

Delegated Action of the Executive Director

PROJECT Joint Base Anacostia-Bolling New Equipment Installation 370 Brookley Avenue, SW Washington, DC	NCPC FILE NUMBER 8752
	NCPC MAP FILE NUMBER 84.22(00.00)46173
REFERRED BY United States Department of Defense, Department of the Air Force	DETERMINATION Approve preliminary and final site and building plans
	REVIEW AUTHORITY Advisory Per Public Law 93-166, Section 610(a)

The United States Department of the Air Force has submitted preliminary and final site and building plans to install security-related sensors and new related sections of chain-link fence at Joint Base Anacostia-Bolling (JBAB). NCPC previously approved a related project (Project # 8397) in September 2022. The new sensors and fencing would be visible from nearby on-base vantage points; however, the new equipment would not be seen outside of the base, and the installations are compatible with the site's land use and similar to the previous installations. Therefore, staff finds the project is generally consistent with relevant policies from the *Comprehensive Plan for the National Capital*.

The Air Force satisfied its environmental review responsibility under the National Environmental Policy Act (NEPA) using a checklist that documents only marginal impacts from the project. In addition, the applicant has satisfied its review responsibility for the project under Section 106 of the National Historic Preservation Act with a "no adverse" effect finding. Pursuant to Public Law 93-166, Section 610(a), NCPC does not have formal Section 106 or NEPA review responsibilities for projects at Joint Base Anacostia-Bolling.

The submission states that the Air Force is undertaking separate coordination with JBAB tenants, the Federal Aviation Administration, U.S. Commission of Fine Arts, and the District Department of Energy and Environment (DOEE).

* * *

Pursuant to delegations of authority adopted by the Commission on March 6, 2025 and per 40 U.S.C. § 8722(b)(1), I approve the preliminary and final site and building plans to install new security-related sensors and fencing at Joint Base Anacostia-Bolling in Washington, DC.

Marcel Acosta
Executive Director
