and approval process, and take corrective action as necessary. I further request that consideration be given to restoring and rebuilding the East Wing in a manner consistent with its original architectural design and historic character.

Adherence to established legal processes is fundamental to public trust. Allowing this project to proceed without accountability for procedural violations would undermine confidence in governmental stewardship and the rule of law. I respectfully request decisive action to ensure compliance, transparency, and the preservation of our shared history.

This project is a despicable destruction of our history, and blatantly illegal, bypassing submissions and approvals that are in place for very good reasons. To allow it to continue would set a terrible precedent. The corruption shown in the bulldozing of the east wing is a disturbing example of an administration that believes they are above the law, and is a spitting in the face of every citizen of this country who cares deeply about our shared history and the proper procedures to ensure that projects are legal, appropriate, and support and enhance existing structures.
This monstrosity must be removed and the building restored to its original state. A statement must be made to show that illegal disregard and destruction at the whim of an individual will not stand.
Thank you.

Please do not go forward with this project. It is not a modernization of the East Wing. It was demolished without proper vetting or plans. It was a cherished piece of history that was crudely destroyed. I believe it should be restored to exactly as it was and the Trump family should pay for it from their own money.
No one is above the law. These people must be stopped.

I am a senior citizen and retired history teacher. I strongly, strongly oppose the destruction of the East Wing in our beautiful White House! The current president has unnatural, overblown delusions of grandeur that are completely at odds with long-held American sentiment and traditions. The LAST thing we need is a “Trump Ballroom,” especially when there is poverty, medical debt, and homelessness in this country.
I want the old East Wing restored immediately. No one is above the law or can ignore the rules and laws!

I oppose the current proposal. This project was started without the correct permissions and permits. The East Wing was destroyed without accounting for the national treasures it contained. Here's the comment I submitted three days ago. Folks are welcome to borrow or adapt:

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

Dear National Capital Planning Commission -

I have reviewed the information available to the public regarding the building of the East Wing of the White House and as a citizen of this great country, am not pleased. The plan that was shared via video was not a modernization, but rather a huge new facility that dwarfs the White House.

I understand the need to modernize a facility that serves as a welcome center of sorts for the American public and visiting dignitaries, but to build it to accommodate 1,000 seated diners with ceilings "38 to 40" feet tall and 89,000 square feet is

not necessary. A building of this scope takes away from the focus and beauty of the White House. The footprint needs to be reduced and kept within the scope of the original building.

The discussion of adding a similar "annex" to the West Wing in order to maintain some sort of symmetry should have been considered prior to the demolition of the former East Wing. Neither the East Wing nor the West Wing should have any additions of the currently proposed scale, which totally overwhelms the original structure.

Regardless of how this proposed project is financed, does not change the fact that it will belong to the American people - like all federal buildings and lands. Decisions of this sort, including the razing of the former East Wing, should be made in conjunction with the citizens of this country. This is a plan that I cannot support.

Any pressure that project advocates apply to approve this project based on national security interests or priorities must be rejected. The sudden nature of the demolition of the East Wing is acknowledgement that the President and White House staff don’t require the space daily for national defense purposes. This ‘hardship’ was self-imposed. If they required it urgently, they’d have planned; they’d have complied with laws (the US Constitution requires that the uphold the laws) and basic construction practices by having designs, permits and materials in hand and staged. Decision makers must assume that alternative facilities for national security activities have been established for a prolonged period.

The unpermitted demolition bypassed laws requiring consideration of the public trust this building represents and the

purpose it served. Those laws allow for consideration of historic assets and for professional planning aimed at retaining history in an appropriate context of modern needs.

In my town of 21,000 citizens, the historic City Hall was gifted to the City by an early settler family. We currently debate how its historic value is best honored. When we design public buildings we hold charettes for collaboration.

I've seen men who have fought militarily on behalf of the United States cry upon learning that the Wing was demolished. You have a serious responsibility to ensure that the spirit and letter of the law is maintained.

I oppose the spending of $300 000,000 for the building of a ballroom which was started by demolishing the East Wing of our White House without getting proper approval. This is our house. Trump is not the owner of this house and should've had to go through all the necessary approvals for this project. He should have to rebuild the East Wing. Stop the corruption and make sure proper, lawful authorizations are given for any future changes to our house, the White House. No one is above the law, including President Trump. To Whom It May Concern,

Before I comment let me say that I find the name for this project befuddling. How can the East Wing be modernized when it no longer exists??? I cannot describe how shocked and saddened I was the day the East Eing was destroyed. It was so wrong and to me is symbolic of what this administration is doing to all we hold dear. The very fabric of our nation, like the East Wing, is being ripped apart with no consciousness of how the American people are affected.

But on to the "modernization" project. In my opinion and what I feel would be the most appropriate resolution of this debacle is to restore what was there. Rebuild the Easy Wing in its original design and footprint with all things included appropriate for a building of the 21st century. A "modernized" new space. No grand ballroom. For gatherings larger than can be accommodated in the White House, find another space. Perhaps Trump's old hotel in D.C. is available. At the time the East Wing is rebuilt, the Jackie Kennedy Memorial Garden should be replanted and hey, let's do this really right and put the Rose Garden back as Jackie had envisioned.

Thank you,

Please use what powers you have to demand President Trump's personal funds or Executive Branch allocated funds be used to rebuild the White House East Wing to it's exact specifications before DJT destroyed the structure.
DJT's actions were illegal, unsupervised, unapproved by regulating commissions and must be corrected.
This blatant abuse of power must be addressed. There must be some response to represent all Americans who have lost faith in the institutions which were designed to monitor and improve all historical renovations.

The unilateral demolition of the East Wing of the White House is a violation of the lawful procedures of our land. The idea to demolish it in order to construct a "ballroom" funded by secret corporate and billionaire donations is an affront to the American people. The White House belongs to the people, and it should not be dwarfed by an oversized oddity that serves no purpose. I don't want the U.S. to be regarded as ostentatious or boastful to the point of being plainly ANNOYING. That is exactly what Trump's enormous gold-studded ballroom would convey. He OUGHT to be prosecuted for destruction of public property for his removal of the east wing of the White House. If the courts found him guilty he should be required to pay for the wing's re-construction.....chump change to him with his ill-begotten multi-millions.

Now to Trump's absurd reason for removing the east wing, viz. to have a flashy, distasteful, abhorrent venue to replace the white (matching the WHITE House, by the way) tents used for state, and other, events staged by the White House. For one thing, those "tents" aren't tents in the public conception of what a tent is, but rather are more like pavilions where invited guests gather for special occasions. After all, the White House grounds where the pavilions are erected are attractive in themselves and can easily be viewed by guests from within the pavilions, or in clement weather, from without. When there have been limited views of these pavilions in the public broadcast media they, and the scene around them, have a lot of appeal.

First, remember that the way this project unfolds is setting precedent for development patterns in DC. And it also is making a statement as it relates to power - setting an example on how to ask for forgiveness instead of permission. The decisions you make right now on this project will have far reaching impacts - be very clear about the message you want to send to the public.

As it relates to the actual project t…..An upgrade ballroom is a fine idea but please make it contextual. When living in and regularly visiting the DC area, the height restrictions make such an impressive impact on my experience of the area. The city planning of our federal buildings is amazing - the balance, the negative space, the symmetry, the order, the grandeur. The sensitivity to place in DC highlights the symbolism around the power of our nation. Please make sure any new buildings or renovations respect the context and don't overshadow existing buildings like the White House. Trust respected planning and preservation professionals on the definition of contextual sensitivity. Specifically, please don't build the wing to be bigger and remove sight lines to the White House.

Thank you for taking the time to ensure we have a great national capital.

That this was done without proper authorization, permits, or even a real plan other than destroying a part of history is completely un-American. The East Wing, being a structure of national historical significance, should not have been modified, let alone completely demolished, without any oversight, review, or feedback from the people. The White House, or the "People's House" is not a vacation home to be remodeled at the whim of the current occupant. The best course of action available at this point is to reconstruct the East Wing to match the original structure as near to the original dimensions and aesthetics as possible. To do anything else would set an indecorous precedent.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.
The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.
I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

I object to the destruction of the East Wing and to the design of the huge ballroom without permits or historic design reviews. I object to funding its building with money and by persons or companies hoping to do business with the US government. It is absolutely corruption. In any municipality or city or town, such a building without permits would result in an order to restore at the cost of the person who did it. That is what should happen here.

I strongly oppose the demolition of the east wing and the proposal to replace it with a ballroom. The east wing is part of the building's history, character, and architectural integrity.

A ballroom may serve a modern function, but it does not justify erasing a space that holds historical and structural value. We should be prioritizing preservation, thoughtful restoration, and adaptive reuse—not demolition for the sake of expansion.

Progress does not require destroying the past. We can meet present needs without sacrificing the legacy that makes this place meaningful.

The White House is the people's house and the people should have a say!

It is extremely disappointing that this project even got started. The destruction of the People's house is a tragic example of a system with no checks and balances. The chaos being perpetrated by this administration needs to be held accountable. Some common sense planning and review should be required for something as important as this. And clearly it has not been done. So please, please let's end this project. Get proper commissions and feedback so that this can be rebuilt for the People. We, the People, deserve better

The White House is a national treasure and a house to a temporary occupant. The proposed project will alter this landmark. No tenant should have the ability to drastically modify the property of the owner. The current tenant occupies the property for such a short time in the history of the building. The proposed project is too large. It would dwarf a building that is part of our collective history. Moreover, the description of the project in the proposal connotes that the current facility is neither secure nor adequate. This is false and attempts to create a need where none exists.

I oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval.

The funding creates unacceptable conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of the president who controls those contracts. This is not charitable giving. This is an investment in access and favorable treatment.

The White House belongs to the American people, not any individual president. I urge the Commission to reject this proposal until full legal compliance is achieved, including congressional authorization and completed environmental assessments. No temporary occupant should possess unilateral authority to demolish historic structures without following the law.

As a tax paying US citizen I am greatly offended by the action, unauthorized and, in my opinion, illegal, taken by Donald J Trump with regard to the demolition of the East Wing of the White House. Furthermore, I find his unilateral action to be an absolute abuse of presidential authority and to proceed with the construction of his proposed ballroom without any oversight regarding its design and proper permitting is in direct violation of his authority.
I would expect that this project needs to adhere to all of the necessary legal requirements for the construction of a structure on public property and to have a detailed explanation of the process that will be used to fund such an enormous project.

What should happen is that the East Wing needs to be reconstructed and the ballroom plan scrapped.

There is no documentation to be reviewed for the east wing modernization project. Where are the architectural drawings, where are the engineering drawings, where is the impact assessment of how this change will impact the environment, traffic flows, where is a comparison of the original east wing to the proposed east wing?

The American people should have an opportunity review the plans before the old east wing was demolished. Without clear understanding of what will be built, I request that the exterior facade and footprint be identical to the original east wing. I will allow for upgrades in wiring, electrical, hvac, and other modern convenience as long as it does not change the exterior facade.

I oppose the unauthorized, unapproved and unnecessary destruction of the East Wing of the citizens of the United States White House. The White House belongs to the citizens and not the employees (including the POTUS) of our federal government. This “project” should have never began without proper approval and oversight. It actually should be something the citizens vote on. Currently our country is in economic and political crisis. This ballroom needs to immediately be stopped until such a time as the American people approve of the project. The people also need to determine if it should be rebuilt or changed to something different. It needs to be paid for not by billionaires trying to buy favor from the current administration but from the White House operational budget and frankly this country cannot afford the bill at this time. The current administration is costing the taxpayers more and more with each unauthorized and poor decision they make. Thank you for your attention to the matter KMM.

I oppose the East Wing Modernization Project. It too late now to stop the complete razing of a wing of "The People's House," but I request that the rest of the work be done with historical experts, who can restore the East Wing to it's original purpose. The destruction was initiated without the proper authorization, permits, or design review. I want this project canceled, and the East Wing rebuilt and restored to its former design. Reprehensible private and public behavior. A record of clearly illegal and/or questionable conduct. An adjudicated rapist. A convicted felon. An instigator of treason and insurrection. A constant, blatant, quantifiable liar. Clearly insecure demands of fealty, with a gallery of bad-faith players willing to play along to various selfish ends. Regularly says whatever it takes in the moment to get his way, whether true or not, mostly with insincerity. These and more are the habits, qualities, and stigma donald j. trump (who deserves neither the office title he supposedly holds, nor the honorarium of a capitalized name) brings to everything he touches.

Traditionally, the White House is The People's House: maintained with taxpayer dollars, curated and altered reasonably and only after thorough, good-faith discussion appropriate to the scope of any given project -- as well as, of course, a permit process commensurate to that discussion. Under no standard can it be said that trump's ballroom plans and the subsequent, catastrophic East Wing demolition, ever underwent that process of consideration.

When is enough, enough? The fate of the East Wing, much less the United States, should not be left to the whims of this erratic lunatic and the various sycophants looking to curry his favor. Reject, rebuild, renew!

ABSOLUTELY DISGUSTING AND WRONG!!! THE HISTORY HE HAS DESTROYED IN THE PEOPLES HOUSE IS INDESCRIBABLE!! I do not know how he is getting away with all that he is....let alone even be president. He is a 34 time plus felon for God's sake!! However the history and grandeur he destroyed can never be repaired. He destroyed the Rose Garden and removed the trees for that hideous concrete monstrosity that is reminiscent of where...mara lago. It's absolutely disgusting along with all the tacky tacky gold accents. He has destroyed everything that made THE PEOPKES HOUSE amazing and turned it into a trash heap of vanity and embarrassment. Let's not begin to discuss the likely asbestos he exposed everyone to by going at it like he was killing snakes!!! Someone needs to stop this absolute utter madness. We won't last another 3 years. Tearing down our monuments, renaming things with no authority. He's a absolutely ridiculous excuse for a scumbag. PLEASE MAKE HIM STOP!!!! Make him rebuild the east wing the way it was or as close as possible. Get rid of the tacky golden touches everywhere and rem9ve the tacky tacky marble etc. It's heartbreaking to see him destroy so much of our history. ITS THE PEOPLES HOUSE NOT HIS!!!!

I oppose the East Wing Modernization Project which was begun without proper authorization, permits or design review. The White House is the people’s house not the property of a temporary resident. This project name is misleading. It is not a modernization but a complete destruction of the East Wing and a razing of our history. This building is and should continue to be a reflection of our nation’s history not of one person’s ego. As planned, this project (ballroom) will not be in proportion with the rest of the historic building and completely dwarf the existing structure. This proposed project should be cancelled and proper channels should be followed for future rebuilding and alterations. No one is above the law and proper procedures should be followed for any changes to the historic structure. Failure to do so should result in consequences and penalties for those involved and is an affront to the American people. Thank you for the opportunity to speak on this matter.

I wholeheartedly oppose the architectural plans for the east wing modernization. A beautiful and historic building that belong to the American public was destroyed without any input and any approved plans to replace it. One wonders whether there were any plans at all. The architectural plans that have since emerged our garage and destroy the aesthetics of the White House, which is the People's House, not personal property that can be turned into a gilded palace that does not represent the anti-monarchy origins of this country. Furthermore, it will dwarf the original building. The original building has been destroyed, and so it is too late to go back. But moving forward, its replacement should resemble the original structure as closely as possible. It should not dwarf the original White House.

As a lifelong American citizen I strongly oppose the desecration/demolition of the East Wing of the White House. This is at best an ill-advised project as well as a violation of the process involved in alterations to a building that belongs to the American people, not the person who resides there now, in the past or in the future. Please cease the demolition and instead rebuild/restore the East Wing as it existed for many many years.

The project which involves tearing down the East Wing and replacing it with a ballroom that is a vanity project for the current president is appalling and, as a citizen of the United States, I oppose this project. It was initiated without the proper authorization, permits, or design review. It is NOT a modernization project. It is total destruction of American history. The White House is the American people's house. It stands as a monument to our history, our values, and our integrity. None of those are valued by the current resident. Whether or the rumors are true that the East Wing is being rebuilt to hide a gigantic bunker, none of this should have happened at the whim of a man who derides American history every chance he gets.

I want the East Wing rebuit and restored to its former design and glory. Frankly, I think the person who demolished it should have to pay for its reconstruction personally. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

I'm writing to express my opposition to this project due to the manner in which the project commenced. It is appalling that the Executive Branch could move to destroy a portion of the People's House without obtaining the proper approvals. Rather than approve the so-called modernization project, the Commission must hold accountable those who illegally destroyed The People's property and insist that the East Wing be rebuilt and restored to its original design. How the

Commission responds to this project sets the tone for future illegal destruction and "modernizing" of our historic American heritage. Please don't let this become an acceptable approach.

I deeply oppose spending $300-$400 million on this project, which was undertaken without proper authorization, permits, or any design review whatsoever. It does not qualify as a modernization project but is a complete razing of American history. I want this project canceled and for the East Wing rebuilt and restored to its former design. The project as planned is grossly vulgar, out of proportion to the rest of the White House complex, and not in keeping with the White House's longtime and relatively modest role as "The People's House." No one is above the law. To permit this project to go forward at all, and particularly without penalizing those who broke the law in razing the East Wing and proceeding with no authorization whatsoever, is an insult to all law-abiding Americans.

To the Governing Committee(s):

Please consider the rampant disregard for not only processes in place for approval and reconstruction of historic places in the United States, but the expenditures at a time when there should be so many other priorities. The demolishing of the East Wing of The White House, then the dismissal of the architects so soon into the project- Doesn’t that tell you that this was not well thought out?

Please rebuild what used to be there. Enough. Or at least get a bipartisan committee together that includes historians, architects, and WH staff to plan the project.

Thank you for your consideration, and please work toward resolving this gross overstep of rights.

Any characterization of this as East Wing Modernization is an architectural blasphemy. I oppose spending more than $300 per square foot, including on the bunker below, and I oppose anything other than what this activity is actually named: modernized (now unfortunately and unnecessarily reconstructed) East Wing of the White House. Trump’s horrible aesthetic as seen in the standing portions of the White House should have no part of planning or execution in this build, if for no other reason than to punish him for his unilateral, unwanted and unapproved destruction of the East Wing. Let me be clear: No Ball Room. Thank you for taking my comment.

I’m very much against the aEast wing project. This project wasn’t approved through proper channels. In fact Trump says it’s paid for by billionaires. What did he promise in return for their “gift”. To say it’s all paid for isn’t true once completed the American tax payer will be responsible to furnish it, staff it, maintain it, and allow use of it. I wouldn’t mind occasional use but with our present administration it will be for parties to feel important, and a place to plan more corruption. Trump should re-build the east wing with the original plans with money from his billfold. After all nobody gave him permission to to destroy the white house., thank you Linda

We should restore the East Wing in the same style and scale as it was, and with the same placement with relation to the

West Wing. Construction should include functional updates that bring it up to code and modern standards, including ADA accessibility where possible. If a larger ballroom is needed, construct it elsewhere in the city or use other nearby public spaces.

Do not allow special interest funds to influence or pay for the rebuilding.

The White House is the people’s house. It was deliberately designed and built with modest dimensions and restrained aesthetics. It is not a Palace for a King.

BEFORE nationally significant places are permanently altered, the public deserves an opportunity to help shape the decision. We should follow past process for making needed but historically sensitive changes.

The White House is a historic landmark first, an event venue second.

We probably do need an expansion of some sort to ensure state dinners don't need to spill out to tents on the lawn. However, whatever is constructed, should be of a scale that doesn't overwhelm the Whitehouse. Also, the addition needs to fit with the historic character of that settong. Get rid of the gaudy gold! The White House was modestly elegant and full of symbolism. We don't want the opulence of a royal palace because each president only resides there temporarily.

I would like to see key elements of the East Wing restored and I would like the rose garden returned. What's been done to the people's house is a travesty.

In addition, no one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans. An investigation into the process and determination of who should repay the costs (NOT the US people through taxes!). Investigation into the basement areas should be done as well.

Any future projects should have careful oversight, including plans, selection of contractors, permits, and comment periods,

The impulsive, unapproved, appalling razing of the East Wing was a criminal act of desecration. Donald Trump should be compelled to personally pay to restore this valued part of our history to its condition prior to its wanton destruction. The need for a permanent ballroom is best left to the discretion of Congress and the preservation organization responsible for the White House’s protection. The White House is not one man’s personal property. It is the People’s House and We the People want the current temporary occupant to stop damaging it.

Restore the East Wing, then consider any possible addition with experts providing guidance regarding need, cost and design, especially focusing on proportion and well-considered aesthetic considerations.

This is a horrible removal of America’s history. It happened in the dark of the morning, in secret, with malice because the President knew we (the people) would never agree to destroying Our White House. Make him return it to its original form with all the rooms and furnishings. And make him pay for it. While you’re at it, make him take down his stupid “car lot flag poles “ “replant the rose garden “, and “remove gold” everything from everywhere! The East Wing “modernization” project

I strongly object to the demolition of the East Wing with no approvals, permits or input from Congress or the public, since it is the public’s house. After the shock of seeing the demolition, I was sad and depressed for days.

Also, I seriously doubt the fundraising is firmly in place. If taxpayer money is to be used, it needs Congress’ approval.

Plus, no one asked for a ballroom. Or needs one.

This is not acceptable. The lack of respect for our history, and the office of the President, is appalling.

I have great concerns with the ethical consequences of accepting money from billionaires to rebuild a structure that Trump demolished without congressional approval. I view it as this is another way for billionaires to bribe Trump for pardons, for legislative reasons and whatever else they can get out of him that they're paying for. There has been no transparency on how much each donor has donated. I think we have the American public should know who Trump will be in debt to so when he granted some special privilege, we know why.
And I really have an extreme problem with Trump, making decisions outside his legal authority. He had a demolished without congressional approval. He says he has plans drying up without congressional approval. He didn't include anybody from the historical oversight of renovating the White House?
I am very tired of the government, allowing this man to run rampant without making him follow the rules. I would be very disappointed in this agency for allowing him to bypass the rules and the regs.
Thank you, Tammie Morris

Remember the East Wing of the White House? Remember the giant ballroom that the tech billionaires have agreed to fund in its place? The National Trust for Historic Preservation is making a gallant effort to stop this. And we can help.

Thanks to the National Trust, we have until March 4 to submit comments about the ballroom to the National Capital Planning Commission. You can make a comment through the link below (click on Submit Comment). PLEASE NOTE, the project is called East Wing Modernization on the pull down menu.

Anara Guard's comment on this is beautiful. She gave me permission to post it here, if anyone wants to use her language.

Demolishing the East Wing without permission was unlawful. It was stomping all over the history of the United States. That building belonged to us the people, not to this administration. If there were truly safety or decay issues they should have been addressed through the proper channels. I do not believe it was demolished for those reasons but instead for the ego and narcissism of the current administration and his belief that he can do anything and is all-powerful and that the law does not apply to him. I request that the building be rebuilt in the same style and fashion that it was prior to the unlawful demolition taking place. If allowed to go forward the building of the proposed massive ballroom would dwarf the peoples' house and confirm that the law does not apply to all. I urge the committee to think of the message that sends. Please restore this important part of American history and do a little bit to restore our faith in our nation's laws.

It isn't a modernization project it is a total destruction of USA History by a fascist who thinks he is king. This is disgusting and should have never happened. It should be a respectful replacement or a museum to hold the photographs of the events that had taken place in that lovely old building. This fake gold leaf president (pretend, unqualified) should be called out for destruction of property and defacing history in the USA. Giving this pretender free reign in the USA is unhealthy for our free nation and our laws and the Constitution. Make this now repaired and respectful not a tribute to someone who is destroying the USA.

The President is the temporary resident of a historic building, the White House. Like any temporary tenant, he does not have the right to demolish it for a renovation of his choice without permission from the landlord, who is US, the citizens of the US. As this was unauthorized, it should not be allowed to continue. Efforts should be made to restore the East Wing to its original state.

The East Wing of the White House has been a part of OUR White House for decades. NO ONE gave the US President the authority to simple bulldoze it into the ground to make way for a gawdy, Putin-style ballroom as a vanity project so millionaires can get special favors from a corrupt administration! Why else would this have been done without the proper authorization, permits, or design review? It is not a modernization project but rather a complete razing of American history, without so much as a “how do you do” to our CONGRESS!

I want this project canceled and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans, not to mention a breach of Congressional oversight. If this is allowed to go on as planned, what’s to stop the President who thinks he can demolish public monuments at his whim and sole will from wreaking this kind of destruction elsewhere WITHOUT LAWFUL AUTHORIZATION AND APPROVAL. He is NOT a king, and he is not above the RULE OF LAW! The hubris that it was destroyed in the first place is an outrageous affront to every American and a sad loss of our history. I oppose the building of an unnecessary ballroom 100%. Please restore our White House — and while you’re at it, Jackie Kennedy’s Rose Garden as well! Thank you.

It is an affront to all law-abiding Americans in the reckless manner in which our White House was destroyed without proper planning, authorizations, and permissions.

As a homeowner, I cannot install a 100 square foot patio without submitting plans for approval and securing permits from proper authorities, but the current administration believes it can do whatever the hell they want to the White House because they won an election? I oppose the demolition of the White House East Wing because changes to a national historic site should occur through transparent review, not unilateral action. Additionally, this $300M project is being funded by large private donations at the behest of the sitting administration which creates at the very least the appearance of influence-seeking or preferential access, and undermines public trust.

The East Wing was destroyed to make way for a new state ballroom funded largely by private donors, with demolition beginning before review by the National Capital Planning Commission and amid unresolved preservation concerns.

I am asking for clear disclosure of donor funding, environmental and design review, and public accountability.

The White House is a shared civic symbol, not the property of any one administration, and major alterations should follow the same oversight standards expected of every other federally significant project.

I am opposed to the “big beautiful ballroom “ expansion of the east wing of the White House. The destruction of an entire wing of the people’s house without approval from the historic preservation or Congress or even the people was a gross display of unrestrained power. To allow the building of an unnecessarily large and gaudy addition not only is a slap in the face of the original architect it shows total disregard to what the American public wants. The rebuilding needs to be symmetrical and complimentary to the rest of the building. There has also been no guarantee that it will be paid for by donations. lLuke all the rest of this administration’s rampant spending, it is most likely going to fall on the taxpayers shoulders. I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

I oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval.

The funding creates unacceptable conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of the president who controls those contracts. This is not charitable giving. This is an investment in access and favorable treatment.

The White House belongs to the American people, not any individual president. I urge the Commission to reject this proposal until full legal compliance is achieved, including congressional authorization and completed environmental assessments. No temporary occupant should possess unilateral authority to demolish historic structures without following the law.

I strongly oppose the rushed demolition of the East Wing and the proposed construction of a massive, 55,000 to 90,000-square-foot ballroom on the White House grounds. As stewards of American history, we believe this project bypasses critical legal and public oversight, threatening the historic integrity of one of the nation's most iconic symbols of democracy.
1. Failure to Follow Legal Review Processes
The demolition of the historic East Wing and the planning of the new ballroom have proceeded without the required, transparent public review processes. Major structural changes to the White House must be reviewed by the National Capital Planning Commission (NCPC) and the Commission of Fine Arts. By bypassing these consultations, the

Administration is neglecting the legal procedures designed to protect federal, historic property.
2. Damage to Historic Integrity and Scale
The proposed ballroom is outsized and threatens to permanently disrupt the carefully balanced, classical design of the White House and its grounds. A structure that dwarfs the existing East Wing will overwhelm the Executive Mansion, creating a visual imbalance and altering the modest, non-royal aesthetic originally intended for the President's home.
3. Lack of Public Transparency
The White House belongs to the American people, not to any single administration. The rapid,, under-the-radar demolition of the East Wing, which previously housed the Office of the First Lady and served as a public entrance, demonstrates a lack of respect for public engagement and transparent governance.
4. Redundancy and Environmental Impact
The need for this massive, permanent structure is questionable, as it seeks to replace the temporary, reversible, and less destructive practice of using tents for events. The permanent destruction of the site causes, at minimum, a "significant impact" on the cultural landscape that deserves a full Environmental Impact Statement (EIS).
Conclusion
I urge an immediate pause on all construction activity. We demand that any plans for the White House grounds be submitted for full, open public review and that the preservation of the "People's House" takes precedence over the unilateral, aesthetic preferences of the executive branch.
Trump is an ASSHAT and this project needed to be stopped before it started! How does one man have the power to tear down part of american history.

This project needs to be stopped in its tracks. The entire process is a reflection of someone who only operates selfishly and impulsively. History cannot be bulldozed to entertain billionaires. Please stop this project and support what is right and just. America is not for sale. This is our house, the people's house, and we the people do not approve of this project. A prominent symbol of our nation's history has been erased overnight. Though we cannot restore what was lost, we can change the outcome of what it will become. Stop this now!

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history.
I want this project canceled, and the East Wing rebuilt and restored to its former design or failing that a proper design approved by the people, in proportion to the rest of the White House. And please no gaudy gold leaf.
No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.
And if the millionaire have this much money sloshing around there are better projects to fund. Or maybe they could pay more taxes….

I see you are calling it the East Wing Modernization Project which implies a remodel with the main wing surviving. The fact is that this is a total demolition. It is a betrayal of the public. The White House is home to a president on a temporary basis, but it is permanently part of our history. Some of us remember driving down Pennsylvania Avenue as kids and waving out the window to the White House or taking their kids there for an Easter Egg Roll. This is not Trump's property. It is the property of the American people. As such, all major changes should go through the prescribed processes. I would like to see it resurrected again as it basically was with perhaps newer wiring, etc. The wound is further aggravated by two other facts. One is that the White House access is seemingly for sale as the wealthy donate toward these causes. The other is that it has already been clearly articulated that there in intention to ruin other sites of national importance. Please do what you can to prevent this.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history, most pointedly all of the former First Ladies (their offices and staffs were once housed in the East Wing). It is a further separation between the People and their government since the traditional public entrance for tours was also in the East Wing.
I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans. I strongly oppose the demolition of the East Wing that was done without review, oversight or input from the agencies and organizations tasked with protecting our national buildings and monuments. The monies raised/donated for the construction of this unnecessary ballroom should be used instead to rebuild and restore the East Wing of the White House, the People’s House, to its former state as quickly as possible.

Furthermore, a fine should be levied against those who perpetrated the destruction of this historic building without proper scrutiny.

Respectfully,

I find myself curiously upset at the demolition of the East Wing. I don’t think an administration should be allowed to satisfy their whims on a moment’s notice and destroy history.

Regardless now that it’s been destroyed I think REAL historians should be the ones to decide how it is rebuilt. It needs to blend in with the architecture of the White House, not dwarf it. Do we really need a ballroom for 1,000 people? We have an outrageous deficit; we don’t need to spend money on that kind of entertainment. Let’s tighten our belts!

Speaking of money. The destruction has cost money, the restoration will cost more. Do we trust these corporations will continue to pay when a new administration takes charge?

I fear the taxpayers will once again be left holding the bag for a project that could have been more thoughtfully and conservatively undertaken.

I oppose the spending of $300 million on this East Wing Modernization project, which was initiated without the proper authorization, permits, or design review. I strongly disagree with the destruction of the East Wing and the building of a ballroom that will dwarf the People's House. There was no discussion or choice we were given but was simply torn down in the middle of the night. As an American Citizen I am requesting that the East Wing be restored to its original condition and footprint and that Mrs. Kennedy's Garden be restored. We can not allow a temporary resident to rip out and destroy the very things that the people of this country cherish. The expense of this reconstruction should be charged to Donald J. Trump as he is the responsible party for the desecration of property not legally belonging to to him.

The White House East Wing Modernization project is misguided and should not be allowed to proceed. Every project that comes in front of NCPC does so BEFORE it is started. I unequivocally oppose the reckless expenditure of $300 million on a project that was launched without proper authorization, required permits, or legitimate (ANY???) design review. This is not a modernization effort - it is the deliberate dismantling of an important piece of American heritage.

This undertaking represents a profound disregard for both our history and the rule of law. It must be halted immediately. The project should be terminated in its entirety, and the East Wing must be faithfully rebuilt and restored to its original design.

No individual, agency, or administration stands above the law. Allowing this unlawful project to proceed without accountability would undermine public trust and insult every law-abiding American. I oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval.

The funding creates unacceptable conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of the president who controls those contracts. This is not charitable giving. This is an investment in access and favorable treatment.

The White House belongs to the American people, not any individual president. I urge the Commission to reject this proposal until full legal compliance is achieved, including congressional authorization and completed environmental assessments. No temporary occupant should possess unilateral authority to demolish historic structures without following the law.
What has already occurred as simply unacceptable.
The current administration is grossly overstepping its authority and this needs to be addressed before there is more damage to our country and it’s rich history.

I believe that the East Wing of the White House was an historic structure and should never have been destroyed. But it has. Now, I think it should be rebuilt as a replica of the former structure. As close to the original as possible. We can only hope everything that was in the building has been preserved and it should be placed back where it was. Anything lost or destroyed should be recreated and used as the original was. Art, furniture, all of it. This was a legacy of our Democracy. Restore it!!!!!!!! Were all the legally required steps followed before the demolition of the East Wing of the White House? Were all the assigned commissions consulted before the demolition of the East Wing? One man’s desire for a shrine to himself does not allow for laws and commissions to be unobserved and broken. The East Wing Modernization Project appears to be an attempt by the current occupant of the Oval Office to make over the Capitol of the United States in his own image. He does not seem to recognize that the Capitol is public property, not his private property. I strongly oppose the so-called "East Wing Modernization Project." It was launched without proper authorization, without required permits, and without legitimate design review. That is not modernization; it is demolition disguised as progress. You don't modernize history by bulldozing it.

We were lied to, this project does not update the East Wing—it erases it. It trades architectural heritage for vanity construction and treats the rule of law as a nuisance to be sidestepped. Public buildings, especially those that belong to the American people, are not personal canvases for unchecked ambition.

I call for this project to be halted immediately. The East Wing must be rebuilt and faithfully restored to its original design. Those who authorized and advanced this unlawful undertaking must be held accountable.

No one is above the law—not private citizens, not public officials, not even presidents. To allow this project to proceed without consequences would not merely damage a building; it would damage the principle that laws bind us all. And once that principle is weakened, it is far harder to rebuild than any historic building.

Please stop the demolishing & construction of the East Wing. The president has consistently lied about the facts of his ball room construction. While it may not be possible to return the East Wing, we need responsible & educated people to study & build a replacement addition that fits into the beauty of the current structures already in existence---not something that is just big in size & dwarfs the current White House. The East Wing being demolished without proper authorization, the proposed Ballroom should not be built on public property.

The donated funds should be used to fully restore the East Wing to modern standards. If not feasible, perhaps the area can be naturalized - new rose garden or public park to memorialize Renee Good and Alex Pretti.

Illegally destroying the East Wing of the White house, a piece of American History, without proper authorization, permits and design review is despicable. It should not be rewarded with control of the design of it's replacement. There is a reason National Preservation and Trust has rules for any major changes in OUR White House. (Compete replacement is 'major'). The new East Wing should have improvements but remain in keeping with the proportions of the White House proper. It's function should not be wasted on a vanity space. A gilded ballroom is not what the East Wing was originally built for. It is NOT what should be built in it's place. Restore it's function as a working part of the White House as it was intended before it was so violently destroyed.

I oppose the demolition of the White House East Wing because changes to a national historic site should occur through transparent review, not unilateral action. Now that it has been demolished without review, the project must not be continued until the proper procedures are followed. The new construction must be proportional to the rest of the building.

The East Wing was destroyed to make way for a new state ballroom funded largely by private donors, with demolition beginning before review by the National Capital Planning Commission and amid unresolved preservation concerns.

I am asking for clear disclosure of donor funding, environmental and design review, and public accountability.

The White House is a shared civic symbol, not the property of any one administration, and major alterations should follow the same oversight standards expected of every other federally significant project.

Additionally, this section of the White House should not be named for any person, as it is "the people's house".

I strongly oppose the allocation of $300 million for this project, which was launched without the required authorization,

permits, or design review. This is not a thoughtful modernization effort; it is the wholesale destruction of a historic American landmark. The East Wing was torn down before Congress granted approval—an action that reflects reckless disregard for established legal and constitutional processes.

President Trump's decision to move forward in what can only be described as a political temper tantrum undermines the rule of law and the system of checks and balances that governs federal projects of this scale. No individual, including the President, is above the law. Allowing this project to proceed without accountability for those who bypassed legal requirements would send a dangerous message and diminish respect for the institutions that safeguard our democracy.

While we cannot undo the loss of the historic East Wing, any effort to rebuild it must proceed through the established checks and balances required for federal projects. The restoration should be subject to full congressional approval and guided by qualified historical architects selected through a bipartisan process, ensuring transparency, integrity, and respect for our shared national heritage.

Thanks to the National Trust, we have until March 4 to submit comments about the ballroom to the National Capital Planning Commission. You can make a comment through the link below (click on Submit Comment). PLEASE NOTE, the project is called East Wing Modernization on the pull down menu.

I am strongly opposed to a 90,000 sq foot addition to the White House. The design of this is a monstrosity. It will completely overshadow the White House - the PEOPLE's house. The beautiful central White House building should always be the focal point of this historical site. Any additions should be subtle, tasteful, and never distract from the main building. My preference is to restore the East Wing as it originally existed with whatever modernizations are needed to the interior. Please do not let the peoples house be disfigured with a gawdy addition that will forever be a stain on this beloved house.

The White House is the Peoples' House, not a Trump real estate holding. I vehemently oppose this construction proposal. The project commenced without legally required authorization, permits, design approval, or public health oversight. An aesthetic nightmare, it grows larger, gaudier, and more costly with each subsequent design iteration. Construction must stop immediately, and the East Wing should be fully restored to its former configuration. In short, I'm utterly opposed to this project. This is an abomination. First they tear down a historical piece of American history without any authorization, and then they plan to rebuild it as a monument to one man's ego. I vehemently oppose the spending of $300 million on this monstrosity, which was initiated without the proper authorization, permits, or design review. This is a vanity project, and I cannot for the life of me understand why it's been allowed to get this far. I oppose this project for several reasons.
1) The Whitehouse is housing for our countries elected President & family and a symbol of the separation in our 3 branches of government, not an entertainment venue.
2) The number of state dinners and similar events is 3 to 5 per year on average. At a cost of $400 million, even with private funding, the annual upkeep and maintenance will be paid by the taxpayers. Rent the tent!
3) It's gastly over building. The area around the Whitehouse is already cluttered and congested, this expansion will not only add to the chaos but serve to further separate the President from We the People.
4) This administration, essentially throwing a tantrum, and demolishing the East Wing ahead of required approvals, which

now must be repaired regardless of the modernization project, is no reason to move forward with the ballroom. In the public sector, asking forgiveness instead of permission does not work, this is not a private business nor private home. Any funds donated to date should be used for the repairs.

The unautorized demolition of the East wing to serve an ego fueled project
is another unnecessary and unwarranted "defacing" of an historic building.

This act is work than the effort to made one of the People's buildings resemble some Oligarch's or Royal's Palace, not the home of a democratic representative.

The destruction of the former East Wing without propper approvals in place was an assault on the American people. A ballroom addition that overwhelms the scale of the White House is inappropriate and entirely unnecessary. Funding of this proposed project through "donations" is also of a dubious nature given the corruption of the current WhiteHouse occupant.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. I am vehemently opposed to the east wing modernization project. Using private donations breaches an ethical line. It will cost taxpayers for upkeep anyhow. It is out of scale with the historic Whitehouse. This is thr people's house and it should never have been destroyed without going through proper channels.

The destruction of our historic East wing without regard for regulations protecting our whitehouse is an unfathomable wound perpetrated against every American. I believe this crime should be corrected by rebuilding the wing and restoring it as much as possible to its original design. I believe there would be massive support for erasing the results of the crime, and no one person should ever destroy our heritage in this way again.

Trump's destruction of the historical East Wing which belongs to the citizens of the US, is one among a myriad of travesties he has committed. I would like to see his ballroom construction halted. Also, his taste is hideously garish and I do not want that to represent my country.

I was shocked when I saw photos of the East Wing of Our White House being bulldozed to the ground! Why would the

American People's House be treated this way? Why had the process, that is explicitly outlined to protect our historic buildings, Not Been Followed? And been so brazenly been Ignored by the president of our country?

I believe this may be the only chance that the American people have to register their disbelief and abhorrent disgust of the actions that caused this to happen as well as the next building, a ballroom, that is to be erected again, without going through the normal procedures. Even the name of the project does not accurately describe what is taking place.

According to historian, Heather Cox Richardson, in her Letters from an American on February 16, 2026,
"In 1789, when George Washington took the oath of office as the first president of the United States of America, no one knew what to expect of leaders in a democratic republic. Washington understood that anything he did would become the standard for anyone who came after him. "I walk on untrodden ground," he wrote in 1790, the year after he assumed the office of the presidency. "There is scarcely any part of my conduct w[hi]ch may not hereafter be drawn into precedent."

In the ensuing years since Washington's shining example, many laws and procedures have been enacted to protect our buildings, such as the White House. We CANNOT let this go on without doing everything we can to force the procedures be followed and followed to THE LETTER.
Thank you.

I oppose the East Wing Modernization project as written to spend $300+ million dollars to build a ballroom of undetermined size and cost. This proposal for a grand ballroom serves no true purpose beyond limited and infrequent use that would never justify the costs and expense. The White House is and has always been the People's House. The now destroyed East Wing was how we came to visit and love this cherished landmark that has been such a part of our history. I request that the East Wing be rebuilt to its former glory, use and design. Any modernizations of the original structure could be done at that time as it is rebuilt back to its former beauty using all the original furnishings.
I thank you for the opportunity.

I beg of you - PLEASE DO NOT APPROVE the current plan for the ballroom. The scale and design are totally inappropriate.

This project should NOT be designed and approved based on the whims of one man. It should go through the appropriate vetting process and include a range of architectural experts. It will be a sad day for Washingtonians and Americans if this project is bullied through and approved because the responsible committees don't have the courage to stand up to Donald Trump.

I flatly oppose the reckless expenditure of $300 million on a project that was launched without proper authorization, required permits, or any legal design review. This is not a modernization effort - it is the deliberate dismantling of an important piece of American heritage.

This undertaking represents a profound disregard for both our history and the rule of law, and it must be halted immediately. The project should be terminated in its entirety, and the East Wing must be faithfully rebuilt and restored to its original design.
No individual, agency, or administration stands above the law. Allowing this unlawful project to proceed without accountability undermines public trust and insults every American citizen. This illegal his destructive course must be reversed without delay.

This whole project is obscene. Protocol for historical building preservation was not followed. Laws were broken. The east wing was demolished without the proper permits. This is not the United States of Trump. He clearly wants everything he can think of to be a homage to him - airports, bridges, statues, the White House. Everything about this is gross. Please stop the prostitution of our White House and our country. The wealthy people who are supposedly paying for this ballroom are clearly buying political favors.

I oppose spending 300 million dollars on this East Wing project.
This work appears to have moved forward without proper authorization, permits, or a meaningful design review. That is not acceptable for any public project, and it is especially unacceptable at a site that carries this level of national significance.
Calling this modernization does not match what has happened. What I see is a loss of history and character that cannot simply be rebuilt later and called “the same.”
I am asking that this project be canceled. I also want the East Wing rebuilt and restored to its former design, as faithfully as possible.
No one is above the law. Allowing this to continue, without accountability for those who ignored the required process, would be an insult to every law abiding American who is expected to follow the rules.

I oppose this project and would like the east wing restored to its original state. The $300 million spent is a waste of my tax dollars. Demolition was done illegally, destroying a piece of our history. The idea that wealthy donors “promised” to fund this project is abhorrent to me. The promises were only made to curry favor with the government. Also, that only one American has been able to demolish the east wing without a future plan is ridiculous. The size he purports alone will detract from the White House’s former beauty. We are not assured anywhere that this project will see a completion date. Based on past promises, I sincerely doubt it.

This project was begun without proper permitting or review and should be required to under go both BEFORE consummation. Rather than being a "modernization" it feels like an erasure of American history. The taxpayers had no say through representation or otherwise regarding this project, only the billionaires who supposedly funded this project. I am totally against the modernization of the east wing of the White House. This never should've been started without proper authorization. As far as I'm concerned, it never should've been started at all. The American people are going through way too much financial difficulty at this time, and I'm pretty sure billion dollar donors are not going to cover the cost. I would like to have the White House restored to its previous glory but not during this presidency. I'm appalled that this was allowed to happen and want the remainder of this term living in the eyesoar that was created. And I would like all involved in the tearing down of the left wing of the White House to be criminally prosecuted, but that might be the job for another department.

I oppose the proposed $300 million expenditure on this project, which appears to have advanced without appropriate authorization, permitting, or comprehensive design review. In my view, this effort represents not a modernization but a significant alteration of a historically meaningful structure. I respectfully request that the project be halted and that the East Wing instead be preserved and restored in a manner consistent with its original design and historical character. It is important that all development activities adhere to established legal and regulatory requirements, and allowing this project to proceed without accountability for any procedural deficiencies would undermine public confidence in those standards.

Restore the East Wing, please. The Rose Garden has been razed and is now a cement patio. I don't recall discussion before that destruction. Then the East Wing was demolished, without approval by the National Historical Trust, for a ballroom that would get very little use at a cost of $300 million. If the White House needs upgrading to keep with current codes, it can be done without forsaking the simple beauty of the people's house.

Thanks to the National Trust, we have until March 4 to submit comments about the ballroom to the National Capital Planning Commission. You can make a comment through the link below (click on Submit Comment). PLEASE NOTE, the project is called East Wing Modernization on the pull down menu.

This is an unnecessary project. It’s a Trump vanity project. The White House has always been a symbol of our great nation. Now it is reduced to rubble with sketchy details of an abominable rebuild. Going forward we don’t need a permanent reminder of this disastrous period in our nation’s history. The east wing needs to be restored to its original structure.

I am opposed to the construction of the oversized ballroom for many reasons. It was decided without proper permits or authorization from the National Park Service. The entire East Wing as we knew it was demolished without the appropriate approvals. The ballroom is too large and not in keeping with the beautiful White House architecture. A ballroom designed for 600 people, properly designed and not overshadowing the mansion is more in keeping with the rest of the property. The ceiling does not need to be so high. The ballroom does not need to be so outrageously large. Does the new construction replace the rooms that were destroyed when the East Wing was razed ?

The ballroom is a travesty. Our current president does not realize he is a temporary resident, living in MY house. History and good taste are not his strong points, and with his ego in charge, who really knows what grandiose ideas he has. There are many venues in D.C. for ballrooms. Security has to be a factor in having one at the White House. And how much of the grounds of the MY house will be destroyed for his “vision”? We already have a good idea of the answer.

The rebuilding of the East Wing of OUR White House must be subject to public input and professional review. A project of this historical importance should never be designed and executed according to the desires of one individual, or a small group. The laws that govern the replacement of historic monuments in our country must be respected and enforced. It should be titled East Wing Destruction. The East Wing should never have been razed so haphazardly and quickly but that’s trump’s MO. We do not need a 90,000 square foot ballroom that will dwarf the White House. The East Wing must be rebuilt but to the previous size and scale as was torn down. As the commission and public know, the destruction of the East Wing completely ignored the law and federal regulations. It is an abomination, but that is done. For the future, I urge the commission to consider the existing architecture of the White House in any decisions made to reconstruct the East Wing. It must be in keeping with that design, to present to the Nation and the world a unified (to the greatest degree possible) vision of the People's House. One person's preferences regardless of who they are must not be allowed to dominate both the appearance and function of any new structure that will stand for decades, hopefully centuries to come.

I not only oppose but am EXTREMELY AGAINST the spending of the ghastly amount of $300 million or more on this project, which was initiated ILLEGALLY without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. Because of this a piece of beautiful American history over 100 years old has been erased and demolished and bulldozed as if it was garbage. This project should be immediately canceled, and the East Wing rebuilt and restored to its former design, not the gaudy fake trump design, but the elegant, tasteful design before him. And trump should pay out of his own pocket. He and his family have already fleeced taxpayers out of billions, and benefitted billions more in corrupt schemes since taking office. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all those who abide by the law. This is the people's house. Not trump's house, and he had NO RIGHTS WHATSOEVER to damage and destroy it in the way that he has done!!

I oppose the spending of $300 million on this project. As a taxpaying American citizen, I am first of all appalled that the project was initiated in secrecy, with the demolition of the East Wing covered from public view and done without required prior approval. Such illegal action should not be rewarded.

Second, the proposed ballroom is outsized, dwarfing the White Houst itself. The White House is meant to conduct government business and house the first family. Entertaining guests is a minor need, and entertaining huge numbers of guests is ridiculous. If anything is built to replace the unfortunate loss of the former East Wing, it should be functional - working office space - and in proportion to the existing part of the White House.

I recommend common sense and adherence to the law to guide the repair of our country's most important structure.

I oppose spending public funds on this project which was put forward without the proper oversight or review. It has already been an abominable defacement of one of our national icons and the string of events leading to its present state has been a source of both national division and international shame. It is unfathomable that this was initiated in the first place. The only reasonable use of public funds in this case is to use them to restore the building to its previous condition and appearance.

Destroying the East Wing of the White House to build a "ballroom" was a travesty. It was done without approval, planning, consideration, or purpose. This destroyed an American Icon, known throughout the world as a source of democracy. No where in the US could someone begin a project of this magnitude without consultation, permitting, approval from zoning, historical foundations, and time for public sentiments. For it to be destroyed in days without any notice or legal process further demonstrates the destructiveness, lack of respect, and failure to consider anyone else exhibited throughout trump's presidency.
This must be rectified in the most historically accurate and appropriate means possible without trump's involvement or the blood money supposedly donated by corporations.
This was a criminal act committed by trump and should be punished as so.

I am very concerned with the planned East Wing Modernization. First the east wing was illegally torn down prior to any review by the National Capital Planning Commission (NCPC) or the public. The destruction of an historic building in our nation's Capital is unforgivable and a great loss for our country. Second, the proposed structure is vastly larger than the former east wing, dwarfing the historic White House and West Wing. This ostentatious structure sends the wrong signal to our citizens and the world that the USA is now a monarchy rather than a democracy, a country run by the rich few and not the people. The White House is the "People's House" and it's appearance should represent that. I was honored to be in attendance when my aunt received the Presidential Medal of Freedom from President Bush in 2003. I know that she would be rolling over in her grave seeing this totally inappropriate structure being proposed for the White House. Please reject this proposal and find a way to rebuild the destroyed East Wing.
Respectfully,
David McWilliams

I was horrified by the destruction of the beautiful, historic East Wing. This was done without permission or public input. This belongs to we, the people, not any temporary resident. Most presidents have shown respect for the White House and have understood that they are living in a house that doesn't belong to them. This administration has no respect for history and has desicrated the memory of all the first ladies who worked and held events in the East Wing. They, and everyone involved in this tragedy must be held accountable (including the demolition company). The cost of rebuilding must be

paid with their funds, not our tax money. The new East wing should be in keeping with the scale and architecture of the White House.

I was appalled at President Trump’s decision to demolish the East Wing of the White House. As a historic building belonging to the People, the White House should have been protected from the thoughtless destruction by this man, who has a long history of abuse of privilege. He should be punished to the full extent of the law, and required to use his “immense wealth” to finance the full restoration of this building. Under no circumstances should he be allowed to move forward with construction of his gaudy and unnecessary ballroom.

I am absolutely disgusted by the East Wing Modernization Project. I am appalled that The People’s House was destroyed in such a manner, without going through the proper channels. I don’t know why action wasn’t taken to prevent this. The White House, which has so much significance in American history, has been decimated. The East Wing should be restored at the president’s expense and measures should be taken to ensure something like this never happens again.

I write today as an American citizen who has always revered the White House and what it represents. I was heartbroken when the East Wing and rose garden were demolished. Upon finding out that the proper protocol was not followed to make changes to the People’s House, I was outraged; although, I admit, not surprised. The American people have no need for a ballroom in the White House, particularly when it’s slated to be larger than the House itself. The disregard for the House, proper protocols, and the American people by this administration should not be disregarded, and the East Wing and rose garden should be rebuilt to their former glory and no further changes should be allowed by this administration.

Thank you,

I am an architect who worked in DC for several years. In my opinion it’s the most attractive cities in the US, from L’Enfant’s original layout, to the well sited monuments and museums and the natural beauty of Rock Creek Park. Much of its attractiveness is due to restraint, such as the city’s building height restrictions. The Proposed East Wing Modernization Project is totally out of proportion to the existing historic structure. Proceeding with this scheme will turn the White House into the laughing stock of historic buildings.

To Whom it May Concern:
Please do not allow the president to trample on the majesty of our federal buildings, including the East Wing. Despite his claims, he is NOT an architect, and clearly shows no regard for tradition or grace in architecture. If you allow his "ballroom" design to go forward, not only will you get a monstrosity that dwarfs the White House, but you also know he will attempt to put his name in giant letters on the outside. The president is already an unstable character who is only interested in whatever benefits himself. He betrays American values at every turn. Do you really want the "people's house" to turn into the "twice impeached felon's house"? I realize the effort to prevent this architectural catastrophe may be futile, as it is reported that the president has stacked the relevant boards with his sycophants. But understand if they allow this travesty to go forward, they should be prepared to be outed and roundly ridiculed for their blind servitude to the worst president in American history.

The demolition of the East Wing, wrongly labeled 'modernization' in the title of the project, was carried out without the correct oversight required for historical buildings. As this is not a private residence and does not belong to the Trumps, the aim of this project is not being conducted for the people or with their input. A significant amount of damage has already occurred to the building and it is not permissible that building proceeds without the required committees being allowed their due oversight. As an American citizen this damage has been done to a nationally recognized building that stands in as a symbol of the American presidency, and I feel greatly grieved and frustrated that it has been done without any consultation of those meant to prevent reckless whims and fancies from transforming the landscape of our historical capital. Please stop this project until it can be properly reviewed by those third party individuals and please allow them to carry out the tasks they have been assigned to conduct in ensuring American history is not needlessly destroyed.

The White House belongs to the people, not to the President. Therefore, any decisions to modify any part of it should be made by us citizens - and made with consideration to historical significance. Donald Trump tore down the East Wing without any authority to do so, and he should be stopped from building a ballroom or anything else on White House grounds. Period!

Name: Allyson Bailey

The destruction of the White House East Wing was an act of destructive vandalism, undertaken without the appropriate and required review, consultation, authorization or permits. I am given to understand (though I do not assert this from any expert knowledge of my own) that the demolition was in fact illegal. In addition, I am not aware of any accounting for the contents of the area that was destroyed.

There is absolutely no need for the government to create a new ballroom for official functions, nor am I convinced that all the plans for the rebuild have been made clearly available to the public, so we are unaware of what else is due to be constructed.

The White House East Wing should be rebuilt, decorated and furnished exactly as it was before, where possible with original furnishings and fittings. Where originals are unavailable, their fate must be fully and transparently documented, and they must be replaced to an equivalent standard. The rebuilding and refurnishing must be carried out entirely at the expense of those that sanctioned the original clearance and destruction. American taxpayers must not have to pay to put right something that was never authorized to take place. The rebuild must take place under clear impartial scrutiny to ensure that everything is restored to its original standard, the workmanship is of the highest quality and everything that

belongs to the White House has been returned to it.

If it is determined that any part of the project was unlawful, those responsible must be brought to an appropriate court of law to determine where culpability lies and ensure that it is punished as required by law.

Thank you for the opportunity to comment on this project.

I'm retired now, but have worked in Community Development and my office often interacted in work with Historic Preservation specialists and community groups.

I was horrified when the East Wing was demolished without oversight by relevant agencies. I was equally horrified by the sketches of the proposed ballroom. The scale of the proposed building would visually compete with the White House. The proposal looked to me like it violated any guidelines and standards for additions to historic buildings.

Since the East Wing no longer exists, it seems to me that there should be a Commission established to solicit input from historians and preservation experts to determine how to proceed with redeveloping the area. I think the primary questions to answer are: "What is the best use of this area?" and "What should be the footprint and height of any new construction?"

I suspect the best use of the area is what it was before, and that the footprint and height should be the same. And I believe Hillary Clinton, Laura Bush, Michelle Obama and Jill Biden would have wonderful suggestions!

Sincerely,

Kathryn Morse

The Trump administration forced this project upon the NCPC by razing the East Wing of the White House. It clearly expects the Commission to decide that it is too late to oppose the planned project to replace the previous structure with a “grand ballroom.” Approving the project in any form or size is a capitulation to this administration’s modus operandi of doing as it wishes, regardless of laws, regulations, or public opinion.

Washington. D.C., has already seen the results of this single president’s intention to make over the nation’s capital *irreversibly* in his own image. The time to stop this Trumpification of the city is now. The NCPC has the duty to do so and the rationale to do so in this case, by enforcing existing regulations and heeding the objections of experts in architecture and urban design.

Here are my comments on the proposed ballroom.
1) It is much too large in all its aspects: footprint, height, cost. The scale of this will dwarf the White House and the West Wing. Is a room really needed to accommodate 1000 people? How often does this actually occur? Will it be used for smaller events?
2) Will this building cast shadows on the White House and keep it in the shade?
3) The views out of the White House will be dominated by this building.
4) The interior is too gaudy and makes one think you are in a palace instead of a federal government building. Way too much gold trim and decoration.
5) What will be the future cost of maintaining this building (heat, security, water, staffing, etc.) if it's built?. This will be at the taxpayer expense. If the building is actually not used that often, this expense will be for a huge, empty space.
6) What will the noise level be like on the inside for an event (full capacity or partial capacity)? A large space like this can have terrible acoustics and lots of echoing if there is nothing to help dampen the sound.

The East Wing should not have been demolished until this project was reviewed and commented on. How can this project be called "East Wing Modernization" when the East Wing has already been demolished? How can you modernize something that has been demolished?

I think the money pledged for this ballroom would be put to a much better use by rebuilding the East Wing. This ballroom plan should be scrapped.

The destruction of the east wing was not done with proper reviews and has been environmentally harmful. Please deny permission for this monstrous ballroom project to go forward in its current form. I do not know a single person who is in favor of this design, which is totally out of scale and ruins the beautiful balanced proportions of the White House. Average citizens do not see the point or need of a giant ballroom at the White House; we didn't elect Cinderella to lead our nation. Tearing down the East Wing with no proper oversight was an affront to all of us. Please do not add further insult by allowing this monument to one man's ego to desecrate the people's house. Since the original East Wing is gone, something must be built, but it should be drastically scaled down to ensure harmony with the existing historic structure. I beseech you to heed the people of our country who are frankly appalled by the changes already made to our beloved White House (the Rose Garden has been destroyed for starters), and cannot stand to see the House dwarfed by this unnecessary and overwhelming addition.

I oppose the $300 million on this project, which was initiated without proper authorization, permits, or design review. It is not a modernization project but rather a complete taxing of American history. I want this project cancelled and the East Wing restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law abiding Americans.

I'm beginning my comment with the words of another American who put it very succinctly:

"I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. I would like to add that this is especially egregious during a time when so many Americans are struggling to find meaningful work, pay bills, and even feed their families. This kind of ostentatious spending is a vicious insult to the average American.

The East Wing Modernization/ Ballroom project should not proceed for several reasons, the greatest being the plans don't coincide with the style and size of the White House. It would be lopsided rather than stately. Also, there are rules that were ignored and no one gets to do that here. The style is gaudy not traditional federalist/ colonial.
Trump needs to pay to replace the East Wing as it was . We can't afford to do it. We busy paying his tariffs. He has stolen enough money to pay for it. The DC area is historical and can't changed.

This action to remove the east wing of the White House was undertaken without proper notice and authorization. I oppose construction of a ballroom to serve certain people, and demand that this project be canceled The east wing should be restored and open to the public as it has been in the past.

I strongly opposed the demolition of the White House East Wing and the proposal to replace it with an oversized ballroom wholly incompatible with the character, scale, and meaning of the People's House.

In a single day, a contributing component of a National Historic Landmark was removed while bypassing the level of transparency, documentation, and public engagement required for any other nationally significant property in the United States. The absence of a complete public review undermines both the legitimacy of the action and the stewardship standards the federal government expects of every other property owner in the country.

Regardless of one's politics, the stewardship of nationally significant places must be guided by continuity, the rule of law, and respect for institutional memory—not personal vision. Alterations of this magnitude must meet the highest preservation standards and remain subordinate to the historic architecture they affect. A ballroom of monumental scale risks overwhelming the White House rather than complementing it.

Because the demolition has already occurred, I request that the Commission require the following:

1) Full disclosure of what architectural elements, materials, and artifacts from the East Wing were salvaged.

2) Documentation of where those materials are currently stored and how they will be preserved.

3) A binding commitment that any new construction will interpret and honor the historic role of the East Wing, particularly the contributions of First Ladies and their staff.

4) Design review ensuring the replacement structure remains architecturally subordinate to the White House in massing, scale, and character.

The White House does not belong to a single administration. It is a shared national inheritance, and each generation is obligated to pass it forward with its meaning intact. I urge the Commission to exercise to the best of its ability and its authority to ensure that whatever replaces the East Wing respects the history that stood there and the public that owns it.

I am deeply disturbed by the overwhelming size of the proposed ballroom and East wing addition. The White House is a National Monument and symbolically important. Adding this extensive ballroom which is far larger than the White House itself is very inappropriate. It fundamentally changes the footprint and the historical aesthetic of the White House. I strongly oppose this addition. If the addition of a ballroom is necessary, it should be one story high and not near the height of the White House, and it should be significantly smaller in size and scope. It was wrong for demolition of the East Wing to take place without public comment and without plans having been approved in advance. This can only be corrected now by significantly adjusting the plans for the ballroom so that the addition is appropriate in size and scope for this historic landmark. The White House is owned by the people of the United States, and any significant changes such as this should be thoroughly reviewed and discussed.

Sincerely,

Elizabeth M. Byam

This project is not only proceeding illegally it is an architectural monstrosity. The administration should not only be forced to follow all legal procedures they should also be required to present a rational reason backed by facts as to why we need a larger East Wing. Furthermore, I feel an injunction should be sought to stop all work until the proper legal procedures have been completed. Personally, I would like to see what has been done so far to be removed and the administration forced to rebuild the original. That will probably cost less than the new facility and if the President is forced to use the so-called private funds he says will finance the new facility, then it won't cost the taxpayers anything.

As President & CEO of Historic Charleston Foundation, a preservation advocacy non-profit in Charleston, SC, I would like to express our deep concern around this demolition and new construction project on the White House grounds. As one of the most historic sites in the entire country, the White House should serve as a model for best practices in historic preservation policy. The complete disregard of the Secretary of the Interior's Standards sets a horrible precedent for the whole Capitol area and for the nation. Please ensure that adequate review and attention is paid to how this new ballroom wing will impact the symmetry of the site's design and its proposed scale would overwhelm the main residence.

The White House is a National Historic Landmark and National Park, owned by the American people and stewarded by the National Park Service. It has been home to our presidents since 1800 and is perhaps the most significant historic site in the United States. Before nationally significant places are permanently altered, the public deserves an opportunity to be heard and to help shape decisions that affect our shared national heritage.

Major construction projects in Washington, D.C. must be reviewed by the NCPC and the CFA, comply with the National Environmental Policy Act (NEPA), and receive congressional approval. These safeguards exist to ensure transparency, accountability, and meaningful public input.

I have seen a rendering of the White House Ballroom Proposal. It is too large to be near or attached to the White House. Additionally, it should be externally and internally in the tasteful restrained style of the White House. If one is needed of that size, it should be placed elsewhere in Washington, DC. Any east wing addition needs to be designed so that the White House complex's architectural integrity is preserved.

This project should not proceed. The ballroom sounds hideous. Accountability for this disaster should be swift and transparent so the American people know how this is resolved.

I am a retired nurse in my seventies. As long as I can remember, the White House has represented the center of our

country, home to our president and his family. Nothing is was more exciting than visiting the White House, seeing the East Wing decorated at Christmas. The East Wing was more accessible to the people. The East Colonnade linking the East wing to the White House. Full of history. Our country has held many great gatherings without a monstrous ballroom, large enough to over shadow our White House. The demolition of the East Wing never should have been allowed, stopped as soon as it was begun. This is the people's house. This isn't a castle in Versailles. Our history is a long one. The White House web site expresses the current president's desire to build a Mar a Lago image in its place. This doesn't represent the American people. Let it be built keeping our country's history in mind. Personally I don't feel the need but the East wing doesn't exist any longer. My preference is it remain smaller to maintain the balance of the WH complex. Simple. Please protect our history. Thank you.

I am absolutely shocked and appalled that the current President could be permitted to destroy historic White House property (the East Wing) to build a new extravagent ballroom without any Federal or local groups taking action to stop the demolition. The White House is the "people's house" and it is a historic structure - most likely on the register of National Historic places. There are myriad Federal regulations that prohibit destruction or renovation or changing of historic buildings. I truly cannot understand how Trump's actions to demolish the East Wing were not stopped, delayed, prevented, and that he was able to take this action without any groups, the Court System, The National Trust for Historic Preservation taking action to prevent demolition.
This is another example of Trump and his administration completely ignoring laws that other governments, developers, local agencies, non-profits, private citizens and localities are required to follow when desiring to modify or change a historic property.
The Trump administration's actions related to destruction of part of the "people's house" are illegal and appalling, and have destroyed American History. Sadly it's too late undo the damage that has been done.
Perhaps the best that can be expected at this point is that the Trump administration be stopped from demolishing and destroying other parts of the White House and other historic Federally-owned properties.
Stop the madness!

The White House is an iconic building which is familiar to people all over the world. Even though it has been modified many times, the basic design and proportions have remained recognizable. Based on drawings that have been made public, the proposed ballroom appears to be grossly out of scale with the White House, and other public buildings in the area. I question whether a ballroom of this size is really necessary, but if it is needed, it should be less obtrusive and farther away from the actual White House.

What has happened to the East Wing is less a Modernization Project than the complete destruction of part of the Historic White House. It is more than regrettable that the destruction was done without consideration for historical preservation of a public building.

The proposed ballroom addition appears to be hugely out of proportion to the rest of the White House, and its proposed use as a White House/Presidential socializing and entertaining space precludes access by regular citizens.

Any renovations should be thoroughly vetted by those responsible for historic preservation of public buildings and property and should reflect this nation's history as a Democracy.

To Whom It May Concern,

I am writing to share my thoughts regarding any proposed expansion of the East Wing of the White House.

As one of the most recognized and historically significant buildings in the nation, the White House serves not only as the seat of executive leadership but also as a carefully stewarded architectural legacy. Any new addition should honor that legacy in both design and spirit. I encourage planners and decision makers to ensure that an East Wing expansion is compatible in scale, materials, and proportion with the existing structure, while remaining clearly identifiable as a contemporary addition. The new construction should be subordinate to the original historic building in both size and presence. If additional space is required, as much of it as possible should be located below grade so that the historic structure remains visually dominant.

New construction should also preserve historic sightlines and landscape features that contribute to the integrity of the grounds. The White House is more than a building; it is a symbol shaped by its architectural and landscape context. Thoughtful design, reversibility where feasible, and adherence to established preservation standards will help ensure that improvements enhance functionality without diminishing historic character.

Finally, I urge that any addition be designed to achieve LEED certification. Doing so would demonstrate a commitment to sustainability and responsible stewardship, setting a powerful example of careful, forward-looking design for the United States and the broader global community.

Thank you for considering public input on this important matter and for your continued stewardship of this national landmark.

Sincerely,
Margaret Dunn

It has become clear to many Americans that the present administration, without authorizations, rips down everything they want to rebuild in their gaudy and self serving way.
The East wing of the White House once stood proudly and is now a pile of rubble.
The President took action on his own desire to remove and install as he felt, a much needed ballroom.
His action were never approved, no permits were acquired to demolish the wing and now it sits as one more eye sore of the Trump administration.
As an American citizen and patriot I feel it is imperative to remove and rebuild the east wing into some resemblance of the original structure
The gaudy idea of his ballroom should not be granted.
The destruction of the rose garden and paving into a seated parking lot like area is disgraceful.
There are no checks on what goes on within the White House
This administration should not be able to just rip apart, remove and destroy as they like, rename and replace at whim.
These are American institutions owned by all Americans.
This isn’t the playground of one President to do as he pleases without the consult of the American people.
It is imperative that immediate actions be taken to control the abuse happening within our institutions at the cost of all Americans.

I hope that the committee would take into effect the many times that people have come to the White House to visit the magistry of the history of the White House. For that this one man who can only be there for 4 years can destroy a part of American history. Not to mention the removal of the plaques of the slaves in Philadelphia. This project should not continue and I oppose spending $300 million on this because:
1/ It was begun with proper authorization
2/ It was done with permits

3/ It was done without design review
4/ It was done without input from The People - and do not forget, the White House and its wings belong to The People of the Uniited States.
The demolition of this project is just one more erasure of our real history by the current Administration and it violates one of the principles of our country, namely, that no one, repeat no one! is above the law.

The East Wing should be restored to its former design.

Thank you.

Now that it is too late to stop it- it should be toned down. The White House was meant as the "peoples house" so less gold and more muted would be appropriate. It would be wonderful if there could be something representing each state. It may turn out to be acceptable to have a large venue for some public events, but the way it was done was wrong.

This is not a "project", but a desecration. The destruction was done without proper review and is contrary to the vision of the "people's house". I submit that the east wing should be restored to its' previous state and that the people who supposedly agreed to fund this new monstrous ballroom be billed for the expense.

That this president tore down the East Wing without going through the proper channels is outright wrong. That he says he's going to build a ballroom that truly, only his fragile ego "needs", is fiscally irresponsible, as well as a blight on the White House grounds.
This project went from "we won't touch the East Wing" to tearing it down. It went from seating 650 and $200 million to seating 1,000 and $400 million. Building a room this large, one has to wonder if he thinks he can hold political rallies and fundraisers in it, which, of course, is yet another illegal thing he wants to do. It's bad enough he paved over the Rose Garden and turned it into a patio.
It's also fiscally irresponsible when you consider the long-term costs of such a monstrosity.
Using tents for the State dinners has worked well. For something that happens, on average, once a year, building a huge ballroom that will have to be maintained, not to mention the air conditioning and heating bills, is a waste of taxpayer money, Reagan hosted an average of ~7 each of his 8 years, but that was an exceptional outlier.
The current president says that "everyone" has wanted a big ballroom for years and years, and that's simply another lie. He wants yet another garish place he can plaster his name on. The majority of people in this county did NOT vote for him, he has no great mandate for anything.

The lack of respect for the historical nature of the White House complex is indicative of this president's lack of respect for anything other than what he wants. He didn't bother with the proper authorization, permits, or even an actual design (since it keeps growing) before having the East Wing illegally torn down.
Given the total lack of taste of this man, I can only imagine how tacky this ballroom would be. I hope that the Commission will rule that the East Wing is to be built back as it was, with the exterior looking as close to the original as possible. I also suggest that the president should be responsible for raising the money, or paying for it himself, since he destroyed it.
SOMEONE has to rein this man in. HE MUST follow the rule of law, and procedure. Stand up to the bully, stand up FOR the American people.

I oppose the destruction of the East Wing and the replacement that will be larger than the White House. I'm deeply disturbed that it was demolished without any regard for history. I would like to see it restored to the way it was prior to demolition since we don't have a Time Machine and cannot rewind time to prevent the demolition in the first place. This is The People's House! The President is only there temporarily, so what is done to it under their regime should have to be approved by The People! Also, stop allowing the naming of Federal buildings and spaces after a sitting president. That's disgusting!

Please do everything possible within your powers and control to STOP this so-called '...Modernization Project', which is actually another desecration project by our Narcissist-In-Chief. There is no longer an East Wing because he destroyed it. And my question is: How was that allowed to happen?

The White House belongs to every American, not to the temporary, current tenant. Moreover, it can be argued that the White House and its history belong to each of our citizens and people of the world as a symbol of democracy and our previous commitments to fostering peace in the world. The current tenant has neither a respect for our democracy nor a commitment to truly fostering peace in the world -- as we've witnessed a constant and consistent series of his attacks on both.

This huge monument to one man's ego is neither appropriate in size, nor called for -- especially at a time of financial hardship for so many Americans. Nor will this 'ballroom' likely be stately, beautiful or of public benefit. The Narcissist-In-Chief likes to stick real or fake gold everywhere he can. Like a gone-full-crazy King Midas: Consider his bathroom throne.

East Wing Modernization

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. I am appalled by this administration’s disregard for the history of the White House, which belongs to the American people. And for their hubris in making changes without going through the required channels. I am opposed to the building of a ballroom which is a vanity project for this president. I support replacing the east wing and penalizing those who destroyed the original structure.

Name: Blair Moses

I was appalled, hurt, and angry when the person in the White House decided without permission from the proper authority or discussion to tear down the East Wing of the White House. The White House is the American people's house, contrary to that person's claims, and has stood as a symbol of our country, our democratic form of government, and our freedom. Ripping the East Wing down felt like the ripping down of who we are as a country.

Because of this, I strongly oppose the use of the hundreds of millions of dollars the person in the White House received being used to build a disgusting, ugly, and unnecessary ballroom, which was initiated without the proper authorization, permits, or design review. It is NOT a modernization project. It is a complete razing of American history and MUST NOT go forward! I want this project canceled immediately and the East Wing rebuilt and restored to its former design.

No one is above the law. To permit this project to go ahead without penalizing all those who broke the law would be an affront to all law-abiding Americans.

I strongly oppose the spending of $300 million on this vanity project, which was initiated without proper authorization, permits, or design review. It is not a modernization project but rather a razing of American history.

I want this project canceled. Full stop.

It's bad enough that the Rose Garden was razed to make way for a tacky concrete patio. It's bad enough that they've put large gold-plated words all over the building. But those are easily reversed.

This is the People's House, not a monument to one man's fragile ego.

Beyond that, it will be a gross monstrosity throwing the visual symmetry of the White House into a permanent imbalance. On aesthetics alone, this would be a travesty.

To permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans and the systems we have put in place to ensure that decisions are not taken to serve one overinflated ego bent on revenge, retribution, and gilt framing.

The proposed White House ballroom project is a travesty both of process and of "product" -- that being the design of the ballroom itself--that absolutely should not be funded in its present form. In terms of process, the demolition of the existing east wing was undertaken without appropriate, and legally mandated, approvals and without prior submission to the National Capital Planning Commission. In short, it's a crime. The razing of the present east wing was an act of political hubris and arrogance undertaken with the evident opinion that "It's easier to get foregiveness than it is permission." The National Capital Planning Commission should not give that permission after the fact, should not validate Trump's unilateral monument to megalomania and self-promotion.

The project design itself is an aesthetic travesty that defiles a National HIstoric Landmark and also defiles the White House as a symbol of American democracy. It is evident that the grandios design is ridiculously disproportionate -- a 90,000 suare foot box nearly twice the footprint of the building to which it is to be adjunct. It is not an addition; it is a usurpation of the legitimate purpose and presentation of the White House.

In short, the proposed ballroom is illegal and it is ugly. The National Capital Planning Commission should exercise its mandate and authority in conducting this project review and decline to ratify the existing obliteration of part of a national landmark as a fait accompli. Any construction eventually approved must be genuinely compatible with the rest of the White House in both form and function. Having been denied the justified privilege of review and comment before demolition commenced, the American people are owed an active and objective review -- a review that includes denying approval to this grotesque project in its present form.

I am appalled by the lack of respect that this administration has for process and procedure, along with an overwhelming attitude that the constitution does not apply to them. The demolition of the East Wing brought me to tears, as years of history and decorum were stripped away for some grand ballroom that, to my knowledge, had no plans submitted nor approved. Any upgrade to the White House needs to be done with care and consideration. This historical structure needs to be treated with respect and not turned into a spectacle at the whim of an unhinged person with too many nefarious agendas.

There is absolutely no need for a ballroom attached to the White House. Aesthetically, it will be a lopsided nightmare. Functionally, it's simply a massive waste of money, no matter where that funding comes from, and that's not even taking into account the potential "pay to play" aspect of donations. I would like to voice my strong concern for the recent demolition of the East Wing of the White House. Obviously it is a historic building that has been home to Presidents since the 1800. The fact that it was demolished before anyone could decide if it should be (besides President Trump) is an outrage and it needs immediate attention!

I have never had the opportunity to visit the East Wing of the White House. Now I and my children, and many more, never will. This kind of reckless erasure of the past and the beauty of our architecture has got to stop.

I would like to make it known that the current plans for the building of the "ballroom" take away from the grandeur of the White House and should not be done in the proposed plans.

The White House is an iconic statement of America and this new addition, which now has to be built due to the destruction of the East Wing, needs to respect the White House itself and the power, prestige and design it was meant to project. Previous additions and changes to the White House and the grounds have always tried to limit taking away from the main building, and still meet the needs of the White House. Your decision will have a large impact, now and for the future.

Please, I implore you, to make the best choice to replace the East Wing with an addition that makes sense for the site and keeps the focus on the American People's home for the President.

Thank You for your time with this matter.

The white house is a symbol of the people of the united states. It is also iconic. We cannot undo the destruction but we can be more thoughtful about how to fix it. It does not need this ballroom, it does not need this proposed huge monstrosity that will dwarf the rest of the building. The balance of the previous wings were beautiful. Razing the East Wing was an act of cultural and historical sabotage that was brazen, criminal, and environmentally irresponsible, to say the least. The White House belongs to the People, and no president or any member of the government has the right to alter it without our consent. The new East Wing Ballroom should not be of a style that differs from the historic building, nor of a height or bulk that overwhelms the historic White House. Design considerations for both the interior and exterior of the addition should be made by professional architects and historians that recognize the importance of the many decisions made during a project of such magnitude. No person or benefactor should be allowed to put their name on the building or any of the associated buildings.

The proposed East Wing modernization project should be halted immediately. Instead of altering or replacing the historic structure, the East Wing ought to be rebuilt and restored to its original design. Preserving the integrity of this national landmark is essential, and allowing the project to proceed without addressing any alleged legal violations would undermine public trust. I strongly oppose the destruction of the East Wing of the historically significant White House. This building stands as a key monument and symbol of the United States. The building belongs to the American people and its unilateral and impermissible destruction of its unique and historically pivotal character is shameful and wasteful. No one wants or needs a 90,0000 square foot “ ballroom.”

It is indeed ironic that it is the same administration that insists that we must keep confederate monuments to slave owners and people who fought against our country in place due to their historical significance would destroy the entire East Wing of the White House to build this monstrosity, The unprecedented and impermissible destruction of this central symbol of the American government was wildly disrespectful to the American people and to our country.

The administration should be required to restore the East Wing of the White House to its prior configuration and character.

Objections I have of this project:
1) This East Wing replacement is NOT in proportion to the White House. It is unseemly to dwarf the most iconic People's House with this construction.
2) This addition to the Peoples House is being built with billionaire/corporate money donations and this is NOT in keeping with our US principles of fair, just democratic process.
3) This addition was not conceived by the people, but was forced upon them by an autocratic president without due process or consideration of the ramifications of security, health, tradition or cost.
4) This addition, if constructed as stands, will be a lasting monument of shame to the US public even if it serves the function to which this administration wishes as a gathering place for heads of state, functionaries, and "movers and shakers".

I am fully in opposition to this project, which was begun without following any of the lawful procedures required. It is not “modernization,” but rather desecration of a historic building precious to the American people. It has been undertaken to satisfy the whims of one person, and symbolizes disrespect to millions of others. Please stop it, and rebuild the East Wing as closely to the original as possible.

Dear Commissioners:

As an American citizen, I certainly did not appreciate the comment by Chairperson Cook - "Americans have a short memory"
That was incredibly demeaning and certainly indicates your disregard of the over 2000 comments which were according to your committee, 99% against the approval of this ballroom and current East Wing Modernization Project

I would like to say that much of Mr. Baranes' presentation seemed to be about screening the ballroom structure and how the public wouldn't really see it from the street thanks to the trees. So are we saying we know that this structure will be a

monstrosity and clearly out of proportion to the existing White House structure so let's hide it from view as much as we can? I think you all know it is inappropriately large. You all seemed to chime in that removing a pediment made all the difference and what a bold change that was to the original design, but did none of you ever comment on the outrageous size? I know you were appointed by Trump, but really?

To be clear, I am not against the idea of a ballroom. But this project is clearly an ego driven one on the part of President Trump.
Chairman Cook praised First Lady Kennedy's work to bring the White House back to its beauty and showed photos of work that former Presidents have done that were necessary to the support of the aging structure. Let's be clear, those projects were pre-approved and budgeted by the appropriate committees. While the East Wing was too an aging structure, any work on it should have been approved and demolition should have been the absolute last resort.
Mr. Cook said that Trump is "trying to honor what she (Mrs. Kennedy) did in the past". I would love to know how specifically he is doing that?

I am hoping that Mr. Parisi, in his landscape design, will strive to replace the historic trees that were removed and to use only native North American plantings throughout the grounds. We know that the existing boxwoods and the Ilex trees are not native. Only native plants have the most benefit to native pollinators and wildlife and I would see them used in design going forward to beautify the grounds and hide that new massive 90,000 sf structure.

Oh and by the way, no offense to the architects. I think the ballroom building is beautiful in it's own right and in a different location might be wonderful. But not in this place.

Thank you.

The demolition of the East Wing should never have been undertaken without input from the public. The White House is the "people's house" not Trump's house. The proposed ballroom, whether needed or not, is too massive to sit beside the White House. The East Wing should be reconstructed to look as it did. Modernizations can be done regarding the HVAC, internet ,security needs, and whatever else is required but retain the facade as it was. If a larger entertaining space is required then it should be in scale with the White House. Trump's outlandish tastes should have no bearing. The White House is a historical building and, as such, should be renovated with care.
Thank you.

First off what a joke, they are calling this the East Wing Modernization Project when - without approval - he has already demolished the east wing. I understand he is also already talking about "modernizing" the west wing. I was under the impression that Obama orchestrated a complete update of the mechanicals of the whole White House during his term which tells me that all of the money spent on the East Wing was wasted when Trump just demolished it after repeatedly saying that his ballroom would be adjacent and would not touch the East Wing. We know that we cannot trust anything that Trump says and that includes who will be paying for this project. We have seen him repeatedly extorting money for favors and this project reeks of that and his refusal to be open about who has donated and where that money is currently supports my belief that the whole thing is corruption. Trump has no right to make any permanent changes to the White House without congressional oversight and approval. He bypassed that and destroyed part of the structure. His refusal to accept his role as a tenant and not the owner of the White House speaks volumes and it is time that he be held accountable for his actions. I respectfully ask that he be fined the cost of rebuilding the East Wing and that its restoration begin as soon as possible and that Trump be told in no uncertain terms that he is not building anything on the White House grounds or the National Mall as monuments to himself.

The White House is one of the few iconic symbols of our nation, therefore, alterations or additions should reflect the virtues and values as well as the historic traditions of the United States of America, not just the aspirations and tastes of

our current President. Presumably, the American people will be living with this addition to our White House for generations to come. It should be designed and built by professionals who can approach their task with knowledge, skill and respect for our traditions.

As President of a small 501c3 charged with the preservation of an historic church, I am aware of the value of tradition as well as the need for renovation. I hope that those designing this ballroom will keep both of those values in mind.

Given that the funding mechanism is blatantly illegal and lacks oversight of any kind, and that the project itself was started illegally without permitting and proper authorization, I would ask that the project be denied to continue any further. Not only has a piece of amazing American history been irrevocably damaged by the tearing down of the East Wing, but the proposed ballroom would dwarf the actual White House, making for a blatant statement of grand parties and speeches being far more important than the business of the country. Which is not the image the American government should convey either visually, architecturally, or from a human-scale perspective. We, the people, deserve a voice in how our government is funded, where that money is spent, and how our government comports itself. A grand ballroom is not acceptable. Please end this project promptly and restore the East Wing, to its original form.

I have been a member of your organization for decades. I served for many years on my community's Historic Preservation Commission.

I am still incredulous that the man in the White House actually tore down the East Wing of the White House, without any by your leave or without following the proper channels.

I vociferously oppose the spending of $300 million on the ballroom project, which he initiated without proper authorization, permits of design review. This is not a "modernization" project, but rather an attack on American history.

This project should be outright CANCELED, and the East Wing rebuilt and restored to its former design.

I would like the "people's house" returned to the original state that this new administration found upon taking power. It has functioned perfectly fine all these years and while I do not object to upgrading basic services such as electric, plumbing and communications infrastructure when it is rebuilt I do not want the structure to be turned into a mega mansion and playhouse for the rich. I liked the old structure with it's sense of history and grace. A reminder of a simpler time and respectful of her people and their history. I found peace knowing Jackie's roses still bloomed on the lawn and her sense of style permeated the east wing. A building can still be functional and historic. As far as a ballroom there are plenty of other venues in Washington to provide that space.

First, the fact that the East Wing was summarily demolished is offensive and troubling, at the very least. But now that it has been, the question is what to replace it with. The White House, building and grounds, is the people's property. No President or other person owns it. It is ours as citizens.

To that end, if the East Wing must be replaced, it should not be replaced with something which will overshadow the actual White House. If there is a need for a huge ballroom or meeting place, there is no need or purpose to place it on White House grounds.

If something must be built in the place the East Wing once stood, it should be in keeping with the prior structure, not nearly as high as the present plan suggests, not so huge [or its height so great] that it overwhelms the actual White House itself. There are many buildings and areas of Washington DC which can provide secure and useful 90,000 square-foot ballroom space, the White House grounds is not one of them - nor need it be.

Calling this a "modernization" project is proof of how language can be distorted. It is the destruction of an historic building to fit one man's grandiose vision. The White House does not belong to any single president - they are merely tenants in the nation's home. Changes to the White House should be done with moderation - and only after sufficient discussion by all the appropriate people including historians, architects, city planners, etc. Above all Congress should be involved and should be the entity funding any such program. Allowing political donors to curry favor with the president by destroying our cultural heritage is a disgrace.
Building a ballroom is not something to automatically oppose. It may be necessary, it may even be beautiful but it should not overpower the existing architecture. It should not be built without government oversight. It should not be built to boost the ego of a single person.

I wish to state my objections to the proposed East Wing addition to the White House as currently planned. It overshadows the Executive Mansion proper and has not been approved by the appropriate government agencies, as required by law. Oversight is needed to ensure that the new East Wing is in keeping with the architectural style and scale of the peoples' White House, not to boost the ego of the current President.

This project must be CANCELED and the East Wing restored to its former design and functionality. "Modernization" is the president's code word for his destruction of American history and his illegal solicitation and acceptance of corporate bribes. Like the Rose Garden, the East Wing demolition was done without authorization, permits, or oversight. No one is above the law, and all who broke laws in furtherance of this project must be held accountable and punished.

Any plans or physical work on the historic White House should have gone through the proper official review process BEFORE anything else was done. Tearing down the East Wing without having done so is inexcusable.
The ballroom should not physically nor aesthetically overwhelm the appearance of the White House in any way. The White House is a symbol of our country and should be treated with the respect it deserves.

I believe the White House should be restored to its previous configuration and that Mr. Trump had no legal authorization to demolish the East Wing. The proposed plans bears no relation to the historical design, planning or significance of The People's House. The plans for a bloated, oversized ballroom should be rejected out of hand.

I oppose the spending of $300 million on the East Wing Modernization Project which was undertaken without proper authorization, permits, or design review. The razing of the East Wing was a crime and it should be rebuilt and restored to its former design at the personal expense of Donald J. Trump. The president has no respect for the People's House which should not under any circumstances be subjected to his personal desires at the expense of American citizens.

I was horrified at the news of the demolition of the East Wing of the White House. It was done recklessly, without proper vetting and authorizations and the wanton destruction of this historical building is consistent with the lawless disregard for the concerns of Americans who value the historical nature that this building played in so many important and memorable events.

To assume that once destroyed nothing can be done is to continue this Administration's ploy to act without respect for our history in order to create an ugly vanity project. I want the East Wing to be rebuilt to its historical architecture and design. The teardown was tragic. We as Americans deserve no less than to literally recreate the foundation upon which this great country was built.

Remember the East Wing of the White House? Remember the giant ballroom that the tech billionaires have agreed to fund in its place? The National Trust for Historic Preservation is making a gallant effort to stop this. And we can help.

Thanks to the National Trust, we have until March 4 to submit comments about the ballroom to the National Capital Planning Commission. You can make a comment through the link below (click on Submit Comment). PLEASE NOTE, the project is called East Wing Modernization on the pull down menu.

Anara Guard's comment on this is beautiful. She gave me permission to post it here, if anyone wants to use her language.

The East Wing of the White House was the heart and light of the people's house. It was for visits to see the holiday decorations, it was the offices of the First Lady, and it was the welcoming entrance for those who would like to tour our once great building belonging to all the American people. Buildings, as they age, need updating and renovating. But taking a bulldozer to the East Wing without public comment or Congressional hearings is not the way to conduct the business of the American people. Rebuild the East Wing!

I want the East Wing modernization project halted immediately, and the wing rebuilt as it was historically. Put whatever modern infrastructure you want in it, but bring it back.

Demolition took place without proper process.

There should be accountability for the demolition of the prior east wing building and its historical contents before any new construction begins.

This ballroom project should not be so large as to overshadow the existing White House.

This project should not be paid for by private funds.

This project should be overseen by Congress, and no new building project should be undertaken without following proper process.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history.

The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.

The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

mass destruction before submitting for approval from this body negates any potential benefit to so-called modernization of the east wing, its historic gardens and the surrounding property, including any rumored underground bunker being built on the property of the people's house. at the full expense of the person or estate of the individual who initiated this scheme, the property should be returned to its former state and rebuilt to exact replication immediately and without delay, and any civil or criminal litigation that has merit should be pursued against the initiator with expediency and without hesitation

Please stop the current construction of the ballroom at the White House and ensure that anything built to replace the destroyed East Wing is appropriate to the design and history of the building. The White House is a National Historic Landmark and National Park, owned by the American people and home to our presidents since 1800. Major changes to this historic landmark should only be made in a way that respects history and aesthetics of the building, and not at the whim of a single individual. Federal law requires that major construction projects in Washington, D.C. undergo review by the NCPC and the Commission of Fine Arts, comply with the National Environmental Policy Act, and receive congressional approval. Since the White House is also "the people's house" comments from the public should be given particular weight.

The plans described by the current president would destroy the historic architectural symmetry of the White House, replacing it with a massive structure intended as a monument to a single individual. While expanded event space may be needed, additions must respect the historic scale and design of the White House. At 90,000 square feet, the proposed ballroom would exceed the size of the 55,000-square-foot Executive Residence. A general principle in historic preservation is to maintain the historic exterior, even if significant renovation is required inside the building. Additions to historic properties should be compatible in scale and subordinate to the original structure. This one clearly is not.

Moreover, it is not even intended to be compatible with the historic building. Rather, the very scale and opulence is intended to put the mark of a single individual on a building that belongs to us all, forcing the American people to remember this individual every time we look at the White House. In the late 1980's Nicolae Ceausescu, the authoritarian

leader of Communist Romania, tore down historic neighborhoods to build a massive opulent and wasteful palace for himself. Although he called he called it "the house of the people" during construction, tour guides now refer to it as "Ceausescu's Palace." Please do not allow the same to happen to the White House which truly is and should remain "the people's house."

National Capital Planning Commission:

Thank you for this opportunity for the American people to have input on the East Wing Modernization Project. Please consider my concerns.

There is confusion as to the architect on deck . . .
- Shalom Baranes Associates (creator of renderings)?
- McCrery Architects (named on the White House website)?

There is also significant confusion as to a cost estimate . . .
- Original quoted by Trump was $300, later $350
- Most often quoted at $400
- Currently on White House website at $200 (is this without the Secret Service security component?)

The only rendering that shows the building plan in relation to its surrounding (White House) environment lacks any detail. However, the footprint does appear to extend forward significantly further than the West wing—a concern toward balance—although the real concern is the overall mammoth scale in that perfect originally-designed space. As a trained designer myself, balance, proportion and harmonious existence in space are paramount. If this unnecessary building must be erected, please let it reflect the historical dignity where it resides.

I am of the strong opinion that America is NOT in need of a space, "that also resembles the gilded spaces of his [Trump's] private clubs." Trump's circle and self-appointed administration do not reflect the majority of America the People. In fact, the United States was held globally in the highest esteem before any gilding ever occurred. Respect for people—sharing intellect and resources where appropriate—is the measure of a government's success, not frivolous expenditures and billionaire overtures. America the People are currently lacking sufficient income to eat, keep warm and stay healthy. This is where resources are needed.

Lastly, I just want to express my deep horror that the East Wing was torn down with zero regard for an historical treasure owned by the American people. I find Trump's actions beyond deplorable, and akin to indictable vandalism.

Most sincerely,
Lisa Johnson

I am offering this written statement in objection to the Trump administration's illegal demolition of the East Wing of the people's house, the White House. I am in opposition to the size scope and lack of historical reference proposed in this project. Furthermore, I feel that it was clearly meant as an insult to the Free Press, the peoples right to freedom of information via access to the executive branch and a misogynistic symbolic demolition of the role of First Lady. As a female American, I completely resent all of this. I want the East Wing rebuilt, as it was according to historical reference scale and size and modernized to accommodate the free and full functioning of a Free Press and in accordance with the needs of a modern fully functioning office of the First Lady. This project is an abomination. While there may be a need to address public participation and gatherings on behalf of the United States, so many things associated with this project are wrong. This

These include:
- Process to approved has been fully disregarded and work began without the required reviews.
- There was no review of priorities of White House and where a ballroom fits in that list of “wants”
- The President should not have and does not have singular standing to determine this need (and his hand seleted “panel” is not empowered to do so).
- Private funding does not mean that the project at “the people’s house” should be up to a few and go against the guidelines for public and governmental buildings approval and building in Washington DC. This is not private property.
- The scale of the ballroom is fully out of kilter with the proportions of the other White House buildings.

Please stop this construction now and have defined appropriate reviews occur before a White House change/addition occurs.

I submit this comment to raise legal concerns regarding the destruction of the East Wing of the White House.
As a federally owned historic property and designated national landmark, the White House is subject to the National Historic Preservation Act (NHPA), including Section 106 (54 U.S.C. § 306108), which requires federal agencies to consider the effects of undertakings on historic properties and to consult with the Advisory Council on Historic Preservation. Major structural demolition would appear to constitute a federal “undertaking” triggering these obligations.
In addition, Article I of the Constitution vests Congress with authority over federal property and appropriations. Permanent structural alteration of a national symbol raises separation-of-powers concerns if undertaken without clear congressional authorization, documented appropriations, and transparent oversight.
While executive security needs are legitimate, they do not override statutory preservation mandates or constitutional constraints. I request public clarification of NHPA compliance, consultation records, environmental review, and the specific legal authority relied upon for this action.

Any changes to the White House need architectural approval before work can begin from a representative body filled with non-partisan participants, not Trump appointed people who do his bidding. It also needs congressional funds approval. This is the “peoples” house, not “corporate donors” house. The proposed 90,000 square feet addition is too

large and overwhelms the existing property. Conventions are typically around 24,000 square feet. We do not need this size of a banquet hall attached to the White House!!!

I was deeply upset when I heard about this destruction of our history. No one should be able to destroy what belongs to us, the people. I ask that the East Wing be rebuilt as it was before and that the history books will record the entire fiasco. Please make your decisions carefully and thoughtfully. History is watching. Thank you, Linda

I do not believe the ballroom which would dwarf the actual White House should be allowed to move forward. Having donations to pay makes the country beholden to those who have contributed. The White House is the people's house not any president that temporarily resides there. Bigger is not better. I am writing in opposition to the White House East Wing Modernization Project. There is a legally required federal review process, and my public participation is to be considered. The White House is not property of the president. It's called the People's House for a reason. Major construction projects in Washington, D.C. must be reviewed by the NCPC and the CFA, comply with the National Environmental Policy Act (NEPA), and receive congressional approval. These safeguards exist to ensure transparency, accountability, and meaningful public input. At this point, it appears that any demo has been done without approval or consideration of existing laws. Please keep our White House as it’s been. I do not want to see it changed out of respect for traditions and the future presidents that will reside there. By making permanent changes to this building and other's overseen by the Trust, it appears that Donald Trump is sending a message that he thinks he will be in office forever. This is not governing for the people or by the people and it important that we all speak up now before construction makes the outcome irreversible. Please stop any construction and restore it back to how it was in 2025. Americans deserve better.

Thank you,
Dawn

The East Wing Moderation Project is a misnomer. The East Wing is being destroyed and replaced, not modernized. The destruction has been accomplished without any oversight or approval. The project is merely another form of self-aggrandizement for the current occupant of the White House. Put the project on hold until this administration is over and a more appropriate replacement for the East Wing can be considered.

This so called modernization of the East Wing is nothing more that the current administration’s attempt to tear down history and create a testament to his “greatness”. As far as who is paying for it, not one of his wealthy cronies are donating for the greater good. There is something in it for them and him, rest assured.
It’s not anything that will benefit We The People. Imagine the good the money pledged would have done it it went towards services for those in need, like our veterans for one.

Number one. The proposed ballroom is hideously outsized compared to the White House. Second, America is hurting. Groceries are costing us more. Healthcare is costing us more. Housing is costing us more. We are told that we have no choice, that we the people have to tighten our belts but yet this administration thinks they can spend like it's going out of style for marble and tacky gold fixtures for a gigantic ballroom? That is taxpayer money that could be better spent on things that benefit the people and not so this administration can show off. Lastly, you don't go into a bunker for modern conveniences. You go into a bunker because you're scared and you need the basics for survival. Just be sure you trust the people installing the modern infrastructure and Internet.

I have served as a commissioner on my local Kansas City-area historic preservation commission over the course of three decades. I am familiar with the kinds of standards and restrictions established by federal and state authorities governing changes to historic buildings.

That a portion of a historic building should have been permitted to be demolished in the first place is a gross violation of these standards. "Weekend Warriors" who destroy historic resources overnight are the bane of any preservation officer. At

this point, the salvation of historic materials and their re-placement on the structure are no longer possible. In such situations, the replacement of the structure in new materials in such a way as to emulate what had been present is the most appropriate requirement. Absent that, any new construction should conform to the existing structure and context in terms of its size, materials, and appearance. These standards are imposed upon historic structures around the nation on ANY applicant for new construction in these circumstances. No architect or builder should be above the law in this respect. The character of the nation's Capitol can only be preserved by adhering to such guidelines.

As such, the proposed plan for the site of the former East Wing is inappropriate in scale, materials, and appearance. It should in no way be permitted. It certainly should not be built with the blessing of the Trust.

I register my strong opposition to the so-called East Wing modernization project. Modernization could have been achieved without demolishing a treasured part of our nation's heritage, and the Administration's moving forward with no regard to established procedures and regulations is inexcusable. Do NOT approve this project, and the proposed construction of the White House ballroom, and restore the East Wing to its former appearance, with appropriate modernization.

It is not a modernization project but rather a complete razing of American history. I demand this project be canceled and the East Wing rebuilt and restored to its former design as the place to welcome the public to the white house as well as house the first lady's office and work area. The white house does not belong to the incumbent at any time--it belongs to the people of the United States. Elected officials and government employees who occupy public buildings have a special duty to preserve these witnesses to history. This is especially true of the White House. Every part of it echoes the people who lived and worked there, the historic events that happened within its walls. So it is especially atrocious that the East Wing was destroyed in one fell swoop, without discussion, lacking any sort of regular procedure, by the simple diktat of its temporary occupant, the current President. He does not own the building. We the citizens of the United States do, and we expect that the building and its contents be preserved and respected.

For four years I had the honor of living in the only US National Historic Landmark located in a foreign country, the old American Legation in Tangier, Morocco. It has National Historic Landmark status by right of it being the first American diplomatic property, a gift of the Sultan of Morocco in 1821. The building presents unique challenges of maintenance, a consequence of its location in the middle of an ancient walled city of narrow pedestrian alleys and interconnected walls and roofs. It is painstakingly preserved by a unique partnership between an American nonprofit institution and the US government. Historic preservation is something I lived those four years directing the museum and cultural center housed in the Legation.

The East Wing must be restored. If a way can be found to create space for White House events while respecting the existing footprint of the site, let that come through a public process as set out by the NCPC.

This is not modernization. It is yet another vanity project for a man whose need for reassurance and flattery is bottomless. Nothing could be less appropriate than a few rich individuals pouring bribe money into this project. The White House is the People's House, not the Oligarchs' House. It's appalling that the East Wing was destroyed before the proper authorities were included in the process. The East Wing should be restored to its previous size and design, but modernized with updated insulation, plumbing, electricity, fixtures, etc. Nothing more. And since the president is personally profiting from his presidency with his crypto currency side business, I suggest he pay for the restoration out of his own pocket.

However, I don't care how it is funded. It is not a modernization project but rather a complete razing of American history. The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.
The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.
I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

To the National Capital Planning Commission,

I strongly oppose the proposed 90,000 square foot ballroom addition to the White House.

This is not a modest update. It is an expansion nearly double the size of the 55,000 square foot Executive Residence. Preservation standards require that additions to historic landmarks remain subordinate to the original structure. An addition of this magnitude is not subordinate. It would fundamentally alter the scale and character of one of our nation's most important historic sites. Also, project is being funded by large private donations of large scale donors and I am asking for clear disclosure of donor funding, environmental and design review, and public accountability.

The White House is a symbol of democratic governance, not a convention facility. Expanding it to accommodate large scale galas and donor focused events shifts its purpose away from the public trust it represents. The dignity of the People's House should not be compromised for event capacity.

Approving a project of this size at a National Historic Landmark sets a dangerous precedent. If preservation principles can be bent here, they can be weakened anywhere.

I urge the Commission to reject this proposal and uphold the historic integrity, proportionality, and public mission of the White House.

Respectfully,
Debra Muniz

The East Wing addition to the Whitehouse appears to be grossly oversized and out of scale with the existing building and grounds. The initial ballroom program was for 500 seats which would more than double the capacity of the existing facilities at the Whitehouse. It does not seem that a 1000 seat ballroom is necessary. A building half the size, and lower in height would be more appropriate to the existing massing and scale. This facility seems overbuilt rather than right-sized. There is also no indication within the building plan regarding security screening and where/how that process occurs...so what is the visitor experience? And what is really envisioned for the West Wing expansion? The plan seems imbalanced, again because the ballroom addition is TOO BIG.
Also, if the only accessible entrance is from the Whitehouse, that seems to be problematic that elevator access is not provided within the new structure.
Finally the Whitehouse complex is to reflect the values of the American people, and while improvement may be required, one thing that has always struck me is that the Whitehouse is intentionally NOT palatial. It is NOT the house of an emperor or king, and reflects that it is the house belonging to the American people. The ostentation and imperialism reflected in the scale an treatment of the addition is inappropriate. It is also inappropriate that the plans are being reviewed by a commission that is largely political rather than professional in nature.

Dear Commission,

I am against the East Wing Modernization Project, but as the demolition has already begun, suffice it to say that it is a desecration and a slap in the face to every citizen. The project should be halted because President Trump began the demolition despite no independent reviews having taken place, or congressional approval given. Even the president's supporters never asked for a ballroom.

The project as it is currently designed is not in proportion to the White House and the images submitted to the National Park Service show that the plans are incompatible with the current design. A former architect under the Biden administration was quoted, "...it is a poorly proportioned neo-classical structure that is completely out of scale" with the White House. (https://www.independent.co.uk/news/world/americas/us-politics/white-house-ballroom-plans-east-wing-b2920326.html) As the Trump administration has clearly ignored National Park Service guidelines, the project should be halted until appropriate plans are submitted.

Also, I don't believe that the project will be paid for by "donors." Eventually, these sycophants will realize their bribes are

useless, and United States taxpayers will be paying for this disgraceful, $400,000,000 vanity project.

Sincerely,

Beth Wing

Please do not approve the gargantuan addition of the Trump ballrroom to the White House. Everyone knows that President Trump has stacked all oversight entities with toadies who will approve whatever grotesque ego-driven plan he advocates.

Perhaps a larger facility to entertain is called for. But any such project must be undertaken with all appropriate study and slow deliberation. And it must be tasteful and not detract from the White House or federal city. The addition as proposed will dwarf the White House. The current plan is blasphemous. It is hideous. It does not honor the stately and solemn history of the executive mansion. We will hopefully be rid of President Trump at some point. Please do not make the mistake of allowing him to trash our national treasures on his way out. If this project is approved and built, I will support whichever candidate for President in 2028 who commits to tearing it down.

Dear National Trust, We are a country of laws. If we don’t adhere to our Constitution nor our laws, our society will collapse. The President acted unilaterally, outside of the laws to tear down the East Wing. He has no authority to unilaterally approve plans for a new design of that space. He must be made to go through proper legal process. Not sure what punishment after the fact can be implemented for tearing down the East Wing without due process. We cannot let this set a precedent. Thank you. -Sarah Shrewsbury US citizen from CT

Please restore the East Wing to its former structure and footprint. Restore the interior to be historically accurate to the former configuration. Return as many of the previous furnishings as possible. The tear down is an abomination and insult to the American public. We do NOT want at monstrosity of a ballroom for the rich. It would be a symbol of this misguided administration.

I oppose this project in its entirety. I don’t care how it’s funded, it is a garish abomination. It’s bad enough the east wing has been demolished. Adding this monstrosity as a tribute to the president’s giant ego is an affront to all decent Americans.

Please do not let this project be moved forward. If a bunker is needed, it can be covered with grass easier than a $300 - 400 million dollar building that serves no justifiable purpose.

I oppose the East Wing Modernization Project.

This project began without required National Capital Planning Commission approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington.

The $400 million cost is funded by corporations holding billions in federal contracts with the administration approving those contracts. his creates an unacceptable conflict of interest.

The White House is not private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve construction without following the law and allowing public input.

I urge the Commission to reject this proposal.

Trump should be required to replace the East Wing substantially as it was before it was illegally destroyed. He must pay for it's reconstruction personally and repay the government for whatever costs incurred to tear it down. Once that's done, he can apply legally to the commission that regulates government buildings to make any substantive changes he wants done.

Any changes to the White House should be done through the proper channels, not on the whim of the president. The White House is the People’s house and the occupant is only there temporarily. In the past, the changes that have been made were approved through the proper channels. If a ballroom is needed a discussion should’ve taken place where all sides could weigh in before anything proceeded and the destruction of the E. Wing took place. The only people who benefit from a ballroom are the rich friends of the president not the everyday citizens.

This $300 million project has never really been properly vetted with the American people. The previous structure was demolished with no notice. It is unclear whether the demolition was properly handled, and we don't know what sort of history has been lost. A more appropriate structure would be what the name of this is--a modernized version of the East Wing, where the First Lady could conduct business, among other things. I oppose this project as it has been currently explained. But I hope to see a new structure, proposed within the proper guidelines, and with Congress, the American people, and the appropriate agencies involved. Such a structure should fit appropriately on the White House grounds, as well as fitting the design of Washington, DC.

The White House is small and humble because it’s not the king’s house; it’s the people’s house. Donald Trump had no right to tear it down without the people’s consent.

Modernization was needed, I'm sure, and an office for the President's spouse assumes free labor. However, bulldozing it sneakily is simply destruction. If a huge ballroom is needed - and maybe it is- put it underground or somewhere else. The White House is historic and thus small by today's standards. Is the next step to bulldoze that too in the dead of night, so it can be "modernized?"
Maybe just replace the East Wing with a Rose Garden.

It is shameful that the East Wing of the White House was demolished without the input of historical or architectural committees as well as we the people of The United States.

The “ballroom” is unnecessary considering the plan is for it to be 90,000 square feet. Trump will no doubt fill it with gaudy gold like he did to the Oval Office.

Instead of a ball room, the east wing should be reconstructed exactly the way it was.

I’m so disappointed with how this project was sneaked by the people of our country!

To whom it may concern,

I am writing as a concerned citizen.

I am very concerned that the demolition of the historic East Wing of the White House, one of our National Parks properties and belonging to the people of the United States proceeded without consultation with the National Capitol Planning Commission and other pertinent organizations.

I am against the building of a large ballroom on the site, and would prefer that a new East Wing with that is in keeping with the history of the White House and not of a scale that overshadows what is left of the existing White House be built instead.

I am also concerned about the cost of the ballroom and the private sources of funding for the project and that the financial contributors are donating purely to curry favor with the president. I would also like the amount of tax payer money that is spent on the project to be made public.

There should be some oversight going forward with the building of new monuments, demolition and /or remodeling of historical buildings in Washington DC by the current occupant of the White House as these buildings do not personally belong to him, but to the people of the United States.

Thank you for your time and attention to this matter,

Marya Gabriel

I understand the need for a better venue to host state dinners and large events. However, the established procedures for altering federal properties have not been followed. I performed with the Broadway company Aladdin in 2015 for First Lady Michelle Obama, and the kids who won her healthy foods recipe contest. It was the thrill of a lifetime to play piano in the East Wing where so many artists have shared their talents with whomever was President & First Lady at the time. To sit beneath the giant George Washington portrait while playing was a total inspiration.

To wake up one morning to learn that Donald Trump had literally taken a WRECKING BALL to a piece of HISTORY made me physically ill. His arrogance and IGNORANCE knows no bounds.

To whom it may concern:

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all!

I am writing to express my strong opposition to the ongoing demolition and proposed 90,000-square-foot expansion project at the White House East Wing. While I recognize the need for the Executive Residence to evolve, the current "State Ballroom" project represents an irreversible departure from the historical integrity and democratic transparency that the "People’s House" demands.

The following points outline the primary concerns regarding this project:

1. Desecration of a National Landmark
The wholesale demolition of the East Wing, which began in October 2025, has already caused the loss of significant historical fabric. By replacing a structure with deep ties to the 1902 and 1942 eras with a massive, 89,000-square-foot annex, the project disregards the National Historic Preservation Act. The White House should not be subject to architectural whims that prioritize scale over stewardship.

2. Lack of Oversight and Legal Authority
A project of this magnitude—estimated to cost up to $400 million—is being executed without express congressional approval. Federal law typically requires that no structure be erected on public grounds in D.C. without authority from Congress. Furthermore, the National Trust for Historic Preservation has sued to halt construction, alleging the administration bypassed mandatory reviews from the National Capital Planning Commission (NCPC) and the National Park Service (NPS).

3. Absence of Public Input
The "People’s House" belongs to the American public, yet this project was launched with little to no notice and zero opportunity for public comment. The American Institute of Architects (AIA) has condemned the lack of transparency, noting that such significant alterations to public architecture require open decision-making and citizen participation.

4. Ethics of Private Fundraising
The decision to fund a major addition to a public federal building through private donations from billionaires and corporations raises grave ethical concerns. Lawmakers have questioned whether these contributions, which reportedly include funds from major tech and defense firms, could be used to facilitate corruption or secure favorable treatment. Public landmarks should be maintained through transparent, appropriated funds, not through opaque private "gifts" that carry the appearance of a conflict of interest.

5. Aesthetic and Scale Concerns
Renderings show a structure that is roughly twice the size of the original White House residence. This "immense" design threatens to overwhelm the iconic silhouette of the Executive Mansion and permanently disrupt the carefully balanced classical design that has defined the site for over two centuries.

I respectfully urge you to support a formal halt to the project until a comprehensive, transparent review is completed and the necessary legislative and ethical safeguards are established.

I am opposed to this project as it currently stands. While something needs to be built to replace what has been illegally destroyed, the scale of the proposed building is ridiculous. My objection to this project is the lack of input from organizations like the National Trust for Historic Presrvation and the D.C. planning commission prior to the demolition of the existing structure. There don’t seem to be any agreed upon costs published, or plans for funding the additional maintenance required to this addition to the White House in the future, regardless of promises that it will be built with donations. Is this an addition that will modernize the White House or sent only as another monument to the current administration’s desire for more lavish accommodations?

I'm appalled by the destruction of the East Wing without any approval. I do not want my tax dollars to fund this. I want it to be rebuilt with foresight and planning, and under the guidelines of the National Trust for Historic Preservation. Right now, its wanton destruction stands as a symbol for a president who espouses the view he once openly stated: "When you're a star, they let you do it." ‘Design Guidelines for the White House and President’s Park’ (1997), issued by the National Park Service: “The White House and President’s Park are first and foremost a public trust, an important part of our national heritage.”

Any alterations undertaken should have followed a rigorous and deliberate design and review process prior to any demolition. Nothing should be demolished before what is to replace it has been proven not only acceptable to the people who's house it is, but necessary to serve those people.
What this administration literally plowed into ruins should be considered a crime against our nation and should be punished as such.

This horrific act of demolition shows a revolting sense of disregard for the people who's house it is, entitlement and self-aggrandizement. It is offensive and undermines the powerful sense of shared ownership and responsibility. The material, both toxic and historic, was treated with the same lack of respect and care as the American people are being treated by this self centered president.
The argument that the” renovations” is being done by donors is absurd. Unspecified donors currying favor is the last element we need in our Peoples House. We need a shared decision-making process that is open and transparent.
We needed thoughtful deliberation and carful assessment of what may actually be needed. This has been stolen from us,

robbed in plan sight because we could not have imagined such insanity. Stolen by a bulldozer and juvenile behavior one expects in a Jr. High school parking lot not in the oval office.

Call this "renovation" what it is, thoughtless destruction for the purpose of self-adulation and facilitating yet more purchase of favor from wealthy donors and other countries.

“The White House is owned by the American people and stewarded by the National Park Service. It is more than the President's residence; it is a site for protests and national discourse about what it means to be American. As one of the most iconic sites in the country, the White House and President's Park seeks to tell the stories of all people who have lived, worked, and visited. “

The WH East Wing needed no “modernization”. The destruction of this historic structure containing invaluable records of Presidential First Ladies, historic portraits, & letters removed an opportunity for the public to immerse themselves in Presidential history. The structure belonged to the People, & a 4-year “renter” had no right to tear it down, much less change the purpose & dimensions of a space not needed for “balls”. No matter who is providing the cash. The structure should be replaced as it was.
Tell Trump to return the Qatari airplane & use that money to rebuild the East Wing as it was.

I oppose spending 300 million dollars on this East Wing project.
This work appears to have moved forward without proper authorization, permits, or a meaningful design review. That is not acceptable for any public project, and it is especially unacceptable at a site that carries this level of national significance.
Calling this modernization does not match what has happened. What I see is a loss of history and character that cannot simply be rebuilt later and called “the same.”
I am asking that this project be canceled. I also want the East Wing rebuilt and restored to its former design, as faithfully as possible.

NCPC Commission members,

We oppose the current East Wing (of the White House) Modernization Project.

This project began without required National Capital Planning Commission (NCPC) approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington. We understand from your web page that “Section 106 does not apply to NCPC’s review of projects at the White House, and therefore NCPC does not consider potential effects to historic properties for projects at the White House and its grounds”. We also understand the concerns of the American people about the ruthless pillaging of the White House (the people’s house!) abruptly and without normal procedures and authorization may not be within your purview, but we believe it should be. This is an insult to the rule of law and our government process and highlights the contempt this administration has toward its citizens. These factors may or may not influence your decision making, but please understand they DO influence the public interpretation of your decisions.

Another concern we have is the Trump administration’s assumption that arranging private funding for an unauthorized vanity project will appease any concerns citizens may have toward destruction of our Cultural Heritage sites no matter how legally of honorably those funds might have been solicited. Although judging from ongoing administration ‘dealmaking’ even the motivation for those donations may be in question.

The White House is not private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve construction without following the law and allowing public input.

We urge the Commission to reject this proposal.

Sincerely,
Denise D. Smith

I oppose the razing of this historical space. It is not a modernization project, but an attempt to erase history. $300 million for a project created without proper permits or authorizations? No. The citizens of this country deserve a building that reflects their history, not an expensive vanity project initiated by a leader who didn't care to follow the steps all others have to when initiating such major projects that are funded by tax payers.

1) This project is on a publicly owned, building and complex sustained by federal funds and employees. It moved hastily without following protocols required in the National Historic Preservation Act of 1966 and amendments, especially sections 106 and 110, and did not follow local and regional building project review processes and permits. Plans submitted to the planning commission were vague and dodged pertinent questions and data.
2) As a highly visible and well known national landmark and publicly shared building, the input of citizens matters more than the temporary tenants of the site.
3) Although publicity indicates it is privately funded, this information seems uncertain and there has been no information on the ongoing maintenance and utility costs that will fall on public funds.
4) There has been no reliable information or assessment of actual need for a large ballroom, and whether a long-term structure will actually be frequently utilized or justify the expense and ongoing maintenance.
5) The design of the proposed new structure is out of scale and proportion to the site and the existing surrounding buildings. No information on whether construction will use current best practices for energy efficiency, sustainable materials, and maintenance.
6) A structure that matches the style, materials, proportions of the razed East Wing is preferable, and restoration of the grounds that have been destroyed by this hasty, unpermitted project.
7) Penalties and fines consistent with what occurs when local and federal laws are broken.

This is not a modernization project. It’s a monstrous billionaire scheme that had no approval and destroyed a historic building. The proposed building is completely out of scale and design with the White House complex and I fervently object to its construction. It makes a mockery of the term “The People’s House”.

I am appalled at the utter destruction of the East Wing of the White House, a structure that beautifully balanced and provided architectural symmetry, had attained historical significance over the years since its construction, and was destroyed by a rogue president without the consideration of any of the stakeholders in a this national symbol of great meaning to all Americans,THE PEOPLES HOUSE!
As an American citizen, I wish to register my horror and disgust that ANY ONE PERSON was allowed to order such a devastating transgression against our shared national heritage. This act of destruction must be reversed by the historically accurate rebuilding of what was wantonly destroyed.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

I oppose the East Wing Modernization Project.
This project began without required National Capital Planning Commission approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington.
The $400 million cost is funded by corporations holding billions in federal contracts with the administration approving those contracts.

This creates an unacceptable conflict of interest.
The White House is not private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve construction without following the law and allowing public input.
I urge the Commission to reject this proposal.

Tearing down the historic East Wing without authorization or public input was a desecration of our history and an overreach of power.
The Trump inspired grandiose ballroom is aesthetically displeasing and proceeding without cooperation of the appropriate authorities.
The ballroom should be stopped and the East Wing reconstructed.

There is no reason for a ballroom at the White House. Particularly, one that dwarfs the main building as this one does. It should also not be funded with donations for such a historic building. Just utterly corrupt.

While I understand that it probably helps to keep an old man who is publicly declining at a shocking rate playing with his toys, it is utterly unnecessary and un-American.

Modernization? Is that what it's being labeled now? That's a laugh - it's destruction and EGO! There is no way this should be happening no matter who is supposedly paying for it and it must be STOPPED and restored - update wiring and plumbing then if required to be compliant w\ the NEC etc. The WH is a a historic building and as such should be preserved as the rest of our historic treasures are.

I am outraged that $300 million is being wasted on a project that was pushed forward without proper authorization, without the required permits, and without a legitimate design review. This reckless disregard for the law is unacceptable. Worse, this project is actively destroying an important piece of our history.
This project must be canceled immediately. The East Wing should be rebuilt and restored to its original design without delay. No one is above the law, and allowing those responsible to escape consequences would be a direct insult to every law-abiding American.
We have rules, processes, and safeguards for a reason. Ignoring them is not just careless — it’s a blatant abuse of power. This situation is outrageous, and it must be corrected now.

I am requesting that the construction of a ballroom addition to the White House be suspended until the appropriate permits be obtained for the demolition and construction of the ballroom, the wreckage be tested for asbestos and other dangerous contaminants, and approval of the construction is voted by both the House of Representatives and the Senate. While a large entertainment space may be warranted, the disregard for the permitting process, ignoring the preservation of historical details, and the process of private funding are only a few of the indications that this project in its present form is ill advised

As a design professional recently retired from a 45 year career in the design and construction fields, I oppose the East Wing Modernization Project. This $400 million construction began without National Capital Planning Commission approval, without required environmental assessments, and without congressional authorization mandated by federal law

for construction on federal parkland in Washington. These violations should not be rewarded with after-the-fact approval. The funding creates unacceptable conflicts of interest. Corporations holding billions in current federal contracts with this administration are funding a construction project at the residence of the president who controls those contracts. This is not charitable giving. This is an investment in access and favorable treatment.
The White House belongs to the American people, not any individual president. I urge the Commission to reject this proposal until full legal compliance is achieved, including congressional authorization and completed environmental assessments. No temporary occupant should possess unilateral authority to demolish historic structures without following established rules and regulations.
The East Wing may already be demolished. But public opposition matters. I urge the Commission to oppose this project.

I reject the premise that the president had the legal authority to tear down the previous structure in order to build himself a monument(ballroom). I object to him making a unilateral decision to spend millions of dollars on his egomaniacal display of power. I am requesting that whatever he builds, be torn down and replaced with an identical structure of the original East Wing. It is a farce to call this project the "East Wing Modernization Project," because modernizing it is wholly unnecessary. The destruction of the East Wing is a stain upon this president's legacy, and a temporary tenant of a building that the people own should not be allowed to make such permanent and sweeping changes. Rather than a ballroom, the East Wing should

be restored to its former structure. The new ballroom design is garish, elephantine, and unwarranted, rather like the current White House occupant.

I appreciate your serious review of this project…it is unfortunately misnamed as a modernization project. I'm sure that it needed to be upgraded to modern standards - especially the emergency operations area, however, we do NOT need a huge ballroom! It is a slap down to the average American, it is a symbol of aristocracy, it is a symbol of the 19th century. Please, please please only approve new construction that will be supportive of a forward looking view of the House of the People…or a new, large rose garden.

A giant ballroom is a frivolity and expense which does not reflect the values or needs of the American people at this time, or possibly ever. Furthermore, these wholesale changes to our national house, no matter how well planned or thought out, should not be happening without public approval. I oppose this “modernization” project which is costing 300 million dollars or more. It is not modernization, it is an erasing of history. It was done without planning, authorization, and permits. It is breaking laws. I request that the east wing be rebuilt and restored to its former glory. An individual should not be allowed to erase this large part of our American heritage without permission from the people. We did not vote on the matter and it should never have happened.

I want the East Wing project to be halted and the East Wing to be rebuilt to what it was and should be. It’s a historical building and never should’ve had private investors involved. This isn't a modernization project this is monument to a small man, sort of like the oversized castle for the prince in Shrek. If it gets built, this monument to a small man is going to remind us all in a few years of nothing but him and his ego. It will no longer remind us of a beautiful house that belongs to America. I am submitting comments about the East Wing "Modernization" Project. First of all, this is a bit performative because the East Wing has already been destroyed. Presidents are temporary, The White House is permanent. The best thing about The White House is that it remained the same, despite the tenant. Reminding U.S. Citizens that we elect our President and Government.
The White House's understated elegance is a perfect representation of how I would like the U.S. to show up to the world. Not gaudy and gold and a tribute to any one President. No one President must dictate or significantly alter The White House aesthetic. Since it is already torn down, I think we renovate it back to what it originally looked like but modernized systems for enviornmental and energy efficiency. Thank you for considering my input!

I’m writing to express my profound concern over the East Wing Modernization Project (NCPC File Number: 8733) and the irreversible changes it has already inflicted on one of America's most iconic historic sites.
The abrupt demolition of the East Wing—completed last fall without adequate prior public review, environmental assessment, or full compliance with historic preservation laws—has permanently altered the visual and historical integrity of the White House grounds. The original East Wing, while modified over time, contributed to the balanced, symmetrical, and human-scaled composition of the White House complex as viewed from Pennsylvania Avenue and the surrounding public spaces. Its modest scale and classical design elements harmonized with the Executive Residence, preserving the symbolic restraint and dignity that define this national landmark.
The proposed 90,000-square-foot addition, including a massive new ballroom, appears from available renderings and elevations to introduce an oversized, sprawling structure that risks overwhelming the main White House mansion. Recent submissions indicate it reaches comparable height but extends significantly farther, potentially disrupting the historic sightlines, proportions, and neoclassical harmony that have endured for over a century.
I urge the Commission to exercise its full authority under the National Capital Planning Act to require restoration of the exterior appearance as it existed prior to demolition. This should include:

Reconstructing or approximating the original East Wing facade, scale, and massing to maintain the pre-2025 visual relationship with the White House.
Rejecting or substantially scaling back above-grade elements that dominate or compete with the historic core building.
Prioritizing compliance with the National Historic Preservation Act and ensuring the project respects the White House as a National Historic Landmark.

Allowing this transformation to proceed without meaningful mitigation would set a dangerous precedent for executive overreach on federally protected historic properties and diminish a shared national treasure for future generations.
Thank you for your careful consideration of these concerns during the March 5, 2026, meeting. I respectfully request that this comment be entered into the public record.

I don't see the need for the ballroom. The think the East Wing should be rebuilt to its historical appearance. The President should pay for the reconstruction out of his personal money. He did not ask for money or permission to move forward on this project. From what the general public hears, the correct permits were not secured for this project. I understand the project is going over the proposed budget. I remember the president being upset with the over budget cost for the treasury building rennovations. Why is it okay for the ballroom to be over budget? It's NOT. Please stop the disstruction and bastardization of the White House.

Hello. I am writing to comment on the East Wing project that is underway. It’s unfortunate that this was demolished before any plans were approved, but so be it. I certainly understand the need for more space at the White House for formal gatherings, or whatever the case may be. But I strongly object to the size and the designs I’ve seen of this space. I believe the size should be scaled back so that it is more in proportion with the rest of the complex. And I would hope it would be more in line with the decor of the rest of the White House, unlike the Oval Office. Thank you for allowing me to submit my comments.

The East Wing was torn down with no regard to history, protocol, and with questionable legality That was bad enough. Now he has stacked the make-up of the 2 commissions that will review and approve the new ballroom with partisan sycophants, who just today approved the initial plan, and simultaneously the final plan which no one has seen. What has been done to the East Wing is a travesty. I'm opposed to this project and think the entire project should revert to rebuilding and modernizing the facilities that have been torn down. Notwithstanding the fact that the funding is supposedly private, the entirety of the White House is and should always be "the people's house." The country's population owns the White House and lends the facility by virtue of election to the current president's family, rent free I might add. As such, any and all modifications to the facility should be subject to extensive review and input by the rightful owners of the property. One individual, with or without the help of private contributors, should not be allowed to make modifications to the White House without significant input from the owners. As a rightful owner, I object to the damage that has already been done to the East Wing and would like to see that Wing restored (and modified appropriately) to its previous state. And done so using the same private money, I might add, If an entertainment facility is needed, let it be constructed somewhere else in the vicinity of the existing White House (completely off the current White House grounds).

Esteemed committee members:

While modernization of the East Wing is quite likely an appropriate project to undertake, I, with many others, have serious concerns about the scale of the proposed addition. The over-reaching scope of demolition--not adequately reviewed in advance--is of course now moot. In addition, the architect's drawings have been a moving target (like the architect), so it is difficult to know what one is commenting on.

That aside, each iteration of the proposed addition I have seen has been increasingly out-of-scale with the massing of the historic complex, such that the new east wing will visually relegate the balance of the White House to an unacceptably subordinate status. The addition is simply too big: too tall, too long, too wide. Any architecture student could explain this. The drawings as they stand represent an assault on the classical proportions of the whole. This is perplexing, since President Trump has championed a more classical federal architecture, which I happen to agree with. This situation is not too late to correct; it will, however, mean a retreat to a less grandiose, more self-effacing statement. The people's house deserve no less. Thank you for reading.

The East Wing of the People’s House should be rebuilt using the personal money of the individual who ordered it to be bulldozed without any prior approval. No other renter is allowed to demolish part of a property they’re inhabiting for four years without some level of accountability.

I don't understand why the President failed to receive a STOP WORK order that shut down the destruction of the East Wing. The plan now is for something radically larger than modernization. The White House belongs to the people of the United States, and as one of those people, I object to the scope and scale of the project. I recommend the East Wing be rebuilt as it existed a year ago.

This is not a modernization project but rather a complete razing and destruction of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. We should restore the East Wing in the same style and scale as it was, and with the same placement with relation to the West Wing. Construction should include functional updates that bring it up to code and modern standards, including ADA accessibility where possible. If a larger ballroom is needed, construct it elsewhere in the city or use other nearby public spaces. Do not allow special interest funds to influence or pay for the rebuilding.
The White House is the People's House. It was deliberately designed and built with modest dimensions and restrained aesthetics. It is not a Palace for a King.
BEFORE nationally significant places are permanently altered, the public deserves an opportunity to help shape the decision. We should follow past process for making needed but historically sensitive changes.

Asking that the East Wing of the White House be rebuilt and that the project costs to restore be taken from the current White House occupant. Such a desecration to put it mildly. What next? This modernization project was started without appropriate review and approval. Donations should not be used to alter historical buildings in our nation's Capital. Those involved with this project know any demolition/building requires approval IN ADVANCE. Why it took so long to stop this activity is a mystery. It appears we have lost all control of our country and pray this type of activity is NOT permitted. How the damage already done to that beautiful building will be remedied is going to be complex, but the money pledged should be used to reconstruct a wing similar to what was destroyed NOT a gawdy ballroom.

I am opposed to the demolition of the East Wing of the White House which proceeded forward without proper review and

authorization. The proposed “vanity project” of a window-lined ballroom is not needed for the people of the United States and despite “empty promises” that no taxpayer dollars would be spent on this atrocity, it appears that the “promised” funding from the favored billionaires was not a truthful statement. The Ease Wing should be returned to its former floor plan immediately and any further destruction of the people’s house should not be allowed. The president far exceeded legal authority by the actions taken to date on this project and that also needs to be addressed.

The White House is home to The President of the United States, temporarily, and is not owned by any President. It belongs to the people of the United States.

Many changes have been made to the building by many residents. Changes necessary to maintain and changes to beautify, not for the current resident but for the country, the people. The proposed Ballroom gives nothing to the people, not stability and not beauty.

Building a massive ballroom is a vanity project for the current administration and will never be used for or by the American people. Our citizens are struggling, our citizens need help, and our tax dollars must be used for us. We know who will truly pay for this and we know “private funding” is disingenuous. Perhaps there is a need for an official ballroom at the Whitehouse. However, a project of such magnitude should not be left up to the whims and desires of a single person.
There are procedures and process put in place for such projects and these rules should be followed to the letter of the law. A do it now and ask forgiveness later attitude does not work when demolishing national landmark.
In its current iteration I strongly oppose the construction of a ballroom, or any other structure on the Whitehouse grounds unless the proper procedures are followed and adhered to.

I am writing to express my disapproval of the fast-track permission given this administration to rebuild the East Wing of the White House. This project has been disingenuous from the start - first by the demolition done without going through the proper channels, changes of architects, multiple versions of the project submitted and stacking the authoritative committees with unqualified people who will agree to whatever this administration wants!!! This is THE PEOPLE'S HOUSE and we should have a say in how it is changed. It is not meant to be a shrine to the current president - it is a small and unassuming building for a reason - the resident can only be an inhabitant for 8 years at most and he works for US!!!

I oppose the current East Wing Modernization project. The historic East Wing of the White House was destroyed without proper review of plans or authorization from Congress. There was no environmental assessment performed by the National Capital Planning Commission. Please cancel this project and require the administration to rebuild the East Wing according to its state before the demolition. If this administration wants to build a ballroom, they should get authorization as prior administrations have done for major changes and build it behind the East Wing. Washington DC is a beautiful city that all Americans can be proud of. Its Neo-classic architecture and harmonious scale over several centuries have ensured that the city retains its historical significance. It was shocking that anyone could authorize the demolition of a major building without the prior review of the Planning Commission and other oversight committees. However, now that the East Wing has been destroyed, it is essential that what is built in its place is in keeping with the style and scale of the White House, which must remain the focal point. A 90,000sf ballroom will dwarf the 50,000sf White House and will be an eyesore for generations. The White House does not belong to any one president - it is the peoples house. Please protect it by preventing this project!

I am TOTALLY opposed to the building of the “Ballroom” addition to the White House. Aside from the hideous design plans, the East Wing should have been assessed to see if repairs were needed. I do not believe most U.S. citizens and taxpayers want a huge ballroom project regardless of who is funding it.

Having donors fund this project in this manner leaves the whole process of altering, improving or repairing government structures open to nefarious opportunies for a variety of abuses. This is a clear violation of the public trust.

Hello,

Growing up in the 1970s and 80s, I was always taught that first and foremost, the White House is the "People's House".

Our votes elect the temporary occupants and our tax dollars fund the structure. The occupants are, in a sense, "renters" with a lease not to exceed 8 years. As such, just like any other renters of any other property, while of course life/safety issues can and must be addressed promptly, any renovations outside of those need to go through a formal review and approval process.

As any renter (or even homeowners in a HOA) can attest, any renovations must reflect and complement the architectural design of the existing structure. The ballroom, as it as currently proposed, does not. It's proposed size dwarfs the remaining, existing structure. The previous design was in scale and provided adequate "camoflauge" for the bunker below. I would like to see any new construction done in the pre-existing footprint of the now-demolished wing - nothing larger.

Furthermore - as the "people's house", the renovation should not be paid for by corporations. The White House is not a tv show with sponsored ad breaks. Renovations done should be only what is necessary for life and safety, (including any accessibility updates), and because it should be limited to the necessary, it should then be taxpayer-funded. A ballroom is not necessary: the past President's have done just fine with the existing options, and if women's heels sinking into the mud is an issue, tell the guests to wear flats, or, rent and install temporary ramps and floors, just like people do all over the country every day for outdoor weddings, festivals, etc.

Thank you.

The fact that the East Wing of the White House was destroyed without any permit or review by the historic trust is a travesty.
The gaudy ballroom that was designed, again, without any oversight or review should not be allowed to be built. This was designed to be a monument to a president not operating on the people’s behalf.
Any monies raised for the said ballroom project should be reallocated to rebuild the East Wing to maintain the trust and historic significance of the White House for the American people.

The east wing of the White House was demolished without permits or approvals. Whomever is responsible for that (I am assuming that it is our president) should be required to reconstruct the wing just like it was with their own personal funds.
The scale of the proposed ballroom will overwhelm the size and proportions of the White House. This proposed wing is a completely and utterly inappropriate addition to the beautiful, classical-style, symmetrical White House. Indeed one of the defining features of classical style architecture is symmetry. I cannot use the word "inappropriate" enough.
No other president in our history felt the need to have a gigantic ballroom and all respected the beautiful architectural style of the White House. Why does this president need a gigantic ballroom? Does he think that he is a socialite who must give parties and balls like we were living in the era of The Great Gatsby? Is it just to rub his wealth in all of our faces (or are we taxpayers going to pay for all his balls?) or is he just a party animal? Why is he partying instead of concentrating on running (or ruining depending on how you look at it) our government? How often does he intend to give a ball to justify this monstrosity?
There is a complete lack of transparency about the funding of the project and the awarding of contracts. What are the contributors getting in return for their contributions? Access to the president, favorable tax provisions, pardons for their federal crimes?
If you approve this inappropriate project you will be proving that not only has the "swamp" not been drained but that you are part of the swamp itself.
Do we now live in a country where is no honor or integrity? Please be brave and do the right thing. Thank you.

I am writing to state my deep concerns about the East Wing demolition at the White House.
I do not believe there has been 150 years of presidents wanting a ball room bigger than the White House itself as Mr. Trump has stated.
We were told, by Mr. Trump initially that it would not affect the White House,"not even touch it".
Both statements are lies.
The White House is the PEOPLES HOUSE. Mr. Trump is a guest there. While past presidents have made renovations, none of them has changed the appearance like this proposed project would.
Input from historical preservation groups and the PEOPLE should be given top priority.
Please stop the project and restore the PEOPLES HOUSE to it's former glory.
Thank you for this opportunity to provide input.

I strongly oppose what has been done to the East Wing. To call it modernization is to add a chapter to Orwell's "1984." We cannot let any current occupant of the White House determine the look of the White House, no matter the source of the funding. This would open a Pandora's Box of poor personal choices that would have nothing to do with history and everything to do with satisfying one's ego. Any changes to the White House should go through a thorough, independent design review before any action takes place, a design review done by a committee that is not influenced in any way by the occupant of the White House. I believe that the East Wing should be restored to its pre-demolition state using the personal funds of President Trump of possibly a fund of anonymous donors. The United States does not need a massive ballroom. We've managed state dinners for hundreds of years without a 'ballroom' that dwarfs the original building. The White House is a National Historic Site. It is arguably the most important historic site in the U.S. More important, it is property of the American people. Before any changes are made, the law should be followed and the American people should be allowed to comment to shape what happens to public property and our national heritage. While I agree that the White House needs additional space and a larger ballroom, the current plan is not necessary. Any addition should not dwarf the White House itself. The current plan is excessive and interferes with the White House and its surroundings.

The proposed ballroom to replace the East Wing of the White House is too large. It will take away from the White House due to the fact that it is enormous in comparison. It is a complete outrage that the American people need to curb the voracious ego of Trump because he's trying to create a legacy for himself which he thinks will obscure the heinous actions of both of his presidencies. While it would seem that a larger building was needed to accomodate state dinners, certainly a building which is more to the scale of the White House would be more appropriate. Are any of the items that were in the East Wing going to be placed in the renovation, such as the paintings, chandeliers, woodwork and other elements which not been mentioned in descriptions of the demolition process and outrage about how quickly the East Wing was demolished? Certainly the paintings, many of which were portraits and chandeliers are part of the legacy of the East Wing and belong to the American people. Has there been an inventory of components removed from the East Wing prior to demolition. Are architects or contractors required to consult historical preservation offices previous to demolition? It is a complete outrage that this destruction has occured and if there is no accounting for many of the items, such as art, lighting fixtures, other elements of historic or monetary value, it would cause one to wonder what could have happened to these items. Thank you for your time.

The proposed White House ballroom is an abomination! It is disgusting and sad that the East Wing of this historic site was quickly demolished without any input whatsoever from the taxpaying public. The White House is "The People's

House". The East Wing had existed for more than a century. Shouldn't "the people" have had some say in whether a new 90,000 square foot ballroom is actually necessary, regardless of who is paying for it? Is it truly essential or even advisable to more than triple the capacity that the East Wing provided for? The proposed ballroom will totally overpower the actual White House and would be a gaudy eyesore for generations to come.

I was saddened and appalled at the unapproved demolition of the East Wing of the White House which has been home to U.S. presidents since 1800 and as such is historic.

Since the stated goal of President Trump is to build a 90,000 square foot “ballroom” it will dwarf the current remnants of the White House resulting in totally overshadowing it and destroying any aesthetic compromise.

I would like to see a smaller footprint for the addition that could have some space for larger White House events but also include a dedicated museum regarding the multitude of racial and ethnic groups that have contributed to building and creating the United States since inception. I believe that our diversity is what makes us better.

I hope the final design will be architecturally compatible with the remaining White House.

The proposed "White House Ballroom" will be an architectural atrocity. It completely breaks the elegant symmetry of the People's House and its accompanying wings, and why?

The purported reason is so that events that cannot be accommodated by the East Room have a place to be staged. However, the practice of holding such rare proceedings in tents on the White House grounds is perfectly adequate and does not leave a permanent, gilded tumor of a modern ballroom to destroy the aesthetics of our national treasure for future generations.

Please consider halting President Trump's building plans.

National Capital Planning Commission members,

I am writing to express my opposition to the proposed Ballroom.

The White House and its surrounds are the people's house and should not be changed based on the whims of a temporary resident. Upon seeing the destruction of the East Wing, I was appalled and saddened by the wanton and illegal destruction of this important public building. The fact that the East Wing was the official offices of the First Ladys made the destruction of the East Wing particularly distressing.

The East Wing should be restored to its original exterior dimensions and architectural style. The construction should be achieved with an eye to how the White House and surrounding buildings blend and support each other architecturally and functionally. Given the complete destruction of this important structure, which is the property of the American people, a newly restored East Wing could retain its original shape, be updated to current standards, and made ADA accessible.

The historic Rose Garden, the site of so many important historical occasions, should also be restored to its original appearance.

If a ballroom is needed for state functions, the facility could be constructed elsewhere in Washington, D.C. In fact, the project could bring economic activity to a D.C. location that would benefit from this use of public funds.

Thank you for your attention.

Kathleen Manning

The plan to build a gaudy ballroom that eclipses the rest of the White House, which I will remind everyone is the People's house, not the President's house, is an abomination. I object to this plan in the strongest terms. The President has shown absolutely no regard to history, or architectural taste, with the slap-dash destruction that he engaged in, on his own, without the input from any other Americans. I strongly suspect he broke the law with his destruction. I strongly expect he exposed people to toxic products since there was no apparent effort at asbestos containment. I therefore demand as an American citizen that the East Wing be restored exactly as it was, and I demand it be at the sole expense of the man who destroyed it. I also demand that he face liability for his destructiveness, whether that be criminal or civil.

Hello,

I really appreciate the opportunity to comment on this proposal. Separate from the fact that demolition was started before this process was underway, I want to express my belief that the East Wing Ballroom that is proposed should not happen. I have no resistance to Modernization, however it must be done within the walls of the existing building. As a resident of the DC area for over 40 years now, the image of the White House has always been the main building. The proposed East Wing building will take a way the traditional image of the house and instead turn it into the East Wing, with a white house attached to it.

I do not want my tax dollars to go towards this project. Rebuild the East Wing as it was before it was illegally demolished. There is plenty of ballroom space near the White House both large and small that can accommodate parties of any size.

Thank you for the opportunity to comment.

I write as an academic with advanced degrees in art, history and culture studies. I have been an academic for over 25 years. I also have restored 4 historic structures, both residential and commercial, following the long established guidelines shared by local, state, and national professional organizations. Further, I am a long standing member of our local Historical Commission which oversees various applications for changes or improvements to buildings.

With my strongest voice I condemn the ill conceived destruction of the East Wing of one of the country's most beloved and known structures. Further I condemn the outsized and dominating proposal for a ballroom at the White House. This work has adhered to no known building or historic review, permitting, or planning. This work its totally inconsistent with the character of the 'People's House" and should be halted immediately. The concept, scale and proposed finishes are an abomination and if executed, will be a permanent scar on our capital city's beauty.

When one person proceeds in such a manner in even small towns, the building department would issue an immediate stop work. order. No one should be above the law or broadly accepted society standards without consequences.

Stop the permanent distraction occuring at the White House.

Respectfully,
John L Thompson

I am not in favor of building a colossus ballroom as part of the White House. It doesn't speak the right message that we want to present to other countries. 44 previous presidents didn’t see a need for a larger ballroom to entertain dignitaries. The ballroom should not change the overall look of the historic White House building. US leadership do not need a building that looks like what kings would use - we are a democratic country. the white house is the people’s house and the people of the US are humble and the house should reflect that. Further, I am not in favor of removing the First Lady/Man's offices as part of the renovation to that part of the building. They should be respected for the work that they do as part of the couple in the White House.

I am concerned about the illegal demolition without permits or oversight or with respect to the safety or workers or humans within the area of demolition which likely contained asbestos, the disproportional and inappropriate scale that will dwarf the historic building, the White House, the violation of historic preservation principles, a lack of transparency in funding and contracting which allows fraud and “quid-pro-quo” favors to be aligned with “donor” funding of the project, the legality of whether a building funded outside of the federal government funds is eligible to be owned and operated by the government, whether the physical and cyber security protocols and standards which are required for federal buildings (especially those which are physically near the White House will be upheld and inspected as being sufficient … and who says that the federal government needs to be in the “Event” business anyway? Have taxpayers or Congress allocated funding to support the ongoing operations of such a facility with meals and security and furnishing upkeep?

All represents the fundamental miscarriage of federal property construction, historical and safety compliance.

The proposed East Wing ballroom building project is grossly out of proportion with the Historic White House complex. The new building overpowers and unbalances the White House from the north,east and south sides especially. The destruction of the Jacqueline Kennedy Memorial Garden is tragic. The proposed replacement south landscaping destroys the symmetry plan as envisioned by Pierre L’Enfant for the new city of Washington. This is the people’s house and should

be treated accordingly. Having qualified architects, historic preservationists, and knowledgeable historians is crucial as is allowing sufficient time to ensure an historically correct change as significant as this proposal. The loss of the historic magnolias that anchored the east corner is also thoughtless and tragic.

I vehemently oppose this project; it should frankly be canceled. Not only did the administration start it without the appropriate (and required) authorization, permits, or design review steps, but it's an absurd waste of so much money at a time when so many US citizens are struggling financially. This is a vanity project to placate one man, Donald Trump, not a modernization project. Moreover, he had an architectural component of American history illegally destroyed. Instead of building a monument to Trump's ego, focus should instead be on the complete and meticulous restoration of East Wing to its former design. The proposed ballroom to replace the East Wing of the White House is too large. It will overtake the graceful composition of the home of the president of the United States that the former East Wing offered.

The need for such a large and pretentious ballroom has not been justified.

The demolition of the former East Wing was done without approval or proper planning and approvals.

The funding for the project is suspect, subject to corruption. Private donors will expect favors from the government, as has already been observed with donors to the presidential inauguration.

I urge you to reconsider any approval for such a project.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. The cost of rebuilding and restoring the East Wing should be paid through the private funds collected to go towards the previously proposed ballroom.

I object in the strongest possible terms to this ill-advised and illegal project. To allow this travesty to go forward without the statutorily required permits and authorizations is an outrage, not to mention a waste of hundreds of millions of dollars on an unnecessary “modernization” that erases a vital part of our nation’s history. It should be stopped immediately.

I oppose the East Wing Modernization Project.

This project began without required National Capitol Planning Commission approval, without environmental assessments mandated by the Environmental Policy Act, and without congressional authorization required by federal law for construction on federal parkland in Washington.

The $400 million cost is funded by corporations holding billions in federal contracts with the administration approving these contracts. This creates an unacceptable conflict of interest.

The White House is not private property. It belongs to the American people. No president should have unilateral authority to demolish historic structures and approve construction without following the law and allowing public input.

I urge the Commission to reject this proposal.

Thank you

No matter how many laws or buildings are broken, trashed or destroyed, you cannot re-write the history of the United States. We, the people, do not need or want a ballroom in the people's house, i.e. the White House. It is insulting and appalling that $300 million of our hard-earned money was spent on this unlawful project. Laws of our nation must be followed. This project must be canceled, with the East Wing restored to its original design as approved by historical architects, and with the proper design review and permits.

I am very much opposed to the East Wing Modernization Project. The destruction of the existing East Wing was done without authorization or review. I oppose the current plan (such as it is) to build a ballroom to replace the East Wing of the White House. The East Wing was demolished without proper authorization or a clear, well-conceived plan for the proposed ballroom. Instead, the current POTUS intends to build a massive structure which would dwarf the current White House which he then plans to expand upward in order to compensate. Where does it end? And how much more taxpayer money is going to be diverted from projects that will actually benefit the American People in order to indulge Donald Trump’s vanity projects?? He seems to forget he is a TENANT not an owner of that house. Either scale back the ballroom or rebuild the East Wing and he should not be using ONE PENNY of taxpayer dollars to do any of it!

Dear Committee Members,
I'm writing this today in pain and sorrow for not only loosing our historically important East Wing of the White House. It's very difficult to understand how this administration can justify tearing down an entire structure like that, by presidential edicts alone, without proper authority or oversight. Please stop the ballroom construction, if it's in your authority to do so and recomend to Congress to have them rebuild the East Wing, from the original blueprints and to it's original footprint to include Solar Panels for both the White House and the East Wing. My wife and I feel very strongly about this distruction and are move emotionally, almost to tears over this! Thank you, in advance for your considerations.

I support the ballroom project because it is needed as an alternative to temporary tents outside. The new space can be used for a variety of functions where large crowds are being hosted. The White House has been remodeled in the past, so there is ample precedent, contrary to what critics say: this is not a desecration of a historic structure. It is being funded through private donations, although taxpayer resources would be entirely appropriate, in my view. To object at this point, when construction is well under way, would undermine the credibility of your commission as a nonpartisan agency.

I think the plans to add a ballroom to the East Wing of the White House are antithetical to everything the White House stands for. I don't think a massive ballroom is necessary in the White House, and the plans speak to a level of grandiose thinking and excessiveness that does not represent us as a country. I don't want my federal tax dollars to support such an unworthy investment. There are so many better things to spend our money on than an unattractive, gaudy, unnecessary ballroom that is outdated and serves no practical purpose. I urge the Planning Commission to block these plans.

I am writing with deep concerns about the illegal demolition of the East Wing of the White House without permits or oversight -- an action that alone should be enough to halt this process immediately in favor of a long-term review. Moreover, the new design for this "ballroom" is absolutely inappropriate in scale. The design will dwarf the White House -- taking the central symbol of the American republic and shrinking behind a tacky ballroom addition. The Administration has violated historic preservation principles and the entire process has lacked any transparency. This project is an outrageous overreach by the President.

I strongly object the expenditure on the new ballroom. I object to the acceptance of a design of its rebuild as well. There needs to be a proper process for which this wing is designed that represents our history, not honoring a single person, but our history and heritage. The old ballroom should have never been torn down without proper process and agreement, and funds agreed to. We have things that need resources, much more than we need a new ballroom. I see no urgency to complete this project in the near future.

My heart is still breaking over the unannounced and illegal demolition of a part of the White House, the People's House, the East Wing which also held a significant place for the history of women in our government. How can it be that this building was allowed to be bulldozed without any permits, and without any design review?! It is symbolic of what this current resident of the White House is doing on every level to our society, our government, our culture. He is a TEMPORARY RESIDENT and he is treating the building as if it belongs to him, which it does not. I oppose the spending of $300 million on this project. Donald Trump is a temporary resident of the People's House. Despite what he thinks or says, he serves at the pleasure of the citizens of the United States. By tearing down the East Wing, he destroyed history against the will of the people. The people want jobs, better wages, housing, and healthcare, not a wasteful vanity ballroom for a man's ego. It's insulting to the people to spend enormous amounts of money for something that only the rich and powerful will ever use, hosting Gatsby-esque parties while we struggle. It is quite disappointing to learn today that the Commission on Fine Arts, composed of mainly political appointees without art experience, has approved the White House ballroom project, which is not modernization but actually a

destruction of American history.

I ask the NCPC to please not appprove this project. Destroying the East Wing was done without required approval. It should be rebuilt and restored to its former design. However, if a new ballroom is to be built, it should be far smaller and go through Congressional review, to ensure transparency. The private donors who are supposedly funding this project with $400 million dollars will expect favors from the White House in return. For these reasons and many more, such an ill-conceived addition should not be approved by the NCPC.

I adamantly oppose a 90,000 sq foot ballroom addition. While additional event space may be needed, any buildings

placed on the site of the East Wing - which was demolished without appropriate approvals - must be done in scale with the White House. This addition must not dwarf the White House as the current plan would have it. It is also imperative that any new build replace the functional space that was removed with the inappropriate demolition of the East Wing.

The White House is the People's House. It is not a palace, nor meant to be one. It should not be adorned in gold as a palace would be either, and that includes any new build.

I am a 68 year old disabled navy veteran who feels that this president has no care, candor, or a true and honest executive vision for all citizens of this country. Quite the opposite, he prefers a Kakistocracy where expertise, experience and dedication are scorned. Witness the mass resignations on multiple levels in all departments of government, hollowing it all out, destroying our system from the inside with cronyism leading the hive minded debacle. This project, in my opinion, is just another of the numerous pay to play scams this person and his subordinates are engaged in. Distractions, lies, rigging the board overseeing said project with political hacks, along with the untold number of worldwide bad actors involved in this despicable scheme. Just another scam from a person who, in my opinion, hates more than serves, lies instead of providing facts, proving that not only is this "project" a base defilement and unneeded desecration of The People's White House, that he is, in fact as well as deed, unfit, unqualified, unhinged and just plain evil. I take no pleasure here, and pray that someone in authority will terminate this post haste. Thank you for your time. Respectfully, Patrick Anthony.

We should restore the East Wing in the same style and scale as it was, and with the same placement with relation to the West Wing. Construction should include functional updates that bring it up to code and modern standards, including ADA accessibility where possible. If a larger ballroom is needed, construct it elsewhere in the city or use other nearby public spaces. Do not allow special interest funds to influence or pay for the rebuilding.
The White House is the People’s House. It was deliberately designed and built with modest dimensions and restrained aesthetics. It is not a Palace for a King.
BEFORE nationally significant places are permanently altered, the public deserves an opportunity to help shape the decision. We should follow past process for making needed but historically sensitive changes.

Restore the exterior dimensions and architectural style, update wiring etc. and make interior ADA accessible where possible. Follow past process for making needed but historically sensitive changes.
If a ballroom is needed, construct it elsewhere in the city.

It is my opinion that the massive ballroom being proposed does not fit with the historic nature of the site and should not be be part of the White House grounds as designed. It has been pushed through by the whims and desires of a single individual. The White House is the People's House and major changes should be carefully thought through by a non-partisan panel of independent experts in history, architecture, and related fields.

The two main issues about the proposed White House ballroom design appear to be its size and relationship to the historical aspect of the overall structure. Although the focus is on attaching a ballroom to the house, building the ballroom in a different location seems like an obvious and excellent solution. The White House may have historically served as an “all purpose” structure, but it is perhaps time to move beyond this idea.

There is clearly not enough room on the grounds for the desired size of the ballroom. As proposed on this site, it will be absolutely squished into the space. Jamming a ballroom into this setting will make it difficult to view and appreciate. The proximity of the old and new sections will diminish both parts. The result will resemble a Greek temple stuck onto an old house - not an elegant solution. And although I do not have the expertise to determine this, I imagine that designing within the space limitations has detrimentally affected design choices, making the structure inadequate in other ways.

Building a dedicated Presidential/National Ballroom in a different location will create an opportunity to build a new East Wing that respects history and enhances the White House overall. Everyone has their own personal taste, but in matters of historical taste it is best to hire experts in the period rather than referring to our own ideas about what looks good. A new East Wing that is refreshingly and seamlessly historical in design, with hidden modern features, would be a wonderful way to celebrate the 250th birthday of the nation while also being a truly substantial contribution to the White House.

I am opposed to spending any money, private or public, on this ego ballroom which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of the White House as The People's House. I would like to see this project canceled, and the East Wing rebuilt and restored to its former design. Continuing with this project amounts to rewarding criminal behavior of those who think they are above the law. The American people deserve better.

I oppose the destruction of the East Wing of the White House and the building of a ballroom at the White House. This project has been initiated with complete disregard to preservation laws, procedures and policies. These laws, policies, and processes are in place to protect our natural, historic, and cultural resources. This project was initiated without proper authorization, permits, or required review and approval processes. I want this project stopped and the East Wing rebuilt to match its historic design. In addition, those that disregarded laws and regulations regarding the funding and implementation of the project need to be held to account.

It's misleading to refer to the razing of the East Wing as a "modernization project." This is an unlawful, unauthorized, unpermitted, and unreviewed destruction of American history.

I oppose spending $300 million on this project. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one, including the President of the United States, is above the law.

To permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

Anara Guard said it best, and I am quoting them here, with full agreement: "I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans." As for my personal comments on the project: the "modernization" of the East Wing is nothing more than a delusional, self-congratulatory, gilded turd. The current administration is a dangerous and criminal laughing stock, run by a senile clown who continues to break the law, defile the constitution, federally fund executions and disappearances, and (probably) masturbate into a huge pile of cash. This country was built by immigrants. This government was founded on freedom and the inalienable rights that all humans possess. The White House sits as a physical reminder of our history, and to demolish any part of that building with such self-righteous disregard in order to coat it in gold paint and use it to host parties for billionaires is akin to personally running a ship aground, stealing all the lifeboats, and laughing while we all drown. I applaud the efforts of The National Trust for Historic Preservation in collecting our comments and (hopefully) being able to put a stop to this project. In terms of our nation's biggest concerns, it's true that this is lower on the list than the violence being committed in our streets and the criminal activity of the current administration, but dammit, this is important too. The American people, the true patriots,

will continue to fight for our rights, our freedoms, our neighbors, our communities, and yes, our historic buildings. Thank you.

I vociferously oppose the planned ballroom that would be built on the site of the illegaly demolished East Wing of the White House. None of the appropriate discussions and considerations were allowed before the demolition. This is an out of control president acting like he owns the white house and can do what he wants with it. He has a short lease as the white house tenant. A tenant does not make renovations on a house he does not own. This is an insult to the American people. Thank you for your attention to this matter.

After finally getting to visit the East Wing of OUR White House in April 2024, and appreciating the history embodied in the site and position of US President, I am profoundly disgusted by the illegal destruction of OUR historical property. The White House and its property belongs to the citizens of the United States, not the current resident. This unannounced destruction is an egregious display of zero respect for our country's history, our equal branches of government, the law, and the DC area's people.

There are PLENTY of venues in DC where large gatherings are held. Presidents before him have managed with no complaint. The current administration should have to restore the East Wing to its former architecture and pay out of their pockets -- let the billionaires who tried to buy influence pay for it. And open it back up the the public.

A question that begs attention:
WHERE ARE THE HISTORICAL ARTIFACTS THAT WERE ON DISPLAY FOR THE PUBLIC?

I am opposed to this renovation project. It is too expensive; it has no value to the US American people, it is just a vanity project for President Trump, it adds no value to the White House. It was not approved prior to demolition. There was no ability to submit bids and designs for this project so that it was not just another grift project. There is no clear direction and designs for this project. While I appreciate that the White House is an ever changing and evolving facility, there

should always be guidelines driving that change and evolution, not the vanity whim of someone who is ELECTED for 4 years.

Donald J. Trump, President of the United States, is an invited "Guest" at the White House. The White House belongs to the People of the United States, having been built and paid for with taxes paid by the public. Donald Trump, although an invited guest onto property not belonging to him, has willfully and maliciously caused damage on White House property. The homeowner (the People of the United States) may now sue to recover damages. Damages shall not be paid by others , thus relieving Donald Trump from responsibility for damages caused by Donald Trump. The Homeowners of the White House are the tax-paying human population of the United States. Changes and maintenance of the White House may require construction via review and permission by the National Trust for Historic Preservation. Bulldozing and removing large or small portions of the White House are not "preservation." Numerosity, Commonality and Standing might allow a future Class Action case against Donald J. Trump. He was a guest on the property owned by the People of the United States. The East Wing must be replaced, architecturally similar to its previous design.

I oppose the building of a ballroom as a replacement for the previous East Wing. I oppose the proposed ballroom being paid for by any person, organization, government, country, other than Donald J. Trump personally. Donald J. Trump may be sued for the damage he caused.

I oppose this project! It began without requiring NCPC approval, without environmental assessments mandated by the National Environmental Policy Act, and without congressional authorization mandated by federal law. Architecturally, the inappropriate scale would dwarf the White House. The $400 million (and counting!) cost is funded by corporations

holding billions of federal contracts, with this administration approving those contracts. This is a fundamental miscarriage of democratic principles and must be stopped immediately.

I am horrified at the President's lawless action in changing and demolishing parts of the White House without review, without permits, and without Congressional oversight. The White House is a National Historic Landmark and a National Park. The American people own it. No president owns the property or its buildings. I ask the National Capital Planning Commission to require the reconstruction of the East Wing to maintain its historic design match the style of the original structure.

I'm not in favor of this project. I want the East Wing of the White House rebuilt as it was in January 1, 2024. It was a waste of money and time to destroy such an historic structure without permission or plans submitted. It is the People's House, Trump is only a temporary resident as has been every President since George Washington. He had no right as a tenant to demolish or remodel any part of it without permission of We the People through the procedure set aside for this purpose. Is it is a huge waste of time, money, and resources. Put it back the way it was!

The White House is the PEOPLE’s house and has great historical significance for our country. The president cannot tear the entire East Wing down on a whim in the darkness of night with no accountability. The president is not a king. He has the PRIVILEGE of living and working in the White House while he is the president. His residency is temporary. The White House is one of America’s most significant historical buildings. How the president got away with tearing the East Wing down without going through any oversight process is an abomination. Now that there is a gaping hole left where the East Wing once stood, The president should not be allowed to begin construction on a replacement for the East Wing without mandatory approval from a nonpartisan historical preservation review board which is not just filled with his political hacks and cronies. The current proposed plan is way too large and dwarfs the current White House, which should be the primary structure and focus of the complex. No construction should be started without input and approval from an historical architectural preservation organization like the National Trust for Historic Preservation. The design and construction of a new East Wing is not a fleeting project like a ballroom at a country club or an event venue. How we got to this point is an outrage. We need thoughtful and careful design and planning commensurate with the awesome historical building that is the people’s house.

I want this project canceled, and the East Wing rebuilt to its former design at the persoal expense of those who tore it down. This project - along with the destruction of the Rose Garden - is a razing of American history and an affront to The People's House. No temporary occupant of the White House has the authority to significantly alter the structure or grounds, especially without going through the proper channels of authorization, permits, or design review.

Further, I would like there to be an investigation into the legalities of the entire process from the claim that work permits were not required all the way down to the contractors proceeding with the work of razing the East Wing without approved work permits. This entire thing stinks to high heaven.

I'd love to comment on the idea of that blasted arch, but will save them for the proper time and place.

The rules and regulations for this type of project were not followed and demolition was done on a whim of Donald Trump. The demolition should never have been allowed to proceed. The proposed addition is completely inappropriate both historically and aesthetically.

The whole project, how it was started without the proper reviews and the design will reflect poorly on the United States as Washington DC and specifically the White House are representative of our country. This project will show we are not a democracy that follows the rule of law but is governed by an authoritarian ruler who thinks he is above the law.

I strongly oppose this project to dwarf the White House itself with this ballroom project. This proposed “addition” will cause the White House itself to appear small and insignificant. This is an awful look for the seat of the powerful head if our wonderful Republic. The East Wing was demolished without consultation of the proper authorities, began in secrecy and was presented as a fait du accompli to the American people. First, I am concerned about the demolition of the East Wing before all formal architectural reviews and procedures could be followed. This should not happen with any historic structure, let alone one of the most important of historic places in our country. I also, question the necessity of having an official grand royal-style ballroom for our great republic. A project this big should get prior approval from Congress before moving forward, and be reviewed by proper architectural and historical review committees and organizations.
Personally, I believe that the proposed structure is not appropriate in that it takes away from the most important element, which is the White House itself - the "People's House." If indeed, the current administration feels the absolute need for such a structure, and the Congress approves, I think it would be more appropriate for it to be placed in a nearby area, and not directly on the National Mall.

As a person who restored a house built in 1740 in Amesbury Massachusetts, I have great respect for the craftsmanship and traditions associated with older buildings. The demolition of the White House East Wing was a desecration. Even if the building had limitations or was too small for its current use, total destruction was not the proper answer, I wholeheartedly support rebuilding it to look as it used to look from the outside, while redesigning the interior to allow more contemporary use. Please do not allow any other use for this site.

To this I would add that I proudly served for over ten years on the Framingham (Massachusetts) Historic District Commission as Secretary and then Chair having, prior to that, worked on the Cultural Resources Inventory and Massachusetts Historical Commission reports that expanded both of Framingham's historic districts. The work of so many appointed office holders and volunteers was hard, thorough, and took many years to make sure the preservation of the local historic architectural fabric was secured. Too much was already lost in the blink of an eye, with a bulldozer, with wrong-headed changes and willful disregard of not just heritage but of the law.

Now this has happened at the White House, "The People's House", and for the exact same reasons. Once something historic, never mind totemic, is destroyed it is not only gone, it leaves a scar. The Trump administration has done enough damage. Please, please stop this predation on national icons and heritage. Restore the East Wing. Prosecute the responsible parties to the full extent of the law. Thank you.

I do not approve of the proposed $300 million ballroom for the White House. A ballroom is not a necessary part of the White House. First of all, the east wing was torn down without anyone's approval. The destruction of the existing East Wing without input shows a shocking disregard for the story of the White House and its ownership by the American people. Buildings, even historic ones, need to evolve with time but changes should always be done with respect for history and for the people.

To whom it my concern,
The White House is an historic building and as such is not to have its exterior altered.
Yet this is what is happening as the President wishes to build an expansive ballroom where the East Wing was.
This is not right as it is not HIS house but belongs to the American people. Please do not allow this to continue.
Thank you for your consideration of this matter.

I opposed tearing down the East Wing. I feel the companies that destroyed the East Wing should face fines and be forced to reconstruct the East Wing brick by brick to the original historic standards. The White House is a historic building that this administration is only occupying for a limited time. They are renters and had no authority to destroy this part (or any part) of the White House.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. As the owner of a historic home and as the leader of Preserve Burbank in Southern California with a degree in architecture, I am appalled at the destruction of the East Wing of the White House. The White House is the People's House and Donald Trump is merely a tenant. If a renter ever destroyed an entire wing of a property, the owner would have them put in jail. This is desecration, not modernization. The East Wing already had a ballroom and the need for a room that would seat 1,000 guests is absurd. Form follows Function. This is an ego project being rammed through by the least popular president in modern history.

The East Wing should be restored to its original footprint and exterior facade. Any interior remodeling/modernization should occur within the original style and dimensions of the original. All costs for the repairs should be borne by the president himself and not by donors. It is not his house. He should be treated like any other vandal who destroys property.

I wholeheartedly object to the desecration that was enacted on the People's House without care or authorization. I do not want taxpayer dollars spent on a monument to one man's ego. This country does not need a ballroom. I mourn the history that was lost and destroyed. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law. To permit this project without penalizing those who broke the law would be an affront to all law-abiding Americans and would greenlight what amounts to blatant vandalism.

I am appalled that "The People's House" has been demolished for a vanity project, and paying for it with bribes from the wealthiest makes the project more appalling, not less. To tear down the East Wing, which has been the public-facing side of the White House is an expression of contempt for the people of the country, and a declaration that this administration is only interested in providing access to the wealthy few. To ignore the law and established process to demolish public property is a crime, and the cost to restore the East Wing to it's former beautiful and useful state should come out of the pockets of those who chose to destroy it without permission.

As a former advisor to the National Trust for Historic Preservation and life-long advocate for the care and conservation of national, state, and local cultural heritage, I oppose this project, which started without proper authorization, permits, or

design review. It is NOT a modernization project but a COMPLETE ERASURE of American history. Please cancel this project -- don't let it go forward. Rebuild the East Wing, restored to its historic design. No one is above the law. To permit this project without penalizing the person who broke the law demoralizes the good people of this country who respect law and regulations. Make him pay with his own money to rebuilt and restore the people's house.

I was born in this country and have lived here 78 years. As a long-time citizen, I oppose this project, and believe it should be canceled immediately. The cost ($300 billion) far outweighs the usefulness of the proposed facility, and since it was undertaken without the appropriate authorization and without following the proper protocol to obtain authorization, it should never have been initiated. This country has been successful for 250 years, and a large part of that success is due to the checks and balances system that was put in place at its inception. To abandon that system now would irreparably damage our future as a country as well as damage our reputation as a world leader. Thank you for providing this avenue for the people of this country to express concerns regarding this and other plans for the National Capitol.

I would like to request that the East Wing be rebuilt to its former state. This is clearly not a “modernization” but instead a complete pave-over of American history and tradition. It is shameful that the East Wing of the people’s house was able to be lawlessly demolished with no approval or appropriate planning for what is to take its place.

Rebuilding the East Wing as it stood before is the least that can be done to repair this travesty.

Thank you,

I am against what this administration has done to the people's White House. It is not a "modernization", but a complete gutting/razing done with no thought to our legacy of carefully researched and planned historic preservation. This is an affront to the citizenry of America - to carelessly demolish the facade of one of our most beloved national treasures, while exhibiting no respect to adhere to the legally required steps needed in the process. Not to mention the ballooning cost - how disheartening.

It certainly looked like the unbalanced toddler had a fit after the ground breaking No Kings march and simply demolished the White House in a fit of rage. He had no right to do that! NONE.

That enormous ballroom would look awful!

If we had laws in America it would seem logical he should rebuild exactly what was there with his own money! How much of our tax money is he and his corrupt regime wasting? They spend our money to party! While healthcare and the EPA have been gutted. This is sickening and he should be held accountable for a change!

I am writing out of concern about the White House ballroom project because of its unpermitted, rapid demolition of the historic East Wing, its massive scale overshadowing the existing mansion and a lack of transparency regarding $400 million in private funding.
The White House is owned by the American people and as one of those citizens, I expect that any project undertaken will be done in a way honors the exceptional historic significance of the White House and acknowledges the investment that the American people have made in the preservation of this beloved place. I don't believe in spending an inordinate amount of money to put in a ballroom that the majority of the citizens of the United States will never set foot in. I think destroying what was already there is sad and unfortunate. We don't need a ballroom, we need to provide for our citizens so we can all have a better life. A ballroom does not house the homeless or feed the hungry or heal the sick.

I write to express my opposition to the proposed White House ballroom project.
It has been widely reported that demolition activities affecting the East Wing commenced prior to the formal submission of plans to the appropriate review authorities and without clear legislative approval or oversight. In addition to the serious historic preservation and architectural considerations at stake, my principal concerns relate to transparency, process, and accountability.

According to reporting by the Associated Press, public comments submitted to relevant federal commissions were overwhelmingly opposed to the project. Furthermore, the identities of prospective donors and the specific funding mechanisms have not been fully disclosed. The absence of this information raises legitimate questions regarding potential conflicts of interest and the extent to which private interests may influence decisions affecting a nationally significant public asset. Even where private funding is proposed, rigorous safeguards and full transparency are essential to maintaining public trust.

Proceeding with a substantial, privately funded expansion of the White House without comprehensive review, clear legislative authorization, and meaningful public engagement risks establishing a troubling precedent. Decisions concerning federal property—particularly a site of profound historical and symbolic importance—must adhere to the highest standards of transparency, accountability, and respect for established oversight processes.

For these reasons, I respectfully urge careful reconsideration of this proposal.

The White House is a National Historic Landmark and National Park, owned by the American people and stewarded by the National Park Service. No president should have the power to unilaterally and without public comment, tear down an entire wing of the White House. The design for the building to replace the East Wing as presented by the White House is entirely inappropriate for a modification or replacement of any portion of this historical building. The planned building is so large that it will destroy the pleasing symmetry and proportions of a national landmark loved by all Americans. Please reconsider the entire project and insure that any new construction will blend comfortably and esthetically with the existing building.

To call this a "modernization" of the East Wing is misleading - the administration has admitted the East Wing was razed to make room for an unnecessary "ballroom". Modernization implies updating a standing structure, not demolishing a standing structure and replacing it with an unrelated building.

There is ABSOLUTELY NO REASON to build a gilded "ballroom", this is not the "palace of Versailles", we don't have a medieval king that wants to show off their riches to other monarchs.

Return it to it's original appearance!

President Donald J. Trump broke the law when he demolished the East Wing of the White House (and also when he paved over the Rose Garden). He doesn't have the legal authority to make demolition of or renovations to the White House. He doesn't own it. The People of the United States do. This is a devastating misuse of power. I fervently and adamantly oppose the proposed ballroom construction, and the demolition of the East Wing, at the White House.
Both projects were undertaken illegally, without proper notice or practices. This was done to the People's House, without input from, or consideration of, the people of the United States. I oppose any and all changes to the White House made by this administration. It is unwarranted, unprecedented, and absolutely improper.

I request the following:
Cease and desist any demolition, construction, or "renovation" on any part of the White House.
Rebuild and restore what was demolished (East Wing and Rose Garden), in what can only be described as an erasure of our history and institutions.
Ban and block any future attempts or plans to significantly alter the structure, fabric, and integrity of this historic building and symbol of our country.

Thank you for the opportunity to comment. Setting aside my belief that any demolition of the existing structure should have been part of the proposal for a replacement project, I set forth my opinion of the proposed replacement of the East Wing structure. I view this proposal as a violation of the Secretary of the Interior's Standard #9 of the Standards for Rehabilitation: New additions, exterior alterations, or related new construction will not destroy historic materials, features, and spatial relationships that characterize the property. The new work will be differentiated from the old and will be compatible with the historic materials, features, size, scale and proportion, and massing to protect the integrity of the property and its environment.
The proposed structure is far too large in size and scale and blows out any sense of proportion to the White House and the existing West Wing. The proposed structure screams lack of respect for the White House and the integrity of the entire site. I am confident that an architect who understands historic sites can come up with a proposal that respects the site, satisfies Standard #9, and provides a larger space for a ballroom that is believed to be necessary.

I think it's horrendous and illegal that a huge peice of The People's House has been TORN DOWN without any consultation from the entities whose job it is to preserve and protect the integrity and heritage of The White House. This building belongs to the American people, and they have a right and obligation to have an interest in its disposition. Allowing Donald Trump to literally destroy the White House to build a personal vanity project to his own ego is an absolute disgrace to the United States. The White House is a National Historic Landmark and a National Park, owned by the American people and home to presidents since 1800. The current president at any given time is not the owner of the property or the structures thereon; the president is a temporary tenant whose interventions are limited by law and by respect for the people of the United States.
The demolition of the historic East Wing without review, without permits and without Congressional oversight is clearly a violation of the law. In addition, it is a violation of the trust of the American people who were given no opportunity to comment on what should have been presented as a proposal and not as a violent fait accompli.

I urge the National Capital Planning Commission to require reconstruction of the East Wing in keeping with its historic design and size. Anything constructed on the demolition site going forward must be compatible in form and subordinate in scale to the original structure of the Executive Mansion.

Name: Stephanie Andrews
Date: February 19, 2026 4:26:38 pm

A project of this scale and significance deserves a thorough, transparent public discussion before moving forward. Decisions involving historic buildings and substantial public funds should reflect bipartisan input, careful design review, and full compliance with established legal and permitting processes.

Rather than proceeding in a way that feels rushed or insufficiently vetted, the Commission must fulfill its responsibility to honor the historical significance of the East Wing and reflect broad public consensus in whatever changes are made. This is not simply a question of modernization, but of stewardship — how we preserve and respect our shared history while considering any necessary updates. Without a more considered process the changes will be challenged and potentially redone to satisfy the next political actor.

A project of this magnitude should move forward only after robust debate, lawful authorization, and a design that reflects both historical integrity and bipartisan support.

This unplanned, unpermitted, unauthorized destruction of an entire wing of the peoples' White House must stop immediately. We do not need this grotesque "ballroom" which would dwarf the size of the original structure. The fact that it is being paid by murky third parties- probably companies which do business with or stand to benefit from federal spending or priorities- makes it even worse, smacking of corruption.

It is not a modernization project but rather a complete razing of American history. I am a AP US history teacher too and I am horrified at what happened to our public house... this house is owned by the people. Also on a personal note I remember going into the east wing when I was a kid for the xmas tour and it is all gone... right now I may never be able to bring my son to experience the same magic of Xmas Whitehouse tour...

I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

The modifications to the East Wing of the White House are an abomination. They were initiated without consent and desecrated our People's House without the proper authority. The plans for this improvement are obscene and take away from the role the President has as a temporary one, with limitations on his authority to make such changes to the structure. The existing East Wing should not have been demolished without proper consent, nor should the current ballroom plans be constructed. The East Wing should be restored to its former footprint.

I have visited the White House and East Wing, I went with my family. I am often in DC and drive past the White House. This is a sacred place for Americans. No president owns this house, any changes must involve the owners, the American people. And yet, the East Wing was bulldozed and a new building almost double the size of the White House now planned. The proposed building is too big. It dwarfs the white house. And if it is to be done in the style of the renovations of the White House, not appropriate as a representation of our country. I graduated with an architecture degree and have worked in art and design all my life. I strongly object to the proposal, the poor communication about this project (which on the official website now says 650 seat occupancy although in the meeting the architect said 1000) and especially the lack of consideration before the East Wing was torn down.

This grotesque, ill-conceived and architectural abomination must be cancelled. The public still not being provided with complete, finished plans. The process of funding is being concealed from the public, with a slush fund administered by the Trust for the National Mall refusing to release all information on donors, amounts, application of funds and who exactly is running this slush fund.

This proposed addition to the White House, a public building, has not followed protocols, not respected the architectural and artistic communities and not sought public input. It has been a disgraceful process and must be halted.

The plans shown to the public in no way enhance the 1800 White House building-balance, proportions, style, massing, finishes all are at odds with "The People's House" aesthetic.

I share the sentiment with millions of Americans that this project must be halted.

Just as Washington DC's National Mall captures and honors our shared American history, the White House and its outbuildings are the visible representation of our American leader. Just as American independence shook off the trappings of royalty and majesty, the People's House must be returned to its simple, honorable, and classical architectural beauty. Americans do not need, nor want, a Versailles-esque monstrosity erected to satisfy the ego of a vainglorious huckster.

We oppose the current East Wing White House Mondernization Project.
This project began without required approval by the National Environmental Policy Act, or NCPC approval and without congressional authorization required by federal law.

The White House is the peoples house, it is not private property. No president has unilateral authority to demolish historic structures and approve construction without following the law and allowing public input.

The disgraceful pillaging of the White House (the peoples house) highlights the contempt this administration has toward its citizens, the rule of law and our government.

Private funding does not appease the concern of the illegal destruction of our cultural heritage sites.

We urge the Commission to reject this proposal.
Sincerely,

I want to express my concern about the East Wing Modernization Project. I’m personally very alarmed that this project did not follow the rules for proposed demolition and construction. The demolition was complete before allowing for the proper vetting of the plans. Overall, I feel the immense size of the proposed new ballroom is completely out-of-proportion compared to the White House. This new construction should have been compatible with the existing size, scale and features of the White House.

The White House belongs to the people, not to one individual nor to one President. I really hope this project will be reconsidered.

The recent demolition of part of the East Wing to make way for Donald Trump's proposed ballroom is deeply troubling and has sparked legitimate outrage across the nation. The White House is not a disposable venue for personal ambitions—it is a living historic symbol of American democracy and the collective heritage of the American people. To see sections of that building already torn down for what amounts to a luxury addition provokes widespread anger and disbelief.

This was not a simple renovation or necessary structural repair; it was the erasure of history. Portions of the East Wing, which had stood for generations and reflected the evolving story of the presidency, have now been lost forever. Preservationists, historians, and everyday citizens are right to feel betrayed: once that physical history is gone, it cannot be restored. The demolition signals a disregard for the architectural integrity and historical continuity of the presidential residence.

Beyond the cultural loss, the optics are infuriating. In a time when many Americans are struggling with economic uncertainty, healthcare challenges, and deep national divisions, allocating enormous resources to raze part of a historic building for a lavish entertainment space feels tone-deaf at best and self-indulgent at worst. This is not about hosting dignitaries or state occasions—it's about reshaping a national monument to fit one individual's vision.

The outrage is not merely emotional; it is grounded in principle. The White House belongs to the public, not to any single president or administration. Its preservation should be safeguarded with bipartisan commitment, not traded for a vanity project that will forever alter the historic fabric of the structure.

In light of the demolition that has already occurred, it is imperative that Congress, independent preservation bodies, and the American people demand full transparency, accountability, and an immediate reassessment of the project. There must be consequences for the irreversible loss that has taken place—and safeguards put in place to prevent future dismantling of our shared heritage for personal or political ends.

The demolition has already happened. The outrage is justified. And the defense of our history must be unwavering.

I am writing in strong opposition to the proposed 90,000-square-foot ballroom expansion at the White House.

The White House is a National Historic Landmark and one of the most recognizable symbols of American democracy. It is not a personal estate or an event venue to be expanded at will. Any addition of this magnitude demands extraordinary restraint, rigorous preservation analysis, and full transparency. A project of this scale risks altering the historic character and precedent of a site that belongs to the American people — not to any single administration.

Equally troubling is the broader context. Even if funded with private dollars, this proposal reflects a troubling set of priorities. At a time when millions of Americans are struggling to afford housing, groceries, childcare, and healthcare, a massive ballroom expansion sends the wrong message. Leadership is not only about what is legally permissible — it is about what is symbolically responsible.

Private funding does not eliminate public consequence. Long-term maintenance, security adjustments, operational costs, and preservation impacts ultimately fall within the public sphere. The American people deserve clarity about necessity, cost, long-term obligations, and how this aligns with preservation standards.

The White House should be stewarded with humility, historical respect, and an awareness of the broader national climate. I urge serious reconsideration of this proposal.

East Wing Destruction Project, the physical example of ownership when in fact one is supposed to serve and protect. Our tax dollars were used without OUR PERMISSION to destroy our HOUSE. The temporary tenant has broken trust, the law, the historical history of the Peoples House. He alone should be fined, charged with a crime and pay all and any amounts for it's complete and total restoration. This vile act must be accounted for. It's current form is the true feeling our country has about what is being done to the rights of all citizens. ENOUGH.

To the Members of the Commission,
It is obvious that our current president, Donald Trump, craves recognition and attention using whatever means possible, whether through blatant lies or complete disregard of the laws that have been in put place by our fore fathers------just to feed his ego!! The destruction of the East Wing, a building that has stood over time, embedded with the rich history of our nation----our country-----to be blithely replaced with an oversized, gaudy ballroom is just plain disrespectful. No attempt to seek permission, approval, nor even input by the members of both houses, let alone the public, that the law requires!! The East Wing belongs to the People of our Nation and needs to be rebuilt in the exact image that it once was. And I recommend that Donald Trump pays in full for this rebuild!
Respectfully submitted and thank you for this opportunity, Carole McFarland

This project is an abomination, having already demolished the historic East Wing of 'The People's House' without any public consultation or adherence to planning, construction, or demolition standards. No asbestos remediation occurred, and site waste is being illegally dumped at inappropriate sites in both Washington and the surrounding area. The private benefactors funding this project are essentially providing bribes to gain and retain access to the Executive branch. The entire project is illegitimate and should cease immediately and the perpetrators should be subject to criminal inquiry

To whom it may concern,

This ballroom is a disgrace to our country. It is nothing more than a vanity project for Trump to try and leave a legacy despite all of his failures. Architecturally, the ballroom is hideous and does not compliment the construction of the White House. There is no justifiable need for millions of taxpayer dollars to go towards building this redundant ballroom when alternative function sites exist within a reasonable distance of the White House. When Trump illegally had the east wing demolished without approval, he ruined a national monument. I am unable to discern a single benefit this ballroom will have for the American people. I strongly oppose the East Wing "modernization" project--it should never have been initiated without securing the necessary permits, undergoing a design review, or obtaining authorization. The price tag of $300 million is an affront to taxpayers. Further, there is nothing remotely "modernizing" about this project--it doesn't honor our history; it simply

demolishes it. I believe the project should simply be canceled, and I would prefer to see the East Wing rebuilt as it was in a way which honors history. There is no urgent need for a private ballroom which serves to indulge the whim of one obscenely selfish man, who violated longstanding rules and statues, not to mention public trust, to satisfy a caprice. Penalties for those who broke these laws are in order. Please stop this project now.

Gentlemen,

I have reviewed the project materials for the East Wing and watched the video presentation by the architect and others. Although I understand the need for the entertainment space and the other functional areas included in the project, as a designer, I strongly feel that the scale is unacceptable.

The humongous size of the addition is out of proportion with the rest of the White House. This should not be taken lightly, as it will be a permanent change to the historic structure. It seems that the presenters emphasized that it will be partially hidden by trees in the summer from some vantage points. Not good enough.

I urge the NCPC to firmly reject the current plan for the East Wing, and ask for a new plan that is no larger than two-thirds of the current proposed size. That should include the height as well. This giant box should not be close to the height of the main White House structure.

Thank you. I appreciate your time and the opportunity to make this comment.

Best wishes to you all.

I oppose the spending of $300 million or more on this project, which was initiated without proper authorization, permits, or design review. This is not modernization — it is the destruction of American history. I further object to reports that the funding is being supplied by private individuals and corporations, raising serious concerns about legality, transparency, and violations of federal ethics and appropriations laws governing federal property. The White House is not privately owned, yet this proposal reflects the attitude that it belongs to Donald Trump personally, to be reshaped to satisfy his preferences. This effort appears driven less by any genuine need for a "larger meeting space" than by personal ego and

legacy-building. This project must be canceled and the East Wing rebuilt and restored to its former design. No one is above the law, and allowing this project to proceed — especially through questionable private funding — without accountability would be an affront to every law-abiding American.

As a 58 year old citizen of this country I have been horrified by the brazen destruction of the East Wing at the whim of a TEMPORARY occupant of The White House! The fact these actions were taken without approval and review and had to be forced to this point by courts of law is shameful and the damage that has been done cannot be made whole. That doesn't mean restitution a restoration shouldn't be attempted. We do not want nor do we need this monstrosity of a ballroom this administration has planned. No one asked for it and no one wants it. It needs to be halted completely AND the East Wing needs to be restored to its previous footprint and architecture. All persons involved in this destruction from POTUS down to the construction companies who actively destroyed this property need to be made to answer to the fullest extent the law allows.

I write in support of a formal event space at the White House (which I will refer to as "the ballroom"). I believe that for too long, hosting state dinners in tents has given the Republic a poor image to foreign dignitaries. This space would lend dignity and elegance to formal events. It would remove the need for the renting or storing of reception tents.

I believe that any planning should include other uses for that space. It could also be used for public events, such as Presidential Medal of Freedom presentations.

While I support the construction of a formal ballroom to the Executive Mansion, I urge that the eventual building stay in proportion to the current White House. This expansion cannot diminish the White House to where it becomes the dominant space. I also write in opposition to the ballroom carrying the name of any President. All Presidents are custodians of the White House, not owners.

I support the building of a ballroom which should be formally known as "the White House Ballroom".

I'm very disgusted with the East Wing of the White House being torn down with not so much as a "may I?" I'd like to see it restored to the way it was, with a few more square feet if the architects think it needs be. I hope Trump has to pay for it!!! It's too bad our taxes were used to tear it down!!

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

As a past partner with the Idaho State Preservation Architect I'm appalled at the lack of process that this event has followed. It seems to follow the idiom that "it's easier to ask for forgiveness than it is to ask for permission"! In the case of the White House it would certainly suggest that is exactly the case! It's one thing to go about making additions to the original edifice and a whole other to wipe away a third of the structure as if the use of it was not needed. I have heard nothing about where those uses are to be housed on the grounds as I understand some uses were for a First Ladies staff. If

they are not currently being used for such functions it begs the question why not! Not let’s get rid of the area because a current resident doesn’t utilize it for the intended purpose. Where the heck is DUE PROCESS!

We do not want the giant ballroom to replace the historic East Wing. In fact, we didn't want the East Wing torn down. This is wrong. This is rushed, and hopefully, it is illegal. There are many of us that agree that this project should NOT go forward. The size of the ballroom is also horrific.

Our country needs safe roads, bridges, and highways, paved with appropriate traffic signals, directional signs,and more. America doesn’t need a new ballroom or any updates to the Presidential residence.
Let’s invest in our COUNTRY, not in our leader’s quarters or “playgrounds.” At a time when infrastructure is often crumbling, let us remember that the United States is built on and for WE THE PEOPLE, not on the whims or desires of any single leader.

The destruction of the East Wing without having secured proper permits speaks for itself re the motivations of this administration. The White House is not the property of the President. Like so many other actions of this administration, the first move is to destroy. It is time for these actions to be held accountable and for proper legal procedures to be followed. The law applies to everyone residing in the United States. No exceptions.

As mentioned in your preface to this request for comment:

"The White House is a National Historic Landmark and National Park, owned by the American people and stewarded by the National Park Service. It has been home to our presidents since 1800 and is perhaps the most significant historic site in the United States. Before nationally significant places are permanently altered, the public deserves an opportunity to be heard and to help shape decisions that affect our shared national heritage. "

It is insulting that the President would unilaterally disregard the White House's status a National Historic Landmark and a National Park, as well as totally disregard the needs of its owner - the American people. It is an embarrassing personal status symbol of a President who is unfit for office and a betrayal of the American public. It would have been nice to give comment as you mention is legally required as part of the federal review process, before the entire wing was destroyed, but I suppose that is the usual of a president that puts himself and his own personal benefit before the public or their needs.

The project should not proceed. It is a national disgrace. Leave it as the wreckage it is - a far better symbol for the current political moment than a cheaply garish ballroom.

To the members of the commission:

I have been a resident of Washington since 2009. I was also an employee at the U.S. Department of Commerce Headquarters Building for eight years. My office was a block from the White House. I was fortunate to attend several meetings and events there while at the Commerce Department. Many years ago, as an 18-year-old, I came to the White House to receive an award as a Presidential Scholar. I am well aware of the importance of the building and its site to the many visitors to Washington.

All day, people stand at the fence and look at the iconic facade. They tell their children about our history. They take photographs. They carry protest signs. They are quiet, thinking of the momentous decisions that are being made there. The building embodies more than 225 years of our history, from the War of 1812 to the death of Abraham Lincoln to the first televised presidential speech by Harry Truman in 1947 to today. It is a powerful symbol worldwide of our democracy.

The destruction of the East Wing and subsequent plans for a ballroom addition violate the principles the U.S. was founded on. No permissions have been received. No funding has been authorized or appropriated by Congress. Billionaires have been invited to contribute without oversight. The proposed new wing will dwarf the existing White House and change the site completely. It is a travesty. I urge you to reject this proposal completely.

Thank you for considering my concerns.

Sincerely,
Laura Breeden

This project to drastically demolish and replace property owned by the United States of America was started without appropriate owner representative review and approval. Damage to the property was not communicated or approved by taxpayers in any form. All demolition and impacts need to be reversed, repaired and rebuilt in-kind at the cost of the party that initiated the work without proper authorization. The impacted party (United States Citizens) must not be held financially liable for this action or actions required to mitigate damage, both physical and financial. A third party needs to be hired to design and oversee historical restoration, at the cost of the party that initiated the work.

This is not how the United States of America operates. Not now, and not in the future.

I am a professional archaeologist in Pennsylvania who works in cultural resources management. This plan is an outrageous affront to historical buildings and the feeling, integrity, and setting of such an important PUBLIC building. Not only do I disagree with the use of public and private money funding such an outrageous project, I also object to the

deeply inappropriate size, plan, and use of a "ballroom" to the White House.
I urge others to not support such an inappropriate project. Not only is this administration completely failing to acknowledge, let alone follow, the legal process for such an undertaking, they also have not shown interest in the historical and PUBLIC nature of the building they are actively negatively impacting to approach any level of a "modernization" plan in a culturally sensitive way. PUBLIC COMMENT IN OPPOSITION
NCPC File No. 8733
Project Title: East Wing Modernization / White House State Ballroom
National Capital Planning Commission Review — March 5, 2026

Submitted by: Chuck Miller
[redacted]
Date: February 19, 2026

FORMAL STATEMENT OF OPPOSITION
I am writing to express my absolute and unequivocal opposition to the "East Wing Modernization" project (NCPC File No. 8733). As an American citizen who cares deeply about the preservation of our national heritage, the integrity of our democratic institutions, and the responsible stewardship of public property, I find this project to be a profound violation of the public trust. The estimated $300–$400 million expenditure, the lawless manner in which demolition was initiated, the firing of the independent review commission, and the ethically compromised funding mechanism all combine to create a project that is antithetical to the values this nation was founded upon.

This project must be cancelled immediately. All further construction must be halted. The East Wing must be restored to its historic design. The Jacqueline Kennedy Garden and all commemorative landscaping must be re-established. And the individuals responsible for bypassing federal law must be held accountable.
What follows is a comprehensive analysis of the legal, procedural, historical, architectural, environmental, ethical, and fiscal grounds on which this project must be rejected.

I. PROCEDURAL MALFEASANCE AND LEGAL VIOLATIONS
A. Demolition Before Review: A Fundamental Breach of Federal Law
The East Wing of the White House was demolished beginning October 20, 2025. The East Portico was destroyed first, followed by the progressive reduction of the entire East Wing to rubble between October 21–24. This demolition was carried out without prior notice to the National Capital Planning Commission, the Commission of Fine Arts, Congress, or the American public. No plans had been filed with the NCPC as required by the National Capital Planning Act. No environmental assessment had been prepared as required by the National Environmental Policy Act (NEPA). No public comment period had been offered.
This was the first major structural change to the White House complex since the Truman renovation of 1948–1952. The magnitude of this action — the total destruction of one-third of the White House complex — demanded the most rigorous review process available under federal law. Instead, it received none.
When the White House announced the project on July 31, 2025, it was described as a $200 million addition that would be "near" the East Wing "but not touching it" and would "pay total respect to the existing building." By October 22, the President contradicted this assurance entirely, stating that "in order to do it properly, we had to take down the existing structure." The American people were misled about the scope and nature of this project from its inception.

B. Circumvention of the National Capital Planning Act
The National Capital Planning Act requires that plans for construction on federal property in the District of Columbia be submitted to the NCPC for review and approval before construction begins. This is not a suggestion or a courtesy — it is

a legal mandate established by Congress to ensure that the architectural character and planning integrity of the nation's capital are preserved.

The administration demolished the East Wing and commenced construction of the ballroom foundation before submitting any plans to the NCPC. It was only after a federal judge ordered the administration to file plans — in the context of a lawsuit brought by the National Trust for Historic Preservation — that the NCPC received any formal submission. The NCPC's information presentation did not occur until January 8, 2026, nearly three months after demolition began.

To allow this project to proceed retroactively is to validate the principle that any administration can destroy a National Historic Landmark first and seek approval later. This sets a catastrophic precedent for every historic property, park, monument, and federal building in the United States.

C. Evasion of NEPA Environmental Review

The National Environmental Policy Act of 1969 requires federal agencies to evaluate the environmental impacts of their actions and to involve the public in the decision-making process. The NPS ultimately prepared an Environmental Assessment (EA) for this project — but only after a lawsuit forced the issue, and only after the demolition had already occurred.

The EA itself has been widely criticized as inadequate. The National Trust for Historic Preservation called it "facially deficient, internally contradictory, and plainly designed to support a predetermined conclusion." Former NPS Director Jon Jarvis stated that "several steps have been left out" and that the destruction of one-third of a National Historic Landmark "is by definition a significant impact" that should have triggered a full Environmental Impact Statement (EIS), not merely an EA.

The EA's own Finding of No Significant Impact (FONSI) contains a remarkable internal contradiction. It acknowledges that the project "will adversely alter the design, setting, and feeling of the White House and the grounds over the long-term," and that the 90,000-square-foot building "will dominate the eastern portion of the site, creating a visual imbalance." It further warns that construction vibrations "could affect the structural stability or finishes of the Executive Mansion and adjacent features." Yet it concludes there is "no significant impact." These findings are irreconcilable.

D. The Question of Congressional Authorization

Federal law requires that Congress authorize construction when it is proposed in any federal park in the District of Columbia. The White House grounds are administered by the National Park Service and fall squarely within this requirement. No congressional authorization has been sought or obtained for this project. The administration's argument that private funding negates the need for congressional involvement has no basis in the statutory text and, if accepted, would allow any administration to bypass Congress simply by soliciting private donations for construction on federal land.

E. The Section 106 Exemption and Its Implications

The National Historic Preservation Act's Section 106 review process requires federal agencies to assess the impact of their undertakings on historic properties and consult with relevant stakeholders, including the Advisory Council on Historic Preservation (ACHP) and the D.C. State Historic Preservation Office (SHPO). The White House, along with the U.S. Capitol and the Supreme Court, is technically exempt from Section 106. However, this exemption does not mean that the destruction of the East Wing was lawful or appropriate. It means that the existing legal framework has a gap — one that Congressman Jamie Raskin's "People's White House Historic Preservation Act" seeks to close by extending Section 106 jurisdiction to the White House and its grounds.

The fact that a legal exemption exists does not confer moral or civic legitimacy. The White House is the most recognizable symbol of American democracy in the world. That it falls outside the protection of the very law designed to preserve historic federal properties is a legislative oversight, not an invitation for destruction.

F. The Firing of the Commission of Fine Arts

On October 29, 2025 — just five days after the East Wing demolition was completed — the President terminated all six members of the Commission of Fine Arts. The fired commissioners were Bruce Redman Becker, Peter D. Cook, Lisa E. Delplace, William J. Lenihan, Justin Garrett Moore, and Vice Chair Hazel Ruth Edwards. They were removed via email from the Presidential Personnel Office, effective immediately.

The CFA is an independent federal agency charged with advising the President, Congress, and the city of Washington on matters of design and aesthetics. It was established by Congress in 1910 and has served as a guardian of the capital's architectural integrity for over a century. These commissioners were scheduled to review the ballroom plans. Their removal, and the administration's stated intention to replace them with members "more aligned with President Trump's America First Policies," represents an overt attempt to eliminate independent oversight of a presidential construction project.

On February 19, 2026, the reconstituted CFA — now composed of political appointees including a 26-year-old former White House receptionist — approved the ballroom design by a vote of 6–0. This was not an independent architectural review. It was a rubber stamp. The Commission limited public comment to written submissions shared "at the discretion

of the CFA chairman," a highly unusual restriction that further undermined public participation.

II. DESTRUCTION OF AMERICAN HISTORY AND CULTURAL HERITAGE

A. The Historical Significance of the East Wing

The term "modernization" is a misnomer of extraordinary proportions. What has occurred is the systematic destruction of an irreplaceable piece of American history. The East Wing was not some ancillary outbuilding — it was a central component of the White House complex with deep historical roots.

The East Colonnade was originally designed by Thomas Jefferson and architect Benjamin Henry Latrobe to connect the Executive Residence with the grounds' eastern service areas. Jefferson's colonnades were integral to his vision for the White House as a working estate, and they have linked the residence with the East and West Wings for over two centuries.

The modern East Wing was constructed in 1942 under President Franklin D. Roosevelt, designed by White House architect Lorenzo Winslow. It served a dual purpose: providing expanded office space and concealing the construction of the Presidential Emergency Operations Center (PEOC) — the underground bunker used during national security emergencies. The East Wing's family theater was integrated from Theodore Roosevelt's original coatroom, creating a space with connections to multiple presidencies.

For decades, the East Wing served as the office of the First Lady and her staff, including the White House Social Secretary, correspondence staff, and the White House Graphics and Calligraphy Office. First Lady Rosalynn Carter was the first to keep her own office there in 1977, establishing a tradition that every subsequent First Lady followed. The East Wing was a hub of social diplomacy and civic engagement — a working office space where the public's business was conducted.

All of this is now rubble.

B. The Jacqueline Kennedy Garden

The Jacqueline Kennedy Garden was one of the most beloved and historically significant landscapes on the White House grounds. Its origins trace to First Lady Edith Roosevelt, who established plantings on the east side of the residence. In 1913, First Lady Ellen Axson Wilson redesigned the space as the East Garden, featuring a modest central lily pond. This work was completed after Mrs. Wilson's death in 1914, making it a memorial in its own right.

The garden was formally redesigned in the early 1960s under the direction of First Lady Jacqueline Kennedy as part of her broader effort to restore the White House's artistic and cultural identity. It featured an I.M. Pei-designed pergola and served as an elegant outdoor venue for awards ceremonies, receptions, and cultural events hosted by first ladies of both parties for more than six decades. The garden was dedicated in honor of Jacqueline Kennedy in 1965.

Satellite imagery confirmed that by late October 2025, the Kennedy Garden had been completely torn up. Construction equipment and debris replaced the garden's trees, bushes, and the Pei pergola. This destruction was carried out without consulting the government commission established by federal law to ensure the preservation and integrity of government buildings in Washington, D.C.

C. Loss of Commemorative Trees

At least six trees that surrounded the East Wing were removed, including two historic Southern Magnolia trees originally dating to the 1940s. These magnolias were designated as commemorative trees for Presidents Warren G. Harding and Franklin D. Roosevelt. Commemorative trees on the White House grounds are living monuments to the presidencies they represent. Their removal was not a landscaping decision — it was an act of historical erasure.

While the White House Historical Association rushed to document photographs and obtain objects of historical value once they learned of the demolition plans, no representative of the U.S. National Park Service was able to confirm whether any of the plants or the pergola were being relocated. Documentation is not preservation. Photographs cannot replace living trees planted nearly a century ago.

D. Architectural Incompatibility and the Violation of the McMillan Plan

The proposed replacement structure is approximately 89,000–90,000 square feet — nearly double the 55,000-square-foot Executive Residence itself. The NPS's own assessment acknowledged that "the new building's larger footprint and height will dominate the eastern portion of the site, creating a visual imbalance with the more modestly scaled West Wing and Executive Mansion." Adding a second story to the East Colonnade would change "the traditional spatial organization and sightlines of the grounds."

This fundamentally alters the architectural balance that has defined the White House complex since the McMillan Plan of 1901–1902 and the original 1792 design by James Hoban. The McMillan Plan, created by architects Daniel H. Burnham and Charles F. McKim, landscape architect Frederick Law Olmsted Jr., and sculptor Augustus Saint-Gaudens, established the architectural and planning principles that continue to guide development in and around Washington, D.C. The White House's relationship to its surrounding landscape and the proportional balance between its wings and the central residence are integral to these principles.

DC Council Chairman Phil Mendelson, an ex-officio NCPC member, has called the renderings of the structure

"disturbing," stating that it appears to be "overwhelming the existing building." When the chairman of the DC Council describes the plans as disturbing, the Commission must take notice.
Out of respect for the White House's historic character, no substantive architectural changes had been made to the Executive Residence since the Truman renovation. The Committee for the Preservation of the White House, a congressionally authorized body, must approve any modifications to the State Rooms to maintain the house's historical integrity. This project did not seek or receive such approval before destroying one-third of the complex.

III. FISCAL IRRESPONSIBILITY AND ETHICAL CORRUPTION

A. The Ballooning Budget

When the project was announced on July 31, 2025, the cost was estimated at $200 million. By October 2025, it had risen to $300 million. By December 2025, reports indicated the cost may reach $400 million. This 100% cost escalation in less than six months — before the replacement structure has even risen above ground — raises serious questions about financial management, planning competence, and eventual total cost.
There is no public accounting for how these funds are being spent, no competitive bidding process has been disclosed, and no independent auditing mechanism is in place. The American people have no way to verify whether this money is being spent responsibly, because the entire funding mechanism has been designed to avoid oversight.

B. The "Private Donor" Model: Corruption by Design

The project is being funded through private donations channeled through the Trust for the National Mall, a nonprofit philanthropic partner of the National Park Service. The Trust has confirmed it receives a 2–2.5% management allocation from each donation, meaning it stands to collect $8–10 million in fees from the ballroom project alone. This is an organization whose previous work involved marshaling volunteers to paint park benches — it has never managed a project of this scale or political sensitivity.
The White House has released a list of 36 donors, including 21 corporations and 15 individuals and family foundations, but has not disclosed how much each has contributed. The New York Times reported that the White House initially withheld the names of several donors, including BlackRock, Nvidia, and Jeff Yass — entities with major business concerns that could be directly impacted by administration decisions.

C. Corporate Donors with Active Federal Business

A review of the known donor list reveals a staggering concentration of companies with active business before the federal government. Corporations such as Amazon, Apple, Meta, Microsoft, Nvidia, Comcast, Lockheed Martin, Palantir, T-Mobile, and Union Pacific Railroad all have antitrust matters, regulatory proceedings, federal contracts, or procurement interests pending before the Trump administration.
Several ballroom donors — including Alphabet, Amazon, Microsoft, Nvidia, and Palantir — are major technology companies that stand to benefit from the administration's AI Action Plan. According to reporting by OpenSecrets, some of these donors were directly involved in shaping that plan. When companies that help write federal technology policy also make large donations to a presidential construction project, the appearance of corruption is unavoidable.
Columbia Law School Professor Richard Briffault has warned that "there is a concern that when companies give to a favored project of the president, they're going to get more favorable treatment in decisions about grants, contracts and procurement, regulation, enforcement or non-enforcement of existing rules." This is not hypothetical — it is the defining feature of pay-to-play governance.

D. Lobbying Disclosure Failures

According to an analysis by Citizens for Responsibility and Ethics in Washington (CREW), at least 23 reported contributors to the White House ballroom should have disclosed those donations as part of their regular lobbying disclosure filings. Only one company — Vantive Healthcare — actually did so. Companies including Lockheed Martin, Palantir, and T-Mobile failed to disclose. This systematic nondisclosure suggests that donors and their counsel understood these contributions to be politically sensitive and sought to minimize their public visibility.

E. The Anti-Deficiency Act and Congressional Bypass

Ethics experts have raised serious concerns that the private funding mechanism violates the intent of the Anti-Deficiency Act, which restricts government agencies from accepting unauthorized funding commitments. Federal Judge Richard Leon, who presided over the initial legal challenge, described the funding scheme as a "Rube Goldberg contraption" and said he saw "no basis" in the legislative history of the Park Service's gift authority that would allow it to be used to raise $400 million for a presidential construction project.
By routing hundreds of millions of dollars through a nonprofit intermediary, the administration has constructed a mechanism to build on federal property without congressional appropriation, without competitive procurement, and without the budget oversight that the Anti-Deficiency Act was specifically designed to enforce. Senator Elizabeth Warren and Representative Robert Garcia introduced the "Stop Ballroom Bribery Act" to address the apparent corruption, and Democratic senators have warned of "quid-pro-quo arrangements in which large corporations get backroom favors from

the White House."
The Trust for the National Mall has largely evaded congressional inquiries into the project, refusing to provide documentation requested by Democratic senators. When the intermediary managing hundreds of millions of dollars in politically sensitive donations refuses to answer questions from Congress, the project has crossed the line from questionable to indefensible.

IV. THE NATIONAL SECURITY ARGUMENT IS PRETEXTUAL
The administration has invoked "national security implications" as a basis for continuing construction and opposing judicial intervention. Justice Department lawyers stated in a February 2, 2026 court filing that they would appeal any halt to the project on national security grounds. This argument is transparently pretextual.
The Presidential Emergency Operations Center (PEOC) bunker beneath the former East Wing was a legitimate national security installation. But a 22,000-square-foot ballroom designed to seat 1,000 guests for state dinners, complete with a grand staircase, movie theater, and commercial kitchen, is not a national security facility. It is a social venue. The conflation of bunker reconstruction with ballroom construction is a rhetorical strategy designed to shield a vanity project from legal scrutiny.
If the PEOC required modernization, that work could have been accomplished without demolishing the entire East Wing, without building a structure nearly double the size of the Executive Residence, and without bypassing every federal review process designed to protect the public interest. The national security argument is not a justification — it is a smokescreen.

V. THE PROFESSIONAL COMMUNITY'S OPPOSITION
The American Institute of Architects (AIA), the nation's leading professional organization for architects, has been unequivocal in its opposition to how this project has been conducted. The AIA's advocacy includes:

A. An August 5, 2025 formal letter to the Committee for the Preservation of the White House with five key recommendations, including qualifications-based architect selection, adherence to historic preservation standards, full transparency, proportionality to the existing complex, and meaningful professional collaboration.

B. An October 24, 2025 statement expressing "deep concern" that the demolition "stands in direct contradiction to earlier public assurances," calling for a halt to further irreversible alterations and the publication of full project documentation.

C. More than 6,000 letters sent by architects to their members of Congress demanding an investigation into the destruction of the East Wing.

D. Ethics complaints filed against the project's architects, including a letter from 13 AIA members to James McCrery of McCrery Architects and a letter from 29 architects urging Shalom Baranes Associates to decline the commission on ethical grounds.
When the nation's architects are filing ethics complaints against the professionals involved in a federal construction project, it is a clear signal that the project has violated fundamental principles of professional practice and public accountability.

VI. THE DANGEROUS PRECEDENT
The implications of allowing this project to proceed extend far beyond the White House grounds. If the NCPC approves this project retroactively, it establishes the following precedents:

Any federal agency or administration can demolish a National Historic Landmark and seek approval after the fact.
NEPA environmental review can be conducted after demolition is complete, rendering it a meaningless formality.
The NCPC's own authority is optional, not mandatory — agencies may bypass it and return for post-hoc validation.
Independent review commissions can be fired and replaced with political loyalists to ensure favorable outcomes.
Congressional authorization and budget oversight can be circumvented through private donor schemes.
Corporate entities can make large, undisclosed donations to presidential construction projects on federal land without triggering conflict-of-interest protections.

Every one of these precedents weakens the rule of law and the system of checks and balances that protects American public property. If this can be done to the White House — the most visible and symbolically important building in the country — it can be done to any federal building, any national park, any historic site.

VII. DEMANDS
Modernization does not require destruction. Security upgrades do not require a 22,000-square-foot ballroom. The People's House is not a private estate to be renovated at the whim of its temporary occupant. I respectfully but firmly demand that

the National Capital Planning Commission take the following actions:

Reject the Current Plans: Deny approval for the 90,000-square-foot ballroom and associated construction. The project's procedural violations alone are grounds for rejection, independent of its architectural and ethical deficiencies.
Mandate Immediate Construction Halt: Order the cessation of all construction activity on the site until lawful review processes are completed in full, including a proper Environmental Impact Statement and congressional authorization.
Require Reconstruction of the East Wing: Mandate the reconstruction of the East Wing and East Colonnade to their former architectural specifications, using historical documentation, photographs, and the records preserved by the White House Historical Association.

Restore the Jacqueline Kennedy Garden: Require the full re-establishment of the Jacqueline Kennedy Garden, including the I.M. Pei-designed pergola, and the replanting of commemorative trees as a matter of national priority.
Refer for Investigation: Refer the procedural violations in this matter to the appropriate congressional committees and enforcement bodies for investigation, including the unauthorized demolition, the absence of NEPA compliance, and the questionable legality of the private funding mechanism.

Require Full Financial Transparency: Demand the public disclosure of all donor identities, donation amounts, competitive bidding records, and financial accounting for every dollar spent on this project.

CONCLUSION
The White House belongs to the American people. It is held in trust by each President for the duration of their term, to be passed to the next occupant and the next generation in the condition they received it or better. No President has the right to demolish part of the White House complex, circumvent federal review processes, fire independent oversight commissions, solicit hundreds of millions of dollars from corporations with pending federal business, and then present the result to the public as a fait accompli.
The East Wing Modernization project is not modernization. It is demolition, self-aggrandizement, and institutional corruption, executed under the false pretense of national security and shielded from accountability by a funding mechanism designed to evade congressional oversight.

American history is not a real estate asset to be flipped or "modernized" at the whim of an individual. The laws that protect our shared heritage exist for a reason. The review processes that govern construction on federal property exist for a reason. The independent commissions that provide expert oversight exist for a reason. Every one of these safeguards was violated or circumvented in the execution of this project.

I call upon the National Capital Planning Commission to fulfill its statutory mandate, reject this project, and send a clear message: no one is above the law, and the People's House is not for sale.

Respectfully submitted,
Chuck Miller

The buildings belong to EVERY American, including the president. However, your ownership does not give you the right to destroy the building and build something for you. Please restore the building and ALL of its contents before your term in office ends. Keeping in mind that every president realizes his office is temporary and you must leave the People’s House and ALL of the People’s documents in the hands of those citizens who are gatekeepers.
Thank you.

I oppose the spending of $300 million on this project, which was initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing of American history. I want this project canceled, and the East Wing rebuilt and restored to its former design. No one is above the law and to permit this project to go ahead without penalizing those who broke the law would be an affront to all law-abiding Americans.

Please halt the construction of the proposed ballroom. The scale of the ballroom will eclipse the beauty of the existing structure of the White House. Due to the negligence in filing the correct permitting and approval, I believe those persons responsible should pay for the reconstruction of the East Wing as it was originally designed and how it stood prior to the demolition.

Thank you for opening for comment. The East Wing of the people's White House, which was demolished without planning, approval, or budget, must to be restored to its original footprint and dimensions at the direct cost of Mr. Donald J. Trump or his heirs.

No further public money or money solicited from "donors" should accrue to this plan.

The ballroom is a stupid idea, and the East Wing should be restored. All money already offered for the ballroom should go to restoring the East Wing, and it should get a plaque that reads, "Here is the restored East Wing, rebuilt after being destroyed by the worst president in U.S.A. history at the time, the embarrassing Donald J. Trump."

The White House is a stately, classic, historic building that belongs to the people. Its beauty is in its simple elegance and its history. It does not belong to this president or any other would be president. Donald Trump has no right to unilaterally destroy the East Wing or any other part of the White House. It is the People’s House not his house.
All the tacky, tasteless gold “adornments” he has added to the interior are offensive enough. Because of its enormous size, his planned ballroom will become the dominant feature of the White House. One can only imagine how tastelessly offensive his enormous ballroom will be.
The financial support for the construction of the Donald J. Trump ballroom will be from very wealthy donors who will surely expect something in return. Any changes to the White House would require approval. Donald Trump has chosen a board of “yes men” to give that approval. This all appears to be riddled with corruption.,
The sight of the destroyed East Wing is devastating. The plans for the huge ballroom are evidence of our current president’s malignant narcissism.

Dear colleagues,

I strongly oppose spending $300 million on the "East Wing Modernization Project" as envisioned by President Trump. Far from "modernizing" this historic space, this project as envisioned serves to promote the vanity of the current president who acted illegally to raze the building and impose his design. Of course, that damage is done, and funds must be spent on cleanup (because the site was demolished without adhering to good and proper demolition and hazmat procedures), design, and reconstruction. Since a project must move forward, I would recommend that THIS project be canceled, and a new project undertaken to rebuild a historically sensitive, updated and modernized version of the old East Wing. (I do not propose rebuilding to historically accurate standards - much has changed in the nearly 125 years since the wing was initially built, and I'm sure that an excellent design team could be found to envision a modern and functional version that reflects the gravitas and purpose of the original.)

I will admit that in all of this, I am most concerned about the precedent that would be set by moving forward with this project as President Trump has designed it - doing so suggests that any president may get their way by acting as though they are above the law and may willfully forge ahead and pretend to ask permission later. Good parents don't tolerate that behavior in children; we should not tolerate it in the elderly man serving as President. Rewarding someone who broke the law would be an affront to all law-abiding Americans.

Dear Sir/Madam,

I VEHEMENTLY oppose the spending of $300 million on this project initiated without the proper authorization, permits, or design review. It is not a modernization project but rather a complete razing and erasing of American history and vanity project. I demand this project canceled, and the East Wing be restored to its former design.

Absolutely no one is above the law and to permit this project to go ahead without penalizing those who broke the law is an affront to all law-abiding Americans.

Thank you.

Dear Madams and Sirs,
The demolition of the East Wing was shocking and remains horrifying. But I won’t go on about that.

Please in the name of all good and caring citizens do not allow the planned oversized monstrosity to be built. There is absolutely no call for a ballroom that accommodates 999 people. The lack of intimacy in a room that size does not serve our country.

I understand the need for more room, but any space accommodating more than 500 tops, the ability for people to connect goes out the door.

The information that the funding will be covered for the most part by private donors doesn’t give me a good feeling either. Who are these people and what favors will be expected?

Will the list of donors be published?

Respectfully,

Dear Commision Members ,
Based on today's FAC sham hearing
I suppose it's a waste of time to forward these comments . Nonetheless , I'll just add to Americas overwhelming lack of respect and support for this shameful vanity project by the Con Man. The proposed new structures are massively out of scale for the site and the historical setting . As if the destruction of the historic Rose Garden is not enough we now face the desecration of the entire site. While I urge you to put a stop to this insanity perpetrated by the felon I also realize that he's stacked the deck with gutless ass licking cronies who have zero respect for Americas voices . What shame you bring to what was once a professional ,respected oversight commission !

In most localities across our nation, you are required by law to openly present your project in order to obtain a building permit before any work begins. This may require further permit permissions and variances affecting local zoning ordinances, including historical impact and requirements, environmental impact, and there are more. Where I live, this would be illegal.
Let us not forget, this is The People's House! No single person owns The White House, No single administration owns The White House. Certainly, 'We the People' should have some sort of say in such a monumental change to this centerpiece of our Democracy.

The proposed size for the ballroom is much too big. It will dwarf the White House. Also the current President's personal affinity for a gaudy decor, as evidenced by the Oval Office and other areas of the White House, is as unacceptable for the ballroom as it is for the Oval Office. Please keep the building to an appropriate size and shape((90,000 sq ft is not appropriate or reasonable) in respect to the White House itself. Also please prevent the interior design from looking like a bordello as is currently the decor of the Oval Office.
Thank you

Not only no, but he'll no. The East Wing should never have been torn down. Where we go from here here should be controlled by Congress. Not one dime for Trump's vanity project. And we should particularly ban funding this project by bribery.
